Welcome to Bellingham Technical College!

First and foremost, know that Bellingham Technical College exists to serve you. Our goal is to help you fulfill your dreams and reach a better place in your life. This educational quest is a partnership formed of your hard work and effort and our experience and expertise. Together, we can truly transform your life.

Bellingham Technical College prides itself on providing the finest in educational programming and top-notch services to aid you in this quest. Every year we conduct a survey of our current students to learn what they think of the education and services we provide. One of the questions we ask is, “Would you recommend BTC to potential students?” Ninety-five percent of the students said “yes.” When we ask employers if they are satisfied with our graduates and would hire more BTC students, 96% said “yes.” Currently, job placement rates for the majority of our programs average between 90% and 100%. These numbers speak for themselves and are strong testimony to the quality that is Bellingham Technical College and the education we provide.

Bellingham Technical College has achieved such positive results for several reasons. First, we are a community of students, faculty, and staff engaged in the purposeful pursuit of learning. We form close-knit teams of students and faculty in our programs, most students graduating with the same classmates with whom they began. Second, we have a solid group of experienced professionals in our Student Services division who strive to provide the finest quality support possible. Third, we work diligently with area employers and businesses to make sure our programs and courses are current, our equipment up to the quality standards of the industry, and we know what future trends are emerging. Fourth, although we are growing rapidly, our faculty and staff have been able to maintain the one-to-one attention that is the hallmark and advantage of a small campus.

Our goal is your success, now and in the future. So, welcome again to Bellingham Technical College. Your career starts here!

Tom Eckert, Ed.D.
President

LIMITS OF CATALOG
Bellingham Technical College reserves the option to amend, modify, or revise any provision of this catalog and its programs for any
reason, including but not limited to:
• A lack of funds to operate a program or course
• Unavailability of faculty
• A change in administrative or Board of Trustees policy
• A change in laws, rules, or regulations of the State of Washington which governs the operation of technical colleges.
HOW TO FIND OUR CAMPUS

(For current information, visit us on the web at: www.btc.ctc.edu)

From I-5: Take Exit 258 (airport exit), follow the signs-Left off the exit, left onto Bennett Drive, left onto Marine Drive, left onto Lindbergh Ave. For College Services Bldg., turn left onto Nome St.

From Downtown Bellingham: Follow Holly St. to Eldridge Ave. After the stone bridge, (watch for sign) turn right onto Nequalicum Ave. For College Services Bldg., go straight onto Nome St.

From Guide Meridian: At the end of Guide Meridian, turn right on Broadway. Right onto Eldridge Ave. After the stone bridge (watch for the sign), turn right onto Nequalicum Ave. For College Services Bldg., go straight onto Nome St.

Instructional sites are easily accessible to students using wheelchairs or crutches. Building M and Fisheries Technology are not barrier-free. Disabled students who wish to take a class at a site which does not accommodate their disability should contact the Career Center.

About our College

Curriculum subject to change. For current information, visit us on the web at: www.btc.ctc.edu
ABOUT OUR COLLEGE

BTC History
Bellingham Technical College began in 1957, serving Whatcom County adults as Bellingham Vocational Technical Institute and was operated by Bellingham School District. In 1991, through State legislative action, the institution was designated a member of the Washington State Community and Technical College system as Bellingham Technical College (BTC). The College is located in a district of 2,210 square miles with a population of over 174,000. The majority of students are local, with a growing number moving to the area to enroll at BTC.

About our Students
In the 2007-2008 academic year, the College served over 8,100 students. In fall 2007, the student body was 52% female and 48% male, with 22% minority students, and the average student age was 28 years old. BTC served over 2,170 full-time equivalent students during the 2007-2008 academic year.

Accreditation Process
Bellingham Technical College is accredited by Northwest Commission on Colleges and Universities, 8060 165th Avenue N.E., Suite 100, Redmond, Washington 98052-3981. The Commission is an institutional accrediting body recognized by the Council for Higher Education Accreditation and the U.S. Department of Education.

In addition to institutional accreditation, many of BTC’s programs have national certification or accreditation. These are highlighted in the program descriptions and include Dental Assisting, Culinary Arts, EMT-Paramedic, and Automotive Technology, Diesel Technology, and Surgery Technology.

Advisory Committees
The degree & certificate programs at Bellingham Technical College rely on the involvement and support of over 300 business and industry employers and employees from the community. Advice and direction offered by experts in the working world ensure that students are acquiring the knowledge and skills that are in demand in the workforce.

An advisory committee representing each specific professional technical field meets regularly with the faculty of the same instructional area on matters of curriculum review and development, facilities and equipment, guidance and career advisement, employment opportunities and placement, plus public relations and promotional activities.

Drug Free Workplace
BTC intends to promote a drug free, healthful, safe and secure work environment. The unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited in or on property owned or controlled by Bellingham Technical College. The use of any unlawful controlled substance while in or on property owned or controlled by BTC is prohibited. No employee will report to work while under the influence of any unlawful controlled substance. A controlled substance is defined by RCW 69.50.201 through RCW 69.50.214 or pursuant to Title 21 USC Section 821 (Schedules I-IV), as now enacted or subsequently amended. Violation of this policy by any employee may result in a referral for mandatory evaluation or treatment for a substance abuse disorder. Disciplinary action up to and including dismissal from employment may be imposed.

BTC recognizes drug dependency to be an illness and major health problem. The institution also classifies drug usage and abuse as a potential safety and security problem. Employees needing assistance in dealing with such problems are strongly encouraged to utilize the Employee Assistance Program provided by health insurance plans, when appropriate.

Equal Opportunity Statement
BTC provides equal opportunity in education and employment, and does not discriminate on the basis of race, ethnicity, creed, color, sex, national origin, age, marital status, religious preference, the presence of any sensory, mental, or physical disability, reliance on public assistance, sexual orientation, status as a disabled person or Vietnam-era veteran, or political opinions or affiliations. The College complies with all Washington State antidiscrimination laws (RCW 49.60) and the following federal laws relating to equal opportunity: Title VI and VII of the Civil Rights Act of 1964, Title IX of the Educational Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA). Questions regarding Title IX, Section 504, equal opportunity, affirmative action, or the ADA should be directed to Human Resources, Building A Room 2, 360.752.8354 or 752.8515/TTY.
STRATEGIC PLAN

Vision
To be a recognized leader in providing innovative and effective technical education, creating options for career success, and developing a competitive workforce.

Values
As a learning community, Bellingham Technical College is committed to educational excellence realized through a positive, values-based campus environment. To realize BTC’s mission and vision, the college will adhere to the following values:

STUDENT SUCCESS
Promote Instruction, activities, and an environment to enable student success.

INCLUSIVENESS
Create a welcoming respectful campus.

LEADERSHIP
Support Instruction in current and emerging workforce skills. Structure learning that embraces, adapts to, and fosters change.

OPPORTUNITY
Provide seamless educational opportunities. Improve the quality of life for students and employees.

PARTNERSHIP
Contribute to a sustainable regional economy. Create mutual value for students, the College, and the community.

ACCOUNTABILITY
Foster a results-oriented culture. Demonstrate ethical decision-making and stewardship of public and private resources.

Mission
To deliver superior professional technical education for today’s needs and tomorrow’s opportunities.

Goals

ACCESS
BTC will increase student access to seamless, educational pathways.

MARKETING & RESOURCE DEVELOPMENT
BTC will broaden resources and community support to ensure the college’s growth and viability.

STUDENT SUCCESS
BTC will increase students’ goal achievement by providing activities and opportunities for learning, growth, and leadership.

EXCELLENCE & INNOVATION
BTC will support and promote excellence and innovation throughout the College.

PARTNERSHIPS
BTC will maintain and develop effective partnerships that enrich the communities we serve.

WELCOMING CAMPUS ENVIRONMENT
BTC will create and maintain an attractive and inclusive campus environment that promotes a sense of community, respect for individuals, and effective work and learning.

ACCOUNTABILITY
BTC will demonstrate to its constituents the effective, efficient, ethical, and strategic use of all resources.
BTC FOUNDATION

The mission of the Foundation is to enhance student success by securing gifts that support student scholarships, faculty and staff development, and capital projects or campaigns. The Foundation achieves this mission through fundraising and friend-raising activities and events with individuals, businesses, alumni, grant-making institutions and other community organizations.

Established in 1987 as a nonprofit, tax-exempt organization, the Bellingham Technical College Foundation (BCTF) is governed by a volunteer board of directors. Early on, the Foundation’s primary function was to serve as a conduit for scholarship awards and gifts of in-kind equipment. Since 1997, when staff was first hired, the BTC Foundation has played an increasingly important role in helping Bellingham Technical College reach its goals.

The Foundation Board has set ambitious goals for the 2008-2010 calendar years. These include raising $300,000 for annual scholarships; $600,000 for endowed scholarships and $1 million for President Eckert’s Access to Education Initiative. Likewise, the Board continues to expand its’ size in order to achieve its fundraising goals.

If you or someone you know wants to make a gift to the Foundation, you can do so online through the Foundation link at www.btc.ctc.edu, or by calling 360-752-8464. The Foundation accepts gifts of stock and equipment and offers the flexibility of making pledged gifts over time. Moreover, if you are interested in making a bequest to the College or setting up a charitable remainder trust, please contact the Foundation’s Executive Director at 360-752-8378.

BTC transforms lives. The Foundation is privileged to be able to work on behalf of the College and to champion student success. We thank each one of our donors, business and corporate partners for their confidence in our work, our faculty and our students.

Enrollment Services

ADMISSION & ENROLLMENT

In all other programs, students must apply for program admission and register in the degree/certificate program. Students may register for full-time or part-time based on personal preference, availability of space, and/or specific program offerings. Most courses within the program will be offered at various times throughout the program as scheduled by the instructor. In some programs, specific courses required for a degree/certificate may only be offered in certain quarters. Students should consult a BTC counselor, advisor, and/or faculty advisor to assist in determining the best schedule option to meet their needs.

Students are registered in a program rather than in individual courses. Full-time students enroll in a minimum of 12 credits; part-time students enroll in a minimum of 6 credits. Full-time students generally attend class six hours per day, five days per week.

Specific program information is defined in the sequence & schedule section on the program pages of this catalog.

PROGRAM ADMISSION PROCEDURE
New students may be admitted into degree/certificate programs at the beginning of each quarter. Some programs have established entry dates or multiple start dates throughout the year.

Applications for program admission are accepted at any time. Applicants seeking program admission are encouraged to meet with an advisor or counselor to discuss specific plans prior to completing the application process. To meet with an advisor and receive program & schedule information, contact the Admissions & Advising Office at 360.752.8345. To meet with a counselor if you need assistance deciding on a program, contact the Counseling and Career Center at 360.752.8450.

1. Complete the Degree/Certificate Program Admissions Application and submit it to the Registration Department with the $36.90 ($46.90 for Practical Nursing, Radiologic Technology, and Surgery Technology) application fee. The application will be kept on file for a period of one year beyond the date of application. After that time, applicants must reapply and pay the application fee. Application materials can be obtained through Admissions & Advising at 360.752.8345.

2. Take the basic academic skills assessment (Accuplacer test), or equivalent assessment test, and achieve required scores for the specific program or college coursework as defined below. If the placement scores are below the level identified for the specific program, the student will meet with an advisor to identify an individual plan of study. Appointments for the Accuplacer tests can be made through Admissions & Advising at 360.752.8345.

   a) An applicant seeking program admission, who has completed a minimum of three (3) credits for a course in English or mathematics with a "C" (2.0) grade or above, which at that college is deemed a prerequisite for a course equivalent to the BTC course in which the student wishes to place, may have the Accuplacer assessment requirement waived upon evaluation of an official transcript from a regionally accredited college or university and completion of the Accuplacer Waiver Request form. Requests for evaluation of transcripts for Accuplacer waiver can be made to the Admissions & Advising Office.

   b) Applicants who have taken college basic skills assessments (i.e. ASSET, COMPASS, SAT, etc.) at other accredited colleges or universities may request evaluation of the official scores for equivalency to the Accuplacer. Requests for basic skills assessment equivalency may be made to Admissions & Advising.

   c) Certain programs require higher placement in general education requirements in reading and mathematics.

      • Students interested in programs that require Precalculus I (MATH 141), such as Civil and Mechanical Engineering, Process Technology, Instrumentation, Electronics, Electro-Mechanical, and Surveying & Mapping, or Math in Society (MATH 107), must test into Elementary algebra at a minimum for acceptance. Students are strongly encouraged to take any necessary preparatory math coursework such as Elementary Algebra (MATH 098) or Intermediate Algebra (MATH 099) prior to beginning their program sequence.

3. Some programs have additional admissions requirements, which may include but are not limited to:

   • Prerequisite course requirements
   • Criminal background check
   • Evidence of high school completion or equivalent

Please view program description pages for additional details.

Applicants seeking advanced placement admission should follow the procedures listed in this catalog.

ADMISSION & ENROLLMENT POLICY: In accordance with WAC 131-12-010, any applicant to Bellingham Technical College seeking admission or enrollment shall be accepted on a space available basis when, as determined by the President or designee, such applicant

1. Is competent to profit from the curricular offerings of the College (for degree/certificate programs, attainment of identified scores in reading comprehension and in arithmetic or algebra on the Accuplacer or equivalent test is required), and

2. Would not, by his or her presence or conduct, create a disruptive atmosphere within the College inconsistent with the purposes of the institution, and

3. Is eighteen (18) years or older OR is a high school graduate OR has applied for program admission under the Local Enrollment Option.

LOCAL ENROLLMENT OPTION: Bellingham Technical College will admit students to degree/certificate programs and courses

1. Who are sixteen (16) years of age or older, and

2. Who meet the requirements of Section 1 and Section 2 above, and

3. Who are not currently enrolled in high school, or who are currently enrolled high school students, have written approval (if required) from their sending high school to enroll, and agree to pay all regular tuition and fees.

(See Underage Admission or Enrollment Appeal listed below.)
ADMISSION & ENROLLMENT POLICY APPEAL PROCEDURE: Persons who have been denied admission or enrollment may appeal the decision. The appeal should be directed, in writing, to the Vice President of Student Services. Such written petition must include, at a minimum, the reasons that support reconsideration of the application or the policy. Any appeal to the Admission & Enrollment Policy must be reviewed and approved by the College President or designee. Persons may further appeal the decision of the Vice President by requesting an Admission Appeal Hearing.

UNDERAGE ADMISSION OR ENROLLMENT APPEAL: The College does not desire to replace or duplicate the functions of the local public and private schools. Persons who do not meet the regular admission and enrollment standards and who are under sixteen (16) years of age may appeal for special admission to degree/certificate programs or short term courses. Requests for consideration of an underage admission or permission to register in a course must be submitted to the Vice President of Student Services, in writing, at least one week prior to the start date or registration date. Written request must include evidence that
1. The student is competent at an appropriate academic level and/or technical skill level, and
2. The student demonstrates the ability to participate in an adult learning environment.
(See also Local Enrollment Option listed above.)

DEGREE/CERTIFICATE PROGRAM RE-ADMISSION POLICY: Students seeking re-admission to degree/certificate programs may return to the same program at priority placement for a negotiated re-entry date, one time only. Re-admitted students will be enrolled on a space available basis and will be required to re-submit a Degree/Certificate Program Admissions Application (and submit the application fee if one year has passed) and meet any new program admissions requirements. This may include repeating the Accuplacer Placement test to meet current program level requirements. Health program students will be enrolled on a space available basis into the same cohort that the student exited from.

Students seeking program readmission who have not officially withdrawn or who are seeking program admission in a different degree/certificate program must complete the BTC application process including meeting all program admissions requirements at the time of application for enrollment. Students will be placed on the bottom of the program ready list and will receive a registration appointment in the order that they applied.

ASSESSMENTS & TESTING
PLACEMENT TESTING: Bellingham Technical College is interested in the success of each student seeking enrollment. We know that student success in individual degree/certificate programs and in subsequent employment is closely related to abilities to read and compute. For this reason, acceptance into specific degree/certificate programs is determined in part by students’ demonstration that their reading and mathematics competencies are at the level identified for program success. All students seeking enrollment in specific programs must achieve required scores in reading and mathematics. The College uses the College Board’s Accuplacer test for basic academic skills assessment. Requirement for Accuplacer testing may be waived upon evaluation of official transcripts from a regionally accredited college or university. Request for evaluation for Accuplacer waiver should be made to Admissions & Advising.

The Accuplacer is available at scheduled times through the Assessment Center. Appointments are required and can be made through the Admissions & Advising Office at 360.752.8345. Students may take any portion of the Accuplacer test a maximum of three times within a 12 month period. Students must present picture identification when they report for testing.

NEW STUDENT ORIENTATION
New Student Orientation is conducted at the beginning of each quarter. Students will receive information about programs and services intended to help students succeed at BTC. Information about College standards and policies is covered. New students will have an opportunity for a campus tour and to meet with current students. Contact Admissions & Advising at 360.752.8345 for dates and times.

INTERNATIONAL STUDENTS
International students must demonstrate competency in English and math and complete all other admissions processes before their program application will be activated and placed on the selected training program waitlist. Taking the TOEFL and attaining a score of 470 or greater may accomplish the reading portion of the assessment requirement. International students may be able to take this test through the U.S. consulate or embassy in their country. In addition to this, students must meet admission requirements for the selected college program and the college.

Some programs have prerequisite requirements in math, English, computer skills and the sciences that must be met before the student’s program application will be placed on an individual program wait list. Prerequisite requirements for each program are listed on the BTC web page, www.btc.ctc.edu, or contact Admissions & Advising for program information. An official transcript must accompany any request for acceptance of prerequisite credit or advanced placement to a program from the college or university attended. If the college or university is located outside the United States, the class and credits will need to be evaluated by an independent credit evaluation service and the individual program Dean at Bellingham Technical College. Several of these services are listed below. Do not send a program application with the application fee until you have met these requirements. Bellingham Technical College cannot issue an I-20 student visa for students to come to the college for placement testing.

INDEPENDENT CREDIT EVALUATION SERVICES
American Association of Collegiate Registrars
www.aacrao.org

World Education Services
www.wes.org

Foundation for International Students
19015 N Creek Parkway, Suite 103
Bothel, WA 98011-8019
COURSE REGISTRATION PROCEDURE
Students may select and register for a variety of courses intended for employment training, retraining or upgrading, as well as personal enrichment and business & professional development as listed in the quarterly schedule. It is not necessary to apply for admission in order to register for BTC courses listed in the quarterly schedule.

REGISTRATION
A student is considered officially enrolled in a course or program by registering and paying all tuition and fees. The student has the responsibility for completion of the registration form and payment of tuition and fees each quarter. Registration dates for new and continuing degree/certificate program students are assigned and students are notified prior to each registration period. All degree/certificate program tuition and fees must be paid on the due dates specified in the fee notices. Students will be withdrawn from programs if tuition and fees are not paid when due.

CHANGES IN PROGRAM SCHEDULE
Degree/certificate program students may request a change in schedule (add or drop credits), with instructor approval, by completing a Change of Program Credits Request form or an Add/Drop form and submitting the completed form to the Registration & Enrollment Office. A reduction in credits is subject to the refund policy. Refer to the college calendar for specific program withdrawal and schedule change dates for each quarter. Students may change their schedule at quarterly registration on a space available basis and according to the program's part- or full-time schedule.

WITHDRAWAL POLICY
Students may officially withdraw from the college by submitting a completed Add/Drop form to the Registration & Enrollment Office. All applicants should obtain a copy of the current tuition and fee schedule at the time of application and before payment is due. It is important that students attend all scheduled class times or notify the instructor of any absences.

1. If a student is absent for 10 consecutive days without instructor notification, the student may be withdrawn from class.
2. Students absent for 5 consecutive days during the first week of the program are considered a “no show” and may be withdrawn. It is the student’s responsibility to determine if he/she has been withdrawn by the College for non-attendance.

WITHDRAWAL PROCEDURE
1. Students should meet with their instructor to discuss plans for withdrawal and potential plans for return. If appropriate, the student may also meet with a counselor to develop a plan for future enrollment.
2. Students must submit and process their withdrawal through the Registration & Enrollment Office to be official and to receive a refund, if eligible. Students receiving financial aid should contact the Financial Aid Office to give notification of intent to withdraw.
3. Refunds for payments made by cash or check will be processed through the Business Office and mailed within three weeks. Credit card refunds are processed within 24 hours.

Running Start
APPLICATION PROCESS
Students currently enrolled as juniors or seniors in high school and who demonstrate the ability to benefit from college course work, may take courses leading to a degree/certificate at BTC high school as well as college credit. There is no application fee or tuition required, but students must pay any consumable program fees and submit a signed Running Start Referral Form when registering each quarter. Running Start is not available during Summer Quarter.

Students needing program information, guidance, or counseling in completing this process should schedule an appointment with the BTC Running Start advisor at 360.752.8459.

To apply for enrollment in Running Start, the student must:
1. Meet with a high school counselor to determine a plan for study. The student is responsible for notifying the school district through which the student seeks to obtain the award of running start program high school credit of the specific courses he or she intends to take and shall request confirmation of the amount of high school credit that will be awarded upon successful completion of the courses (WAC 392-169-050);
2. Take the basic academic skills assessment (Accuplacer test) in the Assessment Center, College Services Building, or at student's high school if applicable. Running Start students must achieve program level scores to be eligible to participate in the Running Start program. High school students may not enroll in remedial or pre-college courses at BTC through the Running Start program. Students whose scores are below the level identified for the program they have selected should meet with a BTC counselor or advisor for planning;
3. Complete the Degree/Certificate Program Admissions Application form and submit it to the Registration & Enrollment Office, indicating Running Start student;
4. Receive a registration appointment. Submit signed Running Start Referral Form and BTC registration form at the assigned time for registration. Pay all consumable fees by the due date indicated; and
5. Attend New Student Orientation.

Tuition & Fees
All tuition and fees must be paid by the due date for the enrollment period. The College evaluates and adjusts the tuition and fees annually to conform with state legislative regulations and program/course costs. Adjustments in tuition and fees become effective at the time they are implemented. Because changes may be made during the academic year, an up-to-date listing of tuition and fees for any program is available from the Admissions and the Registration Offices. All applicants should obtain a copy of the current tuition and fee schedule at the time of application and before payment is due.
OTHER FEES
Application Fee ................................................................. $36.90
Application Fee for Practical Nursing, Surgery Technology, and Radiologic Technology ................................................................. $46.90
Student Body Card .............................................................. $7.00
Replacement Student Body Card ........................................... $5.00
Official Transcript .............................................................. $4.00
(no cost for unofficial copy - available on website)
Replacement Degree/Certificate (per copy) ................................. $4.00

REFUND POLICY
Students who leave a course or program without official withdrawal will forfeit all claims to the refund of tuition and fees. Official withdrawal will be defined as student submission to the Registration & Enrollment Office of a completed Add/Drop form. The refund will be calculated based on the date the form is submitted rather than the last day of attendance. In accordance with RCW 28B.15.623, the college may extend the refund period for students with medical reasons or those called into military service of the United States. Written documentation must be provided for consideration of exception.

Refunds for payments made by cash or check will be processed through the Business Office and mailed within 3 weeks.

Refunds for payments made by credit card will be processed within 24 business hours.

SELF-SUPPORT & NON-CERTIFICATE/NON-DEGREE PROGRAM COURSES

REFUND POLICY: 100% refund if official withdrawal is submitted one day prior to 1st instructional day.

There are NO refunds on or after the 1st instructional day.

DISTANCE EDUCATION/ONLINE REFUND POLICY: 100% refund if official withdrawal is submitted through the 5th calendar day.

40% refund if official withdrawal is submitted between the 6th calendar day and 20th calendar day.

There is NO refund on or after the 21st calendar day.

PROGRAM & CREDIT COURSE REFUND POLICY: 100% refund if official withdrawal is submitted through the 5th instructional day.

40% refund if official withdrawal is submitted between the 6th instructional day and 20th calendar day.

There is NO refund on or after the 21st calendar day.

SUMMER REFUND POLICY: 100% refund if official withdrawal is submitted through the 3rd instructional day.

40% refund if official withdrawal is submitted between the 4th instructional day and 10th calendar day.

There is NO refund on or after the 11th calendar day.

EXCEPTIONS TO THE REFUND POLICY: In accordance with RCW 28B.15.623, the college may extend the refund period for students with medical reasons or those called into military service of the United States. Request for exceptions to the refund policy must be in writing with documentation for consideration of exception included.

Tax Credit Information

Note: The following information is general and is not for tax advice related to any taxpayer’s particular situation. Please contact your tax advisor or IRS for questions or assistance.

Beginning January 1, 1998, the IRS introduced two new tax credits, the HOPE Credit and the Lifetime Learning Credit (education credits). The HOPE credit may be claimed for the qualified tuition and related expenses of each student in the taxpayer’s family who is enrolled at least half-time in one of the first two years of postsecondary education and who is enrolled in a program leading to an undergraduate degree or other recognized educational credential. The maximum credit a taxpayer may claim for a taxable year for out-of-pocket expenses for each student’s qualified tuition and related expenses is $1,650 multiplied by the number of students in the family who meet the enrollment criteria described above. Read Chapter 2 of Publication 960 Tax Benefits for Education (http://www.irs.gov/pub/irs-pdf/p970.pdf) for complete information on eligibility and application for HOPE credit.

The Lifetime Learning Credit may be claimed for out-of-pocket qualified tuition and related expenses of the students in the taxpayer’s family (i.e., the taxpayer, the taxpayer’s spouse, or an eligible dependent) who are enrolled in eligible educational institutions. The maximum credit a taxpayer may claim for a taxable year is $2,000. Read Chapter 3 of Publication 960 Tax Benefits for Education (http://www.irs.gov/pub/irs-pdf/p970.pdf) for complete information on eligibility and application for HOPE credit.

At the end of each tax year, students will receive a 1098T form from BTC that will list out-of-pocket tuition expenses. The 1098T is for information only. To claim the tax credit, students must obtain a copy of the IRS form 8863.
## Estimated Quarterly Program Costs 2008-2009

Tuition & Fee Estimates are based on Resident Status, 21 credits unless otherwise specified. Canadian Tuition is 35% higher. Online courses require an additional fee of $55 per course. TUITION & FEES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

### Special Notices

- **TUITION & FEES ARE SUBJECT TO CHANGE WITHOUT NOTICE.**
- **RUNNING START** Students pay FEES only. Running Start Referral Form required.
- **CANADIAN** tuition is 35% higher than US Resident tuition.
- **NON-RESIDENT** is defined as students who are residents of countries other than U.S. or Canada.
- **PROGRAM & COURSE FEES** address distinct and specified costs such as lab assistants, supplies, materials, equipment, rentals, software licensing, replacement and upgrade, maintenance, and other operational costs.
- **FINANCIAL AID** is available through BTC Student Financial Services. Tuition & Fees are the responsibility of the Student. Students eligible for Financial Aid must contact the BTC Financial Aid Office to be sure file is complete.
- **CLASS CANCELLATIONS** may occur due to low enrollment. Full Refunds will be granted if BTC cancels a course.
- **REFUND POLICY:** Students in Programs/Credit Courses needing to drop or withdraw from courses, PLEASE REFER to the BTC REFUND POLICY printed in the Bellingham Technical College Catalog and Quarterly Schedule.
- **MISSION STATEMENT:** Bellingham Technical College delivers superior professional technical education for today's needs and tomorrow's opportunities.
- **AFFIRMATIVE ACTION:** Bellingham Technical College provides equal opportunity in education, employment and access to all persons. Inquiries regarding compliance with access, equal opportunity and/or grievance procedures should be directed to Human Resources in A2, at (360) 752-8354 or 752-8515 (TTY).
Financial Aid Programs

PURPOSE OF FINANCIAL AID
For many students and families, the cost of attending college is too great to manage alone. For this reason, the BTC Student Financial Resources Office is available to assist eligible students in obtaining financial aid so they may achieve their educational and career goals. There are many types of financial aid available, including grants, loans, scholarships, work study, and other agency funding.

Financial aid can be used to pay tuition, fees, books, supplies, and some living expenses.

To be sure that you receive the money you are eligible for, it is best to plan ahead. The financial aid process can take up to three months.

We encourage you to contact our office for assistance with the financial aid process. Please stop by the Student Financial Resources Office or call 360-752-8351.

ELIGIBILITY REQUIREMENTS
To receive financial aid, students must:

• Submit the Free Application For Federal Student Aid (FAFSA) and other paperwork that may be requested by the Student Financial Resources Office

• Be a United States citizen or an eligible non-citizen

• Have a High School Diploma, GED, or pass the Ability to Benefit test offered through BTC’s Assessment Center

• Not owe a repayment on any grant, be in default on any student loan, or have borrowed in excess of the loan limits under Title IV programs at any school

• Be registered with Selective Service, if required

• Be accepted for enrollment as a regular student in an eligible program of study and meet all admission requirements

• Students who have received a bachelor’s degree are ineligible for Federal Pell Grants or FSEOG or State Need Grants, but may be eligible for other federal student aid programs

• Students attending two schools in the same enrollment period must inform both financial aid offices. Students cannot receive Federal Financial Aid at both schools

• Conviction of drug distribution or possession may render a student ineligible for financial aid.

DETERMINING FINANCIAL AID AWARDS
The awarding of Financial Aid takes into account three major elements. First, there is the Student Budget, an estimate of what it will cost you to attend school. This budget includes direct educational costs, such as tuition, fees, and books, as well as an estimate of living expenses, such as room and board, personal expenses, and transportation.

Next, there is the Estimated Family Contribution (EFC), which is a figure calculated by the Federal Processors when you submit your FASFA for processing. This EFC is what your family can contribute toward your education based on a formula established by Congress. Financial Need is simply your Student Budget minus your EFC. Your financial need is what BTC will attempt to award you with a combination of financial aid funds.

APPLICATION FOR FINANCIAL AID
To apply for financial aid, you will need to complete the following steps. Applying for financial aid is always free.

1. Apply for a PIN at www.pin.ed.gov. You will receive your PIN by e-mail in 2-3 days or by mail in 7-10 days. If you are a dependent student, your parent will also need to apply for a PIN. If you are unsure if you are a dependent student, contact the BTC Financial Aid Office or refer to Step Three on the FAFSA.

3. Review your Student Aid Report, which will be mailed to you by the U.S. Department of Education after they process your FAFSA. Make corrections if needed.

4. Submit any additional paperwork including documentation that is requested by the BTC Student Financial Resources Office. When these steps are complete, the BTC Student Financial Resources Office will determine which types of financial aid you are eligible for and notify you by mail.

The U.S. Department of Education has a toll-free number you can use to check the processing status of your student aid applications (1.800.433.3243). Applicants can also use this automated system to request duplicate copies of the Student Aid Report.

AVAILABLE PROGRAMS
The two basic types of Financial Aid are gift aid and self-help aid. Gift aid does not need to be repaid, as long as the student maintains Satisfactory Academic Progress. Self-help includes Work Study and Stafford Loans.

GIFT AID
Academic Competitiveness Grant (ACG)
BTC Grant
Federal Pell Grant
Scholarships
State Need Grant
Supplemental Educational Opportunity Grant (SEOG)

SELF-HELP AID
Work Study—Students who demonstrate financial need, as reported on the Student Aid Report, and who are enrolled for at least six (6) credits may apply. If eligible, students must complete a Work Study Application and paperwork necessary for employment in the State of Washington.

Stafford Loans—Students may borrow a Stafford Loan to help meet the costs of attending BTC. Stafford Loans must be repaid at a future date after the student is no longer attending school. To apply for a Stafford Loan, students must complete the FAFSA and any additional paperwork requested by the Financial Aid Office. There is no credit check required but any loan borrowed and payment history will appear on your credit report.

OTHER AVAILABLE FINANCIAL AID
Scholarships—Scholarships are available throughout the academic year. The Student Financial Resources Office has applications for BTC scholarships (available in Spring Quarter), and information on other scholarship sources.

Veterans Benefits—Veterans who wish to use their VA benefits for educational costs should contact the Veterans coordinator in the
Other Agency Assistance - BTC encourages applicants to check into eligibility for funding assistance from other agencies. Students may be eligible for additional funding to supplement their Federal financial aid package. Some of the funding that may be available is listed below. Information about agency funding is available in off-campus offices and at the Student Financial Resources office in the BTC Student Services Building.

Off-Campus Funding
- Division of Vocational Rehabilitation (DVR)
- Employment Security
- Labor and Industries (L&I)
- Northwest Workforce Development Council (NWDC)
- Tribal Funding

ATTENDANCE
Financial aid awards are based upon the academic load for which a student is enrolled each quarter. Most financial aid awards will be based upon whether a student is enrolled full-time (12 or more credits), three-quarter time (9, 10, or 11 credits) or half-time (6, 7 or 8 credits).

Financial aid award distributions are made each quarter in advance of the student actually earning their awards. Thus awards are normally made assuming that the student will be enrolled for a full-time academic load. If a student either enrolls for less than 12 credits or drops one or more classes, which lowers their academic to less than full-time, their financial aid awards will be adjusted and the student will be required to return the portion of their aid.

Students are required to start attending their classes and have their instructor document this attendance before distribution of financial aid. Thus awards are normally made assuming that the student will be enrolled for a full-time academic load. If a student either enrolls for less than 12 credits or drops one or more classes, which lowers their academic to less than full-time, their financial aid awards will be adjusted and the student will be required to return the portion of their aid.

Financial aid awards are based upon the academic load for which a student is enrolled each quarter. Most financial aid awards will be based upon whether a student is enrolled full-time (12 or more credits), three-quarter time (9, 10, or 11 credits) or half-time (6, 7 or 8 credits).

If a student either enrolls for less than 12 credits or drops one or more classes, which lowers their academic to less than full-time, their financial aid awards will be adjusted and the student will be required to return the portion of their aid.

Loan Entrance Interview—If you are interested in participating in the student loan program, stop by the Student Financial Resources Office to pick up information on applying. You will receive information on how to complete your Loan Entrance Interview. You will learn of your rights and responsibilities as a student borrower. After completing the Entrance Interview you will apply for the loan itself from a lender who participates in the Stafford Loan program. Most lenders have an online loan application process. The BTC Student Financial Resources Office has a list of lenders who have agreed to process Stafford loans for BTC students. You are not required to use any of the lenders on this list, and BTC does not receive any financial remuneration from lenders on this list.

OMBUDSMAN
The Office of the Ombudsman at the Department of Education responds to inquiries regarding financial aid.
Contact the Ombudsman:
2. Telephone, toll free 877.557.2575;
3. Mail,
   U.S. Department of Education
   FSA Ombudsman
   830 First Street, NE
   Fourth Floor
   Washington, DC 20202-5144

RETURN OF TITLE IV FUNDS
Financial aid recipients who withdraw from school or stop attending classes may be required to repay all or part of the financial aid that was received for the current quarter. Recipients may also be required to repay all or a portion of tuition and fees to BTC.

SATISFACTORY ACADEMIC PROGRESS
Students who receive financial aid at Bellingham Technical College are required to make satisfactory academic progress in order to maintain financial aid eligibility. Satisfactory progress is defined as maintaining a minimum 2.0 cumulative grade point average and completion of a minimum of 67% of the enrolled course work each quarter. Individual degree/certificate programs may require a higher level grades in a program or individual course requirements in defining satisfactory progress. These requirements will be published and made available to student upon enrollment.

A student who does not meet these minimum standards will be placed on Financial Aid Probation for the following quarter. During this quarter the student will still be eligible to receive financial aid. However, if the student once again fails to meet the Satisfactory Academic Standards the student will be place on Financial Aid Suspension and all aid for that quarter will be cancelled.

FINANCIAL AID APPEALS
Students who are on Financial Aid Suspension may petition the Financial Aid Appeals Committee for reinstatement of financial aid eligibility. This process is accomplished by writing a letter of appeal addressed to the Financial Aid Appeals Committee and submitted to the Student Financial Resources Office.

The Appeals Committee will be convened and the student will have the opportunity to present his or her petition. The Appeals Committee will then discuss the merits of the student’s petition and make a decision.

ESTIMATED COST OF ATTENDANCE
The following budgets have been recommended by the Washington Financial Aid Association and approved by the Student Financial Resources Office of Bellingham Technical College for the 2008-2009 academic year. These are provided as a guide to estimate the cost to attend BTC for a nine month period (September through June).

Foundation Scholarships

Bellingham Technical College Foundation offers over 80 different scholarship programs to new and/or returning students each year in degree programs and continuing education courses. Students needing financial assistance for continuing education courses complete the specific scholarship application available at the Registration and Enrollment Office.

Who may apply for degree program scholarships?

2007 high school graduates planning to enroll at BTC plus new or returning students enrolled at BTC during the 2007/2008 academic year.

How do I apply for degree program scholarships?

Students must complete the BTC Foundation Scholarship Application to be considered for the scholarships. Unless otherwise noted, there is only one application period and students must submit a completed application by the application deadline to be eligible. Scholarship applications are available at:

BTC Student Financial Resources Office,
BTC Foundation Office, or
Online at:
www.btcfound.org

Tech Prep

Tech Prep is a college preparatory program that offers high school students an opportunity to earn college credit for approved high school courses. Working together, high school and college instructors have determined that certain high school career and technical education courses meet the entry level course requirements of comparable college courses. These courses are identified as Tech Prep approved. Students enrolled in these courses may be eligible to receive BTC credit through the schools' articulation agreements with the college.

Students who complete approved high school College Tech Prep courses with a grade of “B” or better may request college credit by completing and submitting a Dual Credit application form. Registration instructions are available in the career and counseling centers at each area high school. All college Tech Prep courses accepted for credit at BTC will be transcripted with the grade earned in the student's high school course. Courses are only transcripted within the academic year the student completes the course work.

Award of articulated credits through BTC does not guarantee or imply acceptance of such credits by other institutions. For more information, contact the BTC Tech Prep coordinator via email at techprep@btc.ctc.edu or visit Whatcom County's Tech Prep web site at www.whatcomtechprep.org

Veterans Benefits

Bellingham Technical College offers degree and certificate programs approved by the Washington State Approving Agency for the enrollment of those students eligible under Veteran Administration Education Benefit programs. Eligible veterans or dependents of veterans must apply for admission to the college and should contact the college veterans coordinator as early as possible before enrolling.

The veterans coordinator is located within the Student Financial Resources office. Contact the coordinator at veteransaffairs@btc.ctc.edu

The veterans coordinator will certify students quarterly enrollment with VA. Eligible students can be certified only for courses that apply to the declared degree or certificate program. All veteran benefit recipients are required to report program changes, quarterly credit hour changes, and changes to marital and family status to BTC’s VA benefit office.

Veteran benefit recipients are required to maintain academic progress according to the College’s policy. Failure to comply with VA regulations may result in termination from the VA benefit program.

Worker Retraining Program

The Worker Retraining program is designed to help unemployed workers in a variety of situations. The Worker Retraining program may provide assistance for you if you have been laid off or if you have received a layoff notice; you currently receive or are eligible to receive unemployment benefits; you have exhausted unemployment benefits within the last two years; you are a displaced homemaker; you were self-employed but are now unemployed due to economic conditions in our community; or you are a veteran having been honorably discharged within the past 2 years.

Bellingham Technical College can assist eligible students with an opportunity to upgrade skills with one-quarter classes, or with the first quarter of a full or part-time program. Financial assistance with living expenses may be available if a qualified student’s unemployment benefits expire while the student is in training.

To find out more, please contact the Bellingham Technical College Worker Retraining Coordinator at 360.752.8492.

WorkFirst

WorkFirst is part of the Washington State Welfare-to-Work program and provides free tuition, books, and fees for qualified men and women as funding permits.

You may qualify if you are a WorkFirst parent who is receiving a TANF cash grant and who is working 20 or more hours a week; or if you are a low-income parent whose household income is less than 175% of the federal poverty level and you are not receiving any other financial assistance sufficient to pay all of the tuition, books, and fees.

Receiving WorkFirst funding requires that the student have a career plan that includes development of basic skills, better employability skills, or a new career, in order to progress in wages.

Anyone inquiring about eligibility for this program should call the Bellingham Technical College WorkFirst advisors at 360.752.8461 (located in College Services Building, Room 100).

Advising & Counseling
It is the goal of BTC advisors and counselors to facilitate access, retention, and success in workforce training and education by assisting students in overcoming barriers to success and in planning, monitoring, and managing their own learning while pursuing career and personal development.

Services available to students include
- New student orientation
- Basic academic skills assessment
- Career & occupational counseling and advising
- Degree/Certificate program information & planning
- Personal counseling
- Referral to community resources
- Single parent/displaced homemaker services
- Disability support services
- Career and job placement services
- Running Start
- Career/vocational assessments

Career Planning Assessments: Interest, aptitude, and other similar tests are administered by staff in the Counseling and Career Center. Students should make an appointment to arrange testing at 360.752.8450.

GED TESTING: GED testing is conducted in the Assessment Center at scheduled times. There is one fee for the entire test battery of $75 and a fee of $10 for each retest. Please contact Admissions & Advising at 360.752.8345 for more information or to schedule testing. Students must present state or federal issued picture ID each time they report for testing. Candidates must be at least 16 years of age. At the time of testing, those less than 19 years of age must bring a completed Request for Approval to Test form signed by the designated employee at their current high school of residence. This form is available at each high school. Registration one day in advance is required for testing. 100% of the GED testing fee will be refunded, upon written request, prior to taking any tests within the GED battery. No refunds are offered for remaining tests once a student has taken any test in the battery. A retesting fee must be paid prior to retaking any individual tests. GED Transcript Fee is $4.00. Persons needing testing accommodations should meet with the BTC Disability Support Services Coordinator in advance, 360.752.8367. Persons interested in preparation for GED testing should contact the BTC Learning Center at 360.752.8341.

DISABILITY SUPPORT SERVICES: Bellingham Technical College is committed to ensuring facility, program, and activities access to students with either permanent or temporary physical, sensory, or psychological disabilities through a variety of services and equipment. The Disability Support Services (DSS) Office, located in the Counseling and Career Center, coordinates accommodations for enrolled students with documented disabilities. Accommodations are determined on a case-by-case basis. DSS also provides needs assessment, mediation, referrals, and advocacy as necessary and appropriate. Requests for accommodations or services must be arranged in advance and require documentation of the disability, verifying the need for such accommodation or service. Requests for accommodations cannot alter the essential abilities required to perform an activity or program occupation. Additional information is available by calling 360.752.8367 (Voice); 360.752.8515 (TTY).

SINGLE PARENT/DISPLACED HOMEMAKER SERVICES: Bellingham Technical College has support services for single parents and displaced homemakers. This includes counseling and community resource referral and may include limited funds for assistance with transportation, childcare, uniforms, and tools. Contact Student Financial Resources at 360-752-8351 for funding assistance or the Counseling and Career Center at 360-752-8450 to schedule an appointment with a counselor.

TUTORING SERVICES: Bellingham Technical College provides a daily drop-in Tutoring Center during all quarters. Tutors are recruited in all subjects where tutoring assistance is requested. Additional individual tutoring may be arranged if the drop-in tutoring is not sufficient and requires instructor approval. There is no charge for tutoring services. Contact the Tutoring Center for tutoring availability at 360-752-8499 or stop by Building A, Room 8. Individual tutoring, if appropriate, may also be arranged for students with disabilities. Contact the Counseling and Career Center for individual tutoring offered through Disability Support Services. Individual tutoring by appointment is also available through the Instructional Assistant located in the Learning Center.

CAREER SERVICES: Career and job placement services are available to students and graduates of Bellingham Technical College through the Counseling and Career Center. The types of services included are resume and cover letter development, critique or mock interviews, and job searching—all of which are provided on an appointment basis. Contact the Counseling and Career Center at 360.752.8450 to make an appointment.

The Counseling and Career Center coordinates targeted career and employment fairs that are held in the winter and spring quarters. Contact the Counseling and Career Center for those dates.

Associated Student Government
The Associated Students of Bellingham Technical College (ASBTC) provides an opportunity for students to develop leadership skills and to take an active role in issues affecting students and the campus community. In an effort to promote student leadership opportunities and to further promote the development of students at Bellingham Technical College, the ASBTC is encouraged and supported by the faculty, staff, administration, and Board of Trustees of the College.

The goals of the ASBTC are to
- Provide a means of self-governance for the students of BTC;
- Promote the educational, cultural, and social welfare of the students of BTC;
- Guarantee an equal opportunity for student participation and representation; and
- Foster cooperation among students, faculty, administration, and the community.

Membership is open to all persons currently enrolled in degree/certificate programs at BTC. The Student Council consists of representatives and alternates elected from each degree/certificate program. The duties of the program representatives are to represent their programs in all matters coming before the Council, to report Council activities to their respective programs, to serve on Council committees, and to set an example of school spirit, leadership, and citizenship. The Student Council is governed by an Executive Committee. Students interested in participating in the Student Council should contact the ASBTC at 360.752.8337.
Basic Academic Skills
The mission of the Basic Academic Skills program is to prepare students for lifelong success by facilitating basic academic learning and workplace behaviors and attitudes.

LEARNING CENTER: The Basic Academic Skills Program offers:
- Adult Basic Education (ABE) including reading, writing, and math
- GED preparation
- Study Skills/Accuplacer preparation
- English as a Second Language (ESL)
- Basic computer skills
- I-BEST programs

Adults who seek Basic Academic Skills classes should contact the Learning Center, Building C, Room 2/3 (360-752-8341) for information. The Learning Center hours are Monday through Friday from 8 a.m. to 4:30 p.m. and Monday through Thursday from 6:00 p.m. to 9:00 p.m. Most classes are offered in the morning (8-11am), afternoon (12-3), and evening (6-9). See the Quarterly Schedule for details.

Basic Academic Skills Program is open to adults who meet these requirements for adult basic education:
- Completion of basic academic skills assessment (CASAS)
- Participation in orientation sessions
- Commitment to regular attendance
- Ability to participate positively in an adult learning environment
- 16 years or older and not enrolled in a K-12 school
- 16-18 year olds must submit “Request for Approval to Test GED Certificate” signed by high school representative

Bookstore
The BTC Bookstore is located on the north side of campus overlooking the student parking lot. It provides for purchase of required textbooks and supplies for degree/certificate programs and courses. Additionally, the bookstore carries a variety of other goods, including office supplies, software, flash drives, calculators, book bags, BTC apparel and other emblem items, as well as coffee, soda, pastries, candy, and other snacks. Services include a student-accessible photocopying machine, outgoing fax service, phone and special orders. Students receiving financial aid checks from BTC must pay for books and supplies at the time of purchase. The bookstore does not cash financial aid or other two-party checks. Visa, MasterCard, most debit cards and personal checks with identification are accepted.

Diversity / Multicultural Support Services
Diversity / Multicultural Support Services assists students with diverse cultural, ethnic, abilities, gender, and language of origin to access, pursue, and attain success in achieving their educational goals. Consistent with the college mission, Diversity / Multicultural Support Services has the mission to provide and promote an environment for a diverse population that is safe, accessible, and conducive to learning and that freely allows students to pursue and achieve their academic and occupational endeavors. Students seeking assistance should contact the Director of Multi-Cultural and Student Support Services at 360.752.8377.

Food Service
Food service is available in Building G offering espresso and coffee service with fresh baked goods and limited breakfast/lunch items starting at 7:30 a.m. Monday-Friday. The Building G Cafeteria opens at 11:00 a.m. on weekdays with a selection of hot entrees, a large variety of hot and cold sandwiches, pizza, salad bar and other specialty favorites. The Food Service department also provides catering for meetings and college events. Conference/meeting rooms are available; for booking please call the Food Service department.

The Culinary Arts program operates the Café Culinaire restaurant, open to the public at selected times throughout the year.

Vending machines are located in the College Services Building, Bldgs. C and J, Haskell Center, Morse Center, and the Mcardle Center. Snack items can also be purchased in the campus bookstore.

Insurance
Voluntary student accident and health insurance is available for purchase by students enrolled at Bellingham Technical College. Students may also enroll in the Washington Basic Health plan, which has a sliding scale cost based on income. Students in degree/ certificate programs that require work with machinery, and who do not have personal accident insurance, are encouraged to purchase the student insurance as BTC does not cover students with medical or accident insurance. Insurance forms are available in the Counseling & Career Center.

Library
Bellingham Technical College Library, which is located in A Building, functions as a technical information resource for BTC students, faculty, staff and the local community. Its collections focus on technical and professional information to support BTC’s degree and certificate programs, and includes books, journals, CD, DVDs, videos and software. The library’s homepage, http://www.btc.ctc.edu/Library includes a web-based catalog, full-text online journal and ebook databases, and access to local area library collections.

The library’s Information Commons houses BTC’s only open computer lab. 34 computer workstations provide Internet access, Microsoft Office applications, and a variety of specialized software programs to support learning.

The library is a Wi-Fi hotspot for students with personal laptops or for those who check out a library laptop. Other resources available through the library include study rooms for quiet and group study, a copy machine, media viewing stations, as well as video and digital cameras and portable flashdrives.

The BTC Library has a reciprocal borrowing agreement with all Washington community and technical colleges. Students may borrow materials from any of the participating libraries, including Whatcom Community College, Skagit Valley College, Western Washington University, and Northwest Indian College. To access national and international library resources, ask about interlibrary loan.
BTC students, faculty and staff the community are encouraged to use the many resources of the Bellingham Technical College Library for research, projects, and collaborative and independent learning. Tours of the Library and instruction in the use of its resources are given to classes on request. Library staff members are always available to help you with your research, information, and technology questions. For more information call: 360.752.8383 or email: library@btc.ctc.edu

**Parking**
Visitor parking is located in front of the College Services Building at the east end of campus.

Student parking is provided in two student parking lots, located north of the campus buildings. The parking lots are accessible from the intersections of Nome Street and West Illinois and Nome Street and West Maryland. There is no cost to the student for this parking.

The entire upper level of the college campus is designated as restricted parking and is NOT available for student use. The upper level area is reserved for faculty, staff, program permits, visitor, carpool, and handicapped parking.

Students who require use of handicap parking will need a handicap parking permit. Contact the Whatcom County Auditor (360.676.6740) for information on obtaining a permit. For information on handicap parking spaces at BTC, please contact 360.752.8468.

Information on carpool parking spaces can be obtained at 360.752.8468.

The following situations will be subject to vehicle towing at the owner’s expense:

- Any vehicle that receives three “Warning! Parking Violation” tickets will be subject to towing ($150) when the third violation is issued.
- Any vehicle parked in a fire lane or in handicapped parking without a handicap parking permit will be immediately subject to towing and a parking citation by the Bellingham Police Department.
- Violations may also be forwarded to the Vice President of Student Services for disciplinary action.

Cars or other vehicles not displaying an appropriate and current permit will be subject to towing at the owner’s expense. Vehicles left overnight or through the weekend on College property may be subject to towing. The College assumes no liability for vehicles parked in the campus parking lots.

**Phi Theta Kappa**
Bellingham Technical College is pleased to offer membership in Phi Theta Kappa to students who exhibit academic excellence in associate degree programs. Phi Theta Kappa is the international honor society of the two-year college, which purpose is to recognize and encourage scholarship among associate degree students. BTC’s Beta Lambda Beta chapter of Phi Theta Kappa was chartered in 2002.

Invitation to membership is extended by the chapter to students without advanced degrees who have completed at least twelve credits of course work leading to an associate degree in which they have a grade point average of 3.5. Students pay a membership fee and are given access to on-line services and activities provided by Phi Theta Kappa.

Phi Theta Kappa provides opportunities for the development of leadership and service through chapter involvement and community service projects.

Information on Phi Theta Kappa is available in the Counseling & Career Center.

**Program Services for the Public**
Many of the College’s degree/certificate programs provide services or repairs for staff, students, and the general public, if the work needed applies to the training of students in the program and does not negatively impact community private enterprise. Services include automotive, appliance, and electronic repair, as well as others.

The BTC Dental Clinic is open to the public and welcomes new patients September through June. Dental care is provided by a licensed dentist from the community and dental assisting students under the direction of a certified faculty member. The clinic provides low cost dental care on a cash-only basis. Contact the clinic at 360.752.8349 for an appointment.

**Academic Requirements**

**DEGREE/CERTIFICATE PROGRAMS**

The Associate in Applied Science (AAS) degree is awarded for completion of a comprehensive program of study in professional technical education designed to prepare graduates for technician level employment. Programs leading to the AAS degree are 90 or more credits in length.

A certificate of completion is awarded for successful completion of an approved course of study totaling less than 90 credits within a program of professional technical education.

Students may elect to graduate under the provisions of the catalog in force either at the time of entry or at the time of completion, providing four (4) years have not lapsed and the student has remained continuously enrolled in the program. Students needing longer than four years to complete a given degree or certificate will be subject to any updated completion requirements.

The College provides assistance through faculty advisors, counselors, and the college catalog, in determining if the requirements for graduation have been met. However, the final responsibility for meeting all completion requirements rests with the student. Students have the responsibility of verifying specific completion requirements with their faculty advisor.

**GENERAL COMPLETION REQUIREMENTS**

1. Complete, with a passing grade, all technical and general education courses as listed on the program pages defining requirements for individual degrees/certificates. Some degree/certificate programs may require minimum grades in required courses. See Program pages 8 through 60.

2. Complete the Application for Degree or Certificate for each degree or certificate requested and submit to the Registration and Enrollment Office.

3. Meet all financial obligations to the college.

4. Earn a cumulative grade point average of 2.0 or above in the required program courses. Individual programs may require a higher grade point average.

5. Complete the last 50% of the required course work at BTC.

**GENERAL EDUCATION REQUIREMENTS**

General education courses are included in the programs to prepare students with communication, computation, and interpersonal skills required for success. All candidates for degrees and certificate options of one year (45 credits) or longer in length must satisfy the requirements for general education in communications, psychology, and mathematics.

These requirements will be satisfied by completing COM 170 Oral and Written Communications (5 credits) or ENGL& 101 English Composition (5 credits); and PSYC& 100 General Psychology (5 credits) or PSYC 111 Interpersonal & Organizational Psychology (5 credits); and MATH 100 Occupational Math (5 credits), MATH& 107 Math in Society (5 credits), or MATH 141 Pre-Calculus I (5 credits); or equivalent courses included within the program requirements.

Requirements for individual degrees/certificates are listed on the program pages of this catalog. The most current catalog information is located on the BTC website. Appropriate safety, industrial safety, leadership and environmental awareness instruction are included in the specific degree and certificate program requirements.

Challenge of some general education courses is permitted. Students must be registered in the course to be eligible to challenge. Successful challenge of courses will be transcripted with a CR grade. Challenge procedure directions are available in the BTC Admissions or Registration offices or from the general education course instructor.

**INTERPRETATION OF GRADE SYMBOLS**

**A (4.0) EXCELLENCE IN ACHIEVEMENT OF COMPETENCY**
In relation to the standards set for the course, the student has done an exceptionally high level of work and has achieved all competencies.

**B (3.0) ABOVE AVERAGE ACHIEVEMENT OF COMPETENCY**
In relation to the standards set for the course, the student has significantly exceeded the average and has achieved all competencies.

**C (2.0) AVERAGE ACHIEVEMENT OF COMPETENCY**
In relation to the standards set for the course, the student accomplished an average level of work and, at a minimum, has achieved all competencies.

**D (1.0) BELOW AVERAGE ACHIEVEMENT OF COMPETENCY**
In relation to the standards set for the course, the student did not do average work and did not meet the minimum level competencies.

**F (0.0) FAILURE TO ACHIEVE MINIMUM COMPETENCY**
Failed to progress toward minimum competencies and performed at exceptionally low level of skill. Student must repeat degree/certificate program course requirements in which an F grade has been earned.

**R - REPEAT**
Indicates the course has been repeated. Only the highest grade will compute in the cumulative GPA. This indicator appears after the letter grade of the lowest grade.
Academic Standards & Progress

**Academic Achievement**

**ACADEMIC AWARDS**

**DEAN’S LIST** - Students who carried a 12-credit load or more in graded courses and who earned a quarterly grade point average of 3.75 or higher are placed on the Dean’s List for the quarter.

**PRESIDENT’S LIST** - Awarded to each full-time student enrolled in a degree/certificate program with a cumulative grade point average of 3.75 or higher at the completion of all degree/certificate requirements. Full-time is defined as being enrolled for a minimum of 12 credits per quarter. Awarded only upon completion and noted on the student’s transcript.

**CERTIFICATE OF MERIT** - Full- or part-time degree/certificate program students who demonstrate academic and/or program excellence in their program may be awarded the Certificate of Merit at program completion by the program faculty. It is awarded at the discretion of the program faculty, only upon completion.

**Academic Standards & Progress**

**ACADEMIC PROGRESS**

The primary objective of Bellingham Technical College is to prepare an educated workforce. In educating students, Bellingham Technical College stresses equally the development of technical skills, communication and interpersonal skills, positive work habits, and attitudes that are required for employment. In light of this, Bellingham Technical College expects that students demonstrate academic achievement.

In 2003, the Legislature of the State of Washington established a law requiring colleges to develop policies “to ensure that undergraduate students complete degree and certificate programs in a timely manner in order to make the most efficient use of instructional resources and provide capacity within the institution for additional students.”

**ACADEMIC STANDARDS/CREDIT COMPLETION POLICY**

Students who wish to graduate and receive a degree or certificate must earn a cumulative grade point average of 2.0 or better in the program course requirements for the specific degree or certificate.

In order to demonstrate satisfactory progress,

1. All students will maintain regular attendance for each enrollment period.

This standard will be reflected in the grading policy within each degree/certificate program. BTC believes that attendance is a critical workplace competency and is important to overall student success.

2. All students will demonstrate satisfactory progress toward meeting program objectives.

This standard is defined as maintaining a quarterly grade point average minimum of 2.0 and completing a minimum of 67% of the enrolled quarterly course work competencies.

* Individual programs may require higher level grades in program requirements.

Curriculum subject to change. For current information, visit us on the web at: www.btc.ctc.edu
or individual course requirements in defining satisfactory progress. These requirements will be published and made available to students upon enrollment in the program.

ACADEMIC ALERT/PROBATION/SUSPENSION/READMISSION
Students who do not demonstrate satisfactory progress, as defined above, will be placed on academic alert. Students who do not demonstrate satisfactory progress for the following quarter will be placed on academic probation. Students will be suspended after three consecutive quarters of unsatisfactory progress.

Students who have been suspended as a result of unsatisfactory academic progress may petition for readmission. The suspended student must meet with a counselor to complete a plan for improvement. The Academic Probation Readmission Plan form can be obtained from the Counseling & Career Center. Once completed, the plan will need to be signed by the student’s instructor, and submitted to the Appeals Committee for consideration of approval. All students readmitted following suspension will remain on academic probation for one quarter.

Privacy of Records
Releasing of Information
FERPA

Bellingham Technical College policy on privacy of records and releasing of information follows the directives outlined in the Family Educational Rights and Privacy Act (FERPA), the federal law governing the protection of educational records. Registered students will be notified of this policy on an annual basis. Others can find the policy in the Bellingham Technical College catalog.

Personally identifiable information will not be released from an education record without the prior written consent of the student, unless an exception has been granted by FERPA (see Exceptions Under FERPA section below).

RIGHTS UNDER FERPA
FERPA affords students certain rights with respect to their education records:

(1) The right to inspect and review the student’s education records within forty-five (45) days of the day the college receives a request for access.

Students should present to the Director of Registration and Enrollment a signed, written request that identifies the record(s) they wish to inspect. The Director of Registration and Enrollment will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Director of Registration and Enrollment, the director shall advise the student of the college official to whom the request should be addressed. At the time of viewing, the student will present some form of picture identification, such as a valid driver license, before being allowed to view the record.

(2) The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading.

Students may ask the college to amend a record they believe is inaccurate or misleading. Students should request forms for this purpose from the Director of Registration and Enrollment. Students should clearly identify the part of the record they want changed and specify why it is inaccurate or misleading.

If the college decides not to amend the record as requested by the student, the college will notify the student of the decision and advise the student of his/her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

(3) The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent (see Exceptions Under FERPA below).

(4) The right to file a complaint with the U.S. Department of Education concerning alleged failures of the college to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue SW
Washington D.C. 20202-5920

EXCEPTIONS UNDER FERPA
Under certain conditions, as authorized by FERPA, information can be released without student consent:

DIRECTORY INFORMATION
The term directory information is a legal term applying to that information the college can release, without student consent, to any third party. The use of the term directory information does not imply that the college actually has a document containing student directory information or that the college has any obligation to produce such a document.

The college has defined Directory Information as the following:
- Student name
- Student e-mail account
- Program of enrollment
- Full-time or part-time status
- Period of enrollment
- Date of completion
- Degree/certificate awarded
- Photos/videos of student for use in college press releases, publications, and web sites

Students have the right to restrict the disclosure of directory information at any time. To restrict the disclosure of directory information, a student may file a signed written request with the Director of Registration and Enrollment. This request to restrict disclosure of directory information will be honored until such time as the student presents signed written notification to the Director of Registration and Enrollment.
U.S. MILITARY
According to federal law, the college must release to the U.S. Armed Forces student name, address, phone number, date of birth, and field of study.

AUTHORIZED FEDERAL, STATE, AND LOCAL AUTHORITIES
Student authorization is not required for disclosure to an authorized representative of the following individuals or entities:
- The Comptroller General of the United States
- The Secretary of the U.S. Department of Education
- State educational authorities
- Any party legitimately connected with the student’s application for or receipt of financial aid
- Accrediting organizations
- Agencies involving an audit or evaluation of compliance with education programs
- Organizations conducting studies for or on behalf of educational institutions.

OTHER INSTITUTIONS
Information can be released to other schools to which a student seeks or intends to enroll.

EMERGENCY SITUATIONS
Information can be released to law enforcement personnel, emergency personnel, and college officials in an emergency in order to protect the health or safety of students or other persons.

LEGITIMATE EDUCATIONAL INTEREST
 Officials of the college who are determined by the college to have a legitimate educational interest may have access to student records without obtaining consent from the student. “Officials of the college” is defined as:
- persons employed by the school in an administrative, supervisory, academic, research, or support staff position;
- persons serving on school governing bodies;
- persons employed by or under contract to the college to perform a specific task, such as an attorney;
- auditors;
- persons or companies with whom the college has contracted (such as attorneys; third party services, such as National Student Clearinghouse; auditors or collection agents/agencies);
- persons serving on the Board of Trustees; and/or
- students serving on official committees (such as a disciplinary or grievance committee) or who are assisting other school officials in performing their tasks.

An official of the college has a legitimate educational interest if they need to
- perform duties specified in their job description or under terms of contractual agreement;
- provide campus services related to a student, such as advising, financial aid, and counseling; and/or
- conduct tasks related to a student’s education or campus discipline.

JUDICIAL ORDER
Information must be released to comply with a judicial order or lawfully issued subpoena. The college will make a reasonable effort to notify the student of the order or subpoena in advance of compliance so that the student may seek protective action. However, if the court (or other issuing agency) has ordered that the existence or the contents of the subpoena or judicial order not be disclosed, the college will comply, and notification to the student will be withheld.

GRIEVANCE HEARING
Information about a student or students involved in a grievance investigation or grievance hearing may be released to members of the grievance committee, including any students assigned to that committee, if such information is germane to the investigation or hearing.

DISCIPLINARY HEARING
The results of a disciplinary hearing may be released to an alleged victim of a crime of violence without the permission of the accused.

BELLINGHAM TECHNICAL COLLEGE FOUNDATION
Student names and addresses may be released to the Bellingham Technical College Foundation for foundation-related activities. The foundation is considered part of the college and will hold confidential such information, using the information only in specific activities intended to aid and support the college. Release of such information to the foundation will be made only with the approval of the college president or his/her designee.

U.S. PATRIOT ACT
The college must release, without consent or knowledge of the student, personally identifiable information from a student’s education record to the Attorney General of the United States or his/her designee in connection with the investigation or prosecution of terrorism crimes specified in sections 233b (g)(5)(B) and 2331 of Title 18, U.S. Code.

WRITTEN RELEASE
Personnel employed by the college who have consent in the form of a written release of information signed by the student may disclose student information to appropriate outside agencies or persons.

GRADUES & TRANSCRIPTS
Quarterly grades for all graded programs and courses are available online within five working days following the end of the quarter through the College website Online Services. Students must have their Student ID number (see page 70 for more information about SIDs) and a personal identification number (Pin) to access their grades on their unofficial transcript. PINS are available by contacting the Registration & Enrollment Office at 360.752.8348. An unofficial transcript is an unsigned and unsealed copy of the student’s record. There is no charge for unofficial transcript copies.

The official transcript is a sealed copy of the student’s academic record bearing the College’s seal and the signature of the Registrar. Requests for official transcripts must be made in writing with signature and accompanied by a $4.00 payment.

To request a transcript by mail, include name, social security number or student identification number, approximate dates of attendance, signature, and appropriate fee payment.

Transcript request forms are available on the BTC website, Online Services page. Submit the completed form with payment in person, by mail, or by FAX.

Transcripts are withheld if all obligations to the College, financial or otherwise, are not fully filled.
Student Rights & Responsibilities

HARASSMENT
Bellingham Technical College, as a place of work and study for all members of its community, will be free of all forms of ethnic, religious, or sexual harassment, intimidation, or exploitation. Any student who is subjected to offensive behavior is encouraged to pursue the matter in accordance with the Sexual Harassment Policy by contacting the Affirmative Action Officer in the College’s Human Resources Office at 360.752.8354. Sexual harassment complaints are treated as sexual discrimination complaints under state and federal regulations. Complaints are confidential.

All students shall have access to due process in accordance with the Student Grievance Procedure without fear of harassment or intimidation.

STUDENT CODE OF CONDUCT
All students are subject to the Bellingham Technical College Student Code of Conduct published in Chapter 495B-120 of the Washington Administrative Code and as defined in this catalog.

Copies of the entire Student Code of Conduct are published and available to students and the campus community in the Counseling & Career Center, the Office of the Vice President of Student Services, distributed to new students at New Student Orientation, and posted in each degree/certificate program classroom.

Enrollment in the College carries with it the requirement that the student will conduct himself or herself as a responsible member of the community. This includes an expectation that the student will obey appropriate laws, will comply with the rules of the College and its departments, and will maintain a high standard of integrity and honesty. Sanctions for violations of College rules or for conduct that interferes with the operation of College affairs will be dealt with by the College, and the College may impose sanctions independently of any action taken by civil or criminal authorities. In the case of minors, misconduct may be referred to parents or legal guardians.

Disciplinary action may be taken for a violation of any provision of the student code or violation of other College rules.

STUDENT COMPLAINT OR GRIEVANCE PROCEDURES
DEFINITION OF GRIEVANCE
A grievance is a complaint by a student against a policy or practice of the college or college staff that is considered improper or unfair, or where there has been deviation from or misinterpretation or misapplication of a practice or policy.

GRIEVANCE PROCEDURE
A. A student wishing to pursue a grievance must take the following steps to try to resolve the grievance prior to filling out an official complaint form:

1. The student will first try to resolve the matter with the appropriate BTC staff member.

2. If resolution is not achieved between the student and the BTC staff member, the student will ask the staff member’s immediate supervisor to resolve the grievance.

3. If resolution is not achieved at the supervisory level, the student will ask the supervisor’s vice president to resolve the grievance.

4. If resolution is not achieved at this point, the student may file a complaint using the appropriate complaint forms. (An appointment must be made with the Vice President of Student Services or a designee to obtain the necessary forms and information.)

B. Complaints must be filed with the Vice President of Student Services or a designee.

C. Complaints must be filed within twenty (20) school days of the date of the action causing the complaint.

D. The student will receive acknowledgment of the filing of a formal, written complaint. The student may withdraw the complaint at any point during the formal procedure. The Vice President of Student Services or a designee will notify the person(s) against whom the complaint has been filed (hereafter referred to as the staff member). The staff member will also receive a copy of the complaint.

E. A grievance committee will be appointed annually by the college president and will consist of five individuals representing the various college constituencies. The committee will be made up of one administrator, two faculty members, and two support staff members. The complainant may request student representation on the committee. If requested, the President may select two students to substitute for a like number of existing members of the committee. Members of the grievance committee will remove themselves from the process if they deem themselves biased or personally interested in the outcome of grievance.

F. The Vice President of Student Services or a designee will serve as the investigating officer in the complaint.

G. The investigating officer will

1. Meet with the student and the staff member;
2. Examine documentation and interview witnesses;
3. Consult with the appropriate vice president, or equivalent unit head and/or other appropriate administrator; and
4. Prepare a written investigative report.

H. The investigating officer may meet individually with the student and the staff member to discuss the report in the hope that a resolution can be reached. If a resolution is not achieved, copies of the investigative report will be forwarded to the grievance committee, the student, the staff member, and the appropriate administrator(s).

I. The grievance committee will review the complaint and the findings of the investigating officer and determine whether or not the facts warrant a hearing. The committee’s decision will be limited to one of the following statements:

1. Based on the evidence presented to us, we find probable cause for believing that an improper or unfair practice or act has been committed; or

2. Based on the evidence presented, we find no probable cause for believing that an improper or unfair practice or act has been committed.
The committee will make its report in writing to the Vice President of Student Services or a designee after receipt of the report by the investigating officer. The deliberations of the committee will not be disclosed to anyone except the Vice President of Student Services or a designee who will hold them confidential.

J. If no probable cause is found, the matter will be considered concluded. However, the student may submit a written appeal to the President within ten (10) working days from the date the decision is made. The appeal must specify in detail what findings, recommendations, or other aspects of the report or decision were not acceptable. The appeal should also include what corrective action the student desires after consideration of the appeal by the President. The President may uphold the decision of the committee, and at that point no further appeals within the college will be considered. Or, the President may instruct the committee to go forward with the grievance hearing process.

K. If probable cause is found, a hearing will be held.

1. The committee will select a chair. The chair of the committee will establish a date for the hearing. A notice establishing the date, time, and place of the hearing will be provided to all involved parties.

2. The hearing will be held within thirty (30) working days from the date of the hearing notice.

3. The student and the staff member will each have the privilege to challenge one member of the committee without cause (stated reason). Unlimited challenges may be issued if it is felt that a member of the committee is biased. In the case of a challenge for bias, a majority of the grievance committee members must be satisfied that a challenged member cannot hear the case impartially before the member can be disqualified. In the case of removal of a member through the challenge process, the President will restore the committee to full membership.

4. The hearing will be conducted as expeditiously as possible and on successive days, if possible.

5. The student and the staff member and any others the committee deems necessary to the proceedings will make themselves available to appear at the proceeding unless they can verify to the committee that their absence is unavoidable.

6. The student and the staff member will be permitted to have with him/her a party of his/her own choosing to act as advisor and counsel. The hearing may be monitored by the Assistant Attorney General assigned to the College.

7. The hearing will be closed to all except those persons directly involved in the case as determined by the grievance committee. Statements, testimony, and all other evidence given at the hearing will be confidential and will not be released to anyone and may be used by the committee only for the purpose of making its findings and recommendations to the President.

8. The chair of the grievance committee will convene and regulate the proceeding. The student, the staff member, and the members of the hearing panel must be present during the proceeding, unless excused by the chair for good cause. Repeated failure, without reasonable explanation, of either the student or the staff member to appear will be grounds for defaulting that party's case. The student will have the burden of presenting the case and the staff member will have the burden of challenging the evidence presented.

All parties will have the opportunity to present evidence, respond to evidence presented, and examine and cross examine witnesses.

a. The hearing panel will be empowered to examine witnesses and receive evidence; exclude any person(s) felt to be unreasonably disruptive of the proceedings; hold conferences for the settlement of the issues involved; make decisions or proposals for decisions; and take any other actions authorized by the rule consistent with this procedure.

b. No individual will be compelled to divulge information in any form that he/she could not be compelled to divulge in or in connection with court proceedings.

c. Any legal opinion or interpretation given to the grievance committee by the parties may be shared with all parties to the case.

e. The grievance committee will file its findings and recommendations with the President, the Vice President of Student Services, the student, and the staff member after the conclusion of the hearing. If the findings and recommendations of the grievance committee are acceptable to the student and the staff member, the President may direct implementation of the recommendations.

L. If the student or staff member objects to the findings and recommendations and wishes to appeal, a written appeal may be submitted to the President within ten (10) working days from the date the finding is issued. The appeal must specify in detail the findings, recommendations, or other aspects of the report or decision that are not acceptable. The appeal should also include what corrective action the student or staff member desires after consideration of the appeal by the President.

M. After considering an appeal, the President will issue a written decision to the parties involved. The decision of the President will be final and no further appeals within the college will be considered.

STUDENT IDENTIFICATION NUMBERS
In accordance with Washington State Law SB5509, BTC uses randomly assigned Student Identification (SID) numbers as the primary identifier for student’s academic records. This law is intended to add additional protection to student’s identity, records, and privacy.

Although the student’s social security number (SSN) will not be listed as the primary student identifier, the College will still need to record it for a number of uses including financial aid, Hope Scholarship and Lifelong Learning tax credits (page 64), employment verification, workforce or unemployment data, assessment/accountability research projects authorized by the College and/or the state of Washington, transcripts, and other legitimate uses authorized under state law and/or federal law.

STUDENT BODY CARDS
BTC student body cards are available for a small fee at the Bookstore. The picture identification card includes the student identification.
in acceptance of transfer credit as defined in the transfer credit
work completed at other regionally accredited institutions. only
with an earned grade of "c" or better will be considered for
courses completed at a regionally accredited college or university
matches in content a course and credits that is required for a B tc
technical content transfer credit award.

For some courses, course syllabi or other descriptive information may
be required in addition to an official transcript.

TECHNICAL COURSE REQUIREMENTS: Students seeking transfer credit
for technical courses must submit a completed Transfer Credit Request form and official transcripts or equivalent documentation to
the Admissions & Advising Office. Program faculty will evaluate and
determine credit granted for equivalent technical content.

GENERAL EDUCATION COURSES: Students must submit a completed
Transfer Credit Request form with official transcripts to the Admissions &
Advising Office for evaluation and approval of credit granted for
equivalent general education content. The form and the official
transcript will be reviewed by the College-designated transcript
evaluator. When evaluated, and after the student has satisfied
requirements for admission into a program, the completed Transfer
Credit Request form and the official transcript will be returned to the
Registration & Enrollment Office for posting of the transfer credit
grade (T) and for filing.

CREDIT FOR PRIOR EXPERIENTIAL LEARNING: Bellingham Technical
College recognizes credit for prior experiential learning. Credit for
prior experiences that can be shown through various means of
assessment to be the equivalent of learning gained through formal
collegiate instruction may be granted toward the award of a degree
or certificate. Credit for prior experiential learning applies only to
degree/certificate programs and may not exceed twenty-five percent
(25%) of the total hours required for the degree or certificate.

Credit for prior experiential learning will be granted only to currently
enrolled program students. The credits granted will be based upon
procedures developed and published by the program faculty and
approved by the Instruction Council in accordance with institutional
policy. Assessment must include theory and practicum if applicable.
The prior experiential learning cannot duplicate credit granted by
transfer or previously graded course work.

Prior experiential learning credit will not be awarded in lieu of
general education courses, including MATH 100, MATH &107, PSYC
&100, PSYC 111, ENGL &101, COM 170, and other academic support
courses. Professional technical faculty may consider professional/industry
certifications for credit for prior experiential learning.

ADVANCED PLACEMENT
The College may offer advanced placement into a professional
technical program to eligible applicants/students with prior
college technical coursework or recognized professional/industry
certification(s).

PROCEDURE
1. Advanced placement is initiated by the applicant/student, by
meeting with an admissions advisor. The applicant must submit
official transcripts showing prior college course work and/or
copies of professional/industry certification(s) with the Transfer
Credit Request form.
2. The request form and documentation is logged and routed to
the appropriate person for evaluation. The professional technical
faculty member will conduct the evaluation of technical course
equivalency. Professional technical faculty may consider
professional/industry certifications for credit for prior experiential
learning. The assigned College evaluator(s) will conduct the
evaluation of general education or academic support courses.
3. The evaluation of transcripts and/or certification(s) will determine
advanced placement, outline which coursework the applicant/
student has completed (students will receive transfer credit for
college course work), and identify at what point in the program
the applicant/student is eligible for advanced placement.
4. The evaluated request form and documentation are returned to
the Admissions & Advising Office, and students are notified of their
eligibility for advanced placement.
5. The completed form is routed to the Registration & Enrollment Office for processing and will be filed in the student's permanent record.

Students are accepted to enroll as advanced placed students based on the date of completion of all program admission requirements and space availability.

**DEGREE & CERTIFICATE PROGRAM TRANSFER**

Currently enrolled Bellingham Technical College degree/certificate program students may be considered for priority on the program list for admission in a related program if the student has completed portions of the technical content/competencies that are transferrable to the degree/certificate program.

**PROCEDURE**

1. Student obtains an unofficial transcript (grade report) from the BTC website, On-Line services.
2. Student meets with a BTC counselor to discuss possibility of transfer and obtains a Request for Program Transfer Form. Student's Accuplacer test scores will be evaluated to determine if the student is eligible for acceptance in the program or if retesting is necessary. Students receiving financial aid should determine the effect of transfer on financial aid status prior to initiating the transfer procedure.
3. Student meets with instructor of program into which the student desires to transfer for evaluation and to obtain approval if the transfer is appropriate.
4. Student presents completed Request for Program Transfer Form (with all signatures affixed) to the Registration & Enrollment Office in the College Services Building.
5. The request will be processed and the student will be notified of permission to register or program list status.
6. Students transferring to another degree/certificate program are responsible for any additional tuition or fees at the time of registration. Running Start students transferring will be required to submit a new Running Start Referral form signed by the appropriate high school official.

**TRANSFERABILITY OF BTC CREDITS**

To determine transferability of credits earned at Bellingham Technical College, students must request an official BTC transcript be forwarded to the college where they wish to have credits evaluated. The receiving college will determine the value of course work completed at BTC. Credits, qualifications, or requirements waived by one college may not necessarily be waived by another college. Those decisions are made at each institution.

Contact the Registrar at any other college you wish to send transcripts to for evaluation. Official BTC transcripts are available through the Registration & Enrollment Office.

“&” in the BTC course prefix designates Washington State Community and Technical College “Common Course Numbering (CCN).” The purpose of Common Course Numbering is to identify those courses common within the 34 community and technical colleges in Washington State and make course transfer between and among those institutions and to the four-year colleges and universities as easy as possible for students, advisors, and receiving institutions.

**ARTICULATION AGREEMENTS**

Through county-wide agreements with school district superintendents and BTC, students may enroll in classes to receive high school and college credit at the same time. These articulation agreements are managed through the Whatcom County Tech Prep Consortium and provide opportunities for high school students under five career pathways: science and natural resources, arts and communications, business and marketing, engineering and technology, and health and human services.

Articulation agreements with public and private colleges and universities provide BTC students with transfer options to earn four-year degrees related to specific programs of study and business and management. To view a current listing of colleges that BTC has developed articulation agreements with, please visit the BTC website at: www.btc.ctc.edu/transferoptions. City University offers courses on BTC’s campus at a very competitive price.

Beyond the formalized degree articulation agreements, BTC has a number of transfer agreements with state colleges and universities regarding courses. To check if BTC credits are transferable to other colleges, contact the Registrar at the receiving college.

Programs of Study 2008-2010 Catalog

Accounting Technician

Degree - Accounting Technician Certificate - Accounting Assistant

The Accounting program prepares students with the necessary technical and professional skills to obtain employment in the accounting field. Students can earn a certificate or associate degree. The successful Accounting Assistant certificate graduate will be able to analyze financial transactions, use various types of office machines, and process transactions using both manual and computerized systems. Accounting assistants may seek employment in the area of accounts receivable, accounts payable, or payroll.

To be successful, accounting students should have an aptitude for working with numbers, be detail oriented, and have the ability to concentrate and communicate. Jobs in the area of accounting afford many opportunities for challenging and rewarding work. Accounting students are eligible to join the North Cascades Chapter of American Society of Accounting (ASWA).

Program Outcomes: The Accounting Technician degree prepares students to seek employment in public, private, and/or governmental entities as accounting clerks, accounting technicians, bookkeepers, accounting support personnel, or payroll assistants. Graduates of Accounting will be able to demonstrate with 80% accuracy effective skills using computerized accounting software, computing payrolls, payroll taxes, tax forms and the ability to apply Generally Accepted Accounting Principles in locating and correcting errors made to the financial records of a business. In a three minute timing, with an error one limit, graduates will demonstrate effective 10-key skills. With a three error limit, graduates will demonstrate basic keyboarding at 35 wpm.

Application & Registration: This program requires an admissions process. Students may enroll in Accounting at the start of each quarter. Admission is offered on a space available basis. Students may enroll full-time or part-time.

Sequence and Schedule: Students meet with and are advised by their program advisor to plan and schedule classes. Many classes are sequential and have prerequisites. A schedule of course offerings can be obtained from program advisors.

It is estimated that a full-time student can complete Accounting Assistant in three quarters and Accounting Technician in five quarters. Because not all courses are offered every quarter, completion times may vary depending on which quarter the student first enrolls.

Degree Requirements: Students may apply for an Associate in Applied Science degree or an Associate in Applied Science - Transfer degree or a Certificate upon completion and verification of all requirements and standards. In order to earn an Accounting degree or certificate, students must maintain a 2.0 grade point average with no course grade below C (2.0). Students may successfully challenge CAP 101, Introduction to Computers, by passing the three IC3 Certification tests.

Online Learning: Students will use some online tools and resources throughout the program. Some of the General Education classes and some of the required courses and electives are also offered online.
Administrative Assistant

DEGREE - ADMINISTRATIVE ASSISTANT

This program prepares students for careers in a variety of business and office settings. Students may achieve an Associate Applied Science degree in Administrative Assistant. Coursework is taught using multiple teaching methods. Students not only work independently but also learn in structured class sessions. Emphasis is placed on hands-on learning and application. Skills needed for success in today's workforce are interwoven throughout the program. With the help of a program advisor, students declare their career goals when entering the program or after working through course material and further identifying their personal strengths. Program content requires the application of basic math, technical reading, and communication skills. Administrative Assistant students are eligible to join the International Association of Administrative Professionals (IAAP).

PROGRAM OUTCOMES: Administrative Assistant graduates will demonstrate competency in touch keyboarding at 50 wpm on a three minute timing; along with 80% competency in business document formatting, proofreading, word processing, spreadsheets, databases, presentation graphics, data entry, 10-key proficiency, alphabetic and numeric filing, and administrative assistant support to an employer.

APPLICATION & REGISTRATION: This program requires an admissions process. Students may enroll in this program at the start of each quarter. Admission is offered on a space available basis. Students may enroll on a full-time or part-time basis.

SEQUENCE AND SCHEDULE: Students meet with and are advised by their program advisor to plan and schedule classes. Many classes are sequential and have prerequisites. A schedule of course offerings can be obtained from program advisors. It is estimated that a full-time student can complete the degree requirements in five quarters. Because not all courses are offered every quarter, completion times may vary depending on which quarter the student first enrolls.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree an Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards. In order to earn an Administrative Assistant degree, students must maintain a 2.0 grade point average with no course grade below C (2.0). Students may successfully challenge CAP 101, Introduction to Computers, by passing the three IC3 Certification tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and some of the required courses and electives are also offered online.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree an Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards. In order to earn an Administrative Assistant degree, students must maintain a 2.0 grade point average with no course grade below C (2.0). Students may successfully challenge CAP 101, Introduction to Computers, by passing the three IC3 Certification tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and some of the required courses and electives are also offered online.
Appliance & Refrigeration Technology

DEGREE - APPLIANCE & REFRIGERATION TECHNOLOGY
CERTIFICATE - APPLIANCE REPAIR

This program prepares students for an exciting and rewarding career in the Appliance & Refrigeration trade. Program graduates have become successful appliance technicians, service managers, and business owners and have also found careers in hotel/motel/apartment maintenance, vending machine servicing, parts specialists, and refrigerator recovery specialists. Skilled technicians are in high demand both regionally and nationally. The program emphasizes the development of diagnostic skills and effective customer service techniques. Students are expected to develop positive work ethics, technical skills, as well as interpersonal and communication skills required by the industry. The program also offers a one year Appliance Repair certificate.

Upon successful completion of either the Appliance & Refrigeration Technology degree or certificate program, graduates applying to the Department of Labor & Industries to become an Appliance Repair (07D) Specialty Electrician can be credited with 1000 hours of supervised work experience per RCW 19.28.191 and WAC 296-46B-940. Under the auspices of the Professional Service Association (PSA), students completing the AAS Degree-take the Certified Appliance Professional (CAP) exam prior to graduation. All graduating students are required to have Refrigerant Handling Certification as part of the A.A.S. degree requirements (AHAM / NARDA).

PROGRAM OUTCOMES: Graduates will demonstrate 70% or above competency in: electrical safety, DC/AC circuits; meters/testing equipment, electrical controllers, timers, electronic control boards, lab diagnostics and a variety of control mechanisms. Graduates will demonstrate knowledge of application of EPA regulations regarding the use of refrigerants, and will successfully complete the AHAM/NARDA Certification for systems under five (5) lbs.

APPLICATION & REGISTRATION: This program requires an admissions process. Students may enroll in the Appliance & Refrigeration Technology program at the start of each quarter on a space available basis. Part-time enrollment is available for the morning section only with instructor approval.

SEQUENCE AND SCHEDULE: This program requires an admissions process.

The Appliance & Refrigeration Technology student will complete a specific course requirement sequence based on enrollment quarter. Students will be advised by the program instructor regarding sequence and schedule of classes.

DEGREE REQUIREMENTS: Students may apply for an (AAS) Associate in Applied Science degree or (AAS-T) Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards. Students may also apply for a one year certificate in Appliance Repair.

Auto Collision Repair Technology

CERTIFICATE - AUTOMOTIVE COLLISION REPAIR TECHNOLOGY

CERTIFICATE - AUTOMOTIVE REFINISHING

The Auto Collision Repair Technology program is an I-CAR Industry Training Alliance member.

PROGRAM DESCRIPTION
The Auto Collision Repair Technology program prepares students for employment in the professional Auto Collision Repair and Refinishing industry. The Associate in Applied Science degree includes a combination of classroom/laboratory instruction and hands-on experience. Using a variety of the most current technological methods and equipment, students will learn how to repair and refinish a damaged vehicle (including automobile and truck bodies, unibody, frames, plastic bumpers and glass) to its original condition per industry standards. By successfully completing the Auto Collision Technology Program curriculum students may earn 8 to 15 I-Car alliance points towards I-Car Gold Class or Platinum Status.

PROGRAM OUTCOMES: Graduates will demonstrate their knowledge and skills to repair and refinish a damaged vehicle using teamwork and methods and skills in structural repair and refinishing. Graduates will demonstrate their knowledge and skills to I-Car standards on non-structural and structural repair, soft to semi-rigid plastic and MIG welding, oxy-acetylene and plasma cutting, oxy-acetylene welding, spot welding (STRSW) and refinishing.

APPLICATION & REGISTRATION: This program requires an admissions process. Students may enroll in the Auto Collision Repair Technology program at the start of fall or spring quarter on a space available basis.

SEQUENCE AND SCHEDULE: The Auto Collision Repair Technology student will complete a specific course requirement sequence based on date of enrollment. Students will be advised by the program instructor regarding sequence and schedule of classes. Generally, classroom instruction is held during morning hours with most lab activities occurring in the afternoon.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree or an Associate in Applied Science - Transfer degree or a certificate upon completion and verification of all requirements and standards.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

Automotive Technology

DEGREE - AUTOMOTIVE TECHNOLOGY
CERTIFICATE - GENERAL AUTOMOTIVE REPAIR
CERTIFICATE - VEHICLE SERVICE TECHNICIAN

The Automotive Program is a Master NATEF/ASE Certified Program.

The Automotive Technology program prepares students for employment in the automotive trade. Instructional time is divided between classroom theory, practical application in the lab, and time spent in a work-based learning situation. The program utilizes current diagnostic equipment and techniques to prepare students to meet the challenge of this highly technical industry. Students have classroom theory and shop experience in all major automotive systems. Students must participate in a work-based learning component as an employee in an automotive shop. The program emphasizes safety, proper work habits, human relations skills, as well as the technical ability necessary for employment.

PROGRAM OUTCOMES: Graduates will use appropriate clothing and protective gear and practice ergonomically correct actions to safeguard against injuries in the workplace. They will research and utilize vehicle repair information from web based programs such as AllData, Mitchell On Demand, the iATN and manufacturer specific programs to perform vehicle repairs in a professional and timely manner utilizing all information resources available. Graduates will be able to diagnose accurately and critically across all major automotive systems and repair common vehicle problems using appropriate tools, equipment and procedures, adhering to standard time and quality standards. They will perform common vehicle service (maintenance) procedures using appropriate tools, equipment and procedures, adhering to standard time and quality standards. Finally, graduates will obtain ASE certification; review, interpret and convey written, verbal and graphic information to communicate effectively with co-workers, management and customers; and act responsibly and ethically as an employee by being punctual, following industry accepted practices, adhering to company policies and interacting positively and appropriately with co-workers, supervisors and customers.

APPLICATION & REGISTRATION: This program requires an admissions process.
Students may enroll in the Automotive Technology program at the start of fall or winter quarter on a space available basis.

SEQUENCE AND SCHEDULE: Students may enter Automotive Technology fall or winter quarter. For the first quarter students enroll in TRANS 101, 102, and 103 plus at least one General Education class (MATH 100, COM 170 or PSYC 111). We recommend enrolling in a morning MWF or an evening General Education class during the first quarter. Full-time students will finish in seven quarters; summer is required.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree or a Certificate upon completion and verification of all requirements and standards. Automotive Technology AAS graduates must receive a 2.0 cumulative grade point average with no required course below a grade of D (1.0).

Bookkeeping Assistant

CERTIFICATE - BOOKKEEPING ASSISTANT

The Bookkeeping Assistant program will prepare students for entry level employment in a bookkeeping position in a wide variety of businesses or agencies.

PROGRAM OUTCOMES: The Bookkeeping Assistant Certificate prepares students to seek employment in public, private, and/or governmental entities. Certificate completers will be able to demonstrate effective skills using computerized accounting software, computing payrolls, payroll taxes, tax forms and the ability to apply Generally Accepted Accounting Principles in locating and correcting errors made to the financial records of a business, under the direction of a bookkeeper, CPA or other financial supervisor.

APPLICATION & REGISTRATION: Prerequisite: Basic keyboarding skills.

Program application and admission are not required. Students begin the program by registering for the required evening courses on a space available basis. It is recommended that students have good basic academic skills. A program brochure is available at the Counseling and Career Center.

SEQUENCE AND SCHEDULE: Courses are held in the evening, generally from 6:00pm to 9:00pm. Some courses may be offered in the afternoon. See Quarterly Schedule for specific information.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

Building Construction Technology

DEGREE- BUILDING CONSTRUCTION TECHNOLOGY CERTIFICATE - CONSTRUCTION TECHNICIAN

The Building Construction Technology program prepares students for employment in a wide range of construction and building maintenance industry positions. The Associate in Applied Science degree focuses on training students in the use of tools, materials, and techniques to be problem solvers and provides theory and practice through class projects and internships in all aspects of the construction trade. The program emphasizes that graduates have the necessary trade skills, academic capabilities, and industry/work attitudes to become competent and efficient tradespersons employable in the industry or through self-employment. Students are able to complete the (AAS) degree program in 5 quarters. The program also offers a Construction Technician certificate.

PROGRAM OUTCOMES: Graduates will demonstrate competency in their ability to use and work safely with hand tools of the trade, common power tools, i.e. circular saws, electric drills, power planers, etc; demonstrate their ability to plan and execute projects to completion, read and interpret architectural drawings, plans, and light frame construction methods.

APPLICATION & REGISTRATION: This program requires an admissions process. Students may enroll in the Building Construction Technology program at the start of each quarter on a space available basis. Part-time enrollment is available for the morning section only with instructor approval.

SEQUENCE AND SCHEDULE: The Building Construction Technology student will complete a specific course requirement sequence based on quarter of enrollment. Students will be advised by the program instructor regarding sequence and schedule of classes.

Classroom instruction is scheduled during morning hours. Lab activities occur during the afternoons. Lab activities include group and individual projects. A weekly schedule is distributed to students in class.

DEGREE REQUIREMENTS: Students may apply for an (AAS) Associate in Applied Science degree or an (AAS-T) Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards. Students may also apply for Construction Technician Certificate.

### Programs of Study

#### Business & Supervision Management

**Certificate - Business & Supervision Management**

The Business Supervision & Management certificate program is a series of courses and seminars designed to provide essential practical skills for employment in Supervision, Office Management, Small Business Operation. This evening program can be completed in four to five quarters, and can benefit those who want to improve their managerial skills, seek career advancement, or gain professional recognition.

**Program Outcomes:** The Business and Supervision Management prepares the student for entry level supervision, supervisory advancement, or entry into an entrepreneurial venture. Completers must demonstrate an affective knowledge of: labor laws, general accounting principles, various leadership styles, effective employee discipline, development of a business plan, customer service, business ethics and general concepts in human resource management.

**Application & Registration:** Program application and admission are not required. Students begin the program by registering for the required evening courses on a space available basis. It is recommended that students have good basic academic skills. A program brochure is available at the Counseling and Career Center.

**Sequence and Schedule:** Courses are generally held each quarter in the afternoon, evenings, and some are held on Saturdays. Courses are not sequential. See a Quarterly Schedule for specific information.

**Degree Requirements:** Students may apply for a certificate upon completion and verification of all requirements and standards.

Child Development (CDA)

CERTIFICATE - CHILD DEVELOPMENT (CDA)

The Child Development Essentials (CDA) Program prepares students for work in the early childhood care and education field. This coursework can lead to a certificate in Child Development from Bellingham Technical College and provides the coursework for the national credential as a Child Development Associate. The three CDA Essentials courses are also transferable to most community and technical colleges for twelve credits towards a certificate or degree in Early Childhood Education.

Core competencies covered in this program prepare early childhood educators to work effectively with young children and their families. Major topic areas include introduction to early childhood, ways children learn, healthy environments, social and emotional development, physical and intellectual competency, curriculum development, family relationships, and professionalism.

Courses are offered as group courses or fully online. Participants must be working with young children regularly either in a paid or volunteer position to fulfill their coursework requirements.

PROGRAM OUTCOMES:

Plan safe, healthy environments to invite learning.
Facilitate steps to advance children's physical and intellectual development.
Create positive ways to support children's social and emotional development.
Develop strategies to establish productive relationships with families.
Facilitate strategies to manage an effective program operation.
Maintain a commitment to professionalism.
Observe and record children's behavior.
Apply principles of child growth and development.

APPLICATION & REGISTRATION: Prerequisite: Students must be working with young children regularly either in a paid or volunteer position to fulfill their coursework requirements.

Program application and admission are not required. It is best for students to begin the program by registering for ECED 120—CDA Essentials: Intro to ECE/Health, Safety & Nutrition fall quarter on a space available basis. However, students can begin the courses in winter or spring as well. It is recommended that students have good basic academic skills or enroll in the CDA I-BEST to work on improving their reading, writing, and math skills. A program brochure is available from the Counseling and Career Center.

SEQUENCE AND SCHEDULE: This program consists of three required courses that are offered either as a group class or fully online. The group class meets one evening a week and one Saturday per quarter. The online course is offered through WAOL. The group courses are I-BEST approved and students participating in the group courses have the option of attending class a second evening each week to work on improving their basic skills in reading, writing, and math.

Each course includes field work as well as coursework and ten hours of mentored activities. See a Quarterly Schedule for specific information.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

ONLINE LEARNING: All three courses required for the certificate are offered fully online as well as a group class. Students will use some online tools and resources throughout the program in the group classes.
Civil Engineering Technology

DEGREE - CIVIL ENGINEERING TECHNOLOGY
DEGREE - CIVIL CONSTRUCTION MANAGEMENT

Western Washington Student Chapter of the American Society of Certified Engineering Technicians (WWSC - ASCET)

The Civil Engineering Technology program prepares students for opportunities in diverse professions including Civil Drafting/Design, Junior Construction Management. The AAS degree in Civil Engineering Technology prepares the student in the theory and application of civil engineering principles in civil drawing, civil design, construction engineering, geographic information systems (GIS) production, and field engineering. In addition, the program includes Survey and Mapping Technology coursework to prepare the Civil Engineering Technology graduate for a profession that integrates with the surveying profession. Desktop Mapping (Geographic Information, Systems - GIS), Construction Materials Testing, Construction Estimating and Inspection, and Surveying. These jobs can be found at the Department of Transportation, County & City Public Works, various private civil engineering and surveying firms, and civil construction companies.

Students learn these skills in classroom lectures; the Computer Aided Drafting (CAD) lab and field measurement with surveying instruments and the workplace internship. The coursework utilizes hands-on projects to simulate the work environment. All students are expected to develop and demonstrate positive work ethics, technical skills, interpersonal and communication skills as required by the industry.

This program also offers an AAS degree and a one year certificate in Civil Construction Management. Students completing the AAS or AAS-T in civil engineering may obtain the AAS or a certificate in Civil Construction Management by completing the additional courses.

PROGRAM OUTCOMES: Graduates will demonstrate competency in Land Desktop, basic CAD, ArcView (GIS), preparing roadway and utilities plans and profile drawings for a Long Plat, plan and profile layout of civil improvements, and an accurate map integrating field gathered GPS data into Arcview.

APPLICATION & REGISTRATION: This program requires an admissions process. Directions for application are on page XX. Note: This program contains advanced mathematics that may require preparatory coursework. Students may enroll in the Civil Engineering Technology program at the start of the fall quarter and at other times during the year with instructor permission, but only as advanced placement. Program coursework is structured so that each course is offered once per year during the year with instructor permission.

CAP 101 - Introduction to Computers is a required prerequisite for students to enroll in this program. Students may test out of this requirement by passing the three IC3 exams (Living Online, Computer Fundamentals, and Key Applications - Word and Excel). These tests may be taken at BTC or any other CertiPort Testing Center.

SEQUENCE AND SCHEDULE: The Civil Engineering Technology student will complete a specific course requirement sequence. Students will be advised by the program instructor regarding sequence and schedule of classes. Generally, a full-time student will be enrolled for six (6) hours per day. Instructor permission is required for a part-time student.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree an Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards.

Clerical Assistant

CERTIFICATE - CLERICAL ASSISTANT

The Clerical Assistant program will prepare the student for an entry level position in almost any office environment. Students will learn basic computer skills, light filing, accounting support, and customer service skills.

PROGRAM OUTCOMES: Students will be able to perform the clerical support functions in an office environment to include filing, light accounting, typing and front office customer service.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering for the required afternoon or evening courses on a space available basis. It is recommended that students have good basic academic skills. A program brochure is available at the Counseling and Career Center.

SEQUENCE AND SCHEDULE: Courses are held in the evening, generally from 6:00pm to 9:00pm. Some courses may be offered in the afternoon. See a Quarterly Schedule for specific information.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

Commercial Driving

CERTIFICATE - COMMERCIAL DRIVING

Bellingham Technical College and locally owned Pegasus Corporation have combined efforts to provide students with a high quality, fast-track training program to prepare for a career in commercial truck driving. This is a two quarter certificate program. It includes preparation of the written and driving tests. In addition to driving skills, students will also take courses, in financial management, first aid, and customer service.

Students will learn the essential skills of professional truck driving tasks in a safe and efficient manner. Students who successfully pass the class will be allowed to use Pegasus vehicles for their on-the-road tests. Students may enroll in the program at the beginning of each month.

Based on DOT regulations, all students who wish to enroll in this program must:
- Possess a current valid Washington State driver’s license and a driving record that is free of serious violations within the past three years.
- Pass a pre-admission drug screen test.
- Obtain a DOT physical examination.

There is a non-refundable application fee of $167.70, which includes the cost of drug screening and current MVR from the Department of Licensing.

PROGRAM OUTCOMES: Graduates will be able to pass the commercial driver’s license (CDL) written and on-the-road test and complete an on-the-job internship.

APPLICATION & REGISTRATION: This program requires an admissions process.

The students may enroll in the Commercial Driving Program on a space available basis at the start of every month, excluding December. Please contact the Registration Department for the Application and Drug Screening procedure.

SEQUENCE AND SCHEDULE: The student must complete the CDL preparation course and obtain a “driving permit” from WA DOL prior to start of hands-on truck driving courses. Students, who have already obtained “driving permit” from DOL can be admitted to other courses in this program with proper driving screen test, DOT physical exam and satisfactory MVR Report.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

Computer Network Technology

DEGREE- COMPUTER NETWORK TECHNOLOGY
CERTIFICATE- COMPUTER NETWORK SUPPORT

Bellingham Technical College is a Microsoft IT Academy member.
Bellingham Technical College is a CompTIA member.

The program offers an Associate in Applied Science degree in Computer Network Technology and a certificate in Computer Network Support. Students are prepared to manage computer network systems through a combination of classroom theory and practical application. They develop the knowledge and skills to troubleshoot and repair computer systems and design, install, and maintain Local Area Networks (LANs). This program prepares students for obtaining industry standard certifications such as Microsoft Certified Professional (MCP), A+, Network+, and Linux+.

PROGRAM OUTCOMES: Graduates earn the industry standard Microsoft Certified Professional (MCP) along with CompTIA A+, Network+, Security+, and Linux+ certifications or may pass an internal exam that measures equivalent skills. Graduates will design and implement a team project including a report and will install, configure, and administer a Linux server and Microsoft Windows Network.

APPLICATION & REGISTRATION: This program requires an admissions process.
Students may enroll in the Computer Network Technology program at the start of fall, winter, or spring quarter on a space available basis. Non-program students may enroll in program classes if space is available.

SEQUENCE AND SCHEDULE: The Computer Network Technology student will complete a specific course requirement sequence. Students will be advised by the program instructor regarding sequence and schedule of classes.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science or an Association in Applied Science - Transfer degree or a certificate upon completion and verification of all requirements and standards. Students may successfully challenge CAP 101 Introduction to Computers, by passing the three IC3 Certification tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and some of the required courses and electives are also offered online.

Computer Software Support

DEGREE - COMPUTER SOFTWARE SUPPORT
CERTIFICATE - COMPUTER APPLICATIONS SPECIALIST

Bellingham Technical College is a Microsoft IT Academy member.

The Computer Software Support Technology program prepares students for employment in the computer technology field in jobs such as Computer Support Specialist, Technical Support, Computer Software Specialist, or Help Desk Technician. It also prepares them for obtaining industry certifications such as Microsoft Certified Professional (MCP), A+, and Network+. Students will gain a working knowledge of a variety of computer software and fundamental office and customer service skills as well as specialized computer skills and knowledge outlined in the outcomes below.

PROGRAM OUTCOMES: Graduates will demonstrate competency in word processing, customer service, spreadsheets, databases, presentation graphics, introductory programming concepts, web design, hardware, operating systems, and networking.

APPLICATION & REGISTRATION: This program requires an admissions process.

Students may enroll in Computer Software Support Technology at the start of each quarter. Admission is offered on a space available basis. Students may enroll full-time or part-time.

SEQUENCE AND SCHEDULE: Students meet with their program advisor to plan and schedule classes. Many classes are sequential and have prerequisites.

Classes are scheduled between 8:00am-11:00am, 12:00pm-3:00pm, and 3:15pm-6:15pm. Degree-seeking students may need to attend several quarters from 3:15pm-6:15pm. Certificate students may need to attend at least one quarter from 3:15pm-6:15pm. A schedule of course offerings can be obtained from program advisors.

It is estimated that a full-time student can complete the certificate requirements in three or four quarters. The degree requirements can be completed in five to six quarters. Because not all courses are offered every quarter, completion times may vary depending on when the student first enrolls.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree or an Associate in Applied Science - Transfer degree or a certificate upon completion of all requirements and standards. In order to earn a Computer Software Support Degree or Computer Applications Certificate, students must maintain a 2.0 grade point average with no course grade below C (2.0).

Students may successfully challenge CAP101, Introduction to Computers, by passing the three IC3 Certification tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and some of the required courses and electives are also offered online.

Construction Management

CERTIFICATE - CONSTRUCTION MANAGEMENT

This certificate is designed to meet the needs of the working student who has experience in some phase of the construction industry and wants to specialize in construction management. Most courses are offered in the evening; some may also be offered in the afternoon. The program prepares people for careers in construction management, including superintendents, project managers, field engineers, estimators, foremen, and other administrators. Students learn estimating, scheduling, project management, safety, and other skills that are critical in the construction management field.

PROGRAM OUTCOMES: Upon successful completion of the Construction Management program, you will be able to:
- Determine personnel, material, and financial resources necessary to manage construction projects.
- Synthesize information from building codes, zoning and other laws, and manufacturers' specifications.
- Communicate effectively with supervisors, subordinates, subcontractors, customers, and regulatory personnel orally and in writing.
- Write bids, contracts, and other construction management documents in accordance with industry standards.
- Use technology to obtain, organize, and distribute information.
- Draw conclusions and make management decisions based on available information.
- Demonstrate leadership, motivation, and problem solving skills in diverse and complex work situations.
- Apply ethical business principles to construction management settings.
- Describe under what conditions it would be appropriate to use various construction materials, methods, and systems.
- Create schedules, budgets, and plans that can be monitored to keep projects going smoothly.
- Demonstrate responsibility for safety planning and productivity in construction management settings.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering for the required evening courses on a space available basis. A program brochure is available at the Counseling and Career Center.

SEQUENCE AND SCHEDULE: Courses are held in the evening, generally from 6:00pm to 9:00pm. Some courses have prerequisites.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

Culinary Arts

DEGREE - CULINARY ARTS
CERTIFICATE - PASTRY
CERTIFICATE - CULINARY ARTS

The Culinary Arts Program is accredited by the Accrediting Commission of the American Culinary Federation Foundation.

The Culinary Arts program, which is taught by an award-winning faculty, is designed to provide graduates with the skills and knowledge necessary to function as a professional in the hospitality industry in a sous chef, line cook, prep cook, or management position. The fast-growing food service industry is one of top ten employers in the country. The American Culinary Federation has recognized the program as one that meets the high educational standards set forth by the American Culinary Federation Foundation. Students in an ACF accredited program receive the best possible culinary arts training. Course work consists of theory, lab skill development, and internships.

PROGRAM OUTCOMES: Culinary graduates will demonstrate knowledge and skills of standards in sanitation, safety, personal hygiene, and pass the National Restaurant Association Educational Foundation Serve-Safe Managerial Certification. Graduates will prepare, cook, bake, and present a variety of foods in a flavorful and artistic manner; demonstrate effective customer service, human relations and communication skills with co-workers, customers, and supervisors.

APPLICATION & REGISTRATION: This program requires an admissions process.

Students may enroll in the Culinary Arts program at the start of fall or spring quarter on a space available basis.

SEQUENCE AND SCHEDULE: Specific courses will be offered each quarter. The sequence and schedule are available from the program instructor. Most first year classes will be offered from 8:00am to 4:00pm.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree an Associate in Applied Science - Transfer degree or a certificate upon completion and verification of all requirements and standards.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

### Customer Service Management

**Certificate - Customer Service Management**

Customer service, or lack of it, is one of the hottest topics in business today. Quality customer service is now expected, no matter what type of business/service you are involved in. Quality customer service is expected whether the business is transacted on the phone, in person, or via the Internet. Various resources are available in one-day seminars, which can give some direction towards improving customer service, but managing on a constant basis needs a more complete exploration. This short certificate is designed for the person who is currently in a lead, training, or supervisory role, or whose career path involves a heavy emphasis on quality customer service. Students will learn to define areas in which customer service can be increased and to pinpoint areas where they never realized customer service is expected.

**Program Outcomes:** Graduates will be able to demonstrate high quality customer principles and assist offices and other business entities in improving customer service and satisfaction.

**Application & Registration:** Program application and admission are not required. Students begin the program by registering for the required evening courses on a space available basis. It is recommended that students have good basic academic skills. A program brochure is available at the Counseling and Career Center.

**Sequence and Schedule:** Courses are held in the evening, generally from 6:00pm to 9:00pm. Some courses may be offered in the afternoon. See a Quarterly Schedule for specific information.

**Degree Requirements:** Students may apply for a certificate upon completion and verification of all requirements and standards.

**Customer Service Management Certificate**

- BUS 140: Supervision & Management 3
- MGMT 100: Business & Professional Ethics 3
- MGMT 101: Conflict Management 1
- BUS 184: Customer Service 3
- HRM 201: Management Of Human Resources: An Overview 3
- MGMT 104: Defining & Managing Quality Customer Service 3
- BUS 141: Total Quality Management 2

**Total:** (Approx. 3 quarters) 18
Data Entry Specialist

CERTIFICATE - DATA ENTRY SPECIALIST

This program prepares students for careers in data entry. Students not only work independently, but also learn in structured class sessions. Emphasis is placed on hands-on learning and application. Skills needed for success in today's workforce are interwoven throughout the program. With the help of a program advisor, students declare their career goals when entering the program or after working through course material and further identifying their personal strengths. Program content requires the application of basic math, technical reading, and communication skills.

PROGRAM OUTCOMES: Graduates will be able to enter data into spreadsheets and databases in a timely and accurate manner.

APPLICATION & REGISTRATION: This program requires an admissions process. Directions for application are on page XX. Students may enroll in this program at the start of each quarter. Admission is offered on a space available basis. Students may enroll full-time or part-time.

SEQUENCE AND SCHEDULE: Students meet with and are advised by their program advisor to plan and schedule classes. Many classes are sequential and have prerequisites. A schedule of course offerings can be obtained from program advisors.

It is estimated that a full-time student can complete Data Entry Specialist in two quarters. Because not all courses are offered every quarter, completion times may vary depending on which quarter the student first enrolls.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards. In order to earn a Data Entry Specialist certificate, students must maintain a 2.0 grade point average with no course grade below C (2.0). Students may successfully challenge CAP 101, Introduction to Computers by passing the three IC3 Certification tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

Dental Assisting

CERTIFICATE - DENTAL ASSISTING

The Dental Assisting Program is accredited by the Commission on Dental Accreditation. The Commission is a specialized accrediting body recognized by the U.S. Department of Education.

The Dental Assisting program prepares the student to be a key member of the dental team and assist the operator chair-side during diagnostic, preventive and operative dental procedures, including exposing x-rays, placing sealants, polishing teeth, preparing dental materials and placing temporary restorations. The college operates a dental clinic that is open to the public on Thursdays and Fridays, and is staffed with a dentist, dental hygienist, clinic manager, clinical instructor and certified dental assistant. The clinic provides students with clinical experiences, including 4-hand expanded function chair-side practice and equipment maintenance using a variety of delivery systems. The clinic fully incorporates the application of infection control, digital x-ray and dental software. Students are expected to complete the national certification exam (Dental Assistant National Board) or meet other comparable certification requirements by program completion.

PROGRAM OUTCOMES: Apply academic, technical and professional skills to effectively contribute to the dental health team; Apply cognitive retention of dental terminology, theory and science; Expose and evaluate intraoral and extraoral radiographs implementing radiation safety and processing skills; Verify critical thinking, problem solving and positive work ethics as they directly relate to the dental assistant profession; and Validate the importance of National Certification and participation in professional activities and education opportunities.

APPLICATION & REGISTRATION: This program requires an admissions process.

To be eligible for admission to the Dental Assisting program, applicants must meet college admission requirements and submit additional materials, including evidence of high school graduation or its equivalent. Acceptable documents include a copy of your high school diploma, high school transcript, or GED certificate. Applicants must also prove evidence of taking the HOBET (Health Occupations Basic Entrance Test).

To be eligible for the program ready list, all general education courses must be completed. Students may take the general education courses in any quarter. Transcripts must be submitted for all general education courses to be eligible for the program ready list.

After acceptance to be on the program ready list for the Dental Assisting program, and prior to the beginning of the dental courses, students are required to:

- Be 18 years of age
- Demonstrate satisfactory oral health by dental examination
- Demonstrate satisfactory health status by physical examination and current immunization status
- Provide evidence of negative test for tuberculosis from physician or health department
- Complete hepatitis B immunization series. (Students should note that the cost of this immunization is estimated to be approximately $150.00.)
- Possess and maintain a current CPR card. Minimum CPR required is

Curriculum subject to change. For current information, visit us on the web at: www.btc.ctc.edu

49
HO 127 - Healthcare Provider (6 hr).

SEQUENCE AND SCHEDULE: Students begin by completing their general education courses. The Dental Assisting program is a three quarter sequence with fall and spring entry. Students are generally in class from 8:00am-3:00pm. All students will have the summer quarter off. General education courses must be taken first to be eligible for the program ready list.

Extramural clinical experience requires a minimum of 200 clinical hours by the end of the final quarter. The clinical schedule varies according to the dental office hours and students must be available to meet the arranged schedule.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards. Students must receive a minimum of (B) 3.0 in all clinical courses and a (C) 2.0 or above in all academic courses to receive a certificate. Students wanting transferable credits can replace BIO 105 with the following 3 courses: BIOL& 160, BIOL& 241, and BIOL&242.

Dental Hygiene

DEGREE - AAS-T DENTAL HYGIENE

The Dental Hygiene program is designed to prepare students to become Dental Hygienists. The Dental Hygiene program is designed as sequential courses that fulfill the educational objectives established by the American Dental Association (ADA) Commission on Dental Accreditation. The program consists of classroom instruction and clinical experiences including dental hygiene clinical experience in an on-campus patient care clinic. Upon successful completion students will earn an Associate of Applied Science—Transfer degree from Bellingham Technical College and will be eligible to take the National Board Examination.

PROGRAM OUTCOMES:

- Demonstrate current dental hygiene techniques, the use and application of dental materials, and safety and health standards;
- Demonstrate cognitive retention of dental terminology, theory and science;
- Demonstrate positive work ethics, team skills, and professionalism;
- Demonstrate a foundation in professionalism through participation in professional activities and education opportunities;
- Incorporate into dental hygiene practice professional laws, regulations and policies established by the licensing state and regulatory agencies;
- Patient/Client Care: Planning - Formulate a comprehensive dental hygiene care plan in collaboration with the client and other health professionals & evaluate the effectiveness of the implemented client/patient dental hygiene care plan, modify as needed.
- Patient/Client Care: Implementation - Provide preventive and therapeutic services that promote oral health according to the needs of the patient/client.

APPLICATION & REGISTRATION: This program requires an admissions process.

To apply for consideration for admission to the program, applicants must submit a complete application packet. Incomplete application packets will not be considered. Information and application packets and application deadlines are posted on the BTC website at: www.btc.ctc.edu. The following application packet materials are required:

- Completed BTC admissions application and pay $76.90 fee
- Official transcripts containing evidence of successful completion of prerequisite courses with a 2.7 or better
- HOBET score sheet
- Dental Hygiene Application
- Student Prerequisite History form
- Dental Hygiene Observation form
- Candidate Information form
- Copy of Dental Assistant (CDA) certificate (optional)

Submit complete application packets to:

Bellingham Technical College
Admissions – Dental Hygiene
3028 Lindbergh Avenue
Bellingham, WA 98225-1599
After acceptance into the Dental Hygiene program and prior to registering for the first quarter the student is required to:

- Demonstrate satisfactory health status by a physical examination, including current immunization status; provide documentation of negative PPD testing, negative chest x-ray, or appropriate treatment; complete hepatitis B immunization series within the first 6 months of the program; and current tetanus vaccination
- Be 18 years of age
- Demonstrate satisfactory oral health by dental examination
- Submit Criminal Disclosure questionnaire for a background check verifying that there is not a history of child or adult abuse, financial exploitation of vulnerable adults, or other crimes against persons as defined in RCW 43.43.

The Dental Hygiene Program will have a selective admissions process. Students, who submit a complete application packet and meet the prerequisite requirements with a 2.7 or above, will be considered for admission to the program. It is estimated that a full-time student will complete the program in 7 quarters.

BTC DENTAL HYGIENE PREREQUISITES

- English Composition I (ENGL& 101)*
- English Composition II (ENGL& 102)*
- General Psychology (PSYC& 100)*
- Intro to Sociology (SOCI& 101)*
- Introduction to Speech Communication (SPCH 100)
- Pre-Calculus I (MATH& 141)* or Math in Society (MATH& 107)*
- Human A & P 1 (BIO& 241)*
- Human A & P 2 (BIO& 242)*
- Intro to Chemistry (CHEM& 101)*
- Intro to Organic Chemistry
- Microbiology (BIO& 260)*
- Human Nutrition (NUTR 150)*

*Courses offered at Bellingham Technical College. Courses not marked with an asterisk may be taken at Whatcom Community College (WCC) or Skagit Valley College (SVC).

SEQUENCE & SCHEDULE: The Dental Hygiene program will begin winter quarter 2009. It is estimated that a full-time student will complete the program in 7 quarters. Classes are held between the hours of 8am-6pm and students may have a varying schedule.

Diesel Technology

DEGREE - DIESEL TECHNOLOGY

CERTIFICATE - DIESEL DRIVE TRAIN/BRAKES/ SUSPENSION/STEERING/ELECTRICAL ELECTRONIC SYSTEMS

CERTIFICATE - DIESEL ENGINE & ELECTRICAL ELECTRONIC SYSTEMS

CERTIFICATE - DIESEL HYDRAULICS PREVENTATIVE MAINTENANCE

The Diesel Technology Program is a NATEF/ASE Certified Program.

Diesel Equipment Technology is certified by ASE (Automotive Service Excellence) as a Medium/Heavy Duty Truck Training Program. This assures that the curriculum follows the stringent standards identified by NATEF (National Automotive Technicians Education Foundation). BTC has one of only three ASE certified training programs in Washington State.

The AAS degree program combines current technology in the classroom and computer lab, with self-paced instruction and practicum/shop experience. The Caterpillar Basics Library is used in a modern 24 station computer lab as an important component in this program. This is just one of the enhancements as a result of a recent facility renovation of over one million dollars. Modules in Electrical/Electronics, Hydraulics, Failure Analysis, and Diesel Engines are included in a self-paced CD-ROM format. A Clayton 1000 HP dynamometer is utilized in engine testing with computer diagnostics for understanding of modern fuel and control systems. Notebook computers and engine simulators are used in conjunction with the dynamometer.

Program content follows the ASE areas of Electrical/Electronics, Preventive Maintenance, Brakes, Steering/Suspension, Drive Train, and Diesel Engines, plus modules in welding and hydraulics. Great emphasis is given to leading edge technologies in the diesel field. The program emphasizes the development of appropriate work habits and attitudes, leadership, interpersonal communications and teamwork skills, customer service competencies, as well as the technical skills necessary for employment. Students will be required to participate in work-based learning where they will be working in an actual shop under the guidance of experienced technicians and the instructor. They may be employed in the transportation, construction, marine, agricultural, public transportation, and equipment rental industries.

PROGRAM OUTCOMES: Graduates will use appropriate clothing and protective gear and practice ergonomically correct strategies/technologies to safeguard against injuries in the workplace. They will read and interpret a variety of schematics from a variety of sources to repair diesel equipment; troubleshoot and repair common problems using appropriate testing equipment, procedures and information systems; act responsibly and ethically as an employee by being punctual, adhering to company policies and interacting positively and appropriately with co-workers, supervisors and customers; research, train and stay current with new and emerging heavy equipment technologies; and review, interpret and convey written, verbal and graphic information to communicate effectively with co-workers, management and customers.
APPLICATION & REGISTRATION: This program requires an admissions process.

Students enroll in the program at the start of fall, winter, or spring quarter. Other enrollment times may be available by instructor permission. Part-time enrollment may be available during the morning section with instructor permission. Students must have a valid driver’s license and be insurable to participate in Applied Diesel Concepts courses. Safety glasses (required), tools, coveralls, and work boots are not supplied and are the students’ responsibility. A tool list is available from the instructors. It is advisable that students be 18 years of age by the start of the second quarter for the work-based learning component.

SEQUENCE AND SCHEDULE: You may enter Diesel Equipment Technology fall, winter or spring quarter. For your first quarter you will enroll in Trans 101, 102, and 103 plus at least one Gen Ed class (PSYC 111, COM 170 or MATH 100). The preferred sequence is to take PSYC 111 first, then COM 170, and lastly MATH 100. While taking the Transportation Core during your first quarter, we recommend that you register into a morning MWF or an evening Gen Ed class so we can schedule your afternoons for lab sessions. Lab sessions will be scheduled Tuesday and Thursday afternoon. Students who start winter quarter will need to take other Gen Ed class in spring quarter, outside of the normal Diesel courses. Students who wish to take one Diesel course per quarter must start in fall quarter in Trans 101, Basic Transportation Service & Systems I.

Full-time students will generally finish in seven quarters; summer is required.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree, an Associate in Applied Science - Transfer degree or a certificate upon completion and verification of all requirements and standards.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

Education

DEGREE - PROFESSIONAL TECHNICAL EDUCATION
CERTIFICATE - CAREER & TECHNICAL EDUCATION

The Professional Technical Education Associate in Applied Sciences Transfer degree will provide a structured degree pathway in education for post-secondary professional-technical educators, providing them with an educational continuum toward a baccalaureate in education. The degree structure—designed around the Washington State Skill Standards for Professional-Technical College and Customized Trainers—will provide leadership and technical skills beyond those required for professional-technical certification.

The curriculum for this program is entirely competency based, with skills and their associated tasks mirroring industry and Skill Standards requirements. The curriculum is designed as a series of discreet extended learning courses, thusly, is not offered as a full-time immersion program. Students are rated according to their mastery of these skills/tasks at pre-determined industry standards of performance.

This program is designed specifically for post-secondary professional-technical educators who are employed on a 50 percent or greater basis. Approval of the Dean overseeing the education courses is required.

PROGRAM GOAL: The program will provide students with a blend of academic, professional-technical teaching, and experiential learning opportunities needed to be an effective faculty member and professional-technical teacher.

PROGRAM OUTCOMES:
- Facilitate well-organized learner-centered instructional activities and lessons that actively engage students and promote achievement of student learning outcomes;
- Create quality instructional materials in support of curriculum outcomes and diverse learning styles;
- Design authentic, appropriate assessment tools as part of the learning process linked to student learning outcomes;
- Analyze instructional strategies implemented in career and technical programs;
- Analyze leadership styles, strategic planning, program development using a DACUM, and total quality management;
- Manage and maintain an effective learning environment; and
- Perform faculty administrative functions.

APPLICATION & REGISTRATION: This program requires an admissions process.

Students may enroll in this degree or certificate program at the start of each quarter. Admissions is offered on a space available basis. Approval of the Dean overseeing the education courses is required. Students may enroll full-time or part-time.

SEQUENCE AND SCHEDULE: Students meet with and are advised by their program advisor to plan and schedule classes. Some classes are sequential and have pre-requisites. A schedule of course offerings can be obtained from program advisors.

It is estimated that a student can complete the degree requirements in six quarters and the certificate program in three quarters. Not all courses are offered every quarter so completion times may vary depending on which quarter the student first enrolls.

DEGREE REQUIREMENTS: Students may apply for the certificate upon completion and verification of all requirements and standards.

Students may apply for an Associate in Applied Science-Transfer degree upon completion and verification of all requirements and standards. The application process is listed on page 74. Students must maintain a 2.0 grade point average with no course grade below C (2.0) to earn a degree.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

## Electrician

**DEGREE - ELECTRICIAN**

The Electrician program prepares students for the electrical industry, including residential, industrial, and commercial jobs. The AAS degree program emphasizes the development of electrician skills along with communication and interpersonal skills to be successful at the workplace. The curriculum starts with basic math and electrical theory and advances to complex systems building upon the knowledge and skills acquired throughout the program. Classroom instruction and practicum/lab instruction provide opportunities for students to achieve the competencies to maintain existing electrical systems, new electrical construction and other electrical jobs.

Graduates applying to the Department of Labor and Industries for a specialty electrical license can be credited with supervised work experience per RCW 19.28.191 and WAC 296-46B-940 as follows: Residential (02) - 1,752 hours of work experience; Nonresidential Maintenance (07) - 1,752 hours of work experience and Equipment Repair (07E) - 1,000 hours of work experience. According to Department of Labor and Industries guidelines, this credit may be applied towards the necessary hours of work experience for only one of the licenses listed above.

**PROGRAM OUTCOMES:**

Successful program graduates will:

- Design, analyze, and diagnose basic electrical systems through the application of electrical theory fundamentals;
- Ensure safe work practices and installations through compliance with national, state, and local regulations and industry standards including the National Electrical Code and WAC/RCW;
- Use proper tools and test equipment to construct and maintain power, lighting, signaling, and control systems in residential, commercial and industrial settings;
- Install new and modify existing electrical systems and components utilizing appropriate wiring methods and materials;
- Estimate costs of labor and material for small electrical projects;
- Exhibit professional and personal conduct and appearance appropriate to the workplace; and
- Communicate clearly with team members, supervisors, and others in the workplace, effectively using oral communication as well as drawings, blueprints, and other documents.

**APPLICATION & REGISTRATION:** This program requires an admissions process.

Students may enroll in the Electrician program at the start of each quarter on a space available basis.

**SEQUENCE AND SCHEDULE:** The Electrician student will complete a specific course requirement sequence based on date of enrollment. Students will be advised by the program instructor regarding sequence and schedule of classes. Currently, classes are held in two separate cohorts from 8:00am to 3:00pm pm and 12:00pm to 6:30pm.

**DEGREE REQUIREMENTS:** Students may apply for an Associate in Applied Science degree or Associate in Applied Science-Transfer degree upon completion and verification of all requirements and standards.
Electro Mechanical Technology

DEGREE - ELECTRO MECHANICAL TECHNOLOGY

CERTIFICATE - CAREER & TECHNICAL TECHNOLOGY

The Electro Mechanical Technology (EMTEC) program prepares students with the knowledge and skills required for success as an industrial maintenance technician (often referred to as industrial electricians, millwrights, or stationary engineers). The EMTEC graduate will have a broad range of knowledge and skills as they work with mechanical, electrical and electronic systems. This program will appeal especially to students who want a broad knowledge about various industrial processes including electricity, hydraulics, pneumatics, engineering graphics, welding, boilers, etc. The program uses hybrid online instruction, classroom lectures and labs. Graduates will have the opportunity to work in a variety of industrial settings including advanced manufacturing operations, particularly petrochemical, refining, pharmaceuticals, chemical, value-added wood products, pulp and paper, power generation and utilities, wastewater treatment facilities as well as in smaller facility maintenance. The program is offered in late afternoon and evening classes. The program consists of common core courses with two options in Electrical or Mechanical maintenance with some elective courses.

Program Outcomes: Graduates will demonstrate competency in the fundamentals of electrical safety, electrical and electronic repair, basic hydraulics and pneumatic circuits, programmable controls, mechanics and welding. Demonstrate competency in oral and written communication and interpersonal relations.

Application & Registration: This program requires an admissions process.

Note: This program contains advanced mathematics that may require preparatory coursework. Students may enroll in the Electro Mechanical Technician program at the start of each quarter.

Sequence and Schedule: The EMTEC student will complete a course requirement sequence based on date of enrollment. Students will be advised by the program instructor regarding sequence and schedule of classes.

Many classes will have a combination of in class and hybrid online content or simulation. Generally, classroom instruction is offered in the afternoon & evening.

Degree Requirements: Students may apply for an Associate in Applied Science or Association of Applied Science - Transfer degree upon completion and verification of all requirements and standards and a one year certificate.

Degree Students must complete general education requirements (15-20 credits) and quarters one and two (38 credits), plus a minimum of 60 additional degree credits.

Certificate Students must complete general education requirements (15 credits) and quarters one and two (38 credits), plus a minimum of 12 additional degree credits.

**Electronics - Biomedical Equipment**

**DEGREE - ELECTRONICS - BIOMEDICAL EQUIPMENT**

The Electronics-Biomedical Equipment Technician program prepares students for employment as technicians in the biomedical equipment industry. Biomed equipment technicians work in hospitals and clinics repairing, calibrating and performing preventative maintenance on a variety of medical equipment. Biomed techs may also be field service technicians, traveling to clinics and hospitals, or be involved in the manufacturing process. Training in the growing NANO/Micro Systems field is included.

**PROGRAM OUTCOMES:** Graduates will demonstrate competency in electrical/electronic safety, direct current, alternating current, basic test equipment, semiconductors, op-amps, digital systems, and troubleshooting along with competency in biomedical equipment technology.

**APPLICATION & REGISTRATION:** This program requires an admissions process. Note: This program contains advanced mathematics that may require preparatory coursework.

Students may enroll in the Electronics-Biomedical Equipment Technician program at the start of fall, winter or spring quarter or at other times with instructor permission.

**SEQUENCE AND SCHEDULE:** Students must complete courses in a specific sequence based on date of program entry. Program instructors will advise students regarding the scheduling of required courses.

**DEGREE REQUIREMENTS:** Students may apply for an Associate in Applied Science degree or an Associate in Applied Science - Transfer degree upon completion and verification of required courses and standards. Students may successfully challenge CAP 101, Introduction to Computers by passing the three IC3 Certification tests.

**ONLINE LEARNING:** Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

**Electronics - Computer Systems**

**Degree - Electronics - Biomedical Equipment**

The Electronics-Computer Systems Technician program prepares students for employment as technicians in the computer industry. Computer systems are a vital part of nearly every business. This degree option offers A+, NET+, and Cisco Certified Network Administrator training. By gaining a solid foundation in electronics, including Electronic Communications and NANO Technology, graduates become well-rounded computer systems technicians.

**Program Outcomes:** Graduates will demonstrate competency in electrical/electronic safety, direct current, alternating current, basic test equipment, semiconductors, op-amps, digital systems, and troubleshooting along with competency in computer systems technology.

**Application & Registration:** This program requires an admissions process. Note: This program contains advanced mathematics that may require preparatory coursework.

Students may enroll in the Electronics-Biomedical Equipment Technician program at the start of fall, winter or spring quarter or at other times with instructor permission.

Sequence and Schedule: Students must complete courses in a specific sequence based on date of program entry. Program instructors will advise students regarding the scheduling of required courses.

**Degree Requirements:** Students may apply for an Associate in Applied Science degree or an Associate in Applied Science - Transfer degree upon completion and verification of required courses and standards. Students may successfully challenge CAP 101, Introduction to Computers by passing the three IC3 Certification tests.

**Online Learning:** Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

Electronics - Manufacturing

The Electronics-Manufacturing Technician program prepares students for employment as technicians in the manufacturing industry. Manufacturing is a vital part of the U.S. economy and highly skilled, trained technicians are recruited by many companies. The Electronics-Manufacturing Technician program offers training in NANO/Micro Systems, Robotics, Lasers, Fiber Optics, and Electronic Communications.

PROGRAM OUTCOMES: Graduates will demonstrate competency in electrical/electronic safety, direct current, alternating current, basic test equipment, semiconductors, op-amps, digital systems, and troubleshooting along with competency in manufacturing technology.

APPLICATION & REGISTRATION: This program requires an admissions process. Note: This program contains advanced mathematics that may require preparatory coursework.

Electronics - Manufacturing

DEGREE - ELECTRONICS - MANUFACTURING

Electronics - Telecommunications

The Electronics-Telecommunications Technician program prepares students for employment as technicians in the telecommunication industry. Communication systems (wired, wireless, data, text, VOIP, etc.) are critical in today's business world. Technicians who understand the many protocols and technologies are in demand. Graduates may work for a local telephone company or as a field service technician for a national company. Telecommunications technicians play an important role in the installation of fiber optics equipment and other high tech system components.

PROGRAM OUTCOMES: Graduates will demonstrate competency in electrical/electronic safety, direct current, alternating current, basic test equipment, semiconductors, op-amps, digital systems, and troubleshooting along with competency in telecommunications technology.

APPLICATION & REGISTRATION: This program requires an admissions process. Note: This program contains advanced mathematics that may require preparatory coursework.

Students may enroll in the Electronics-Biomedical Equipment Technician program at the start of fall, winter or spring quarter or at other times with instructor permission.

**DEGREE - EMT - PARAMEDIC**

The EMT-Paramedic program is designed to meet the demand of emergency medical services with advanced life support skills, primarily in the area designated by the Department of Health as the North Region. This is an exciting career opportunity that will prepare men and women to function as an integral part of the emergency services team of healthcare practitioners, providing immediate advanced life support care to the patient in a pre-hospital setting. The EMT-P is under the supervision of the designated Medical Program Director and specific county advanced life support protocols.

The program prepares students to develop expertise in the theory and application of advanced life support and combines knowledge of human anatomy, pharmacology, airway/respiratory management, cardiology, various medical emergencies, trauma, psychology and sociology. Additionally, the program prepares competent entry-level EMT-Paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

Students learn how to implement various advanced life support techniques in a pre-hospital setting under the guidance of a physician. Students will spend a significant portion of the training program in clinical and field practice, coordinated by the instructor.

Clinical practice will take place mainly in regional hospitals in the OR, ED, and other various specialized areas. Field sites will be in areas as allowed by other ALS Provider agencies and as close to their home response area as possible. Students are responsible for providing their own transportation to clinical and field sites.

Students, before sitting for the National Registry Exam, must complete and pass all requirements during an intense and comprehensive Field Internship, which prepares them for success in the pre-hospital field.

**PROGRAM OUTCOMES:** Graduates will demonstrate field competency in emergency response in the pre-hospital setting with basic and advanced life support skills, communication skills, and personal/professional responsibility as a member of an emergency response team, EMT-Paramedic knowledge and critical thinking. Graduates will demonstrate entry level competence on the National Registry Exam for EMT-Paramedics (NREMTP).

**APPLICATION & REGISTRATION:** This program requires an admissions process.

To be eligible for admission to the Bellingham Technical College EMT-Paramedic program, applicants must meet college college admission requirements and complete a Criminal History Background Check verifying that there is not a history of child or adult abuse, financial exploitation of vulnerable adults, or other crimes against persons as defined in RCW 43.43.

As part of the application process or prior to registration for the first quarter of EMT-Paramedic, students must provide evidence of high school graduation or equivalent.
Along with an application to the EMT-Paramedic program, and prior to enrollment in the first quarter of study, the student is required to:

- Demonstrate satisfactory health status by a physical examination within the preceding year, including current immunizations.
- Complete a urine test for prohibited substances. The test must screen for the following five drugs: amphetamines, cocaine, marijuana, opiates, and PCP.
- Possess and maintain a current EMT-B card. Minimum State requirement is to be an EMT-Basic for a minimum of one year.
- Show proof of personal health insurance (student accident insurance is available)
- Be twenty-one (21) years of age prior to the start of the coursework. A photocopy of Washington State Driver's License is required as proof of age.
- In addition to the above required documentation, students must also submit transcripts, with a minimum 2.0 GPA and the following pre-requisites:
  - BTC EMT-Paramedic:
    - General Education - AAS
    - Oral and Written Communications (COM 170)
    - Occupational Math (MATH 100)
    - Interpersonal & Organizational Psychology (PSYC 111)
    - General Education - AAS-T
    - English Composition (ENGL& 101)
    - Pre-Calculus I (MATH& 141)* or Math in Society (MATH& 107)*
    - General Psychology (PSYC& 100)

**SEQUENCE AND SCHEDULE:** The EMT-Paramedic is five to six quarters long and the student will complete a specific course requirement sequence. Students will be advised by the program instructor regarding sequence and schedule of classes.

**DEGREE REQUIREMENTS:** Students may apply for an Associate in Applied Science degree an Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards.

Students must maintain a 2.0 grade point average with no course below C (2.0) to earn a degree or certificate.

**Fisheries Technology**

**DEGREE - FISHERIES TECHNOLOGY**

**CERTIFICATE - FISHERIES RESOURCES**

The Fisheries Technology program prepares students for employment in a variety of fisheries occupations with emphasis on fish culture and aquaculture. The program offers an Associate in Applied Science degree or a certificate in Fisheries Resources.

The Fisheries Technology program operates the Whatcom Creek Hatchery at the Maritime Heritage Park in Bellingham. The hatchery provides an actual work site for the instructional “laboratory.” This complements the classroom theory and related instruction components. The Fisheries Technology program operates in partnership with several regional and statewide industries and agencies.

**PROGRAM OUTCOMES:** Graduates will demonstrate competency in hatchery methods, and apply appropriate techniques to spawn, incubate, rear and release fish. They will utilize proper use of tools, equipment and protective devices to safeguard against injury to self, others and workplace facilities; and will act responsibly and ethically as an employee by being punctual, adhering to company policies and interacting positively and appropriately with co-workers and supervisors. Graduates will receive, interpret, and convey written, verbal, and graphic information to communicate effectively with co-workers, management, and the general public; compute, calculate, and convert standard and metric measurements for the purposes of disease treatment and prevention, and rearing...
of fish; and observe and comply with environmental laws and regulations related to fish rearing and the use and disposal of chemicals and drugs. They will use current and emerging computerized systems and software to operate equipment, calculate results, keep records, and enter data on proper forms and records and will attend industry workshops and conferences to stay current with new and emerging research, equipment, and techniques.

**APPLICATION & REGISTRATION:** This program requires an admissions process. Students may enroll in the Fisheries Technology program at the start of the fall or winter quarter and at other times during the year with instructor permission. Admission is offered on a space available basis. Students may enroll full-time or part-time. Part-time enrollment requires instructor permission.

**SEQUENCE AND SCHEDULE:** Course requirements are scheduled for specific quarters. Students will be advised by the program instructor regarding sequence and schedule of classes. Generally, classroom instruction is held during morning classroom hours with most lab activities occurring in the afternoon.

**DEGREE REQUIREMENTS:** Students may apply for an Associate in Applied Science degree, an Associate in Applied Science - Transfer degree or a certificate upon completion and verification of all requirements and standards.

**ONLINE LEARNING:** Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

* This degree program is available entirely online for people currently employed in the fish culture industry. Contact the instructor, Earl Steele for details.

Heating, Ventilation, Air Conditioning & Refrigeration Technology

DEGREE - HEATING, VENTILATION, AIR CONDITIONING & REFRIGERATION TECHNOLOGY

Student Chapter of the American Society of Heating, Refrigerating & Air Conditioning Engineers (ASHRAE)

The Heating, Ventilation, Air Conditioning & Refrigeration program prepares students for employment as technicians in the design, operation, service, repair, installation and sales of these systems and equipment. The program combines theory with extensive practical hands-on training designed to simulate the actual work environment and skills needed to excel in this challenging field. Labs afford the student the opportunity to install, repair and/or operate a wide variety of actual field equipment, such as commercial coolers; warm air, hydraulic, electric, gas, and oil furnaces; package and split system A/C; rooftop commercial gas packs; refrigerated sea water systems; liquid chillers; industrial ice machines; centrifugal chillers; cascade refrigeration; pneumatic controls; and direct digital controls.

Prospects for employment are excellent, with high paying jobs. Students learn CFC refrigerants, Indoor Air Quality requirements and increased use of computerized building controls. Employers in this industry include heating contractors, refrigeration contractors, controls contractors, commercial food storage facilities, property management firms, wholesale vendors, hotels, schools, industrial processing plants, and many others.

The AAS degree emphasizes the development of technical skills as well as diagnostic, problem solving and customer service skills.

Graduates of the AAS Degree can apply to the Department of Labor and Industries to become an HVAC/Refrigeration (06A) specialty electrician. Graduates will demonstrate knowledge and application of E.P.A. regulations and procedures applied to refrigeration and environmental awareness and will successfully complete and obtain E.P.A. Type 1 and 2 certification under section 608 for refrigerant usage.

PROGRAM OUTCOMES: Graduates will demonstrate knowledge and application of E.P.A. regulations and procedures applied to refrigeration and environmental awareness and will successfully complete and obtain E.P.A. Type 1 and 2 certification under section 608 for refrigerant usage. Graduates will demonstrate competency in Light Commercial Heating and Air Conditioning and successfully complete the A.R.I. competency in Light Commercial Heating and Air Conditioning.

APPLICATION & REGISTRATION: This program requires an admissions process.

Students may enroll in the Heating, Ventilation, Air Conditioning & Refrigeration program on a space available basis at the start of fall and spring quarters. Part-time enrollment is available for the morning section only with instructor permission.

SEQUENCE AND SCHEDULE: Course requirements are scheduled for specific quarters. Students will be advised by the program instructor regarding sequence and schedule of classes.

Generally, classroom instruction is held during morning classroom hours with most lab activities occurring in the afternoon. Students must complete MATH 100, PSYC 111, and COM 170 prior to entering the second year.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree an Associate in Applied Science – Transfer degree upon completion and verification of all requirements and standards.

To be eligible for the Associate in Applied Science degree, students must pass the ARI Commercial Refrigeration and Light Commercial A/C and Refrigeration certification tests. Students must also hold EPA certification for at least TYPE I and II Section 608 of the Clean Air Act.

PROFESSIONAL TECHNICAL EDUCATION
Human Resource Management
CERTIFICATE - HUMAN RESOURCE MANAGEMENT

The management of Human Resources has continued to be a growing field. With the increasing legal issues involved in personnel and the need for companies to carefully select and maintain their employment force, this occupation field will continue to grow in jobs and importance. The Human Resource Management certificate program is an evening program for people who are currently working in an office that has human resources/personnel responsibilities, individuals who wish to refine existing skills and move up within the organization, individuals wanting to move into the field of Human Resources, employees or managers who are assigned human resource responsibilities as part of an existing job, and/or small business owners who need human resource information to operate their company effectively.

PROGRAM OUTCOMES: Graduates will demonstrate the ability to apply legal principles and human resource practice in the role of human resource manager, assistant or other support role.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering in HRM 201 Human Resource Management or other Human Resource Management courses with previous experience and instructor approval on a space available basis. It is recommended that students have excellent basic academic skills. A program brochure is available at the Counseling and Career Center.

For those not seeking to obtain the Human Resource Management certificate, courses can be taken individually and the prerequisite HRM 201 is suggested, but not required.

SEQUENCE AND SCHEDULE: One to three courses are offered quarterly in the evening, generally from 6:00pm to 9:00pm. HRM 201 or previous experience with instructor permission is the prerequisite for all HRM courses beyond HRM 201. Students may complete the program in one to two instructional years. See a Quarterly Schedule for specific information.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

HUMAN RESOURCE MANAGEMENT
Certificate

Hypnotherapy
CERTIFICATE - HYPNOTHERAPY

The Hypnotherapy program instructs students in the process of using hypnosis techniques in a professional setting for such purposes as pain management, behavior modification, and many other psychological and social concerns clients may have. The Hypnotherapy program also extensively covers the legal and ethical issues involved. Along with private practice, hypnotherapists also work in a variety of healthcare settings, as doctors, dentists, nurses, psychologists and psychiatrists, just to name a few.

PROGRAM OUTCOMES: Completers of this program will be able to apply legal and ethical issues of healthcare workers and use hypnosis techniques in a professional setting for such purposes as pain management, behavior modification, and many other psychological and social concerns clients may have.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering in the Basic Hypnosis course in order to begin the sequence on a space available basis. It is recommended that students have good basic academic skills. A program brochure is available at the Counseling and Career Center.

SEQUENCE AND SCHEDULE: Courses are held in the evening, generally from 6:00pm to 9:00pm one evening per week. Courses must be taken in sequence: HYPN 101, HYPN 102, and HYPN 103. See a Quarterly Schedule for specific course offered.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

HYPNOTHERAPY
Certificate
HLTH 103 CPR: Adult Heartsaver 0.5
HLTH 131 HIV/AIDS For Counselors 0.5

Instrumentation & Control Technology

DEGREE - INSTRUMENTATION & CONTROL TECHNOLOGY

The Associate in Applied Science degree in Instrumentation & Control Technology prepares students for employment to maintain, repair and troubleshoot instrumentation and control systems in such industries as petroleum refining, pulp and paper, pharmaceuticals, aluminum, food processing, chemical manufacturing, semiconductor manufacturing, and power generation. A combination of theory and hands-on training offers a variety of modern process measurement and control instrumentation with actual working processes and computer simulations. The program applies math and physics and duplicates conditions and industry standards that technicians experience. Approximately half of the instructional time is laboratory experience to develop knowledge and skills with electronic circuits, test equipment, individual instruments, multiple instrument control systems, and practical computer applications.

BTC’s Instrumentation & Control Technology program is an active member of the Industrial Instrumentation & Controls Technology Alliance (iicta). This is an organization with educational and industry partners across the nation. The IICTA’s mission is to “promote the partnership of education, industry and businesses in developing activities to assure the existence of a sufficient quantity of highly qualified instrument & controls technicians who are highly sought after by the industry.” These activities include: setting educational standards, promote networking, provide funding for scholarships and programs.

PROGRAM OUTCOMES: Graduates will demonstrate basic knowledge and critical thinking in the field of Instrumentation and Control; be able to design, build, and test functioning AC, DC, semiconductor, analog, and digital electronic circuits; demonstrate basic troubleshooting skills and apply basic computer application skills.

APPLICATION & REGISTRATION: This program requires an admissions process. Note: This program contains advanced mathematics that may require preparatory coursework. Students may enroll in the Instrumentation & Control Technology program at the start of fall quarter and at other times with instructor permission. Admission is offered on a space available basis. Part-time enrollment is available with instructor approval.

SEQUENCE AND SCHEDULE: The Instrumentation & Control Technology student will complete a specific course requirement sequence based on date of enrollment. Students will be advised by the program instructor regarding sequence and schedule of classes.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree an Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards. Students must maintain a 2.0 grade point average with no course (including related instruction) below C- (1.7) to earn the degree.

Leadership Management
CERTIFICATE - LEADERSHIP MANAGEMENT

Good leaders are developed, not born. Everyone is placed in a position of responsibility or a leadership role at various times in his or her life. Developing leadership qualities in yourself, coworkers, and/or subordinates is a desired outcome, but not one without frustration. This short certificate, Leadership Management, was created for anyone who desires to develop a more effective leadership style, whether in themselves or those with whom they work.

PROGRAM OUTCOMES
- Completers will have increased leadership skills and gain the following:
  - Clear understanding of the difference between leadership and management;
  - Clear understanding of the link between leadership behavior and bottom-line results;
  - Acceptance of personal accountability for results;
  - Ability to effectively lead in a changing, turbulent environment;
  - Confidence and courage to lead in ambiguous situations;
  - Development of a personal plan for on-going leadership growth and development;
  - Awareness of leadership theory and exposure to leading-edge leadership practices;
  - Passion for leadership learning;
  - Understanding of personal philosophy of leadership; and
  - Full commitment to the organization.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering for the required evening courses on a space available basis. It is recommended that students have good basic academic skills. A program brochure is available at the Counseling and Career Center.

SEQUENCE AND SCHEDULE: Courses are held in the evening, generally from 6:00pm to 9:00pm. Some courses may be offered in the afternoon. See a Quarterly Schedule for specific information.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

Legal Administrative Assistant
DEGREE - LEGAL ADMINISTRATIVE ASSISTANT
CERTIFICATE - LEGAL ASSISTANT

The Legal Administrative Assistant Program prepares students to work in law firms, corporations, real estate, and law-related government offices as legal assistants, receptionists, or clerks. Legal terminology, legal document preparation, and legal office procedures, as well as word processing and computer applications are emphasized to prepare students for today's high-tech law offices. Successful students will complete an internship and are eligible to join the International Association of Administrative Professionals (IAAP). The program offers a Legal Administrative Assistant Associate in Applied Science (A.A.S.) degree or a Legal Assistant Certificate.

PROGRAM OUTCOMES: Graduates will demonstrate competency in touch keyboarding at 55 wpm on a 3 minute timing; along with 80% competency in business document formatting, proofreading, word processing, spreadsheets, presentation graphics, alphabetic and numeric filing, legal proofreading, legal terminology, legal keyboarding, and ten-key proficiency.

APPLICATION & REGISTRATION: This program requires an admissions process. Students may enroll in the Legal Administrative Assistant program at the start of each quarter. Admission is offered on a space available basis. Students may enroll full-time or part-time.

SEQUENCE AND SCHEDULE: Students meet with their program advisor to plan and schedule classes. Many classes are sequential and have prerequisites. A schedule of course offerings can be obtained from the program advisor.

It is estimated that a full-time student can complete the certificate requirements in three quarters. The degree can take up to six quarters. Since not all courses are offered every quarter, completion times may vary depending on which quarter the student first enrolls.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree or an Associate in Applied Science - Transfer degree or a certificate upon completion and verification of all requirements and standards.

In order to earn a legal administrative assistant degree or certificate, students must maintain a 2.0 grade point average with no course grade below C (2.0). Students may successfully challenge CAP 101, Introduction to Computers, by passing the three IC3 certification tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

Mechanical Engineering Technology

DEGREE - MECHANICAL ENGINEERING
CERTIFICATE - MECHANICAL ENGINEERING DRAFTING

The Associate in Applied Science degree in Mechanical Engineering Technology is based on theory with specialized applications in manufacturing, process piping, structural detailing, and engineering drawing and design. Coursework provides multilevel training in Computer Aided Drafting (CAD) and solid modeling using specialized 3D graphics software. Knowledge of national drawing standards and common industry practices are acquired through instruction and class projects, providing the necessary background for transferring skills to specific industrial design projects.

A wide variety of companies employ graduates, including structural engineering companies, architectural firms, commercial and residential construction firms, petroleum refineries, equipment wholesalers/distributors, and numerous manufacturing industries such as: electronics, aircraft, industrial equipment, and wood products (e.g., truss, cabinet, door, and furniture manufacturers).

PROGRAM OUTCOMES: Graduates will develop a parametric solid model of an existing assembly or one of their own design, and then create a set of working drawings including exploded assembly views and dimensioned individual part drawings; demonstrate proficiency in using CAD software command functions to generate engineering drawing; create fully dimensioned orthographic and isometric CAD drawings (of various machine parts) that adhere to national standards and industry conventions; design and evaluate the stress, strain, and deflection levels of engineering components subjected to deformations, axial loads, and shear loads; apply static's principles including force equilibrium and force resultants to determine the member forces for structural elements that comprise trusses, machines, and frames; apply knowledge of various piping, fittings, connections, and process piping equipment (such as valves, pumps, tanks, etc.) to draft single line, double line, and isometric depictions of industrial piping systems and demonstrate the ability to understand and interpret structural steel framing plans and detail all structural steel beams for a single floor level according to AISC specifications.

APPLICATION & REGISTRATION: This program requires an admissions process. Note: This program contains advanced mathematics that may require preparatory coursework.

Students may enroll in the Mechanical Engineering Technology program at the start of the fall quarter on a space available basis. Part-time enrollment is available with instructor approval.

CAP 101 - Introduction to Computers is a required prerequisite for students to enroll in this program. Students may test out of this requirement by passing the three IC3 exams (Living Online, Computer Fundamentals, and Key Applications - Word, Excel and PowerPoint). These tests may be taken at BTC or any other CertiPort Testing Center.

SEQUENCE AND SCHEDULE: The Mechanical Engineering Technology student will complete a specific course requirement sequence. Program course work is structured such that each course is offered once per year during a specific quarter in a sequential order. Students will be advised by the program instructor regarding sequence and scheduling of classes. Generally, a full-time student will be enrolled for six (6) hours per day. Classes will be offered from 12:00 p.m. to 6:00 p.m.

DEGREE REQUIREMENTS: Students may apply for an (AAS) Associate in Applied Science degree or an (AAS-T) Associate in Applied Science - Transfer degree or a Mechanical Engineering Drafting Certificate upon completion and verification of all requirements and standards.
Medical Coding

CERTIFICATE - MEDICAL CODING

Prepare for a career in the rapidly expanding medical coding field. Medical Coding Specialists are professionals skilled in classifying medical data from patient records, generally in the hospital setting. These coding practitioners review patients’ records and assign numeric codes for each diagnosis and procedure. Coding accuracy is highly important to healthcare organizations because of its impact on revenues and describing health outcomes.

This program will prepare students for job opportunities in hospitals, physicians’ offices, insurance companies, extended care facilities, or other medical environments. Good opportunities exist for individuals who wish to combine their interest in health care with the other professional skills, including organizing, analyzing, and technically evaluating health records content for accuracy and completeness and assigning code numbers to diagnoses and procedures for indexing health data and processing claims. Students who successfully graduate from the program are eligible to take national medical coding exams for certification.

PROGRAM OUTCOMES: Graduates will complete with the requisite skills and knowledge of organizing, analyzing, and technically evaluating health records content for accuracy and completeness and assigning code numbers to diagnoses and procedures for indexing health data and processing claims.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering for HT 126 Fundamentals of Medical Terminology and BIO 105 Essentials of Anatomy & Physiology. It is recommended that students have good typing skills (50 wpm), English skills, and word processing skills. A program brochure is available at the Counseling and Career Center.

SEQUENCE AND SCHEDULE: Courses are in the evening and late afternoon. Students must take BIO 105, BIO 127, and HT 126 prior to taking remaining courses. Students should check the Quarterly Schedule for the course schedule.

DEGREE REQUIREMENTS: Student may apply for a certificate upon completion and verification of all requirements and standards.

Medical Coding & Billing Generalist
CERTIFICATE - MEDICAL CODING & BILLING GENERALIST

The Medical Billing and Coding Generalist program will prepare students for careers in the medical office. Students may find jobs in a variety of medical offices, insurance companies, and some hospitals. Coursework is taught using various teaching methods. Students will learn in both a structured learning environment, but will also be required to work independently. Students will gain a broad base of knowledge in general office skills, along with the required background in medical insurance billing and coding procedures.

Students who desire to seek employment only at hospitals are encouraged to take HT 250, Advanced Medical Coding since this is a generalist focus, where hospital based coding is more intensive.

PROGRAM OUTCOMES: Graduates will complete with the requisite skills and knowledge of organizing, analyzing, and technically evaluating health records content for accuracy and completeness and assigning code numbers to diagnoses and procedures for indexing health data and processing claims and complex billing procedures, based on various requirements of health plans and insurance companies.

APPLICATION & REGISTRATION: This program requires an admissions process.

Students may enroll in the Medical Billing and Coding Generalist program as full-time at the start of fall or winter quarters only. Those wanting part-time can enter at any quarter. Admission is offered on a space available basis. This is a three to four-quarter program.

SEQUENCE AND SCHEDULE: Students meet with and are advised by their program advisor to obtain the scheduled classes. Many classes are sequential and have pre-requisites. Students must complete BIO 105, BIO 127, and HT 126 prior to taking any coding or billing courses. The Medical Billing and Coding Generalist program is designed to be completed in three quarters.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

Students must maintain a 2.0 grade point average with no grade below C (2.0) to earn a degree or certificate. Students may successfully challenge CAP 101, Introduction to Computers by passing the three IC3 Certification tests. There is a fee to take these tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

Medical Insurance Billing
CERTIFICATE - MEDICAL INSURANCE BILLING

The Medical Insurance Billing program will prepare students for employment in medical clinics, offices, and other medical centers preparing patient bills for submission to insurance companies.

PROGRAM OUTCOMES: Graduates will be able to demonstrate with accuracy and timeliness, the medical office skills to prepare preparing patient bills for submission to insurance companies. Students will also effectively manage patient accounts for billing and requirements of various health plans and submittal forms.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering for HT 126 Fundamentals of Medical Terminology and BIO 105 Essentials of Anatomy & Physiology. It is recommended that students have good typing skills (45 wpm), English skills, and word processing skills. (Students who need work in these areas, should take CAP 101 - Introduction to Computers). A program brochure is available at the Counseling and Career Center.

SEQUENCE AND SCHEDULE: Courses are offered in the afternoon or evening, depending on the quarterly schedule. Students must complete BIO 105 and HT 126 prior to taking the remaining courses. See a Quarterly Schedule for specific course information.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

TOTAL: (Approx. 4 quarters) 30
Medical Receptionist

CERTIFICATE - MEDICAL RECEPTIONIST

The Medical Receptionist certificate prepares students for careers in the medical field. Students may find jobs in medical offices, hospitals, or insurance companies. Coursework is taught using multiple teaching methods. Students not only work independently but also learn in structured class sessions. Emphasis is placed on hands-on learning and application. Skills needed for success in today’s workforce are interwoven throughout the program. With the help of their faculty advisor, students declare their career goals when entering the program or after working through course material and further identifying their personal strengths.

PROGRAM OUTCOMES: Graduates will complete with the skills and competencies to operate medical office software and perform daily office functions.

APPLICATION & REGISTRATION: This program requires an admissions process. Students may enroll in the Medical Receptionist program at the start of each quarter. Admission is offered on a space available basis. Students may enroll full-time or part-time.

SEQUENCE AND SCHEDULE: Students meet with and are advised by their program advisor to plan and schedule classes. Many classes are sequential and have prerequisites. A tentative schedule of course offerings for new students may be obtained from admissions advisors. It is estimated a full-time student can complete the Medical Receptionist certificate requirements in two quarters. Because not all courses are offered every quarter, completion times may vary depending on which quarter the student first enrolls.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards. In order to earn a Medical Receptionist certificate, students must maintain a 2.0 grade point average with no course grade below C (2.0). Students may successfully challenge CAP 101, Introduction to Computers by passing the three IC3 Certification tests. There is a fee to take these tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

Medical Records Clerk

CERTIFICATE - MEDICAL RECORDS CLERK

The Medical Records Clerk program will prepare the students for entry level employment in a medical office working with medical records.

PROGRAM OUTCOMES: Graduates will demonstrate the skills and knowledge to work with medical records, both hard files and electronic.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering for the required afternoon/evening courses on a space available basis. It is recommended that students have good typing skills (45 wpm), English skills, and word processing skills. Students may enroll in the Counseling and Career Center.

SEQUENCE AND SCHEDULE: Courses are offered in the afternoon or evening, depending on the quarterly schedule. See a Quarterly Schedule for specific course information.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

Nursing Assistant

CERTIFICATE - NURSING ASSISTANT

This program is a prerequisite requirement for the Practical Nursing program. This course prepares students for the Nursing Assistant certification exam. Focus is on nursing skills to assist in the care of the long-term health care client. Included are discussions of legal/ethical issues of health care, communications skills, safety concepts, hygiene and restorative care, growth and development concepts, and monitoring body functions.

PROGRAM OUTCOMES

Basic Technical Skills:
Demonstrates basic technical skills, which facilitates an optimal level of functioning for the client, recognizing individual, cultural, and religious diversity.

Personal Care Skills:
Demonstrates basic personal care skills.

Mental Health and Social Service Needs;
Demonstrates the ability to identify the psychosocial characteristics of all clients, including persons with mental retardation, mental illness, dementia, Alzheimer’s Disease and related disorders.

Basic Restorative Services:
Incorporates principles and skills of restorative nursing in providing nursing care.

Client’s Rights and Promotion of Client’s Independence;
Demonstrates behavior that maintains and respects client’s rights and promotes client’s independence, regardless of race, religion, life-style, sexual preference, disease process, or ability to pay.

Communication and Interpersonal Skills:
Use communication skills effectively in order to function as a member of the nursing team.

Infection Control;
Use procedures and techniques to prevent the spread of microorganisms.

Safety/Emergency Procedures:
Demonstrates the ability to identify and implement safety/emergency procedures.

Rules and Regulations Knowledge;
Demonstrates knowledge of and is responsive to the laws and regulations that affect his/her practice, including, but not limited to, client abuse and neglect, client complaint procedures, workers right to know, and the Uniform Disciplinary Act.

APPLICATION & REGISTRATION: Program application and admission are not required. Students register for Nursing Assistant on a space available basis through registration. It is a State requirement that students speak and understand English at the level necessary for performing duties of a nursing assistant. (WAC 308-173-210 (1-9), 270 (2a)

Students must demonstrate satisfactory health status including current immunizations. Students must also complete a Criminal History Background Check verifying that the student does not have a criminal history of child or adult abuse, financial exploitation of vulnerable adults, or other crimes against persons defined in RCW 43.43 prior to clinical placement. The 2 step TB test PPD (tuberculin test) is required prior to the first day of class. PPD test must have been completed within the last 6 months. Bring documentation with you on the first day of class.
SEQUENCE AND SCHEDULE: The Nursing Assistant certificate takes approximately three weeks to complete. (See Quarterly Schedule for specific information.) Classes are offered two to three times per quarter. All class/laboratory sessions are conducted on the college campus. Clinical experiences are eight hours per day and conducted at local healthcare facilities during varied hours. Students must complete all theory and all nursing laboratory experiences prior to clinical experiences.

DEGREE REQUIREMENTS: Attendance is required; students must attend a required number of class and clinical sessions in order to receive a certificate. Additional fees are required for State testing and certification, which are not part of the Nursing Assistant program.

Office Assistant / Receptionist
CERTIFICATE- OFFICE ASSISTANT
CERTIFICATE -RECEPTIONIST

This program prepares students for careers in a variety of business and office settings. Students may achieve certificates in Office Assistant or Receptionist. Coursework is taught using multiple teaching methods. Students not only work independently but also learn in structured class sessions. Emphasis is placed on hands-on learning and application. Skills needed for success in today’s workforce are interwoven throughout the program. With the help of a program advisor, students declare their career goals when entering the program or after working through course material and further identifying their personal strengths. Program content requires the application of basic math, technical reading, and communication skills.

Office Assistant and Receptionist students are eligible to join the International Association of Administrative Professionals (IAAP).

PROGRAM OUTCOMES: Graduates will demonstrate competency in touch keyboarding at 40 wpm on a 3 minute timing with a 3 error limit; along with 80% competency in word processing, written business communication, business math, effective oral communication skills, office skills and procedures, and MS Windows.

APPLICATION & REGISTRATION: This program requires an admissions process. Students may enroll in this program at the start of each quarter. Admission is offered on a space available basis. Students may enroll full-time or part-time.

SEQUENCE AND SCHEDULE: Students meet with and are advised by their program advisor to plan and schedule classes. Many classes are sequential and have prerequisites. A schedule of course offerings can be obtained from program advisors. It is estimated that a full-time student can complete Office Assistant in three quarters and Receptionist in two to three quarters. Because not all courses are offered every quarter, completion times may vary depending on which quarter the student first enrolls.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards. In order to earn an Office Assistant or Receptionist certificate, students must maintain a 2.0 grade point average with no course grade below C (2.0). Students may successfully challenge CAP 101 Introduction to Computers by passing the three IC3 Certification tests.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes and Introduction to Computers may be taken entirely online.

Operations Management

DEGREE - OPERATIONS MANAGEMENT
CERTIFICATE - OPERATIONS MANAGEMENT

This competency-based Associate in Applied Science degree and Certificate program is designed for individuals currently employed on the operations side of a company. Completion of the program will prepare students for employment in a supervisory role in operations management.

The program is defined so that it integrates the needs of the company into the class projects. Students who are employed will select a mentor from their company. Others will select a mentor from any appropriate company. Working with their mentors, students will select courses to develop a program tailored to meet the needs of the company. All projects and practicums must be approved by the instructor. The courses must be selected from the courses provided in the program. Throughout the program, projects will be assigned. Working with their mentors, the students will define the scope of the project based on the mentor’s recommendations. The program has two practicums of 12 credits each, that are completed within a company and are project-focused.

PROGRAM OUTCOMES: Graduates will demonstrate competency in job planning, customer satisfaction, communication, team leadership, statistical process, critical thinking, and control concepts of strategic and quality management.

APPLICATION & REGISTRATION: This program requires an admissions process.

Students may enroll in the Operations Management program at the start of each quarter and should then meet with the program Dean to discuss a customized learning plan to meet their goals and objectives. Students who are not seeking a degree or certificate may also enroll for individual courses listed in the Quarterly Schedule and do not need to meet with the program Dean.

SEQUENCE AND SCHEDULE: The Operations Management program is customized to meet the students’ goals in professional development. Students choose courses in an order that best fits their personal career goals.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree and Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards.

ONLINE LEARNING: The Operations Management program is offered entirely online (with the exception of MATH& 107, COM 170, and PSYC 111). Students may schedule a time to meet with the instructor. Interaction with other students in the class will be online. To take this program, the student must have access to the Internet.

Paraeducator

CERTIFICATE - PARAEDUCATOR

The Paraeducator program prepares students for the occupation of paraeducator or instructional assistant. Based on the Washington State Paraeducator standards and the federal No Child Left Behind guidelines, the program provides students with education and skill building needed to work as effective members of instructional teams and provide learning assistance to children and youth. Core competencies covered in this program prepare paraeducators to effectively support and extend instruction and services, thereby increasing student learning. These core competencies revolve around the areas of instructional strategies, behavior management, and human growth and development. The program uses a multimedia approach, drawing on the expertise of local professionals and schools.

PROGRAM OUTCOMES:
Apply skills and knowledge based on the Washington State Paraeducator standards and the federal No Child Left Behind guidelines.

Work as effective members of instructional teams.

Provide learning assistance to children and youth.

APPLICATION & REGISTRATION: Program application and admission are not required. It is best for students to begin the program by registering for EDUC 131 Paraeducator I: Foundation of learning during fall quarter on a space available basis; however, students can begin winter or spring as well. It is recommended that students have good basic academic skills. A program brochure is available at the Counseling and Career Center.

SEQUENCE AND SCHEDULE: This program consists of four required courses that are offered in the evenings. Three of the courses include a 10-hour field experience. See a Quarterly Schedule for specific information.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

ONLINE LEARNING: Students will use some online tools and resources throughout the program.

TOTAL: (Approx. 3 quarters) 13
Parenting Education & Early Learning

CERTIFICATE - EARLY LEARNING CERTIFICATE

Parenting education is provided through the Child & Family Studies Department and is designed to educate and support individuals in their role as parents or caretakers of children. The program incorporates positive parenting skills with a child development knowledge base that promotes strong and healthy families. The program recognizes parenting as an important occupation that requires education, experience, knowledge, thought, energy, and concern. The various parenting courses offered provide instruction in the principles of child development and specific parenting skills and prepare individuals for their dual role of parent-wage earner.

The value of Parenting Education at BTC is that participation in the various parenting courses contributes to the development of children into healthy, mature adults. Course goals vary depending on the particular course but all include developing realistic age-level expectations from knowledge of stages of child behavior and growth; clarifying child rearing values, attitudes, and methods of child guidance; sharing support, consultation, and resource information concerning child rearing and family life; developing skills and practice in teaching children; and developing and/or increasing confidence in managing the demanding role of the parent in a changing society.

Courses for parents and others involved with children are offered each quarter, on campus and at locations throughout Whatcom County. Classes include Childbirth Preparation courses, Parent/Child courses where parents and young children attend class together, and Parenting Discussion courses.

Classes include:
- Childbirth Preparation courses
- Parent/Child courses where parents ad young children attend class together.
- Parenting Discussion courses

More information contact BTC at 360-752-8350 or www.btc.ctc.edu.
View the BTC Parenting Program video at http://www.btc.ctc.edu/Courses/Programs/ParentingEducation/ProgramMain.asp

Students who complete a combination of 12 credits of early learning/parenting courses can apply for the Early Learning certificate. Students need to complete a minimum of 2 credits in Early Learning discussion courses with a maximum of 10 credits in Adult/Child courses with a study of at least three different age groups. It is anticipated that it will take two years for students to complete this certificate.

Program Outcomes
- Plan safe, healthy environments to invite learning;
- Facilitate steps to advance children's physical and intellectual development;
- Create positive ways to support children's social and emotional development;
- Develop strategies to establish productive relationships with children and families;
- Observe and record children's behavior; and
- Apply principles of child growth and development.

APPLICATION & REGISTRATION:

PARENTING EDUCATION—A variety of parent/child and adult only parenting courses are offered each quarter. Program application and admission are not required. Participants can register for their course of interest. Half scholarships are available.

EARLY LEARNING CERTIFICATE—Program application and admission are not required. It is recommended that students have good basic academic skills. Students register for “CHFM” Parent/child or Parenting discussion courses and then let their instructor know that they want to work for credit. The student will then be transferred to a corresponding “ECED” course offered for credit.

SEQUENCE AND SCHEDULE:

PARENTING EDUCATION—Parent/child classes for parents of infants-preschoolers are offered quarterly and participants can continue on in those courses as the child ages. Participants can enter the courses at the beginning of any quarter.

EARLY LEARNING CERTIFICATE—This program consists of ten credits in adult/child courses that are offered weekdays and on some Saturdays—and 2 credits of adult only discussion courses that are offered weekday evenings and on line. See a Quarterly Schedule for specific information.

DEGREE REQUIREMENTS: Early Learning Certificate—Students may apply for a certificate upon completion and verification of all requirements and standards which include completion of a combination of 12 credits in early learning/parenting courses. Students need to complete a minimum of 2 credits in early learning/parenting discussion courses with a maximum of 10 credits in Adult/Child courses with a study of at least three different age groups. It is anticipated that it will take two years or more for students to complete this certificate.

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the adult discussion courses are now offered on line.

Personal Fitness Trainer
CERTIFICATE - PERSONAL FITNESS TRAINER

This program is designed for people currently employed or seeking employment in the fitness industry, or individuals wanting a better understanding of health and fitness.

Completion of the program will prepare you for jobs working in the fitness industry both in a fitness facility and as a private trainer. You will be introduced to the National Federation of Professional Trainers (NFPT). This certifying agency offers a career and employment placement program with a nationwide network to assist successful candidates with job placement in the fitness industry.

PROGRAM OUTCOMES: Graduates will be prepared to successfully pass the NFPT Personal Fitness Trainer Certification test. On a personal level, certification prepares an individual for a healthy lifestyle by giving them the tools to develop healthy lifestyle habits.

APPLICATION & REGISTRATION: Program application and admission are not required. Students may enroll in the program at the start of fall quarter. Instructor permission is required for program entry at other times.

SEQUENCE AND SCHEDULE: The Personal Fitness Trainer classes meet in the evening. Refer to the Quarterly Schedule for specific dates and times. One course is offered each quarter beginning with PFT 100 in fall quarter, followed by PFT 110 in winter, and PFT 120 in spring. With a fall quarter entry, students may complete the program in three consecutive quarters.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

ONLINE LEARNING: Students will use some online tools and resources throughout the program.

Practical Nursing
CERTIFICATE - PRACTICAL NURSING

Bellingham Technical College offers a program that prepares the student for licensure as a Practical Nurse. The program is approved by the Washington State Department of Health: Nursing Care Quality Assurance Commission. Students who complete the program will have met the educational requirements needed to apply for permission to take the National Council Licensure Examination for Practical Nursing (NCLEX-PN). The program is structured to facilitate lifelong learning skills, which students develop while assisting clients in meeting their healthcare needs.

PROGRAM OUTCOMES:
- Nursing Process: Assist in implementing the nursing process.
- Communication Skills: Communicate effectively with client, family, peer group, nursing team, and a multi-disciplinary team.
- Teaching: Assist in the health teaching of clients; Share knowledge and skills with peers.
- Personal and Professional Responsibilities: Demonstrate, in a structured setting, responsibility for own actions by using common techniques of problem solving and decision making to plan and organize own assignment; Demonstrate personal integrity and application of ethical and legal principles as they pertain to self, clients, and others; Demonstrate an understanding of own role in health care delivery system.

APPLICATION & REGISTRATION: This program requires an admissions process.

To be eligible for admission to the Bellingham Technical College Practical Nursing program, applicants must meet college admission requirements, including a Criminal History Background Check verifying that there is not a history of child or adult abuse, financial exploitation of vulnerable adults, or other crimes against persons as defined in RCW 43.43. Prior to enrollment into the practical nursing program, the student is to show proof that they have satisfactorily completed a state approved nursing assistant program.

After acceptance into the Practical Nursing program, and prior to clinical, the student is required to:
- Demonstrate satisfactory health status by a physical examination within the preceding six months, including current immunizations
- Possess and maintain a current CPR card. Minimum CPR required is Adult Heartsaver (3hr)
- Be 18 years of age
- Complete a urine test for prohibited substances prior to entering Nursing Foundations I.

ADVANCED PLACEMENT: Entry into the program with advanced standing is possible for students with previous nursing education. Students must meet all admissions criteria and should apply for advanced standing in writing and submit official transcripts at the time of request.
SEQUENCE AND SCHEDULE: Practical Nursing students begin by completing BIOL& 160 - General Biology with Lab, ENGL& 101 English Composition I, PSYC& 100 - General Psychology, and MATH 98 Elementary Algebra or MATH 99 Intermediate Algebra. Math must be completed before Anatomy & Physiology. They then move into the two-course Anatomy & Physiology sequence, BIOL&241/242, and NUR 105 Pharmacology. Upon completion of this coursework, students take the courses contained in Nursing Foundations I, II, and III. The Biology and Nursing Foundation courses are sequenced and must be taken in the order listed. Students must receive a minimum of 2.0 (C) to progress to the next sequential course. A grade of 3.0 (B) is required in NUR 132 to graduate. Not including general education courses, a full-time program of study is 3 quarters and a part-time program of study is 6 quarters. There are no summer quarter classes.

FULL-TIME PRACTICAL NURSING PROGRAM: Students may enter fall, winter, and spring quarters and should meet with an advisor to plan and schedule classes. Generally, classes are held between the hours of 8 am and 3 pm or 3 pm and 10 pm on campus. Nursing Practice NUR 102, 122, and 132 are the lab/clinical courses and are 8 hours a day; times vary depending on the clinical location and the shift.

PART-TIME PRACTICAL NURSING PROGRAM: Students may enter fall only and should meet with an advisor to plan and schedule classes. Hours vary depending on class schedules. Nursing Foundations courses are two or three days a week, generally between the hours of 8 am and 3 pm on campus. Nursing practice NUR 102, 122, and 132 are the lab/clinical courses and are 8 hours a day. Times vary depending on the clinical location and the shift. Students must be able to accommodate the various clinical schedules.

DEGREE REQUIREMENTS: Students may apply for a Practical Nursing certificate upon completion and verification of all requirements and standards. Students must receive a minimum of (C) 2.0 in all clinical courses and a (B) 3.0 in NUR 132 to receive the certificate.

ARTICULATION RN EDUCATION
CONTINUING WITH RN EDUCATION: REGISTERED NURSING: LPN TO RN
Students planning to continue their nursing education should meet with an admission advisor at BTC. If a student chooses a RN program at a different college, please contact the admissions office of the other college to determine all program prerequisites. The student that continues on to the RN education must take Math 99 - Intermediate Algebra.

TOTAL: (Approx. 9 quarters part-time) 99
The Precision Machining program provides students with employment skills in the computerized machining industry. The Associate in Applied Science degree includes CAD/CAM, theory, and related academic skills for continued success in the machine trades. In addition to the AAS degree the program offers a Machine Operator certificate, and a CNC Operator certificate. BTC is a Master CAM Training site with state-of-the-art Computer Numerical Control (CNC) machining equipment.

### Program Outcomes:
Graduates will demonstrate competency in their ability to operate machine shop equipment: lathes, mills, grinders and drills. Graduates will read and interpret blueprints per industry standards. Students will also demonstrate competency in CNC machine tool operation and programming and in CAM design and manufacturing.

### Application & Registration:
This program requires an admissions process.

Students may enroll in the Precision Machining program at the start of each quarter on a space available basis. Part-time enrollment is available for the morning section only with instructor permission.

### Sequence and Schedule:
Students will complete a specific course requirement sequence based on date of enrollment. Students will be advised by the program instructor regarding sequence and schedule of classes.

### Degree Requirements:
Students may apply for an (AAS) Associate in Applied Science degree or an (AAS-T) Associate in Applied Science - Transfer degree or certificate upon completion and verification of all requirements and standards.

Curriculum subject to change. For current information, visit us on the web at: [www.btc.ctc.edu](http://www.btc.ctc.edu)
Process Technology

DEGREE - PROCESS TECHNOLOGY

The Associate of Applied Science degree in Process Technology prepares students for employment as plant operators in such industries as petroleum refining, pulp and paper, food processing, chemical manufacturing, power generation, and waste water treatment.

The skills learned include monitoring and controlling processing equipment such as pumps, compressors, heat exchangers, distillation columns, boilers, furnaces; troubleshooting and problem solving; safety awareness, and testing product quality.

A combination of theory and hands-on training equips students with the required skills using Envision Computer Simulation modules; computer based equipment training modules, state of the art process technology labs, visits to local refineries and power plants, and student team projects. The program offers the necessary technical, scientific, academic, communication, and interpersonal skills learning opportunities to prepare students for entry level jobs. AAS certification.

The Process Technology program at BTC is designated as The Northwest Center of Excellence for Process and Control Technology within the Washington State Community and Technical College system. Currently this is the only such program in the western United States except California. The program is a member of the Center for Advancement of Process Technology (CAPT), an NSF funded Advanced Technology Center in Texas. Core instruction is based on standardized industry-based curriculum developed for CAPT.

PROGRAM OUTCOMES: Process Technology graduates will demonstrate a knowledge of the typical hazards found in process plants, basic PPE and requirements of regulating bodies regarding safety, health and environmental issues (OSHA, DOT, EPA). Example: Worker Right-to Know, PSM, RMP, RCRA, and Clean Air Act); be able to apply mathematics, physics and chemistry and the ability to link the knowledge to applications such as the nature of heat, chemical reactions, boiling points, vapor pressure, and electrical currents. Graduates will be able to demonstrate a knowledge of the typical organizational structures, economics and quality controls; fundamentals of refining and power generation processes; core functions and principles of operation of typical process industry equipment such as pumps, compressors, filters and dryers, lubricating systems, valves and piping systems, process plant instrumentation systems (from an operations viewpoint). They will know the principles and typical operation of electronic control systems (DCS). They will have the ability to operate simulated DCS process control systems effectively.

APPLICATION & REGISTRATION: This program requires an admissions process. Note: This program contains advanced mathematics that may require preparatory coursework.

Students may enroll in the Process Technology program on a space available basis at the start of fall, winter, or spring quarters.

Part-time enrollment is available with instructor approval.

SEQUENCE AND SCHEDULE: Students will complete a specific course requirement sequence based on date of enrollment. The instructor will advise students regarding sequence and class scheduling.

DEGREE REQUIREMENTS: Students may apply for an (AAS) Associate in Applied Science degree or an (AAS-T) Associate in Applied Science - Transfer degree or certificate upon completion and verification of all requirements and standards.

Project Management

Project Management is one of the hottest careers in the world today. As a project manager your ability to demonstrate best practices in project management, both on the job and through professional certification, is becoming the standard to successfully compete in today's fast-paced and highly technical workplace. After completion of Project Management Fundamentals, Microsoft Project levels 1 and 2, and Project Management management principles and software to a given project.

PROGRAM OUTCOMES: Completers will be able to apply project management principles and software to a given project.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering for the required courses on a space available basis. It is recommended that students have good basic academic skills.

SEQUENCE AND SCHEDULE: It is recommended that students take PMP 100, Project Management Fundamentals prior to taking the other PMP courses. Both MS Project Level 1, CAP 150 and MS Project Level 2, CAP 151 may be taken concurrently with PMP courses. Classes are held in the evening or on Fridays or Saturdays. See a Quarterly Schedule for specific dates and times.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

Radiologic Technology

DEGREE - RADIOLOGIC TECHNOLOGY

The Radiologic Technology program fulfills the educational objectives established by the American Society of Radiologic Technologists (ASRT) and competencies outlined by the American Registry of Radiologic Technologists. Program graduates are eligible to apply to take the national certification examination administered by the American Registry of Radiologic Technologists; successful completion of the registry examination results in national certification as a Registered Radiologic Technologist, RT (R) ARRT.

The program is planned with a regional focus in collaboration with Edmonds Community College, Everett Community College, North Seattle Community College, Peninsula College, Skagit Valley College, and Whatcom Community College. Students are admitted through Bellingham Technical College. Students will be assigned regional clinical experience, on a variety of shifts, in hospitals and clinics in Whatcom, Skagit, Island, Snohomish, and King counties. Students will need to provide their own transportation to clinical sites and be able to meet the various clinical schedules. Theory and application of coursework will be articulated with clinical experience using an integrated model of instruction including distance education components. This experience will provide opportunities for clinical competencies required of an entry-level staff technologist.

Radiologic Technologists must remain mentally and physically alert to react to emergency situations, safety hazard warnings, and equipment problems. The technologist must have the ability to feel, see, hear, and smell. The technologist is required to communicate with patients and maneuver patients and heavy equipment. Thus, the technologist must have adequate use of limbs and speech. Every reasonable attempt will be made to accommodate disabilities.

MAMMOGRAPHY CERTIFICATE

For students who have completed a Radiologic Technology Program and have successfully obtained ARRT registration (must be eligible for their ARRT certificate prior to registering for courses, and must attain the certification and provide proof by the first day of class), BTC is offering a one quarter, on-line course which meets academic requirements for the ARRT Mammographic Registry. Instruction is structured and is not self paced. It is the students' responsibility to secure clinical facilities for practical experience with the approval of the college. Clinical affiliates must be ACR accredited and committed to have students work with Registered Mammographers. Students will submit their clinical choice to BTC faculty with contact information.

Theory I and II may be taken individually for continuing education units for ARRT Registered Mammographers. The ARRT grants up to 12 CEUs for each credit in qualifying academic courses.

PROGRAM OUTCOMES

- Follow all safety guidelines and practice safe radiation procedures to fully protect staff, patients and self.
- Competently performs clinical and administrative components of each radiographic procedure. Produce optimal radiographic images, accurately assessing and applying corrections required when correcting suboptimal images.
APPLICATION & REGISTRATION
This program requires an admissions process.
To be eligible for admission to the Bellingham Technical College Radiologic Technology program, students must submit official transcripts documenting completion of the following prerequisite college courses with a GPA as indicated:

- a. English Composition I (ENGL & 101) 5 credits or equivalent. (Minimum 2.0 GPA)
- b. Introduction to Computers (CAP 101) 5 credits or equivalent. Equivalent courses must include windows, word processing, and spreadsheet. Students who do not have transcripts of formal computer training may challenge the CAP 101 requirement through examination.
- c. Intermediate Algebra (MATH & 099) 5 credits or equivalent within the last 3 years or departmental approval. (Minimum 2.7 GPA)
- d. Medical Terminology (HT 126) 3 credits. (Minimum 2.0 GPA)
- e. Human A & P 1 & 2 (BIOL & 241 & BIOL & 242), 5 credits each or equivalent within the last 3 years or departmental approval. (Minimum 2.7 GPA)
- f. General Psychology (PSYC & 100) 5 credits. (Minimum 2.0 GPA)

Note: It is acceptable to repeat a prerequisite course in order to receive the required GPA. These courses must be taken at a regionally accredited college or university.

To be eligible for admission to the Bellingham Technical College Radiologic Technology program, applicants must meet college admission requirements, including a Criminal History Background Check verifying that there is not a history of child or adult abuse, financial exploitation of vulnerable adults, or other crimes against persons as defined in RCW 43.43 and evidence of high school graduation or its equivalent. Acceptable documents include a copy of your high school diploma, high school transcript, or GED certificate. Please contact Admissions & Advising for additional program admissions requirements.

After acceptance into the Radiologic Technology program, and prior to registering for first quarter, the student is required to:
- Within the preceding six months of going to clinical, demonstrate satisfactory health status by a physical examination, including current immunizations; provide documentation of negative 2-step PPD testing, negative chest x-ray, or appropriate treatment. First clinical course will take place in January of the first year of the program.
- Attend a mandatory summer orientation day. During this time the student is required to successfully complete a urine test for prohibited substances. This test will be arranged by a college representative and be administered on campus.
- Prior to registration for the second quarter, the student is required to:
  - Be at least 18 years of age;
  - Possess and maintain a current CPR card. Minimum CPR requirement is Heartsaver Complete (6hr). Accepted no later than Oct. 31st.
  - Show proof of personal health insurance (student accident insurance is available). Accepted no later than Oct. 31st.

SEQUENCE AND SCHEDULE: The Radiologic Technology program begins fall quarter and is a total of seven (7) quarters. First year students attend fall, winter, and spring. Courses will be scheduled at a variety of times during the day, late afternoon, and evening. Some courses will be provided online and some using video conference media at Everett, North Seattle, and Bellingham. Clinical shifts may be from 8 to 12 hours dependent on the quarter and may vary from days, evenings, or weekends at a variety of clinics and hospitals. Students must be able to accommodate the various clinical schedules. A cumulative GPA of 2.5 is required to progress in the program, but no course can be completed with less than a 2.0 GPA.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree an Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards.

*Radiologic Technology has additional admissions requirements.

PROFESSIONAL TECHNICAL EDUCATION
Registered Nursing: LPN to RN

Bellingham Technical College offers a program for nurses who have graduated from a PN program, that prepares the student for licensure as a Registered Nurse and an AAS Degree. Applicants should be aware that the program requires independent study. The program is for nurses who have graduated from a practical nursing program approved by the Washington State Department of Health, Nursing Care Quality Assurance Commission. Students who complete the program will have met the educational requirements needed to apply for permission to take the National Council Licensure Examination for Registered Nursing (NCLEX-RN).

**PROGRAM OUTCOMES**

**Provider of Care:**
- Practice competently and safely in a variety of health care settings with clients of diverse socio-cultural identities across the life span;
- Demonstrates critical thinking and clinical judgment by integrating and building upon theoretical concepts from nursing and related fields;
- Implements the nursing process.

**Manager of Care:**
- Plan and coordinate care for an individual or group of clients with health care needs by using established priorities;
- Demonstrates an understanding of own role in the health care delivery.

**Member Within the Discipline of Nursing:**
- Actively participates within the nursing profession;
- Seeks opportunity for continued learning, self-development, leadership, and management skills.

**APPLICATION & REGISTRATION:** This program requires an admissions process.

To be eligible for admission to the Bellingham Technical College Registered Nursing: LPN to RN, applicants must complete an application packet. Incomplete application packets will not be considered. Application packets are available by calling the Admissions office at 360-752-8345. Any questions regarding admission should be directed to Chris Richter, Admissions at 360-752-8321, or crichter@btc.ctc.edu. To be eligible for admission, applicants must provide all of the following items:
- Evidence of completion of at least 1000 hours as a working LPN within the last five years
- Completed BTC admissions application and pay $35 fee
- Official transcripts containing evidence of successful completion of the prerequisite courses with a 2.0 or above
  - BIOL&241 Human A & P 1 (5 cr)
  - BIOL&242 Human A & P 2 (5 cr)
  - ENGL&101 English Composition I (5 cr)
  - CHEM&121 Intro to Chemistry (5 cr)
  - BIOL&260 Microbiology (5 cr)
  - PSYC&100 General Psychology (5 cr)
  - PSYC&200 Lifespan Psychology (5 cr)
  - MATH&107 Math in Society (5 cr) or MATH&141 Precalculus I (5 cr)

Submit a complete application packet including admissions application materials and transcripts to:
Bellingham Technical College
Attention: Admissions, Registered Nursing
3028 Lindbergh Avenue
Bellingham, WA 98225-1599

**SEQUENCE AND SCHEDULE:** Registered Nursing begins fall and winter quarters with enrollment for three quarters. Students will average 140 hours per quarter in a combination of lecture, lab and clinical work, attending school for one to two days every week (6-8 hours per day). Hospital clinical experiences are scheduled to take place on the weekends either during the day or in the evening.

**DEGREE REQUIREMENTS:** Students may apply for a degree upon completion and verification of all requirements and standards.

Residential Home Inspection
CERTIFICATE - RESIDENTIAL HOME INSPECTION

Bellingham Technical College provides a high quality, fast-track training program to prepare students to begin their own professional home inspection business or seek employment with a home inspection company. This program will meet the requirements of new Washington State certification. Regulations to be implemented in 2009-2010. The 15 credits program consists of an intensive 4-week full-time Home Inspection Training Program. Coursework will follow the renowned Carson Dunlop and Associates textbooks and in-depth presentations. Hands on study and a combination of technical labs and field inspections will supplement classroom instruction.

This program is offered on the BTC campus and at several other colleges in Washington State.

PROGRAM OUTCOMES: Graduates will receive a Bellingham Technical College Certificate and be prepared to take, and pass, the National Home Inspector Exam, the Washington State Structural Pest Inspector Exam or any exam required by the leading home inspection associations.

APPLICATION & REGISTRATION: Program admission and application are not required.

SEQUENCE AND SCHEDULE: RHI 110 Residential Home Inspection Course at Bellingham Technical College typically runs for four weeks, from 8:00am-5:00pm, Monday-Friday.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

RESIDENTIAL HOME INSPECTION Certificate

RHI 110 Residential Home Inspection 15
TOTAL: (Approx. 4 weeks) 15

Retail Management
CERTIFICATE - RETAIL MANAGEMENT

The Retail Management Certificate is designed to give individuals a clear sense of what is involved in managing a retail sales operation or line of merchandise. Individuals completing the Retail Management Certificate program will develop a clear sense of the scope of a career in the field of retail management. Foundation courses in both written and oral communication, business math, human relations, and microcomputer applications are included. Students also complete specific business and management courses in accounting, management, marketing, retailing, and human resource management.

The retail industry is fast-paced and rapidly changing. Technological advances such as scanners and electronic data interchange, as well as various innovations in marketing and distribution, have created a need for personnel with strong fundamental management and computer skills. Candidates possessing these skills have excellent prospects for employment and/or advancement.

Developed with and endorsed by the Western Association of Food Chains (WAFC), this certificate provides broad-based training in ten content areas for future and current employees in a variety of retail operations, including grocery stores, department stores, and specialty retailers.

APPLICATION & REGISTRATION: Program application and admission are not required. Students begin the program by registering for the required courses on a space available basis. It is recommended that students have good basic academic skills.

SEQUENCE AND SCHEDULE: Students choose courses in an order that best fits their personal career goals. See a Quarterly Schedule for specific course information.

DEGREE REQUIREMENTS: Students who have started a Western Association of Food Chains (WAFC) endorsed Retail Management Certificate program with another college may receive a certificate from Bellingham Technical College by completing at least four of the courses listed for the Retail Management Certificate of Completion at Bellingham Technical College and transferring in equivalent courses to meet the remaining requirements.

CERTIFICATE OF COMPLETION – RETAIL MANAGEMENT OPTION
Some colleges offering WAFC-endorsed Retail Management Certificates utilize courses with less credits than the comparable Bellingham Technical College course. For students who have started a Retail Management Certificate with these colleges, a Certificate of Completion may be obtained by transferring in courses in the content areas listed below, with the following provisions:

A maximum of six of the ten content areas may be satisfied with transfer courses (i.e., four of the content areas must be completed at Bellingham Technical College, 18 credits minimum);

Courses transferred in must equate to at least 3 quarter credits per content area;

- Content Areas
- Business Communication
- Business Mathematics
- Leadership and Human Relations
- Microcomputer Applications
- Oral Communications (Business or Speech)
- Bookkeeping or General Accounting
- Introduction to Management
- Marketing Management
- Human Resources Management
- Retail Management & Merchandising

ONLINE LEARNING: Students will use some online tools and resources throughout the program. Some of the General Education classes, Retail Management and Introduction to Computers may be taken entirely online.

transportation to clinical sites. Physicians' outpatient surgery. Students will need to provide their own

clinic practice will take place regionally in hospitals, surgery centers, and training program in clinical practice, coordinated by the instructor. Clinic and diagnostic procedures. Students will spend a major portion of the technologies to facilitate a physician's performance of invasive, therapeutic

care coordinators, providing surgical care to the patient. The surgery technologist is under the supervision of the physician and/or registered nurse at all times. The program prepares students to develop expertise in the theory and application of sterile and aseptic technique and combines knowledge of human anatomy and surgical procedures. Additionally, the program prepares competent entry-level surgical technologists in

cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Students learn how to implement surgical tools and technologies to facilitate a physician's performance of invasive, therapeutic and diagnostic procedures. Students will spend a major portion of the training program in clinical practice, coordinated by the instructor. Clinical practice will take place regionally in hospitals, surgery centers, and physicians' outpatient surgery. Students will need to provide their own transportation to clinical sites.

PROGRAM OUTCOMES:
Utilize critical and logical thinking processes to evaluate and interpret requests from the surgical field while performing surgical procedures;
Understand current practices and demonstrate sound decision making to provide patient, staff and personal safety;
Strive for excellence in the practice of sterile technique. Recognize and respond immediately to any breaks in sterile technique;
Work collaboratively and interact positively and appropriately with surgical team members and supervisors. Take responsibility for own learning; and
Effectively write the P.A.E. (Program Assessment Exam).

APPLICATION & REGISTRATION: To be eligible for the program ready list, all general education courses must be completed. To be eligible for admission to the Bellingham Technical College Surgery Technology program, applicants must meet college admission requirements and submit additional materials, including a completed Criminal History Background Check verifying that there is not a history of child or adult abuse, financial exploitation of vulnerable adults, or other crimes against persons as defined in RCW 43.43 and evidence of high school graduation or its equivalent. Acceptable documents include a copy of your high school diploma, high school transcript, or GED certificate.

To be eligible for the program ready list, all general education courses must be completed. Students can complete all general education courses in any quarter. Transcripts are required showing evidence that all general education courses are complete to become eligible for the program ready list and entry into the Surgery Technology courses.

After acceptance to be on the program ready list for the Surgery Technology program, and prior to enrollment in SURG 120, students are required to:
- Demonstrate satisfactory health status by a physical examination within the preceding six months, including current immunizations;
- Complete a urine test for prohibited substances. The test must screen for the following five drugs: amphetamines, cocaine, marijuana, opiates, and PCP;
- Possess and maintain a current CPR card. Minimum CPR required is Adult Heartsaver (3 hrs);
- Show proof of personal health insurance (student accident insurance is available); and
- Be eighteen (18) years of age prior to the start of the clinical course-work (SURG 120 and SURG 125)

SEQUENCE AND SCHEDULE: Students begin by completing their general education courses. The Surgery courses begin in fall quarter and end spring quarter, totaling three consecutive quarters. This sequence does not include summer. Students should meet with an advisor regarding completing their general education requirements. Students can complete all general education courses listed on the certificate requirements except the SURG courses to become eligible to be on the program ready list. Transcripts must be submitted to be considered for the program ready list. The Surgery Technology courses are sequenced and require passage to progress to the next course.

DEGREE REQUIREMENTS: Students may apply for a certificate upon completion and verification of all requirements and standards.

CERTIFICATE - SURGERY TECHNOLOGY

Surgery Technology

The Surgery Technology program is an accredited program designed to meet the expanding demand of surgery and related healthcare departments. This is an exciting career opportunity that will prepare men and women to function as an integral part of the team of healthcare practitioners, providing surgical care to the patient. The surgery technologist is under the supervision of the physician and/or registered nurse at all times. The program prepares students to develop expertise in the theory and application of sterile and aseptic technique and combines knowledge of human anatomy and surgical procedures. Additionally, the program prepares competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Students learn how to implement surgical tools and technologies to facilitate a physician's performance of invasive, therapeutic and diagnostic procedures. Students will spend a major portion of the training program in clinical practice, coordinated by the instructor. Clinical practice will take place regionally in hospitals, surgery centers, and physicians' outpatient surgery. Students will need to provide their own transportation to clinical sites.

PROGRAM OUTCOMES:
Utilize critical and logical thinking processes to evaluate and interpret requests from the surgical field while performing surgical procedures;
Understand current practices and demonstrate sound decision making to provide patient, staff and personal safety;
Strive for excellence in the practice of sterile technique. Recognize and respond immediately to any breaks in sterile technique;
Work collaboratively and interact positively and appropriately with surgical team members and supervisors. Take responsibility for own learning; and
Effectively write the P.A.E. (Program Assessment Exam).

APPLICATION & REGISTRATION: To be eligible for the program ready list, all general education courses must be completed. To be eligible for admission to the Bellingham Technical College Surgery Technology program, applicants must meet college admission requirements and submit additional materials, including a completed Criminal History Background Check verifying that there is not a history of child or adult abuse, financial exploitation of vulnerable adults, or other crimes against persons as defined in RCW 43.43 and evidence of high school graduation or its equivalent. Acceptable documents include a copy of your high school diploma, high school transcript, or GED certificate.

To be eligible for the program ready list, all general education courses must be completed. Students can complete all general education courses in any quarter. Transcripts are required showing evidence that all general education courses are complete to become eligible for the program ready list and entry into the Surgery Technology courses.

After acceptance to be on the program ready list for the Surgery Technol-
Surveying & Mapping Technology

DEGREE - SURVEYING & MAPPING TECHNOLOGY

The Surveying & Mapping Technology program prepares the student for employment as a survey and mapping technician in field and office applications. Instruction is individualized within a structured curriculum, and instructional time is divided between classroom theory and practical application. The degree program includes use of a variety of equipment and computer software, including GPS equipment, the use of drafting software, including CAD & GIS. Students receive the necessary technical, and academic skills to be productive and dependable employees. Surveying students are encouraged to participate in the activities of the Land Surveyor’s Association of Washington (LSAW) as student members.

PROGRAM OUTCOMES: Graduates will demonstrate competency in basic GIS and surveying and mapping skills; prepare for the Level I Survey Technical Exam given by the Career Development Committee of LSAW; possess the ability to prepare a topographic map of a parcel of property that is evaluated by WAC 332-130 standards; demonstrate entry level competency in using CAD skills; demonstrate a working knowledge of the Global Positioning System (GPS); demonstrate a working knowledge of Washington Law related to surveying and boundaries; receive, interpret, and convey written, verbal and graphic information; and prepare a BTC campus map data using current RTK GPS equipment.

APPLICATION & REGISTRATION: This program requires an admissions process. Note: This program contains advanced mathematics that may require preparatory coursework.

Students may enroll in the Surveying & Mapping Technology program at the start of the fall quarter or at other times with instructor permission. Admission is offered on a space available basis. Part-time enrollment and individual class enrollment is available with instructor approval.

CAP 101 Introduction to Computers is a required prerequisite for students to enroll in this program. Students may test out of this requirement by passing the three IC3 exams (Living Online, Computer Fundamentals, and Key Applications - Word, Excel and PowerPoint). These tests may be taken at BTC or any other CertiPort Testing Center.

SEQUENCE AND SCHEDULE: The Surveying & Mapping Technology student will complete a specific course requirement sequence based on date of enrollment. Students will be advised by the program instructor regarding sequence and schedule of classes.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science degree an Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards.

5 credits from the list of courses “generally accepted in transfer list” by other institutions in Washington. These will vary by field of study in the degree.

TOTAL: 20
Veterinary Technician

DEGREE - VETERINARY TECHNICIAN
CERTIFICATE - VETERINARY ASSISTANT

The Veterinary Technician program prepares students for employment as a Veterinary Technician with expanded duties allowed by Washington State law. This new program will be accredited by the American Veterinary Medical Association (AVMA) Committee on Veterinary Technician Education and Activities (CVTEA); allowing graduated students to take the National Veterinary Technician test. Clinical experience is provided under the supervision of veterinarians and licensed veterinary technicians at a variety of regional animal care offices and facilities.

The individual that successfully completes this program will have the knowledge, base, critical thinking and technical skills to become a licensed Veterinary Technician upon completing the state licensing requirements. The training of the veterinary technician will be divided into three concept stages:

1) Understanding normal anatomy, physiology and behavior of health for the species studied
2) Understanding and participating in the process of diagnosis, therapy and prevention of animal disease
3) Understanding the profession of Veterinary Technician including: occupational safety, public health, client and colleague communication, ethics of animal welfare, and the human-animal bond.

PROGRAM OUTCOMES

- Demonstrate current veterinary techniques in areas such as animal husbandry, necropsy and anesthesia, the use and application of medicines and materials, and safety and health standards
- Provide support for companion animal, equine, and food animal practice, biomedical research, and other veterinary medical activities;
- Comprehend basic medical terminology and science and demonstrate clinical application skills. Ability to integrate skills such as nursing, surgical, pharmacological, dental, and imaging knowledge and skills in order to care for live animals;
- Demonstrate cognitive retention of medical terminology, theory and science, including anatomy and physiology, clinical pathology and microbiology;
- Demonstrate positive work ethics, professionalism and understanding of team health care delivery;
- Demonstrate a foundation in professionalism through participation in professional organizations and activities and continuing education opportunities;
- Incorporate into practice professional laws, regulations and policies established by the licensing state and regulatory agencies;
- Promote humane animal care and management through counseling owners to reduce health risks and provide community veterinary health services in a variety of settings;
- Demonstrate understanding of veterinary office management and economics. Understanding of varying roles and organizational structures present in veterinary practice; and
- Provide preventive and therapeutic services, including nutritive, nursing and dental care, that promote animal health according to the needs of the patient.

APPLICATION AND REGISTRATION: This program requires an initial admissions process to begin the program and an advanced application process to progress into sequential curriculum.

In addition to the BTC admission procedures, all Veterinary program students in both the part time and full time sections are required to submit the Criminal Disclosure Questionnaire and Criminal Background Inquiry verifying that you do not have a criminal history of child or adult abuse, financial exploitation of vulnerable adults, or other crimes against persons as defined in RCW 43.43.830 and RCW 43.43.840.

Note: Some clinical sites may require a drug screen which would be completed prior to clinical placement.

Prior to enrollment in VETT110, part-time and full-time Veterinary Technician department degree option students must submit a complete packet containing the following items in order to continue:

1) Evidence of high school graduation or its equivalent. Acceptable documents include a copy of high school diploma, high school transcript, or GED certificate.
2) Photocopy of Washington State Driver’s License (must be clear and readable) as student must be a minimum 18 years of age when they graduate.
3) Official transcripts containing evidence of the four general education courses and a completed Transfer Credit Request Form.
   - English Composition (ENG 101) 5 credits or equivalent (Minimum 2.0 GPA)
   - Math in Society (Math& 107) or Pre-Calculus (Math& 141) 5 credits or equivalent or departmental approval (Minimum 2.0 GPA)
   - General Psychology (PSY 101) 5 credits, or General Sociology 5 credits or equivalent. (Minimum 2.0 GPA)
   - Transfer Level Humanities or Science 5 credits or equivalent. (Minimum 2.0 GPA)
4) The Health Status Report including evidence of required and recommended immunizations.

ADVANCED PLACEMENT: Advanced placement in the Veterinary Technology Program will be possible for students who have completed the certificate in Veterinary Assisting and program pre-requisites with a 2.0 ("C") or better, and as space allows.

For those who had taken the Veterinary Assistant program prior to the Fall 2008 quarter, and wish to enter the Veterinary Technology Program, they must:

- Complete all program pre-requisite courses with a 2.0 ("C") or better;
- Take and pass with 2.0 GPA ("C") the VET 150 – Veterinary Assistant to Technician Preparatory Course; and
- Take a knowledge-based comprehensive exam to assess where in the program they can enter and have the best opportunity to be successful.
SEQUENCE AND SCHEDULE: The Veterinary Technology program at Bellingham Technical College will be offered in a unique way in that an early out certificate option as a Veterinary Assistant. All courses will be taught using a “hybrid” format in which the student will do a significant portion of the lecture/didactic material through a web-based medium.

FULL-TIME PROGRAM: (6 QUARTERS)
The full-time program will normally be scheduled Monday through Thursday during the hours of 8 a.m. to 2:30 p.m. After the first two quarters, students who opt out with a certificate in Veterinary Assisting will then need to enroll in VET 117, Clinical Internship.

PART-TIME PROGRAM: (APPROX. 9 QUARTERS)
Students who wish to enroll in the part-time, evening program will normally be scheduled Monday, Wednesday and Thursday from 3:30 p.m. to 7 p.m. the first three quarters, with alternating days, the following 6 quarters. The first 3 quarters of the PT program, plus VET 117, taken during the summer, qualify the student to earn a certificate in Veterinary Assisting.

* When required lab components require the students to be at an off-site Veterinary Facility, the schedule is subject to change to other days and times of the week, depending on availability.

DEGREE REQUIREMENTS
Students may apply for an Associate in Applied Science - Transfer degree upon completion and verification of all requirements and standards.

Students must maintain a 2.0 grade point average with no course below C (2.0) to earn a degree or certificate.

Welding Technology - Aluminum, Pipe, or Structural Fabrication

DEGREE - WELDING TECHNOLOGY
ALUMINUM, PIPE, OR STRUCTURAL FABRICATION

CERTIFICATE - INDUSTRIAL WELDING

CERTIFICATE - BASIC WELDING SKILLS

Student Chapter of the American Welding Society (AWS)

The Welding Technology program prepares students for employment in the metal and construction trades; this is a field that continues to grow and is in very high demand. Students will gain experiences and competencies in all major welding theory, processes and Washington Association of Building Officials (WABO) welding certification testing procedures. Students can earn a certificate or (AAS) degree in Welding with a specialization in Structural Steel Fabrication, Pipe, or Aluminum.

The program includes classroom instruction and hands-on training in metal trades including safety, blueprint reading, metallurgy, power sources, tools and materials, and layout and fitting techniques. Students are taught in a state-of-the-art facility completed in 2007; the welding facility includes 20,000 plus square feet of lab facilities including a large fabrication and clean room for aluminum welding. Instruction includes self-paced and competency-based components with a core curriculum and electives for specialization and student customization. BTC is a certified WABO testing site for the benefit of our students. Occupational upgrade and retraining for the professional welder are also major components of the Welding Technology program.

In addition to the degree and certificate program, evening courses and self-guided upgrades are available for weld test preparation and brush-up on familiar processes, including SMAW, GMAW, FCAW, GTAW, PLATE, and PIPE.

PROGRAM OUTCOMES: Graduates will pass one WABO welding certification; analyze and solve welding and equipment problems, demonstrate appropriate oral and written communication with customers, co-workers, and supervisors; competency in blueprint reading, metallurgy, layout and fitting/cutting processes; ability to operate welding equipment safely; and organizational skills, knowledge of materials, set-up and trouble shooting of equipment, and leadership and personal skills.

APPLICATION & REGISTRATION: This program requires an admissions process. Students may enroll in the program at the start of each quarter on a space available basis. Students may enroll full or part-time.

SEQUENCE AND SCHEDULE: The Welding Technology student will complete a specific course requirement sequence. Students will be advised by the program instructor regarding sequence and schedule of classes. Program hours vary and can range from 7:00am to 6:30pm depending on the section in which students are enrolled.

DEGREE REQUIREMENTS: Students may apply for an Associate in Applied Science or an Associate in Applied Science - Transfer degree or a certificate upon completion and verification of all requirements and standards.

ACCOUNTING

ACCT 141  
FINANCIAL ACCOUNTING I  5 CR  
Covers the accounting cycle through a study of a sole proprietorship and the use of accounts, the general journal, and the general ledger.

ACCT 242  
FINANCIAL ACCOUNTING II  5 CR  
Theory and practice of computing and recording transactions relating to merchandise inventory, notes payable and receivable, depreciation, accounting principles, and reporting standards.  
PREREQUISITES: A minimum grade of B- (2.7) in ACCT 141.

ACCT 243  
FINANCIAL ACCOUNTING III  5 CR  
Theory and practice relating to the formation and operations of partnerships and corporations, decision making, and statement analysis. Financial data is used to access the efficiency of current operations and determine profitability.  
PREREQUISITES: A minimum grade of B- (2.7) in ACCT 242.

ACCT 245  
PAYROLL PROCEDURES  5 CR  
Covers complete payroll records and procedures. Students complete assignments about federal and state laws that affect compensation of employees.  
PREREQUISITES: A minimum grade of B- (2.7) in ACCT 141.

ACCT 246  
COMPUTERIZED ACCOUNTING I  5 CR  
A study of computerized accounting systems in both service and merchandising environments. Uses the commercially popular QuickBooks software to demonstrate the use of fully integrated accounting systems. Prepares the student to use commercial accounting software products on-the-job.  
PREREQUISITES: A minimum grade of B- (2.7) in ACCT 141.

ACCT 254  
MANAGERIAL ACCOUNTING  5 CR  
Introduces students to information needed by managers to carry out three essential functions in an organization: (1) planning operations, (2) controlling activities, and (3) making decisions. Course will show what kind of information is needed, where this information can be obtained, and how this information can be used by managers as they carry out their planning, control, and decision-making responsibilities.

ADULT BASIC EDUCATION

ABE 020  
MATH 1  6 CR  
Includes the numbering system, order of whole numbers, and addition and subtraction of single digit numbers. Students will identify the causes of problems in order to find solutions, learn from their own mistakes, accept correction and direction, respect and interact appropriately with peers and supervisors, and demonstrate personal re-

ABE 021  
MATH 2  6 CR  
Includes identifying place value, adding, subtracting, multiplying, and dividing whole numbers, solving real life word problems, estimating and averaging whole numbers to accomplish a variety of daily tasks. Students will generate ideas about problems, causes, and solutions; participate in groups; recognize their learning style; and learn from others. They will set personal goals and recognize the connection between behavior and outcomes.

ABE 022  
MATH 3  6 CR  
Includes applying decimal and fraction concepts and procedures to solve real-life problems, and recognizing, naming and using metric and/or standard units of measurement. Students will identify their own personal values and financial choices and state clearly personal needs to accommodate their own learning style. They will participate in a familiar group, learn to recognize and relate to differences in others, recognize a good leader, identify appropriate work behavior and attitudes, and relate classroom experience to the workplace. They will also practice technology at the appropriate level.

ABE 023  
MATH 4  6 CR  
Includes using percents, ratios, proportions, simple formulas and measurements, and interpretation of graphs and tables to solve real life problems. Students will solve multistep problems by identifying the issue, thinking creatively, applying a variety of skills, implementing solutions, and evaluating the outcomes. Students will work in teams and groups and communicate effectively through listening, speaking, writing, and peer monitoring.

ABE 030  
READING/Writing 1  6 CR  
This course provides instruction in recognition of letters of the alphabet, symbol/sound correspondences, division of words by syllables, sentence differences, and practice decoding by context. The instruction helps students to recognize the outcomes from a variety of reading and writing sources. Practice in reading and writing for survival needs and personal communication will be offered.

ABE 031  
READING/Writing 2  6 CR  
This course provides instruction in the selection of reading materials for specific purposes and application of reading strategies to assist with comprehension and integration of new information. The instruction helps the student to summarize main idea and supporting details, and to write topic sentences with supporting details.

ABE 032  
READING/Writing 3  6 CR  
This course provides instruction in selecting appropriate reading materials for particular purposes and in expanding choices of texts/genres. The instruction helps the student to purposefully use a wide array of reading strategies to assist in reading comprehension and problems solving, applying the knowledge to real life needs and goals. The instruction helps the student gain competence in writing through organizing a paragraph using topic sentence and supporting details. The instruction helps the student write sentences that express complex ideas and contain minimal errors in mechanics and grammatical structure.

ABE 033  
READING/Writing 4  6 CR  
This course provides instruction in independently determining reading purpose and selecting the best reading resources to satisfy the purpose. This course provides instruction in using diverse strategies (format, skimming, context clues, etc.) and skills (transition words, inferences, point of view) to analyze, evaluate, and draw meaning from text.

ABE 035  
ABE Writing Level 1  0 CR  
This course provides writing instruction for basic survival needs at a beginning literacy level. Students will write the alphabet for personal communication at a beginning literacy level. Students will use memory and write short simple sentences using basic sight words. They will write the alphabet from memory and write short simple sentences using. They will write their name, address, and phone number and complete very basic sight words. They will write their name, address, and phone number using that information. Students will discuss the causes. Students will solve problems in order to identify a solution and demonstrate personal responsibility. They will also learn to use technology at the appropriate level.

ABE 036  
ABE Writing Level II  0 CR  
Provides writing instruction for basic survival needs and personal com this course provides writing instruction for basic survival needs and provides writing instruction for basic survival needs and personal com this course provides writing instruction for basic survival needs and communication. Students will learn to write with limited proficiency (i.e., personal communication on forms, copy text, write in simple sentences). Students will generate ideas about problems (causes and solutions) and set personal goals. They will learn to organize their time and materials and identify and use resources for employment and for support services. They will also learn to use technology at the appropriate level.

ABE 037  
ABE Writing III  0 CR  
This course provides writing instruction in writing paragraphs with sentences that clearly express complex ideas (e.g., short reports, informal letters, memos, personal narratives), proofreading for capitalization and punctuation; and using the dictionary for spelling, meaning, and pronunciation. Students will learn to use negotiating skills to generate, organize, and exchange ideas to solve problems. Students will identify appropriate work behavior and attitudes, recognize a good leader, and relate life change in a work schedule). They will also learn to use technology at the appropriate level.
ABE 038
ABE WRITING LEVEL III 0 CR
This course provides instruction in writing resumes, reports, and formal letters that use connected paragraphs and appropriate formats with correct mechanics, usage, and varied sentence structure. Students will recognize requirements for job advancement, assess their own leadership skills, identify areas for personal improvement, and learn to manage themselves as effective learners and employees. They will also learn to use technology at the appropriate level.

BAS 020
COMPUTER SURVIVAL SKILLS 3 CR
This course provides instruction for basic academic skills students in basic computer survival skills, including navigating Microsoft Windows, work processing with Microsoft Word, and use of common software for spreadsheets and multimedia presentations. Email and Internet skills are also taught.

BAS 050
INTRO TO CAREERS IN TECHNOLOGY 4 CR
Students will explore careers in technical fields, with emphasis on those entered through programs offered by BTC. Students will research careers, visit programs and do job shadows in appropriate industries. Continuing enrollment throughout the quarter.

PREREQUISITES: Student must be enrolled in another ABE, GED or ESL (Level 3-6) course at BTC to participate.

BAS 052
INTRO TO HEALTH OCCUPATIONS 2 6 CR
This basic skills course is part of the larger “Bridge to Health Occupations” Program and is designed to prepare ESL and ABE students for healthcare occupation classes. In addition to receiving an introduction to medical terminology, anatomy, and physiology, students will examine how culture, ethnicity, and race affect people’s beliefs about health and health care. Workplace safety and first aid are also topics of learning. Furthermore, this “bridge” course will reinforce students’ development of study, language, and computer skills.

PREREQUISITES: Open to ESL Levels 3-6 and ABE Levels 4-6 and those who have completed Intro to Health Occupations 1.

BAS 053
INTRO TO HEALTH OCCUPATIONS 3 6 CR
This basic skills course is part of the larger “Bridge to Health Occupations” Program and is designed to prepare ESL and ABE students for healthcare occupation classes. In addition to receiving an introduction to medical terminology, anatomy, and physiology, students will examine how culture, ethnicity, and race affect people’s beliefs about health and health care. Workplace safety and first aid are also topics of learning. Furthermore, this “bridge” course will reinforce students’ development of study, language, and computer skills.

PREREQUISITES: Open to ESL Levels 3-6 and ABE Levels 4-6 and those who have completed Intro to Health Occupation 2.

BAS 060
BASIC ACADEMIC SKILLS 7 CR
This course includes refresher skills in math and communications necessary for success in occupational programs. Specific content will be based on individual needs.

ESL 011
READING/Writing LEVEL I (LITERACY) 6 CR
This course is designed for adults who have no proficiency in the English language. Emphasis is on functioning in situations related to immediate needs and tasks in which basic reading and writing communication skills are necessary. Progress in appropriate technology level is expected.

ESL 012
READING/Writing LEVEL II (BEGINNING) 6 CR
This course is designed for the adult who functions with difficulty in situations related to immediate needs such as providing personal information on simple forms. Emphasis is on reading simple material on familiar subjects; interpreting simple directions, schedules, signs, and maps; and conveying ideas in simple notes and messages using present verb tenses. Progress in appropriate technology level is expected.

ESL 013
READING/Writing LEVEL III (LOW INTERMEDIATE) 6 CR
This course is designed for adults who can understand simple learned phrases, interpret simple directions, schedules, signs and maps; can fill out simple forms; can handle routine entry level jobs that involve some written or oral English communication, but in which job tasks can be demonstrated. Emphasis is on reading simple material on familiar topics with understanding; following specific written direction; using context to determine meaning; writing and editing simple paragraphs; and completing basic forms and job applications. Progress in appropriate technology level is expected.

ESL 014
READING/Writing LEVEL IV (HIGH INTERMEDIATE) 6 CR
This course is designed for adults who can meet basic survival and social needs, follow simple oral and written instruction, and who have some ability to write and edit paragraphs related to basic needs. Emphasis is on understanding descriptive narratives and responding appropriately; reading inferences, comparisons and contrasts; writing and editing descriptions and essays on familiar topics. Progress in appropriate level of technology is expected.

ESL 015
READING/Writing LEVEL V (LOW ADVANCED) 6 CR
This course is designed for adults who can read, write, and edit simple descriptions on familiar topics and handle grammar and writing mechanics with few errors. Emphasis is on reading real-life materials on everyday subjects, and using meaning-making strategies with unfamiliar reading materials; writing and editing multi-paragraph essays that include introductions and conclusions and filling out multiple real-life forms. Progress in appropriate technology level is expected.

ESL 016
READING/Writing LEVEL VI (ADVANCED) 6 CR
This course is designed for adults who can read and understand materials on common subjects, use strategies to infer meaning in unfamiliar texts, write multi-paragraph essays, and edit their own writing for grammar and word choice. Emphasis is on applying critical thinking; conducting research using electronic sources; summarizing, analyzing, and making inferences when reading authentic and unfamiliar texts; writing a resume and cover letter; writing multiparagraph essays using a variety of organizational patterns; and using a variety of sentence structure types with correct punctuation. Instruction in appropriate technology is included.

ESL 019
ESL CIVICS 6 CR
ESL students in Levels 3-6 will develop basic computer literacy while learning about community resources. Students will use computers to learn about local services in the areas of health care, transportation, library, housing, citizenship, local government, education, childcare, or employment. Students will develop and practice their English skills through reading, discussions, guest speakers, field trips, and reports related to community agencies. Class projects may include volunteering, accessing community resources, or assisting others to access community resources.

ESL 021
LISTENING/SPEAKING LEVEL I (LITERACY) 6 CR
This course is designed for adults who have no proficiency in the English language. Emphasis is on functioning in situations related to immediate needs and tasks in which basic oral communication skills can be demonstrated. Progress in appropriate technology level is expected.

Curriculum subject to change. For current information, visit us on the web at: www.btc.ctc.edu
ESL 022
LISTENING/SPEAKING LEVEL II (BEGINNING) 6 CR
This course is designed for the adult who functions with difficulty in situations related to immediate needs in limited social situations and has some oral communication abilities using simple learned and often repeated phrases. Emphasis is on listening actively to understand simple learned phrases containing familiar vocabulary and responding to verbal and non-verbal communication, speaking so others can understand, expressing basic survival needs, and participating in some routine social conversations. Progress in appropriate technology level is expected.

ESL 023
LISTENING/SPEAKING LEVEL III (LOW INTERMEDIATE) 6 CR
This course is designed for adults who can understand simple learned phrases, interpret simple directions, and can handle routine entry level jobs that involve some oral English communication. Emphasis is on listening actively to understand learned and new phrases containing familiar vocabulary and responding appropriately to verbal and non-verbal communication, including telephone calls, on familiar subjects, and speaking so others can understand to express basic survival and social needs. Progress in appropriate technology level is expected.

ESL 024
LISTENING/SPEAKING LEVEL IV (HIGH INTERMEDIATE) 6 CR
This course is designed for adults who can meet basic survival and social needs, follow simple oral and written instruction, and who have some ability to communicate on the telephone. Emphasis is on understanding spoken narratives and responding appropriately; speaking clearly on many everyday subjects; requesting, clarifying and confirming basic information on familiar topics. Progress in appropriate technology level is expected.

ESL 025
LISTENING/SPEAKING LEVEL V (LOW ADVANCED) 6 CR
This course is designed for adults who can converse on many everyday subjects. Emphasis is on listening and speaking to effectively and independently participate in everyday survival, work, and social situations face-to-face or on the telephone. Progress in appropriate technology level is expected.

ESL 026
LISTENING/SPEAKING LEVEL VI (ADVANCED) 6 CR
This course is designed for adults who can participate in everyday conversations in English and understand materials on common subjects. Emphasis is on applying critical thinking skills and analyzing complex grammar patterns in listening; making oral presentations; conducting research using electronic sources; summarizing, analyzing, and making inferences. Instruction in appropriate technology is included.

APPL 100
INTRODUCTION TO TRADE & OCCUPATIONAL SAFETY 1 CR
An overview of the program objectives, school and program policies, rules, regulations, student equipment needs, emergency and safety procedures, and job opportunities.

APPL 105
ELECTRICAL THEORY I 8 CR
The application of mathematical principles and procedures for electrical calculations used for the repair of various appliances.

APPL 106
ELECTRICAL - PRACTICAL I 5 CR
Work here will apply to hands-on approach to electricity. PREREQUISITES: APPL 100 and APPL 105.

APPL 109
TOOL/TESTING EQUIPMENT 1 CR
The technician will be familiarized with trade terminology and the function, correct use, and maintenance of test equipment and tools.

APPL 112
MOTOR CIRCUITS 2 CR
The process of motor application in the Appliance/Refrigeration Industry.

APPL 114
ELECTRICAL DRYERS 7 CR
Application of dryer theory, dryer mechanical systems, electrical systems, and proper diagnosing techniques used in the industry.

APPL 116
WASHERS I 7 CR
This seven credit section will concentrate on top load washers and will include: theory of operation, installation, service procedures, labs on tear-downs and diagnosis of the machines.

APPL 117
WASHERS II 3 CR
This section will be well cover stack sets and combination washer/dryers and will include the theory of operation, installation, service procedures, labs on tear-downs, and diagnosis of the machines.

APPL 118
WASHERS III 7 CR
This course will concentrate on all front load tumbler action machines, and also the energy star rated units. This section will include the theory of operation, installation, service procedures, labs on tear-downs, and diagnosis of the machines.

APPL 122
DISHWASHERS 8 CR
Introduction to water and detergent problems and solutions, mechanical systems and design variations, electrical components, and diagnosis of servicing procedures.

APPL 124
COMPACTORS/DISPOSERS 4 CR
Focuses on mechanical construction and application, electrical components, operating characteristics, and service and diagnosis.

APPL 126
MICROWAVE OVENS 6 CR
Review of microwave theory, components, electrical systems, and diagnosis procedures on microwaves.

APPL 191
LEADERSHIP 1 CR
Study practical applications surrounding technicans and their relationships with customers.

APPL 201
WATER HEATERS 1 CR
The recognition of installation requirements, mechanical construction, electrical systems, and service and diagnosis procedures.

APPL 202
GAS FUNDAMENTALS 2 CR
The theory of gas systems, application of gas systems, mechanical systems, related to gas products, and electrical component testing.

APPL 203
RANGES/OVENS/COOKTOPS 10 CR
The fundamental installation, component familiarization, mechanical construction, schematic reading, and diagnosis of problems.

APPL 204
GAS LABS 4 CR
This course covers the theory in to the application part of the course and provides the students with hands on training using a variety of machines and brands.

APPL 205
REFRIGERATION THEORY 7 CR
Examination of theory, matter and energy, refrigeration and refrigerants, refrigerant handling, and safety.

APPL 207
REFRIGERATION LAB 1 10 CR
Application of lab projects from tubing piping projects, refrigerant management, through servicing procedures required on all refrigerators and freezers.

APPL 208
REFRIGERATION LAB II 6 CR
Specific lab task assignments including diagnosing and repairing of refrigerators, compressor change-out task, defrost circuit electrical lab, and electrical component testing lab.

APPL 209
REFRIGERATION LAB III 6 CR
Refrigeration Lab III will allow the student opportunity to diagnose and service refrigeration electrical circuits and perform job specific labs on a variety of machines.
APPL 210
ICE MAKERS 4 CR
Ice maker installation, operation, and servicing procedures.

APPL 212
AIR CONDITIONERS 4 CR
Focuses on theory and application of comfort cooling, mechanical construction of window air conditioning, electrical components and sealed system requirements.

APPL 216
BUSINESS PROCEDURES/PRACTICES 1 CR
Evaluate the inventory for a service vehicle, looking up parts using microfiche cards, and mark up on parts.

AUTO COLLISION REPAIR

ACRT 101
INTRODUCTION TO AUTO COLLISION REPAIR 4 CR
This course covers personal, tool, and equipment safety, workplace ethics, and hazardous materials.

ACRT 105
NON-STRUCTURAL WELDING 8 CR
This course covers the differences between various metal joining processes, selection of the correct process for different types of jobs, and the advantages of MIG welding, plasma cutting, spot welding, and gas welding and cutting.

ACRT 110
REFINISHING SAFETY 2 CR
This course covers the basic knowledge and skills needed to follow personal and environmental safety procedures pertaining to a spray gun and related equipment operation, surface preparation, and various refinishing operations used on vehicles.

ACRT 115
NON-STRUCTURAL REPAIR 2 CR
This course addresses basic personal safety, vehicle safety, equipment, product knowledge, and basic knowledge required to perform non-structural analysis and damage repair.

ACRT 123
NON-STRUCTURAL METAL FINISHING 7 CR
This course covers the correct mixing and application of body fillers that will increase the quality of a repair. Instruction in safety, environmental awareness, basic fundamentals of metal straightening, and proper selection of metal straightening tools is also included.

ACRT 125
REFINISHING SURFACE PREPARATION 7 CR
This course covers how to determine the condition of a vehicle’s finish and plan the steps to be used in refinishing the vehicle. Instruction in safety and environmental awareness is also included.

ACRT 130
DAMAGE ANALYSIS 3 CR
This course covers the procedure for analyzing vehicle damage and estimating repair costs using manual and computerized estimating systems.

ACRT 133
PAINT MATCHING AND BLENDING 7 CR
This course addresses mixing all types of refinishing materials, the theory of matching refinishing materials, painting and blending techniques, and paint application.

ACRT 135
REFINISH PAINT DEFECTS 3 CR
This course covers how to identify paint film defects, the causes of paint film defects, and appropriate corrective methods. It also covers how to identify surface defects and corrective methods to repair them.

ACRT 138
RESTORING CORROSION PROTECTION 3 CR
This course covers corrosion and its effect on vehicles, how to restore corrosion protection to collision damaged areas, and how to work safely with chemicals. Student plan effective and correct corrosion protection treatment for welded areas and exposed seams, interior seams, exposed surfaces, trim and accessories during repairs.

ACRT 140
DRIVE TRAIN, FUEL, BRAKES, HVAC 2 CR
This course covers repair of a vehicle involved in a collision, including removal of mechanical parts, such as drive train and engine parts. This course also covers servicing heating and a/c systems of a vehicle involved in a collision.

ACRT 141
OUTER BODY PANEL REPAIR 4 CR
This course covers replacement and adjustment of outer body panels, selection of alignment tools, and understanding how to use panel replacement and alignment tools. Instruction in safety, environmental awareness, human relations and work ethics are taught as an integral part of this course.

ACRT 142
SHOP PRACTICUM I 3 CR
This course is self-paced allowing students to apply the fundamental principles and competencies learned in non-structural repair, structural damage repair, mechanical and electrical repair, plastics and adhesives, and painting and refinishing.

ACRT 143
SHOP PRACTICUM II 6 CR
This course is self-paced allowing students to apply the fundamental principles and competencies learned in non-structural repair, structural damage repair, mechanical and electrical repair, plastics and adhesives, and painting and refinishing.

ACRT 253
MOVEABLE GLASS AND HARDWARE 2 CR
This course covers removal, installation, and adjustment of moveable glass and its hardware. Students identify causes of door glass problems and learn how to correct air and water leaks.

ACRT 254
STRUCTURAL FIXED GLASS 2 CR
This course emphasizes the role glass plays in the structural integrity of the vehicle and includes information about automobile glass and methods for removal and installation.

ACRT 255
SUSPENSION AND STEERING 4 CR
This course covers identification and diagnosis of tire and wheel steering, rack and pinion steering, power steering suspension, strut type, and steering and suspension system problems.

ACRT 256
UNIBODY INSPECTION 4 CR
This course covers inspection, diagnosis, measurement, and repair of steel and aluminum unibody vehicles.

ACRT 260
SHOP PRACTICUM III 6 CR
This course is self-paced allowing students to apply the fundamental principles and competencies learned in non-structural repair, structural damage repair, mechanical and electrical repair, plastics and adhesives, and painting and refinishing.

ACRT 262
FRAME INSPECTION AND REPAIR 4 CR
This course covers inspection, diagnosis, measurement, and repair of steel framed vehicles.

ACRT 263
RERAINT SYSTEMS 2 CR
This course covers diagnosis and inspection of restraint and SRS systems.

ACRT 264
PLASTICS AND ADHESIVES 4 CR
This course covers the different types of plastic used in today’s automobiles, and how to identify and repair them.

ACRT 266
ELECTRICAL SYSTEM REPAIR 3 CR
This course covers diagnosis and repair of electrical system problems.

ACRT 268
REFINISHING FINAL DETAIL 3 CR
This course addresses basic theory and practical applications of color sanding, buffing, and polishing after refinishing. This course also covers vehicle cleanup before the vehicle is delivered to the customer.

Curriculum subject to change. For current information, visit us on the web at: www.btc.ctc.edu
ACRT 270  
SHOP PRACTICUM IV  10 CR  
This course is self-paced allowing students to apply the fundamental principles and competencies learned in non-structural repair, structural damage repair, mechanical and electrical repair, plastics and adhesives, and painting and refinishing.

ACRT 275  
INTERNSHIP 7 CR  
The student will gain hands-on work experience with an auto collision repair employer.

### AUTOMOTIVE

**AUTO 103**  
ENGINES  8 CR  
An introductory look at the 4 stroke gasoline engine followed by indepth study and practice of industry standard service procedures including diagnosis and repair of internal engine systems.

**AUTO 107**  
BRAKES  6 CR  
Extensive training on the operation, diagnosis and repair of typical disc and drum brake systems including ABS operation and repair.

**AUTO 122**  
BASIC DRIVE TRAIN  4 CR  
This course will focus on the basic fundamentals of drive train systems found in the modern automobile. This course will include axles and axle bearings.

**AUTO 141**  
ENGINE PERFORMANCE 1  2 CR  
This course will focus on the basic fundamentals of fuel, ignition and computer-controlled engine management systems.

**AUTO 151**  
ELECTRICITY/ELECTRONICS 1  10 CR  
This course provides a comprehensive and thorough introduction to electrical theory as applied to the automobile, focusing on electrical behavior in automotive circuits, understanding and using wiring schematics, and basic troubleshooting procedures on simple automotive circuits. An introduction to starting/charging system operation and diagnosis will also be included.

**AUTO 161**  
STEERING AND SUSPENSION  6 CR  
This course will focus on the fundamentals of suspension and steering including four-wheel laser alignment.

**AUTO 213**  
HVAC  4 CR  
This course covers the operation, diagnosis and repair of climate control systems found on the modern automobile. There will be extensive training on proper handling of refrigerants.

**AUTO 219**  
APPLIED AUTOMOTIVE CONCEPTS I  12 CR  
The student is required to intern in a business that performs vehicle repairs. The student will obtain and maintain their own employment. The student is normally working with or under the direct supervision of a journeyman-level technician. It is recommended that the student’s experience focus on the subject areas completed the last quarter on campus. The repair facility then becomes a real world extension of the classroom. Student work will be monitored by an instructor from BTC who will visit the work site periodically.

**AUTO 229**  
APPLIED AUTOMOTIVE CONCEPTS II  4 CR  
The student is required to intern in a business that performs vehicle repairs. The student will obtain and maintain their own employment. The student is normally working with or under the direct supervision of a journeyman-level technician. It is recommended that the student’s experience focus on the subject areas completed the last quarter on campus. The repair facility then becomes a real world extension of the classroom. Student work will be monitored by an instructor from BTC who will visit the work site periodically.

**AUTO 250**  
AUTOMATIC TRANSMISSION/TRANSAXLE  7 CR  
This course will focus on theory, description and operation of automatic drive systems. This will include diagnosis and troubleshooting hydraulic, electrical/electronic controls and mechanical systems and practicing proper R&R techniques.

**AUTO 255**  
ELECTRICITY/ELECTRONICS 2  7 CR  
This course provides an introduction to various electronic systems found on a modern vehicle and a more in-depth study of starting/charging systems. This course will also cover body and chassis control systems such as ABS, body control computers, low tire pressure warning and airbags.

**AUTO 259**  
APPLIED AUTOMOTIVE CONCEPTS III  4 CR  
The student is required to intern in a business that performs vehicle repairs. The student will obtain and maintain their own employment. The student is normally working with or under the direct supervision of a journeyman-level technician. It is recommended that the student’s experience focus on the subject areas completed the last quarter on campus. The repair facility then becomes a real world extension of the classroom. Student work will be monitored by an instructor from BTC who will visit the work site periodically.

**AUTO 260**  
MANUAL TRANSMISSION/DRIVE TRAIN  3 CR  
This course will focus on theory, description and operation of manual drive train systems. This course will include clutches, transfer cases and differentials.

**AUTO 265**  
ENGINE PERFORMANCE 2  3 CR  
This course covers computerized engine management systems including OBD2 and diagnostic trouble code interpretation.

**AUTO 275**  
ENGINE PERFORMANCE 3  10 CR  
This course offers instruction in the operation, diagnosis, and repair of fuel systems, ignition systems and emission control systems including exhaust gas analysis. In addition, there will be more in-depth study of the OBD2 system and how it relates to other systems on the vehicle. This course also includes an introduction to alternative fuel vehicles.

### BIOLOGY

**BIO 105**  
ESSENTIALS OF ANATOMY & PHYSIOLOGY  5 CR  
The student will develop a basic knowledge of the structure and function of the various body systems. The course emphasizes the essential structure and function of the normal human body, which will serve as a foundation of general understanding for future study in health occupations. Integration of each system to other systems and the whole organism, as well as application of key concepts to health and disease, are emphasized.

**BIO 127**  
DISEASES OF THE HUMAN BODY  4 CR  
Introduction to the effects of system diseases on the human body. Course includes discussions of selected diseases, including causes and treatments. Course also includes an overview of principles of pharmacology and description/purposes of selected laboratory tests.

**BIOI& 160**  
GENERAL BIOLOGY WITH LAB  5 CR  
This course provides introduction to basic concepts of biology, with an emphasis on the cells as the fundamental unit of life. Topics include cell structure, basic chemical and biochemical concepts, metabolism, cell division, principles of genetics, biological diversity, and methods of scientific inquiry and critical thinking. Course establishes foundation necessary for continued biology study, especially in human anatomy and physiology. Lab included.

PREREQUISITES: CPT score of 86 or higher on sentence skills and 85 or higher on reading.
BIOL& 241
HUMAN A & P 1  5 CR
This course emphasizes the structure and function of the normal human body, which will serve as a foundation for future study in allied health fields. Lecture, group discussion, literature and internet research, and laboratory exercises are included. Acquisition of basic knowledge, application, and integration of concepts are emphasized. BIOL 241 includes anatomical terminology, tissues, and integumentary, skeletal, muscular, nervous, and endocrine systems.
PREREQUISITES: BIOL&160 General Biology with Lab with a C or above or equivalent

BIOL& 242
HUMAN A & P 2  5 CR
This course emphasizes the structure and function of the normal human body, which will serve as a foundation for future study in allied health fields. Lecture, group discussion, literature and internet research, and laboratory exercises are included. Acquisition of basic knowledge, application, and integration of concepts are emphasized. BIOL 242 includes circulatory, lymphatic, respiratory, digestive, urinary, and reproductive systems.
PREREQUISITES: BIOL 242 Human A & P2 with a C or above or equivalent

BIOL& 260
MICROBIOLOGY  5 CR
Exploration of microbial world with a focus on medical microbiology for students in the health field. Areas of study include classification of microbes, life cycle, metabolism, control, and common infectious diseases of the human body. Laboratory component will demonstrate procedures to identify and control microbes.
PREREQUISITES: BIOL& 160 - General Biology with Lab with a C or above or equivalent and CHEM& 121-Intro to Chemistry with a C or above or equivalent

---

**BUILDING CONSTRUCTION**

BCT 111
CAREER OPPORTUNITIES AND INDUSTRIAL SAFETY  1 CR
This course focuses on the career opportunities available to individuals in the carpentry trade and industrial safety. Topics covered include, career specialties, primary employability skills, work site safety, and responsibilities of both employers and employees.

BCT 112
CONSTRUCTION MATERIALS AND APPLICATION  2 CR
This course focuses on the material used in building construction and application techniques. Topics covered include, wood as a building material, engineered lumber products, and engineered panel products.

BCT 113
HAND TOOL USE AND OPERATIONS  2 CR
This course focuses on the hand tools used by carpenters in building construction. Topics covered include, measuring and marking tools, cutting and shaping tools and tools for assembling and disassembling.

BCT 114
PORTABLE POWER TOOLS USE AND OPERATIONS  4 CR
This course focuses on the proper use of the common portable power tools used by carpenters in building construction. Topics covered include, portable circular saws, drills, routers, surfacing tools, and tool safety

BCT 115
STATIONARY POWER TOOL USE AND OPERATIONS  4 CR
This course focuses on the proper use of stationary power tools used by carpenters in building construction. Topics covered include, table saws, miter saws, dado saws, jointers, planers, and tool safety.

BCT 116
BUILDING LAYOUT  2 CR
This course focuses on the knowledge, skills and techniques required to properly layout a building on a site. Topics covered include, basic site layout, types of surveying instruments, setting up batter boards, making square corners, establishing elevations, estimating soil excavations.

BCT 117
CONCRETE AND CONCRETE FORMING  3 CR
This course focuses on the knowledge, skills and techniques required to form concrete. Topics covered include, concrete as a building material, concrete ingredients, concrete mixing and reinforcing, and footing and foundation wall forming.

BCT 121
BLUEPRINT READING  4 CR
This course is designed to help the student gain proficiency in reading and interpreting blueprints. Topics covered include, building codes, drawing measurements, notations, and conventions.

BCT 122
FRAMING METHODS - FLOOR FRAMING  4 CR
This course is designed to help the student gain proficiency in the methods used to frame floor structures in light frame construction. Topics covered include, stresses on framing, live loads, dead loads, span tables, balloon-framing, framing for natural hazards, installing post and girders, laying out for and installing plates and joists, laying sub floors, special framing, and material estimation.

BCT 123
FRAMING METHODS - WALL FRAMING  4 CR
This course is designed to help the student gain proficiency in the methods used to frame wall structures in light frame construction. Topics covered include, blueprint reading, interior and exterior walls, layout, assembly, erection, special framing, and material estimation.

BCT 124
FRAMING METHODS - CEILING FRAMING  4 CR
This course focuses on the processes and skills necessary to construct the most common residential roof styles in use in Whatcom County today. Topics covered include roof styles, basic framing, laying out a basic roof frame, the ridge, common rafters, hip and valley rafters, jack rafters, and special framing.

BCT 125
TRUSS ROOF FRAMING  4 CR
This course is designed to help the student gain proficiency in the methods used to frame truss roof structures in light frame construction. Topics covered include roof truss basics, roof truss types and design, handling and installation.

BCT 130
ROOF FRAMING  5 CR
This course focuses on the processes and skills necessary to construct the most common residential roof styles in use in Whatcom County today. Topics covered include roof styles, basic framing, laying out a basic roof frame, the ridge, common rafters, hip and valley rafters, jack rafters, and special framing.

BCT 132
STAIR FRAMING  2 CR
This course focuses on the processes and skills necessary to construct basic stairways. Topics covered include stairway basics, design requirements, layout and installation.

BCT 134
EXTERIOR WALLS AND ROOF COVERINGS  2 CR
This course focuses on the processes and skills necessary to install exterior wall coverings. Topics covered include, siding types, preventing moisture problems, beveled wood siding installation, wood shingle installation and material estimation.

BCT 135
INTERIOR WALL COVERING INSULATION & TRIM  4 CR
This course focuses on the processes and skills necessary to install interior wall coverings. Topics covered include, siding types, preventing moisture problems, beveled wood siding installation, wood shingle installation and material estimation.

BCT 136
INTRO TO HOUSE WIRING AND PLUMBING  3 CR
This course is intended to give the student a basic knowledge of the residential electrical system. Topics covered include, replacing an outlet, replacing a switch and replacing a light fixture. This also introduces the students to the basic layout and fixtures for residential dwellings.

Curriculum subject to change. For current information, visit us on the web at: [www.btc.ctc.edu](http://www.btc.ctc.edu)
BCT 137
ROOF SHEATHING/COVERINGS  2 CR
This course focuses on the processes and skills necessary to sheath, cover, and finish out the most common residential roof styles in use today. Topics covered include sheathing methods, roof coverings, flashing, and roof edge details.
PREREQUISITES: BCT 128 and/or instructor’s permission.

BCT 138
EXTERIOR DOORS WINDOWS AND SKYLIGHTS  4 CR
This course focuses on the processes and skills necessary to install exterior doors. Topics covered include door types and construction, hardware, storage and handling, exterior and interior doors and installation.
PREREQUISITES: BCT 131 and/or instructor’s permission.

BCT 241
CAD DRAFTING FUNDAMENTALS  8 CR
This course introduces the student to computer aided drafting. Topics covered include, CAD drafting, drafting fundamentals, scaling, symbology and conventions.

BCT 242
BUILDING PLAN DRAFTING  8 CR
This course introduces the student to drafting building plans. Topics covered include drawing site plans, floor plans, elevations, building sections and details.

BCT 243
ESTIMATING MATERIALS AND LABOR  5 CR
This course introduces the student to estimating labor requirements from construction documents. Topics covered include square foot costing and unit costing.

BCT 245
PROJECT TRACKING  2 CR
This course introduces the student to the process of project progress tracking. Topics covered include work progression, scheduling and Gant charting.

BCT 251
INTERNSHIP BUILDING CONSTRUCTION  11 CR
This course is designed to give the student an opportunity to gain experience working in the construction industry.

CONST 100
COMPUTERS IN CONSTRUCTION  3 CR
This course provides an overview of Microsoft Office 2007 and how it can be used in the field of Construction Management. You will learn how to create and modify Word documents, use formulas in Excel, develop and maintain Access databases, run reports with Access, and produce a professional presentation using PowerPoint.

CONST 110
CIVIL CONSTRUCTION ESTIMATING  7 CR
This course provides an introduction to estimation methods specific to the heavy civil construction industry. The course focuses on the use of heavy civil construction plans to perform utility quantity take-offs, roadway linear earth work, and site earth work estimation.

CONST 112
CONSTRUCTION RESOURCE ACCOUNTING  5 CR
This course provides an introduction to resource accounting fundamentals specific to the heavy civil construction industry. The course focuses on the reading of real world example project budgets and the preparation of project budgets based on project estimates and heavy civil construction plans. In addition, the fundamentals of time value of money are covered to support the budget process.

CONST 114
CIVIL CONSTRUCTION SCHEDULING  3 CR
This course provides an introduction to precedence diagrams, activity networks, project float calculations, and critical path management specific to the heavy civil construction industry. The course focuses on scheduling fundamentals and concludes with the use of MS Project to prepare and adjust a project schedule.

CONST 141
BLUEPRINT READING  3 CR
This course provides an introduction to reading and interpreting architectural drawings, layout, terminology, graphic standards and drafting fundamentals. Students learn how to locate information and cross reference with details, schedules, and specifications for clarification.

CONST 200
BASIC ESTIMATING  3 CR
This course introduces students to the world of construction estimating and bidding including basic concepts, procedures, and terminology. Students will learn quantity take-off and pricing techniques, along with scope of work issues and costs associated with the major components of a construction project.

CONST 201
CONTRACTS AND CONSTRUCTION LAW  3 CR
This course provides an introduction to construction law specific to the residential and small commercial construction industry. The course focuses on contracts and subcontracts, business law basics, and construction law fundamentals.

CONST 202
COMMERCIAL ESTIMATING  4 CR
This advanced estimating course further develops the methods and procedures of estimating for application in commercial construction. Emphasis is placed on pricing through the utilization of bid forms, which are completed in connection with the estimate.
PREREQUISITES: CONST 200 or instructor’s permission.

CONST 210
CIVIL PROJECT DOCUMENTATION  4 CR
This course provides an introduction to project documentation required for public projects. The course focuses on contracts, contract modification, project correspondence, permits, as-built drawings, and project billing documentation specific to the heavy civil construction industry.

CONST 214
CIVIL CONSTRUCTION PROJECT CONTROLS  7 CR
The course provides an introduction to the methods of controlling heavy civil construction projects. The course focuses on job estimate review, cost account codes, budget monitoring, performance forecasting, and project schedule review.

CONST 216
CONSTRUCTION SAFETY MANAGEMENT  5 CR
The course provides an introduction to the methods of safety management. The course focuses on traffic control plans, trench safety, labor and industry requirements, OSHA and WISHA requirements, safety management, risk management, and loss control.

CONST 220
PROJECT PLANNING AND SCHEDULING  3 CR
Students will use the critical path method (CPM) for planning and scheduling a construction project. They will develop and manipulate a computerized schedule for a construction project using the Microsoft Project software application.

CONST 241
AUTOCAD FOR CONSTRUCTION  3 CR
Introduction to the fundamentals of architectural graphics and geometric construction in multiple views using computer aided drafting software. Prepares students for creating, reading, and communicating graphic images in electronic formats.

CONST 250
SAFETY AND ACCIDENT PREVENTION  3 CR
Important WISHA/OSHA regulations that pertain to the construction industry will be covered along with accident prevention. Students will learn how to recognize hazards, implement safe work practices, create work rules, communicate expectations, and make job-site safety inspections.

CONST 251
SAFETY PLAN ADMINISTRATION  3 CR
This course will focus on job-site safety and potential liability for general contractors. Students will learn about management systems, procedures, and documentation that address WISHA requirements and provide a safe working environment. The effective integration of safety into management systems will be stressed.
PREREQUISITES: CONST 250 or instructor’s permission.

CONST 260
CONSTRUCTION PROJECT MANAGEMENT  3 CR
Students will learn about management concepts and techniques relevant to construction project organization, supervision, and inspection. The course will cover communication systems, contract documents, record keeping, dispute resolution, quality assurance, and schedule management.
BUSINESS & SUPERVISION

BUS 100
ELECTRONIC MATH APPLICATIONS 3 CR
Focuses on the application of the electronic calculator to business transactions and accounting activities. Students will develop speed on the 10-key by touch method.

BUS 123
RECORDS MANAGEMENT 3 CR
Introduces students to basic terminology and the scope of records and information management, employment opportunities, and legal and ethical matters associated with records. The life cycle of nonelectronic and electronic records are surveyed from creation to retention and destruction.

BUS 140
SUPERVISION & MANAGEMENT 3 CR
An introduction to supervision. Course focuses on basic skills in communication, time management, planning, delegation, improving productivity, and the legal aspects of supervision. Practice sessions in communication, interviewing, merit reviews, and termination will be provided.

BUS 141
TOTAL QUALITY MANAGEMENT 2 CR
Total Quality Management, or TQM, is a strategic, integrated management system for achieving customer satisfaction. Course will examine the process, and students will be challenged in devising a plan strategy of how to implement the TQM approach in a variety of organizations.

BUS 150
MATHEMATICS FOR BUSINESS 5 CR
Apply math concepts to business applications such as commissions, banking, payroll, trade and cash discounts, markups, simple interest, taxes, insurance, stocks, bonds, compound interest, depreciation, present value, annuities, and graphs.
PREREQUISITES: BUS 100 is recommended

BUS 177
BUSINESS ENGLISH I 3 CR
Business English I focuses on the improvement of proofreading skills for effective written communication. Students use a self-study text in which they can check their answers for immediate reinforcement. Rules and proofreading exercises are presented in order of increasing difficulty, from simple keyboarding errors to errors in grammar, punctuation, word usage, and capitalization.

BUS 178
BUSINESS ENGLISH II 3 CR
Business English II allows students to review and master the basic communication skills learned in Business English I. It is designed to give students the opportunity to make decisions and apply these skills while editing business documents.
PREREQUISITES: BUS 177.

BUS 184
CUSTOMER SERVICE 3 CR
Excellence in customer service can be the determining factor, no matter the type of service or product, to the success or failure of an organization. Course discusses the basics of customer service, bias in providing quality service, finding the right person the level of expected service, and defining “who is the customer” when dealing in business relations.

BUS 200
BUSINESS LAW 5 CR
Demonstrate knowledge of laws affecting businesses. Introduces students to principles underlying the legal environment of business through lectures, classroom activities, and study of text. Students will be exposed to basic information relating to contracts, sales, consumer protection, real property, personal property, and computer laws.

BUS 225
INTERNSHIP 6 CR
Students will work in an office-related job receiving pay or volunteering.
PREREQUISITES: Instructor permission.

BUS 230
MEDICAL OFFICE PROCEDURES 5 CR
Educates the student for administrative duties in the medical office. Teaches computerized medical office procedures as well as exercises in judgment, independent action, and coping with interruptions. In addition to computerized appointment scheduling and billing, students learn about the major insurances with ICDA and CPT coding.

BUS 232
OFFICE PROCEDURES 5 CR
Prepares the student for the role of an office or administrative assistant and the broader role as a professional member of the management team. Class exposes the student to the growing influence of information technology, the expanding global marketplace, and the changes in the organizational structure of modern business.
PREREQUISITES: At least a C (2.0) in CAP 106.

BUS 280
ASSESSMENT 1 CR
Students will create a portfolio appropriate to their certificate or degree and complete an exit interview with their advisor. Assessments required for a completion certificate or degree will be assigned relative to their certificate or degree.
PREREQUISITES: Instructor permission.

CAP 154
COMPUTERIZED ACCOUNTING LEVEL A USING QUICKBOOKS 3 CR
Learn how to use QuickBooks to manage the finances of a small business. Topics include general ledger, accounts receivable, accounts payable, and payroll.
PREREQUISITES: Knowledge of Windows.

CAP 155
COMPUTERIZED ACCOUNTING LEVEL B USING QUICKBOOKS 3 CR
Learn how to use QuickBooks to manage the finances of a small business. Topics include general ledger, accounts receivable, accounts payable, and payroll.
PREREQUISITES: Knowledge of Windows.

GBUS 100
BUSINESS FUNDAMENTALS 5 CR
An introduction to the fundamentals of business operations and management, the functional areas of business, their interrelationships, and the processes necessary for effective operation. Learn to identify and understand business trends, anticipate future business conditions, and prepare for successful careers. Apply the various business concepts to their actual working environments. Learn to develop and prepare a business plan; to prepare a marketing plan; to manage human resources; to manage financial resources; and how to think strategically.

GBUS 110
BUSINESS COMMUNICATIONS 5 CR
Course includes reading, writing, and listening skills, leading effective meetings, use of email as a communication tool, making presentations, and expressing yourself clearly when communicating.

GBUS 120
TECHNICAL WRITING 5 CR
Designed for both entry-level and experienced writers, this practical, hands-on course gives you an introduction to technical writing. Review and practice the critical elements of audience, project design, language, use of graphics, editing, and problem solving. Take a look at the range of technical and professional communication in today’s business world.

MGMT 100
BUSINESS & PROFESSIONAL ETHICS 3 CR
Current events have brought the concepts of ethics, both in the individual person as well as company practices, to the foreground. This course will discuss and examine, through critical analysis, the concept of interest, secrecy and confidentiality, honesty, interpretation of ethics policies and rules, as well as the differences.
**CHEMISTRY**

CHEM 121
**INTRO TO CHEMISTRY** 5 CR

Introductory course for non-science majors, nursing, and environmental science students. Includes basic concepts of inorganic and organic chemistry, the nature of atoms, molecules and chemical bonds, chemical notation, chemistry of solutions, scientific reasoning, and problem-solving in the study of the theory and application of chemistry. Lab work is included.

PREREQUISITES: PREREQUISITES: MATH 99 - Intermediate Algebra with a C or above or equivalent.

**CHILD DEVELOPMENT**

ECED 112
**STARS - BASICS IN CHILD CARE** 2 CR

This course provides a foundation of basic core knowledge about child development, guidance and behavior, health, and safety and presents an introduction to the important content areas of early childhood education. The course is based on the Child Care Center Licensing Guidebook 2nd ed. Students will be provided information, practice, and opportunity to demonstrate mastery of the course concepts: child growth and development, child guidance, health, safety, and professionalism and communication. Required for child care directors, program supervisors, and lead teachers in center settings.

ECED 120
**CDA ESSENTIALS 1: INTRO TO ECE/HEALTH, SAFETY & NUTRITION** 4 CR

This course is one of three courses that provide the essential coursework for the nationally recognized Child Development Associate (CDA). Topics to be covered in course one include safety and healthy environments, ways children grow, and an introduction to early childhood. Fieldwork is required in addition to coursework and observation/mentoring by the instructor is included. Information gathered in the course can be utilized for creating a portfolio and/or CDA resource file.

PREREQUISITES: Currently working in an early childhood setting (volunteer or paid)

ECED 121
**CDA ESSENTIALS 2: CHILD DEVELOPMENT/LEARNING ENVIRONMENTS** 4 CR

This course is one of three courses that provide the essential coursework for the nationally recognized Child Development Associate (CDA). Topics to be covered in course two include children’s social and emotional development, physical and intellectual competence; and curriculum development. Fieldwork is required in addition to coursework and observation/mentoring by the instructor included. Information gathered in the course can be utilized for creating a portfolio and/or CDA resource file.

PREREQUISITES: Currently working in an early childhood setting (volunteer or paid)

ECED 122
**CDA ESSENTIALS 3: WORKING WITH FAMILIES/PROFESSIONALISM** 4 CR

This course is one of three courses that provide the essential coursework for the nationally recognized Child Development Associate (CDA). Topics to be covered in course three include family relationships; early childhood professionalism; and curriculum and portfolio development. Fieldwork is required in addition to coursework and observation/mentoring by the instructor is included. Information gathered in the course can be utilized for creating a portfolio and/or CDA resource file.

PREREQUISITES: Currently working in an early childhood setting (volunteer or paid)

ECED 123
**PREFOR CHILD DEVELOPMENT ASSOCIATES (CDA) ASSESSMENT** 1 CR

This course will provide detailed information about the assessment processes for center-based/family childcare, and home visitor personnel who meet the education and experience requirements for the Child Development Associate credential. Participants will finalize and organize their work in relation to the six CDA Competency Standards and the thirteen Functional Areas.

PREREQUISITES: Currently working in an early childhood setting (volunteer or paid)

ECED 130
**THE DEVELOPING INFANT** 1 CR.5

Adults and young infants attend this course together in an instructional program that focuses on infant development. Adults and young infants interact together in class. Topics include infant development, play, sleep, nutrition, and health and illness and safety.

ECED 131
**APPROACHING TODDLERHOOD** 1 CR.5

Adults and older infants attend this class together in an instructional program that focuses on children’s development. Developmentally appropriate activities are planned for the adult and older infants to interact together in class. Topics include child development, play, sleep, waking, discipline, emerging language, health and illness, and safety.

ECED 135
**ADULT/CHILD 1 YR DEV - A** 2 CR

Adults and children attend this course together in an instructional program that focuses on one year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 136
**ONE YR DEVELOPMENT - B** 2 CR

Adults and children attend this course together in an instructional program that focuses on one year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 137
**ONE YR DEVELOPMENT - C** 2 CR

Adults and children attend this course together in an instructional program that focused on one year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 140
**ADULT/CHILD 2 YR DEV - A** 2 CR

Adults and children attend this course together in an instructional program that focuses on two year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 141
**TWO YR DEVELOPMENT - B** 2 CR

Adults and children attend this course together in an instructional program that focuses on two year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 142
**TWO YR DEVELOPMENT - C** 2 CR

Adults and children attend this course together in an instructional program that focuses on two year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 145
**3 & 4 YR DEVELOPMENT - A** 3 CR

Adults and children attend this course together in an instructional program that focuses on preschooler’s development. Developmentally appropriate activities are planned for adults and preschoolers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 146
**3 & 4 YR DEVELOPMENT - B** 3 CR

Adults and children attend this course together in an instructional program that focuses on preschooler’s development. Developmentally appropriate activities are planned for adults and preschoolers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.
ECED 147  
3 & 4 YR DEVELOPMENT - C  3 CR  
Adults and children attend this course together in an instructional program that focuses on pre-schooler's development. Developmentally appropriate activities are planned for adults and preschoolers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 150  
ADULT/CHILD 4-5 YR DEV - A  1 CR.5  
Adults and children attend this course together in an instructional program that focuses on pre-kindergarten children's development. Developmentally appropriate activities are planned for adults and preschoolers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and school readiness.

ECED 151  
4 & 5 YR DEVELOPMENT - B  1 CR.5  
Adults and children attend this course together in an instructional program that focuses on pre-kindergarten children's development. Developmentally appropriate activities are planned for adults and preschoolers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, health and safety, and school readiness.

ECED 152  
4 & 5 YR DEVELOPMENT - C  1 CR.5  
Adults and children attend this course together in an instructional program that focuses on pre-kindergarten children's development. Developmentally appropriate activities are planned for adults and preschoolers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, health and safety, and school readiness.

ECED 155  
ADULT/CHILD TODDLER DEV - A  2 CR  
Adults and children attend this course together in an instructional program that focuses on caring for and teachings more than one and children's development. Developmentally appropriate activities are planned for adults and children from birth to age five to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 156  
TODDLER & PRESCOLLEER DEV - B  2 CR  
Adults and children attend this course together in an instructional program that focuses on caring for and teaching more than one and children's development. Developmentally appropriate activities are planned for adults and children from birth to age five to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 157  
TODDLER & PRESCOLLEER DEV - C  2 CR  
Adults and children attend this course together in an instructional program that focuses on caring for and teaching more than one and children's development. Developmentally appropriate activities are planned for adults and children from birth to age five to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 160  
POSITIVE DISCIPLINE  1 CR.5  
Positive discipline is an interactive class for parents and teachers who want more cooperative, respectful, and joyful relationships with their children and students. Topics include ways to discipline (teach) with kindness and firmness at the same time, to help children achieve self-discipline and problem solving skills, to create an atmosphere of cooperation and mutual respect in your home and classroom, and to reduce power struggles.

ECED 161  
EARLY CHILDHOOD STEP  1 CR  
Early childhood step is an interactive class for parents and teachers to help develop skills to guide and encourage children as they grow. Topics include information on understanding young children and their behavior, building self-esteem, effective communication, cooperation, discipline techniques, and emotional and social development.

ECED 162  
TALK SO KIDS WILL LISTEN  1 CR.5  
How to talk in an interactive class designed to help parents and teachers of toddlers through teens communicate more effectively with children. During this seven week course, specific topics of communication, cooperation, alternatives to punishment, self-image, and love and respect will be discussed.

ECED 170  
LOVE & LOGIC PARENTING  1 CR.5  
Based on the highly acclaimed love and logic philosophy developed by Jim Fay and Foster Cline, this class unlocks the secrets of successful parenting. Participants in this class will learn the specific "how-to's" of successful parenting, not just theoretical concepts. The discussions and readings will provide parents with specific, tangible skills to use and a mind-set that allows them to develop a loving relationship while setting limits and boundaries.

COMMERCIAL DRIVING

CODR 101  
COMMERCIAL DRIVERS LICENSE PREP  2 CR  
This course prepares the student to take the written Washington State Department of Licensing Examination. This examination is the prerequisite for obtaining a commercial driver's license required for driving commercial vehicles on public roads. The course includes the step-by-step instructions about the statutory requirements of the transportation laws and basic knowledge needed to commence the hands-on driver training on the commercial vehicle. The course also includes the preparation for the written exam for several endorsements: doubles, triples, hazardous materials, buses, and air brakes.

CODR 104  
CUSTOMER SERVICE FOR TRUCK DRIVERS  2 CR  
Excellence in customer service can be the determining factor, no matter the type of service or product, to the success or failure of an organization. Course discusses the basics of customer service in the distribution and transportation industry. How to present the paperwork for delivery, handle complaints about freight damages, informing customers about company rules politely and clearly, dealing with drivers from one company or other companies for transfer of freight.

CODR 105  
FINANCIAL BASICS FOR TRUCKERS  1 CR  
This course covers the difference between a sole proprietorship and a company, use of accounts, computer accounting software available, understanding personal tax and business related expenses, debt management, credit cards and bank loans, and savings and checking accounts. Introduction to company savings plans, retirement plans, 401K, and other vehicles for savings.

CODR 109  
TRUCK DRIVING INTERNSHIP  12 CR  
This is a 8 to 12 week internship for students to work with a local company as a for practical experience, training and skill learning as a truck driver. The college will sign an internship agreement with the employer and students will work under supervision of a company re/supervisor during this period, the supervisor will submit an internship completion report on a standard college format at the end of the internship period. Students will be responsible to arrange the internship, however, the BTC instructor will help in the process. This may or may not be a paid internship.

CODR 109  
DRIVING SKILLS UPGRADE  1 CR  
CODR 245  
COMMERCIAL DRIVING PRACTICUM 12 CR  
This course prepares the student to take the driving test administered by Washington state department of licensing for obtaining a commercial driver's license required for driving commercial vehicles on public roads. the course includes hands-on behind the wheel driving instruction and observation as second driver/passenger in a commercial vehicle. The teaching includes classroom instruction about dot regulations, range driving, log book entry, and other related topics.

CODR 250  
BUS DRIVING PRACTICUM  2 CR  
This course prepares the student to take the training for obtaining a bus driving endorsement on the class a commercial driving license administered by Washington state department of licensing, which is a mandatory requirement for driving a passenger bus on public roads. The course includes hands-on behind the wheel driving instruction and observation as a second driver/passenger in a passenger bus. the teaching includes classroom instruction about dot regulations, range driving, log book entry and other related topics.
CAP 101
INTRODUCTION TO COMPUTERS 5 CR
Introduces use of the personal computer while working in a Microsoft Windows environment. Includes a basic introduction to Excel, Word, and PowerPoint. Students will become familiar with the basic computer hardware components, Internet use, and Windows use. This course will help prepare students for the IC3 certification exam. CAP 199 may be accepted in place of CAP 101.

CAP 105
COMPUTERIZED TOUCH KEYBOARDING 2 CR
A touch typing course for beginners as well as those needing to brush up on their keyboarding skills. Course covers learning to type alphabetical keys by touch using proper technique.

CAP 106
FORMATTING WITH MS WORD 4 CR
Provides skillbuilding, production typing, and Microsoft Word fundamentals at the beginning or review level. Students use MS Word to format letters, memos, reports, and tables. PREREQUISITES: CAP 105.

CAP 107
COMPUTERIZED KEYBOARDING SKILLBUILDING 3 CR
Designed to help students improve their speed and accuracy at the computer. Computerized lessons analyze areas of weakness and provide appropriate drills for improvement. PREREQUISITES: CAP 106.

CAP 109
COMPUTERIZED KEYBOARD SKILLBUILDING II 3 CR
Designed to help students to further improve their speed and accuracy at the computer. Computerized lessons analyze areas of weakness and provide appropriate drills for improvement. PREREQUISITES: CAP 107.

CAP 110
DATA ENTRY 3 CR
This course is designed to help students learn proper data entry skills and improve their speed and accuracy at the computer. Computerized lessons analyze areas of weakness and provide appropriate drills for improvement. PREREQUISITES: CAP 106.

CAP 128
MS WORD 5 CR
Students receive hands-on instruction using the commands and features of MS Word to create simple to complex business documents. PREREQUISITES: CAP 101 or instructor permission.

CAP 142
MS EXCEL 5 CR
This course provides a practical hands-on approach to developing the skills to use the powerful spreadsheet application. MS Excel. Students will use Excel to organize and analyze data, perform numerical calculations, and illustrate relationships in numerical data by displaying charts. PREREQUISITES: CAP 101 or instructor permission.

CAP 146
MS ACCESS 5 CR
Table design, relationships, filters, queries, forms, and reports will be introduced. Students will apply skills to database projects. PREREQUISITES: CAP 101 or instructor permission.

CAP 148
MS POWERPOINT 3 CR
Presents an overview of a presentation graphics program. Students will create and present a slide show projected from their computer. PREREQUISITES: CAP 101 or instructor permission.

CAP 150
PROJECT LEVEL 1 1 CR
The first in a series of two courses designed for individuals who will use Microsoft Project 2002 as a tool to assist them in managing projects. Topics include critical skills to create and modify a project plan file containing tasks, resources, and assignments; create a project plan file to organize tasks in a work breakdown structure determined by relationships; assign resources and confirm strategy to implement the project plan. PREREQUISITES: CAP 101.

CAP 151
PROJECT LEVEL 2 1 CR
You will exchange and update project plan data with other applications, create custom reports, reuse project plan information, and collaborate on project plans with other students. PREREQUISITES: CAP 101.

CAP 199
COMPUTER FUNDAMENTALS 5 CR
Introduces use of the personal computer while working in a Microsoft Windows environment. Students become familiar with basic computer hardware components and learn to use word processing and spreadsheet software. Students also learn how to use the Internet and email and gain competence in keyboard familiarity. Microsoft Windows, Word, Excel and Outlook are used in this class. This course will help you prepare for the IC3 certification exam.

CAP 200
INTEGRATED COMPUTER APPLICATIONS 5 CR
Students will apply their skills learned in the previous courses to produce professional-looking documents by integrating word processing, spreadsheet, database, and presentation graphics programs. Students will prepare a professional portfolio for use in future job search opportunities. PREREQUISITES: CAP 138, CAP 142, CAP 146, & CAP 148 or instructor permission.

CAP 140
WEBSITE DEVELOPMENT 4 CR
An introduction to HTML, graphics, and other programming languages for use in web pages. Students will learn the use of programming editors, preparation of graphics, content development, and page layout. PREREQUISITES: CAP 101, CAP 105 or instructor permission.

CAP 145
WEBSITE DEVELOPMENT 5 CR
An introduction to HTML, graphics, and other programming languages for use in web pages. Students will learn the use of programming editors, preparation of graphics, content development, and page layout. PREREQUISITES: CAP 101, CAP 138, CAP 142, and CAP 146 with minimum grade of C (2.0).

CAP 251
SCRIPT PROGRAMMING 5 CR
Course provides computer script design and development. Various introductory script programming concepts and techniques will be taught. PREREQUISITES: CAP 101.

CAP 276
INTERNSHIP 6 CR
Students will arrange to work in an office, solving computer software, hardware or operating system problems for users. It may be paid or unpaid 180 hours of work experience. PREREQUISITES: Instructor permission.

IT 102
ETICS AND CAREERS 5 CR
Ethics issues and career options for computer professionals will be explored through research and simulated IT enterprises. Topics include intellectual property rights, respecting privacy, avoiding harm to others, IT career paths, and IT workplace environments. PREREQUISITES: CAP 101 and IT 160 or IT 140 or IT 141.

IT 112
PC HARDWARE A+ 8 CR
This course prepares the student to understand, install, configure, upgrade, troubleshoot, and repair PC hardware components. Course material parallels the CompTIA A+ Essentials certification objectives for hardware. PREREQUISITES: CO-REQUISITE: CAP 101.

IT 121
INTRODUCTION TO PROGRAMMING 5 CR
This course introduces students to the fundamentals of good program design, coding, testing, and documentation. Students will learn to employ good user interface design, standardization and
variable naming, decision operators, looping mechanisms, subroutines and error handling as they build their own programs.

IT 140 COMMAND LINE OPERATING SYSTEMS 5 CR
This course is designed to give students a solid understanding of the basic functions of operating systems by learning the Windows and Unix command line. Students will learn navigation, file manipulation, and redirection commands so that they can build useful batch scripts by the end of the course.

IT 141 OPERATING SYSTEMS A+ 8 CR
This course prepares the student to install, maintain, and troubleshoot Windows operating systems. Course material parallels the CompTIA A+ IT Technician certification objectives for operating systems.

IT 142 CLIENT/DESKTOP OPERATING SYSTEMS II 10 CR
Designed to facilitate in-depth study of a Client Computer Operating system found commonly in the business environment. Areas of study include installation, configuration, troubleshooting, deployment, and networking.

PREREQUISITES: CAP 101 and IT 160 or IT 140 or IT 141.

IT 160 NETWORKING TECHNOLOGIES 8 CR
The goal of this course is to provide students with a background in networking technologies and prepare students to pass CompTIA’s broad-based, vendor-independent networking certification exam, Network +. This course covers a wide range of material about networking, from careers in networking to local area networks, wide area networks, protocols, topologies, transmission media, and security. It not only introduces a variety of concepts, but also discusses in-depth the most significant aspects of networking, such as the TCP/IP protocol suite.

IT 210 NETWORK SECURITY FUNDAMENTALS 10 CR
This course provides a comprehensive overview of network security through lecture, extensive hands-on, and research projects. Topics covered include general security concepts, communication security, infrastructure security, cryptography, access control, authentication, external attack, and operational and organizational security.

PREREQUISITES: IT 160, 112, 140.

IT 220 NETWORK COMMUNICATION INFRASTRUCTURE 5 CR
In this hands-on practicum students learn the components of structured data communications cabling systems, OSI Layers 1, 2 and 3 hardware components, and how to install and configure them.

PREREQUISITES: IT 160.

IT 240 UNIX ADMINISTRATION & CONFIGURATION 10 CR
This course introduces students to system administration fundamentals of the UNIX operating system. Using Linux, students learn to install and configure the O/S using system text files, use the common GUIs, configure networking, administer user accounts and permissions, define the user environment, and monitor system resources, processes and usage.

PREREQUISITES: IT 140 and IT 141 or IT 142.

IT 242 WINDOWS SERVER ADMINISTRATION 5 CR
Covers installation, configuration, and system administration of Windows Server. Topics include managing accounts, groups, folders, and files; object security; Active Directory; DFS; Disk quotas; server monitoring and optimization; and troubleshooting.

PREREQUISITES: IT 160.

IT 243 WINDOWS SERVER NETWORK INFRASTRUCTURE 5 CR
This course covers managing and maintaining a Windows Server network infrastructure. Students will learn how to install, configure, and troubleshoot TCP/IP, DHCP, DNS, routing and remote access, and VPNs. Students will also learn to monitor traffic, troubleshoot connectivity, implement secure network administration procedures and resolve service issues on a Windows Server.

PREREQUISITES: IT 242.

IT 261 ADVANCED TOPICS IN NETWORKING I 5 CR
This course allows for specialized or in-depth study of an advanced computer networking topic. Example topics may include: Microsoft SQL Server, Apache Web Server, Internet Information Server, Microsoft Exchange Server, computer forensics.

PREREQUISITES: IT 240 and IT 242.

IT 262 ADVANCED TOPICS IN NETWORKING II 5 CR
This course allows for specialized or in-depth study of an advanced computer networking topic. Example topics may include: Microsoft SQL Server, Apache Web Server, Internet Information Server, Microsoft Exchange Server, computer forensics.

PREREQUISITES: IT 240 and IT 242.

IT 270 INTERNSHIP 9 CR
Students will work in their new career field applying the new skills and being mentored and evaluated by industry professionals. The internship will provide exposure to a typical work environment, opportunities for customer interaction skill development and an opportunity to make connections with professionals already working in the field.

PREREQUISITES: CO-REQUISITE: IT 261 or IT 262.

CULINARY ARTS

CUL 110 SANITATION 3 CR
This course provides students with understanding and practice of the principles of sanitation in order to maintain a safe and healthy environment for the consumer in the food service industry. Laws and regulations related to current FDA food code and adherence to them in the food service operation are addressed. ServSafe course text and national certification examination are required.

CUL 112 INTRODUCTION TO THE HOUSITLITY INDUSTRY 3 CR
This course provides a background and history of the hospitality industry and introduces the student to the broad spectrum of hospitality/food service organizations and career opportunities, cooking equipment, and hand tools utilized in the culinary arts industry. Safety Laws, regulations, and sound safety practices in the food service operation are addressed. Students must demonstrate safe equipment knowledge and operation. Introduction to weights and measures, their use in recipes, and recipe conversions are covered as well.

CUL 114 CULINARY SKILL DEVELOPMENT I 6 CR
This course focuses on foundational cooking techniques utilized in the culinary industry. Topics of study include basic mise en place skill development, foundational cooking methods, related terminology and additional foundational cooking preparations. Theory and lab topics include focus on meat cookery; the preparation of stocks, classical and contemporary mother sauces and derivative sauces, and the application of herbs, spices, and flavorings used in the professional kitchen today. Weekly labs provide students time to practice these foundational skills.

CUL 116 MEAT IDENTIFICATION AND FABRICATION 3 CR
This course provides an introduction to basic identification and use of hand of tools and equipment in meat and fish fabrication. Activities include composition, skeletal structures, muscle types and fabrication of meats, poultry, and seafood. Students will apply basic yield analysis, portion cost calculations, purchasing and receiving, basic cooking methods, inspection and USDA regulations, sanitation, and hygiene.
CUL 120  
INTERNATIONAL AND AMERICAN REGIONAL CUISINE  
6 CR  
This course provides students with practical experience in the preparation and service of foods from international countries and regions of America. Emphasis is placed on eating habits, ethnic influences, indigenous foods and customs, cooking methods used, traditional equipment, and each region's overall influence on today's restaurant market. Weekly participation in theme buffet production enhances students' technical skills.  
PREREQUISITES: CUL 110, CUL 112, CUL 114, CUL 116

CUL 122  
CULINARY SKILL DEVELOPMENT II  
6 CR  
This course is a continuation of Culinary Skill Development I, with study and practice focused on soups, salads, salad dressings, nuts, fruits, potatoes, grains, dry legumes and pasta preparations, sandwiches, cheese and dairy products, eggs and breakfast cookery and vegetarian cookery. Theory topics include common market forms, yield study and costing analysis, purchasing, receiving, handling and storage of these foundational food products. Through weekly labs students will practice applying foundational cooking methods to these food products.  
PREREQUISITES: CUL 110, CUL 112, CUL 114, CUL 116

CUL 124  
BANQUET AND CATERING MANAGEMENT  
3 CR  
In Banquet and Catering Management students will learn the fundamentals and knowledge needed to set-up and run banquet and catering events. Theory subjects include plated and buffet banquet menus, buffet layout and design, catering contracts, event planning, organization, staffing, home meal replacement, private and personal chef industry, optional services and pricing formats. Weekly buffets provide hands on experience setting up and managing a full service banquet event.  
PREREQUISITES: CUL 110, CUL 112, CUL 114, CUL 116

CUL 140  
GARDE MANGER  
6 CR  
In the Garde Manger course students plan, prepare, execute, and present cold foods and culinary salon work, while applying fundamental cooking and garnishing methods. Production includes refined techniques such as canapés, hors d'oeuvres, amuse bouche, curing, smoking, pickling, cold foods, salt dough sculpture, ice sculpture, and tulip sculptures.  
PREREQUISITES: CUL 110, CUL 112, CUL 114, CUL 116, CUL 122, CUL 124

CUL 142  
NUTRITION  
3 CR  
This course provides students with an introduction to nutrition, cultural food pyramids, including nutritive value of foods, factors influencing body food requirements, their importance in promoting health and preventing disease, and the body processes and their relation to total nutrition. We will examine nutritional requirements throughout the human life cycle with attention to retaining nutritive values through the cooking process.  
PREREQUISITES: CUL 112

CUL 144  
INTRODUCTION TO A LA CARTE COOKERY  
5 CR  
This course provides a practical introduction to the à la carte kitchen. Theory and lab practice topics include station set-up and organization, food preparation planning sheets, portion control, timing, temperature control, teamwork, communication, productivity skills, and sanitary production skills. Weekly participation as a commis in an à la carte restaurant provides students with the opportunity to refine fundamental culinary skills and develop à la minute production skills.  
PREREQUISITES: CUL 110, CUL 112, CUL 114, CUL 116

CUL 150  
CULINARY ARTS INTERNSHIP OR TEAM COMPETITION  
8 CR  
Students may elect to work in a pre-designated professional kitchen, where they will successfully apply cooking skills and knowledge or, students may compete for one of five positions to represent Bellingham Technical Colleges culinary arts program in the Washington State American Culinary Federation student team competition.  
PREREQUISITES: Successful completion of the first 3 quarters of the Culinary Arts curriculum

CUL 212  
BREADS, COOKIES, AND TARTS  
7 CR  
Students learn the theory of chemically-leavened products such as quick breads and cookies; yeast-leavened products such as breads and laminated doughs; steam-leavened products such as puff dough, choux pastry, and decorative tarts. Students’ quick bread production will include muffins, scones, and biscuits. Cookie production will include bar, rolled, cut, piped, tuille, florentine, and snap. Bread and laminated dough products will include European yeast breads, flat breads, crackers, ciabatta, focaccia, croissants, danish, and brioches. In addition, students will produce french pastry including puff pastry (pate feuillete), choux pastry, tarts, fruit strudels, and phyllo dough.  
PREREQUISITES: CUL 110, CUL 112, CUL 114, CUL 116

CUL 214  
PIES, CAKES, AND DESSERTS  
7 CR  
Students learn the theory of creating pies, cakes, petit fours, and individual restaurant desserts. Students’ pie production will include fruit, cream, chiffon, and custard, using different doughs and fillings. Cake production will focus on two-stage, sponge, and meringue-based methods to create a variety of filled and decorated cakes such as multi-layered tortes and charlottes. In addition, students will produce restaurant desserts to order, while learning about organization, assembly, component development, decoration, and menu creation.  
PREREQUISITES: Successful completion of first 5 quarters of the Culinary Arts curriculum

CUL 220  
RESTAURANT MANAGEMENT  
7 CR  
In this course students apply advanced issues related to business and operations management. They plan and develop menus, kitchen design, dining room lay-out, point-of-sale operations, and business projections, while utilizing a variety of computer programs.  
PREREQUISITES: CAP 101, COM 170, CUL 112, CUL 124, MATH 100

CUL 222  
HOSPITALITY SUPERVISION  
4 CR  
In this course students gain an overview of specific concepts necessary to successfully utilize human resources in a food service environment. Lectures on selected topics, student projects, and assignments related to workplace activities form the majority of the material presented.  
PREREQUISITES: COM 170

CUL 224  
FOOD AND BEVERAGE SERVICE  
3 CR  
This course is based on dining room operations and table settings to meet a wide variety of service styles. Students learn the principles of front-of-the-house operations, point-of-sale systems, and guest relations, along with foundational information about wine including the history of wine, production characteristics, laws, and purchasing and storage requirements. Types, styles, service and state laws regarding alcoholic and non-alcoholic beverages service will also be discussed. Upon completion, students will be able to determine which wines compliment various cuisines and particular tastes.  
PREREQUISITES: Successful completion of the first 5 quarters of the Culinary Arts curriculum

CUL 230  
A LA CARTE RESTAURANT  
8 CR  
This course provides students with an opportunity to apply the vast majority of the culinary arts curriculum as they rotate through several stations in the à la carte restaurant kitchen. They become familiar with the theory and lab responsibilities involved in setting up and running an à la carte restaurant station including food preparation, planning sheets, organization, portion control, timing, temperature control, teamwork, communication, productivity and sanitary production skills. In addition students supervise first year students, practice expeditor skills including coordinating and controlling the flow of finished menu items from the station chefs, while working closely with student service staff and maitre d’ positions.  
PREREQUISITES: Successful completion of first 5 quarters of the Culinary Arts curriculum

Bellingham Technical College
DENTAL ASSISTING

DEN 100 INTRODUCTION TO DENTAL ASSISTING 1 CR
This course orients the student to college and program policies, procedures, standards, materials and resources. The student will be introduced to the role of dental assisting within the field of dentistry and to the historical, legal, and ethical issues relating to dental assisting.

DEN 105 HEAD & NECK ANATOMY 2 CR
This course provides an introduction to structure of head and neck region. Emphasis on anatomical structures of the skeletal, muscular, nervous, cardiovascular, and digestive systems as it pertains to the head and neck. Also includes an overview of microbiology and disease.

DEN 110 DENTAL FOUNDATIONS 5 CR
This course provides the students with the foundation necessary to enter into the Bellingham Technical College dental clinic. The student will gain knowledge and skills required to maintain a safe dental environment. Also included are federal and state regulations regarding chemical use and infection control in the dental office. This course introduces basic concepts of radiology. Students learn how to evaluate need for x-rays including: exposing, processing and mounting intraoral radiographs.

DEN 112 CHAIRSIDE ASSISTING 7 CR
This course provides the student with the knowledge and skills needed to operate and maintain typical equipment found in a dental operatory. The student will gain an understanding of the dental instruments and the dental unit water/vacuum line. This course will also focus on the theory and delivery of basic dental assisting skills, such as dental ergonomics, principles of team positioning, instrument transfer and oral evacuation.

DEN 114 DENTAL SCIENCES 4 CR
This course focuses on related biomedical sciences that are the foundation of the dental assisting curriculum. Course content includes basic oral embryology and histology and tooth morphology. Concepts of oral pathology and oral inspection will be introduced.

DEN 115 DENTAL CLINIC PRACTICUM I 6 CR
This clinical practicum course provides a clinical introduction for the student. Students will be assigned to a variety of weekly clinical responsibilities. They will begin their duties with a mentor and eventually move to independent competencies. Students will gain hands-on experience in front office, clinical coordination, darkroom techniques, bitewing x-ray exposure, patient management, and sterilization.

DEN 119 PATIENT ASSESSMENT 8 CR
This course provides the student with the level of knowledge and skills required for the dental assistant to accurately collect and assess patient data. The student will have the opportunity to learn and practice the skills associated with collecting a health history, obtaining vital signs, assisting with medical emergencies, and assisting the dentist in the diagnostic stages of dental treatment. Pharmacology and anesthesia will be presented as it relates to dentistry and oral health. This course also includes an introduction on dental office administration, concentrating on specific job duties in the Bellingham Technical College Dental Clinic.

DEN 122 CHAIRSIDE ASSISTING II 6 CR
This course provides the student with appropriate skills to perform routine dental procedures. Instruction will include the use and manipulation of dental instrument setups, restorative materials, isolation techniques and how to effectively transfer instruments when assisting in a dental procedure.

DEN 124 RADIOGRAPHY 3 CR
This course is intended to introduce basic concepts of radiography and build on those skills and theoretical knowledge. Students will learn to correctly and safely evaluate need for x-rays, expose, process and mount intraoral and extraoral radiographs utilizing a variety of techniques and with a variety of patient situations including pedodontics, edentulous and extraoral situations.

DEN 125 DENTAL CLINICAL PRACTICUM II 4 CR
This clinical practicum course is intended to provide the student with actual patient care experience in the on-campus clinic for the purpose of implementation of the course clinical competencies. Students will be assigned to a variety of clinical responsibilities weekly. The course will identify the clinical competencies that must be successfully demonstrated in order for the student to advance to DEN 135. Actual hands-on experience in front office, clinical coordination, and assisting functions with the clinic dentist and dental hygienist will be facilitated by the instructional staff in the Bellingham Technical College dental clinic.

DEN 130 PREVENTIVE DENTISTRY 3 CR
This course provides the student with a working knowledge of preventative dentistry, good oral hygiene, and nutrition. Students will learn how to promote preventive dentistry in the office and the procedures available to curb oral diseases, including dental caries and periodontal disease and dental implants.

DEN 132 DENTAL SPECIALTIES 1 CR
This course provides the student with the knowledge and skills of the dental specialties; Prosthodontics, Oral Surgery, Orthodontics, and Pedodontics. This course will also instruct the student on the expanded duty of polishing restorations.

DEN 134 LABORATORY PROCEDURES 2 CR
This course enables students to develop skills in the use and manipulation of dental materials and lab equipment. Taking, pouring, separating, trimming, and finishing study models and preparing custom trays and bleach trays will be included in this course.

DEN 135 DENTAL CLINIC PRACTICUM III 4 CR
This clinical practicum course is a continuation of DEN 125. It provides hands-on experience required for front office, clinic coordination, and assisting functions with the clinic dentist and dental hygienist. The student must successfully demonstrate the advanced clinic competencies in order to be eligible to participate in the extramural experience.

DEN 137 EXTRAMURAL PRACTICUM 10 CR
This course allows students to apply knowledge, skills, and professionalism gained in the Dental Assistant program. Expected behaviors regarding office policies, record keeping, and evaluation procedures, as an employee and team member, are explored. Ethical and legal concerns are also addressed. Students are then placed in a variety of local dental offices where they apply skills related to basic chairside, oral hygiene, and operative dentistry.

DEVELOPMENTAL

BAS 015 WORKPLACE LITERACY 0 CR
Individualized and group instruction in English speaking, listening, writing, and reading. Targeted toward job readiness and/or technical training preparation for persons with limited English proficiency.

Curriculum subject to change. For current information, visit us on the web at: www.btc.ctc.edu
BAS 045 WORKFORCE BASICS 2 CR
Individualized and small group instruction in workforce basic skills, life skills, career decision making and guidance. Instruction based on customized integration of basic and technical math, English, communication skills, computer literacy and personal management supplemented by investment program. The focus of workforce basics will be on basic academic skill review in preparation for re-employment, retraining or job training preparation. May be repeated for skill improvement based on individual need.

CDEV 085 COLLEGE SUCCESS 0 CR
This course is a toolkit for success in college. It is designed to teach how to have a successful experience both academically and personally. Focus will be on development of practical knowledge and skills in time planning, test taking, study techniques, critical thinking, organization, interpersonal development and campus and community resources. Course is required core course in access program.

CDEV 101 CAREER TRANSITIONS 0 CR
Designed to assist unemployed/dislocated workers with career planning and job search skills. Content includes skill assessment, financial aid options, career exploration, job search techniques, and development of individual career plan.

CDEV 110 COLLEGE SUCCESS - ALLIED 2 CR
This course is designed for new students entering allied health programs. Classroom environment will be interactive and experiential, focusing on strategies that will enable students to master study skills in health-related subjects. Additionally, students will learn to expand their communication potential, build confidence, and create a pathway to a successful career in a health-related field.

ENGL 092 FUNDAMENTALS OF ENGLISH 5 CR
This course focuses on the fundamentals of college-level standard written English. Coursework includes a study of the conventional grammatical rules of English in the construction of effective sentences and paragraphs, leading to the essay. Critical readings of paragraphs and short essays, and applying these principles to the student’s own writing, is also a part of the curriculum.

MATH 085 BASIC MATH 5 CR
Course covers basic math operations e.g. addition, subtraction, division, multiplication, fractions and decimals. Prerequisite for Math 100.

RDG 085 READING SKILLS 5 CR
This course focuses on developing technical/college-level reading skills, e.g., comprehension, vocabulary in context, locating main ideas, making inferences, outlining, and summarizing content. Prerequisites: Accuplacer Reading score of 50 or above. Students who successfully complete RDG 85 will have met the accuplacer reading requirement for occupational program enrollment.

DECEMBER EQUIPMENT

DET 104 HYDRAULIC BRAKES 2 CR
Hands-on and theory of operation of hydraulic breaking systems. Prerequisites: TRANS 101, 102, 103 or instructor’s permission.

DET 106 ELECTRICAL/ELECTRONICS I 4 CR
Hands-on and theory of operation of the electrical/electronic systems used in diesel equipment, with an emphasis on diesel engine systems. Prerequisites: TRANS 101, 102, 103 or instructor’s permission.

DET 116 ELECTRICAL/ELECTRONICS II 4 CR
Hands-on and theory of operation of the electrical/electronic systems used in diesel equipment, with an emphasis on hydraulic systems. Prerequisites: TRANS 101, 102, 103 or instructor’s permission.

DET 126 ELECTRICAL/ELECTRONICS III 4 CR
Hands-on and theory of operation of the electrical/electronic systems used in diesel equipment, with an emphasis on brake, drive train and suspension/steering systems. Prerequisites: TRANS 101, 102, 103 or instructor’s permission.

DET 129 APPLIED DIESEL CONCEPTS I 12 CR
Students will be required to gain employment or volunteer in an authorized repair/maintenance facility. The student will be under the guidance of the shop in addition to contact with the instructor. The repair facility then becomes a “real world” extension of the classroom. These quarters may be required to have the following assigned hours for NATEF certification: Diesel Engines 15, Electrical/Electronics 45, and PM 5. Students from TRANS 101, 102, 103 MUST meet with the instructor to discuss DET 129 requirements. Prerequisites: TRANS 101, 102, 103 or instructor’s permission.

DET 139 APPLIED DIESEL CONCEPTS II 12 CR
Students will be required to gain employment or volunteer in an authorized repair/maintenance facility. The student will be under the guidance of the shop in addition to contact with the instructor. The repair facility then becomes a “real world” extension of the classroom. These quarters may be required to have the following assigned hours for NATEF certification: Diesel Engines 15, Electrical/Electronics 45, and PM 5. Students from TRANS 101, 102, 103 MUST meet with the instructor to discuss DET 129 requirements. Prerequisites: TRANS 101, 102, 103 or instructor’s permission.
ECON 103

INDUSTRIAL ECONOMICS 5 CR

Students will learn the basic concepts of microeconomics including the examination of the profitability factors of plant operations, personal and business strategies, objectives, and operating profitability. They will perform a cost benefit analysis of different maintenance operations strategies. Students will be able to summarize plant operations from a business perspective; explain the impact of operation of profitability; and interpret stock market factors and annual reports.

EDUCATION

EDUC 131

PARAEDUCATOR I: FOUNDATIONS OF LEARNING 4 CR

An overview of the job of the paraeducator or instructor. Topics covered include introduction to core competencies, roles of paras and certified staff, child development and the implications for learning, positive discipline, the conditions of learning, the diverse student population, the roles and responsibilities of the paraeducator including playground and cafeteria management, and safety and health concerns in working with children. The course includes 10 hours observation and addresses the following Washington State Core Competencies for paraeducators: competencies 2, 3, 5, 8, and 13.

EDUC 133

PARAEDUCATOR II: STRATEGIC LEARNING 4 CR

Focuses on strategic learning strategies that paraeducators or instructional assistants are expected to implement. Topics include confidentiality, IDEA, special education, referrals, special needs children and special programs, learning styles, instructional support methods, effective communication, conflict mediation, remediation, special health care issues, math strategies/problem solving, and paraeducators in the special education workforce. This course includes 10 hours observation and addresses the following Washington State Core Competencies for paraeducators: competencies 1, 4, 6, 7, 10, and 11.

EDUC 134

PARAEDUCATOR III: EFFECTIVE INSTRUCTION 4 CR

This course focuses on assisting teachers in meeting the needs of all students by providing effective instruction. Topics include assessment and standards, the teaching/learning cycle, library/technology skills, the writing process, the reading process, math strategies/problem solving, job search skills, and teaming. This course includes 10 hours observation and addresses the following Washington State Core Competencies for paraeducator: competencies 9, 10, and 12 (a, b, c).

EDUC 137

READING, WRITING, & MATH FOR THE PARAEDUCATOR 1 CR

This course provides a review of the required paraeducator skills and knowledge in the areas of reading, writing, and mathematics and introduces how these content area skills and knowledge apply to assisting in classroom instruction. Course content aligns with the Washington State Essential Academic Learning Requirements in reading, writing, and mathematics and the Title I Paraprofessional Knowledge and Skill Requirements.

EDUC 175

ACHIEVING INFORMATION LITERACY 1 CR

This course is designed to improve the research skills of professional-technical instructors and to help these instructors integrate information literacy into their curricula. The classes are designed to be a combination of demonstration and practice, with emphasis on practice. Additionally, these professional-technical instructors will develop a plan for integrating information-literacy skills into classes that they teach.

EDUC 199

PROFESSIONAL TECHNICAL SPECIALIZATION 12 CR

This course is a project-oriented course designed to provide opportunities for post-secondary professional-technical instructors to document their professional skills and experiences which they acquired prior to or while serving in their position as an instructor. Completion of the coursework project will enhance the instructor’s ability to accurately assess their present skills against the Washington State Skill Standards for Professional Technical Educators and complete an initial Professional Development Plan.

EDUC 200

INTRODUCTION TO TEACHING PROFESSIONAL TECHNICAL EDUCATION 3 CR

This course provides students with an introduction to the Washington State Professional-Technical Teacher Skill Standards; thus facilitating entrance into specific Skill Standard training in subsequent courses. Subject areas include an introduction to performance-based education, including technical education philosophies and fundamentals of Competency-Based education models. Additionally, it provides the opportunity for students to observe fully-qualified professional-technical instructors.

EDUC 207

TEACHING & FACILITATING LEARNING: LEVEL I 3 CR

As an introduction to vocational teaching, college instructors begin or expand their training as a skilled educator. Instructor-learners learn about “successful beginnings;” being a positive role model; and developing effective lessons based on identified student learning outcomes and competencies. New instructor-learners practice implementing a variety of instructional strategies and student assessments and learn ways to evaluate the progress or diverse learners to meet course objectives. Focus is on four primary modes of instruction: lecture, discussion, demonstration, small group work, and ways in which instructors act as facilitators of learning in their classrooms.

EDUC 209

TEACHING & FACILITATING LEARNING: LEVEL II 3 CR

This course guides instructors through the process of moving from a teacher-centered classroom to a student-centered learning environment and prepares instructor-learners to assist students to become a productive part of a learning community. Instructor-learners further examine and fine-tune multiple modes of instruction beyond those in Level I including class discussion, case studies, role-plays and student self-assessment. Using the universal cycle of learning with the four essential elements of preparation, presentation, practice, and performance, instructor-learners develop model lessons and instructional models as well as developing model facilitation practices for establishing learning communities within the classroom. This course is particularly helpful to experienced instructor-learners who wish to hone and apply their facilitation and instructional delivery skills.

EDUC 211

PLANNING FOR INSTRUCTION 3 CR

Instructor-learners plan for the delivery of adult instruction by creating instructional materials appropriate for students of diverse backgrounds and learning styles. Instructor-learners develop the skills required to create, evaluate or modify a course through the construction of lesson plans and course syllabi. This course assists instructor-learners in ways to plan lessons and units of instruction, and to identify textbooks, instructional media and resources. Emphasis is on lesson planning and syllabus development, particularly as they relate to higher order thinking skills such as Bloom’s Taxonomy and domains of learning.

EDUC 216

ASSESSMENT FOR LEARNING 3 CR

Research in learning assessment has transformed the way educators approach the task of teaching. When developing and designing curriculum, instructors need to understand the paradigm shift between traditional, teacher-centered learning where the emphasis is placed on the one-way delivery of content, and active, student centered learning where the emphasis shifts to the collaborative, integrated learning process facilitated by the teacher. In this course, instructor-learners will demonstrate assessment literacy and will design and develop assessments to be integrated into the learning process, including performance-based and other assessments—prior assessment, formative assessment, summative assessment—will be linked directly to clearly developed learning outcomes and will inform the process of curriculum evaluation and revision. Effective testing and evaluation linked to course outcomes and grading policies will also be discussed.
EDUC 221 LEADERSHIP DEVELOPMENT 3 CR
This course focuses on methods that implement leadership development as an integral component of professional technical program. Instruction will stress skills in organizing groups to action, decision making, and human relations.

EDUC 226 LEARNING STYLES 3 CR
In this course, professional-technical instructors will be introduced to the theories of learning styles, multiple intelligences, learning types and environmental effects on learning. Instructor learners will identify their own learning attitudes, environment preferences, learning styles and intelligences and begin to identify the learning profiles of their students. This course will facilitate instructors to create learning environments that are most conducive to optimal learning and to implement teaching/learning strategies that engage a variety of learning styles for instructional success.

EDUC 231 LEARNING ENVIRONMENT MANAGEMENT 3 CR
To effectively instruct students, a professional-technical instructor must have all required equipment, systems, tools, supplies, and materials available and set up prior to beginning the class. This course is designed to help instructor-learners develop a management plan for determining, obtaining, and maintaining instructional equipment, tools, supplies, and materials. Faculty members will be equipped with the knowledge and direction needed to develop and implement safety plans for their learning environment so that equipment, systems, tools, supplies, and materials will be managed and maintained in an appropriate and safe manner. Emphasis is on shop, laboratory, and classroom safety practices.

EDUC 236 OCCUPATIONAL ANALYSIS 3 CR
This course will familiarize the professional technical instructor with the process of occupational analysis, the steps of DATA and DACUM process, and advisory committees and their role in professional technical curriculum development.

EDUC 241 LEARNING & ADAPTING NEW TECHNOLOGIES 5 CR
In this course the instructor-learner will identify, evaluate and implement new and emerging technologies according to industry needs and their needs as instructors. Instructor-learners will develop new ways of communication and develop online materials and websites. Working with their program advisory committee, the instructor-learner will maintain current knowledge of technology in the field and focus on how to integrate this new technology into their curriculum, into their current methods of delivering student instruction, and into effective ways of assessing student learning by integrating new technology into student assignments. As needed, the instructor-learner will develop the skills required to research, organize and maintain information about certification requirements for program-specific technology.

EDUC 246 THE ADULT LEARNER 3 CR
To effectively instruct adults, it is essential that the instructor has a basic understanding of the adult learner. By understanding the adult learner and how one learns, the instructor can teach more effectively and can motivate and improve retention rates with students. In this course, instructor-learners will identify learning principles and adult characteristics, learning styles, demographics and motivation. They will also learn to modify curriculum and instruction based on the needs of the adult learners in their classroom.

EDUC 251 TEACHING PRACTICUM 1 12 CR
This course will provide opportunities for instructors to enhance their professional skills and provides a viable vehicle for attainment of the skills required of a fully qualified instructor. Evidence of learning and skill-building will be evidenced via project portfolio. In a classroom, lab, and workplace learning environment, the student instructor will implement core learning strategies and techniques on teaching and facilitating learning from coursework and research.

EDUC 252 TEACHING PRACTICUM 2 12 CR
This course will provide opportunities for instructors to enhance their professional skills and provides a viable vehicle for attainment of the skills required of a fully qualified instructor. Evidence of learning and skill-building will be evidenced via project portfolio. In a classroom, lab, and workplace learning environment, the student instructor will establish and implement learning outcomes focused on assessment, new technologies such as distance learning, hybrid courses, electronic instruction.

EDUC 256 PROGRAM MANAGEMENT, PROMOTION, AND RECRUITMENT 5 CR
In this course, instructor-learners develop a record keeping system that can be used in the tracking of student affairs, including program enrollment, student grades, student financial aid and scholarship eligibility. In addition, instructor-learners develop a budgeting system to determine program financial needs and the tracking of allocated funds. They take part in departmental and college committees to ensure the interests of their program and to participate in collegewide conversations and decisions regarding enrollment, recruitment and community relations.

EDUC 257 CURRENT TOPICS FOR PROFESSIONAL TECHNICAL EDUCATORS 6 CR
This course is designed to provide opportunities for post-secondary faculty members teaching professional-technical coursework to document and receive credit for research/learning acquired at professional conferences.

EDUC 261 INDUSTRY BASED PROFESSIONAL DEVELOPMENT 5 CR
This course is a project-oriented course designed to provide opportunities for post-secondary professional-technical instructors to document and receive credit for skills-enhancement activities conducted during “Back-to-Industry” or “Return-to-Industry” endeavors.

EDUC 262 ADVANCED INDUSTRY BASED PROFESSIONAL DEVELOPMENT 6 CR
This course is a project-oriented course designed to provide opportunities for post-secondary professional-technical instructors to document and receive credit for skills-enhancement activities conducted during “Back-to-Industry” or “Return-to-Industry” endeavors.

EDUC 275 CAREER & TECHNICAL EDUCATION INTERNSHIP 3 CR
Research supports that faculty often rely on how they have been taught for their own teaching even when those instructional strategies were not viewed as effective. To develop good learning strategies participants will participate in an internship to change their previous paradigm. Through a variety of strategies including assignments, observation, reflection, serving as an instructional assistant, and/or practical application of instructional techniques students will complete an internship in a career and technical education program.

EDUC 299 PROFESSIONAL TECHNICAL EDUCATION CAPSTONE 5 CR
This course is a capstone project designed to provide opportunities for instructors to document their professional skills and provides a viable vehicle for attainment of the skills required of a fully qualified instructor, in accordance with Washington State Skill Standards for Professional-Technical Educators. This course is the final required course for an AAS-T degree in Professional-Technical Education.

ELEC 100 INTRODUCTION TO ELECTRICIAN TRADE 1 CR
Gives information about the program’s organization: rules & regulations, the electrician trade, the job market, essential safety information & procedures.

ELEC 101 ELECTRICITY I 14 CR
Emphasis is placed on the basic understanding of electrical theory and its application to devices, circuits and materials. Also, the fundamental ideas of DC electricity, magnetism, and electromagnetism are studied. Students will apply their basic skills of algebra during this course.

PREREQUISITE: MATH 100 (to be taken concurrently).
ELEC 102
ELECTRICITY II 13 CR
Studies the ideas of electron flow applied to direct current circuits and broadens those ideas for alternating current use. A basic understanding of alternating current fundamentals is essential because it must be applied in everyday situations in the electrical workplace.
PREREQUISITES: ELEC 101A.

ELEC 103
ELECTRICITY III 12 CR
Introduction to the basic principles of automatic motor control for various direct current motors. Detailed explanations and operating principles will be presented along with typical schematic and wiring diagrams of common installation practices. Thorough explanations prepare the student to develop troubleshooting and repair techniques so they can perform effectively on the job. Basic transformer principles, single and three phase circuits are also covered.

ELEC 104
ELECTRICITY IV 14 CR
Detailed explanations of operating principles of various types of alternating current motors will be presented. Typical schematic and wiring diagrams are explored to familiarize the students with common installations. Logical troubleshooting and repair techniques are developed that will help the student perform effectively on the job.

ELEC 105
OCCUPATIONAL SAFETY 1 CR
A review, giving the student information about the program’s organization: rules & regulations, the electrician trade, the job market, essential safety information & procedures.

ELEC 119
ELECTRIC ZONE HEATING 1 CR
This course prepares students with a basic understanding of electrical theory and its application to devices, circuits, and materials. The students will learn fundamentals of DC and AC, magnetism, production of electricity, characteristics and analysis of series, parallel and mixed circuits.

ELEC 123
SOLDERING 1 CR
Covers the basic theory of soldering and gives the student hands-on experiences for practicing soldering skills.

ELEC 160
ENVIRONMENTAL AWARENESS 1 CR
Proper use and disposal of products used in the electrical workplace will be reviewed and discussed to ensure that the environment is not placed in jeopardy by their use.

ELEC 191
LEADERSHIP 1 CR
Explores the importance of leadership and how it affects the work life of the electrician.

ELEC 192
JOB PREPARATION 1 CR
Application of the knowledge used to expand the communication skills that are necessary for seeking and obtaining employment in the electrical field.

ELEC 201A
RESIDENTIAL WIRING 13 CR
A study of the skills for the wiring of a home. It emphasizes the National Electrical Code and enables the electrician to problem-solve real life wiring situations. Learn how to interpret electrical information from a building diagram using American National Standards Institute (ANSI) symbols.

ELEC 205
MOTOR CONTROL DIAGRAMS I 3 CR
Presents general ground rules for establishing good, safe working habits and proper use of electrical tools. Introduction to the student with language of an electrical control, using standard (ANSI) electrical symbols, and line diagramming.

ELEC 207
MOTOR CONTROL DIAGRAMS II 7 CR
An expansion on the teachings of ELEC 205A. More advanced motor control practices are explored & explained.

ELEC 208
PROGRAMMABLE CONTROLLERS 7 CR
Focuses on the principles of how PLC’s work and offers practical installation information. Using programming skills and installation methods introduced in this course, the student will “convert” a normal relay driven control system to PLC control.

ELEC 209
CONDUIT I 1 CR
Examines the skills and techniques required by the electrician to accurately and efficiently bend conduits.

ELEC 210
CONDUIT II 1 CR
Development of the bending skills acquired during ELEC 209A. Student will complete a project installing conduit which uses at least three of the bends listed.

ELEC 211
SOLID STATE DEVICES 1 CR
Introduction to the electronic semiconductor devices used in electrical circuits. Semiconductor theory, explaining how these devices operate, will be emphasized. Semiconductor rectification of alternating current systems will be explained.

ELEC 213
WAREHOUSE WORK 1 CR
Course familiarizes the electrician with the types of work and responsibilities involved with parts in an electrical warehouse.
EMTEC 125
APPLIED MECHANICS 3 CR
Studies introduce material strengths relating to forces such as tension, shear and torque. Students develop knowledge and skills through application of pulley ratios and levers. Instruction also covers properties of materials such as solids, liquids and gases. Utilizing dynamic lecture and discussion and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

EMTEC 126
ENGINEERING GRAPHICS 3 CR
The student will discover print reading format and dimension with types and symbols. A study of Thread specifications and building drawings will be presented. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

EMTEC 131
RIGGING 3 CR
The student will study and apply industry standard principals to safely plan and facilitate controlled lifting of equipment. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

EMTEC 133
INTRODUCTION TO MACHINERY SKILLS 4 CR
Studies introduce shop safety and guidelines, the use of measuring tools, Basic shop equipment and a study of vertical milling machines and lathes. Supervised hands on project will be produced by the student. Utilizing dynamic lecture and discussion and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

EMTEC 135
HVAC BASICS 4 CR
The student will study the basics of Refrigeration theory and systems with an emphasis on Air Handlers, Chillers, Cooling Towers and Condensers. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 103 Electrical Circuits.

EMTEC 136
INTRODUCTION TO RESIDENTIAL WIRING 4 CR
The student will study the basics of Residential single dwelling wiring with emphasis on the National Electrical and State of Washington codes. Utilizing dynamic lecture and discussion and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 103 Electrical Circuits

EMTEC 137
RENEWABLE ENERGY SOURCE 4 CR
This course introduces the student to installing, operating and maintaining alternative power sources including stand alone and grid connect systems. Instruction provides an overview of wind, photovoltaic, hydro-generator, inverters, charge control mechanisms and energy storage/retrieval systems including batteries and fuel cells. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 203 Tuned Circuits and Intro to PLCs.

EMTEC 206
MAKING PLC'S WORK FOR YOU 3 CR
This course is an in depth study of Programmable Logic Controllers including configuring Hardware and Software for controlling devices that drive industrial machinery. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

EMTEC 211
ELECTRICAL CONTROLS I 5 CR
This course introduces the student to the components used in today's Control Systems. Control schematics are introduced with hands-on use of various multi meters in troubleshooting relay logic circuits. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 201.

EMTEC 212
ELECTRICAL CONTROLS II 5 CR
This course advances into more difficult control schemes involving Wye Delta Motors. More basic control situations are explained and the student will trouble shoot and facilitate repair of circuitry. Installing control systems and wire numbering will be demonstrated. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 111.

EMTEC 214
ELECTRONIC CIRCUITS I 5 CR
The students will be introduced to Solid state Devices including Diodes, Transistors, Integrated Circuits, Operational Amplifiers and Sensors. Testing and Measurement of Small Wave forms and associated equipment will be used. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 105 Electricity II.

EMTEC 215
ELECTRONIC CIRCUITS II 5 CR
The student continues with an in depth study of Electronic Circuits, Sensors, Transducers and Electronic Devices. Schematics and Troubleshooting are key Components of this course. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 127 Electronic Circuits I.

EMTEC 217
INSTRUMENTATION 5 CR
This course introduces the student to sensor indicators and transmitters. Measurement, gages, flow

EMTEC 105  Electricity II
This course is an introduction to the study of motors and circuits. Topics include theory, practical operation, components and troubleshooting. Includes the study of vertical milling machines and lathes. Supervised hands on project will be produced by the student. Utilizing dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 103 Electrical Circuits.

EMTEC 203
ELECTRICITY IV 3 CR
This course completes the study of motors and examines the use of transformers, power panels and the distribution of power in the facility. It includes an introduction to control valves and actuators. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 107.

EMTEC 205
PROGRAMMABLE LOGIC CONTROLLERS 4 CR
This course is an in depth study of Programmable Logic Controllers including configuring Hardware and Software, General construction and operation as well as Programming. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

PREREQUISITES: EMTEC 103 Electrical Circuits.
sensors and other industrial sensing devices will be studied in this class. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

**EMTEC 218**

**INTRODUCTION TO NATIONAL ELECTRICAL CODE** 3 CR

The student is introduced to some of the common industrial applications of the National electrical codes such as Grounding, Bonding, Wire sizing, conduit selection, junction box selection, Motor over load protection and current protection selection. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

**PREREQUISITES: EMTEC 127.**

**EMTEC 221**

**HYDRAULICS AND PNEUMATICS SYSTEMS** 5 CR

This course continues an in-depth study of hydraulic and pneumatic systems, and components and maintenance practices for Hydraulic and Compressor Systems. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for the fluid power industry. Text and basic tools required.

**PREREQUISITES: EMTEC 201 AC Components and Measurements.**

**EMTEC 223**

**HYDRAULICS AND PNEUMATICS ANALYSIS AND MAINTENANCE** 5 CR

This is the final course in hydraulic and pneumatic systems that prepare the student to install, evaluate, troubleshoot and maintain Hydraulic and Pneumatic Systems for the Industry. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for the fluid power industry. Text and basic tools required.

**PREREQUISITES: EMTEC 221 Hydraulics & Pneumatics Systems.**

**EMTEC 231**

**BEARINGS AND DRIVES** 5 CR

The student will learn the application and theory of Bearing Technology with emphasis on storing, installing, and maintenance. The course will include an examination of different drive types with emphasis on theory, maintenance and repair. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

**EMTEC 232**

**DRIVE ALIGNMENT-CONVEYORS AND MACHINING SYSTEMS** 5 CR

Principals and Devices used for joining and aligning shafts are presented in this course. Conveying equipment and other automatic transfer machine-
INTRO TO ROUTERS AND SWITCHES 5 CR
This course covers router interface, port configuration, IP addressing, bridging, route maps and troubleshooting, routers and switches, and maps to CISCO Certified Network Administrator (CCNA) training.
PREQUISITES: ELTR 145.

PHOTONICS 1 5 CR
This course offers an introduction to the fundamentals and applications of optical principles with fiber optics.
PREQUISITES: ELTR 145.

PHOTONICS 2 5 CR
Concepts and physics are taught along with characteristics needed to understand and repair electronic devices that incorporate lasers.
PREQUISITES: ETec 236.

SENSORS, TRANSDUCERS, & CONTROL CIRCUITS 6 CR
Students will gain a working knowledge of sensors, transducers, control circuits, electronic signals, measurement, interfaces, amplifiers, AD & DA converters is developed through theory and lab exercises.
PREQUISITES: ELTR 145.

PRINCIPLES OF ELECTRONIC COMMUNICATIONS/TELEPHONY 3 CR
The effects of combining signals, multiple frequencies, harmonic distortion and electrical properties of transducers are among the topics covered by experiments and other material in this telecommunications course.
PREQUISITES: ELTR 145.

TELEPHONE SYSTEMS 4 CR
Explores the basic function of each part of a telephone system. Examines the electrical properties of transmission lines used in phone systems. Cellular telephone systems are also introduced.
PREQUISITES: ELTR 145.

FEDERAL COMMUNICATIONS COMMISSION TEST PREP 3 CR
This course prepares students for the nationally recognized FCC license tests.

BIOMEDICAL EQUIPMENT 6 CR
Gives specific engineering and instrumentation principles applied to the task of obtaining physiological data. Each major body system is discussed by presenting physiological background information. Then, the variables to be measured are considered, followed by the principles of the instrumentation that could be used. This course maps to Biomedical Certification tests.
PREQUISITES: ELTR 145.

BIOMEDICAL CERTIFICATION TEST PREP 5 CR
This course prepares students for the nationally recognized Biomedical Technician 1 test.

INTRO TO ELECTRONIC CAD 1 CR
Focuses on the knowledge and skills used to run the design environment, design management tools, set up work conditions, capture and save an initial macro and save and print your work.
PREQUISITES: ELTR 145.

ROBOT TECHNOLOGY 5 CR
Teaches students the basic concepts of robot technology, including major elements in a robotic system, understanding a robot's linkages and joint-spherical geometry and motion transfer from axis motors plus programming robot motion.
PREQUISITES: ELTR 145.

CERTIFIED ELECTRONICS TECHNICIAN TEST PREP 3 CR
This course prepares students for the nationally recognized Certified Electronics Technician (CET) test.

WORK BASED LEARNING 3 CR
Gives the student hands-on work experience with electronics' employer. To be assigned to this part of the course will depend upon employer availability and student willingness for this experience and near completion of the course.

WORK BASED LEARNING 6 CR
Gives the student hands-on work experience with an electronics employer. To be assigned to this part of the course will depend upon employer availability and student willingness for this experience and near completion of the course.

EMERGENCY MEDICAL SERVICES

FIELD INTERNSHIP EVALUATION 10 CR
Field Internship Evaluation

ADVANCED CARDIAC LIFE SUPPORT 2 CR
Developed by the American Heart Association, this course delivers to the student the ability to recognize and manage lethal/non-lethal dysrhythmias, acute myocardial infarction (MI), pulmonary edema, cardiogenic shock, stroke, and electrolyte imbalances along with other cardiac related conditions and management.
EMTP 103 INTERMEDIATE LIFE SUPPORT AND AIRWAY 12 CR
A preliminary course for entry into the Paramedic Program, the ILS/AIW Course will teach the student the skills or airway management and the recognition and treatment of shock at the Intermediate Level. Course work includes basic and some advanced pharmacology, assessment/management of the cardiac patient, basic EKG interpretation, drug and fluid therapies.

EMTP 111 PARAMEDIC APPLIED PRINCIPLES I 1 CR
Topics covered in the classroom portion of this course include: roles and responsibilities. Medical/legal issues, ethics, pharmacology, communications and documentation, review of airway management and advanced techniques, paramedic patient assessment overview, advanced cardiology and EKG interpretation.

EMTP 112 INTERMEDIATE LIFE SUPPORT CLINICAL PRACTICUM 4 CR
The focus of this clinical course is the development of advanced airway skills by intubation of patients in the OR, observations and participation in the care of patients in the Emergency Department, to include IV therapies. Students will also spend time observing and assisting with treatment of paramedic care in the field setting.

EMTP 117 PARAMEDIC CLINICAL I 1 CR
Students will gain practical clinical knowledge through observation of cardiac patients in CCU, assessment and treatment of patients in the Emergency Department, and communications through observation at dispatch.

EMTP 211 PARAMEDIC APPLIED PRINCIPLES II 11 CR
The foundation knowledge that students will be taught will address assessment and treatment of the trauma patient and various traumatic injuries, assessment and treatment of general medical patients. Lab sessions will focus on development of the psychomotor skills necessary for the student to be successful in the field setting.

EMTP 212 PARAMEDIC FIELD EXPERIENCE II 11 CR
This course will give students an opportunity to observe and perform convergent analytical and psychomotor skills learned each quarter under the supervision of a skilled paramedic preceptor in the field setting.

EMTP 225 PARAMEDIC CLINICAL II 3 CR
Students will gain an understanding and skills through observation at the Emergency Dept., OR, Medical Examiner/Morgue, Children's Hospital, Harborview Medical Center, respiratory therapist and/or allergist office, and the Kidney Center.

EMTP 231 PARAMEDIC APPLIED PRINCIPLES III 11 CR
This course will focus on gaining knowledge of special patients and situations, such as behavioral/ altered mental status disorders, OB/GYN, Geriatrics, Crime Scenes, Abuse and Assault, Multi-cultural issues, and mass-casualty incidents. Lab sessions will focus on development of the psychomotor skills necessary for the student to be successful in the field setting.

EMTP 237 PARAMEDIC CLINICAL III 3 CR
Students will gain skills through participation and observation in a variety of clinical settings. These include: labor and delivery, Geriatric Center, Western States Hospital and/or St. Joseph South Campus, and Bellingham Police Department.

EMTP 239 PARAMEDIC FIELD EXPERIENCE I 3 CR
Students will enroll in EMTP 239 each quarter in which they are enrolled. This course will give students an opportunity to observe and perform convergent analytical and psychomotor skills learned each quarter under the supervision of a skilled paramedic preceptor in the field setting.

EMTP 240 PARAMEDIC CAPSTONE EXAM 1 CR
All students who have all course work in foundation knowledge and skills must complete a culminating exam. This exam will emulate the National Registry Exam, and is used to assess the student's overall learning in the program. The examination will be in three parts: a written and a practical skill component. This course is graded based on passing all skills requirements and written exam scores. The exam is in three parts:
- Examination preparation day – 8 hours
- Practical Examination – 8 hours
- Written Examinations – 8 hours (4 hours each)

EMTP 249 PARAMEDIC FIELD EXPERIENCE III 3 CR
This course will give students an opportunity to observe and perform convergent analytical and psychomotor skills learned each quarter under the supervision of a skilled paramedic preceptor in the field setting.

EMTP 259 PARAMEDIC FIELD EXPERIENCE III 4 CR
This course will give students an opportunity to observe and perform convergent analytical and psychomotor skills learned each quarter under the supervision of a skilled paramedic preceptor in the field setting.

ENG 101 COMPUTER-AIDED DESIGN LEVEL 1 3 CR
This introductory course in computer-aided design covers the fundamental concepts of drafting and design using AutoCAD. Students completing the course will demonstrate competency in file management, drawing navigation, initial settings, primitive entities, layers, entity selections, editing, and dimensioning.

ENG 122 CAD I: BASICS 7 CR
An introduction to engineering drafting and graphics technology. Topics include sketching and drafting techniques, drafting concepts and terminology, methods for improving visualization skills, standards for object views and drawing sizes, and proper usage of drafting equipment to construct geometric shapes and mechanical drawings.

ENG 123 DESCRIPTIVE GEOMETRY 7 CR
This course is a practical step-by-step approach to develop and enhance students' visualization skills. Coursework includes the application of such techniques toward various engineering disciplines including manufacturing, piping, civil, structural, HVAC, and architectural. PREREQUISITES: ENGT 121.

ENG 125 DRAFTING II: ADVANCED CONCEPT & STANDARDS 8 CR
A continuation of the mechanical engineering drafting and graphic technology foundation, utilizing advanced drafting techniques. Instruction includes the purpose and proper application of section and auxiliary views, various manufacturing processes and their relationship to dimensioning and design, and practical drafting applications using ANSI standards for dimensioning, tolerancing, and drafting formats. PREREQUISITES: ENGT 123, ENGT 126, CAD II: INTERMEDIATE.

ENG 126 CAD II: INTERMEDIATE APPLICATIONS 7 CR
A continuation of CAD I, utilizing intermediate drafting and editing tools. Coursework includes
Course Descriptions

ENGT 112

CIVIL/SURVEY CAD 1

Courses in Civil Engineering and Survey industry-specific Computer Aided Drafting. The course focuses on the use of CAD software with Civil/Survey specific applications.

PREREQUISITES: ENGT 121 and ENGT 122.

ENGT 127

ENGT 128

CIVIL/SURVEY CAD 2

Courses in Civil Engineering and Survey industry-specific Computer Aided Drafting. The course focuses on the use of CAD software with Civil/Survey specific applications.

PREREQUISITES: ENGT 125 and ENGT 126.

ENGT 130

TECHNICAL ORGANIZATION AND WORK SKILLS

This course exercises study and organization skill needed to succeed in the program and industry. In addition, the course instructs the students on successful attitudes, successful behaviors, and work place expectation.

ENGT 132

MS OFFICE APPLICATIONS

Continues instruction in Windows-based computer applications, focusing primarily on word processing and spreadsheet skills development and techniques for using applications together. Also provides lab time for the completion of assignments from COM 170 or ENGL 101.

ENGT 152

ESTIMATING AND SCHEDULING

An introduction to the construction process, project scheduling, and estimation of concrete, rebar, and earthwork quantities.

ENGT 153

INTERMEDIATE GIS

An introduction to desktop mapping, focusing on the use of ArcView software in Geographic Information Systems applications.

ENGT 156

EARTHMOVING FUNDAMENTALS

An introduction to earthmoving production fundamentals of construction equipment. The production of heavy equipment, including excavators, scrapers, trucks, bulldozers, and front end loaders is examined from a production prospective. In addition, earthwork conversions to and from loose cubic yards, bank cubic yards, and compacted cubic yards is introduced.

ENGT 210

CAD III: ADVANCED APPLICATIONS

A continuation in the series of CAD courses, coursework involves utilizing advanced drawing, editing, and customization techniques. Topics include LISP enhancements, macros, creating CAD layouts, creating user defined settings, and techniques for automating repetitive operations.

PREREQUISITES: ENGT 125 and ENGT 126.

ENGT 211

PROJECT DESIGN 1

A project-oriented design course in which students create working drawings of an existing assembly or of one of their own designs. Each student is required to prepare a portfolio including sketches, detail and assembly drawings in accordance with ANSI standards.

PREREQUISITES: ENGT 125 and ENGT 126.

ENGT 212

PROJECT DESIGN 2

A project-oriented design course in which students enhance their skills in 3D solid modeling and explore more complex features of the design software. Each student will create a solid model of a mechanical assembly and use it to prepare a set of working drawings. A portfolio consisting of solid model renderings, sketches, detail drawings, and assembly drawings, will be submitted by each student according to ANSI standards.

ENGT 213

PROJECT DESIGN 3

A project-oriented design course in which students create a 3D model of an existing assembly and use it as a visual and design aid for developing engineering detail and assembly drawings. Students will enhance their 3D solid modeling skills and apply these skills as an aid for visualization, assembly, interference checking, and design verification of 2D engineering drawings.

ENGT 215

STATICS

An introduction to physics concepts, including the determination and analysis of "static" (non-moving) loads and forces in engineering structures and machines.

PREREQUISITES: MATH 130 & 131.

ENGT 216

STRENGTH OF MATERIALS

Involves the application of statics’ analysis to determine minimum structural shape and size requirements. Topics will include the importance of physical characteristics (size, shape, length) and mechanical properties of various engineering materials (metals, wood, concrete). Lecture will focus on materials testing and composition, manufacturing processes and standards, and how each impacts materials selection.

PREREQUISITES: ENGT 215.

ENGT 220

PARAMETRIC MODELING

Instruction in the use of parametric modeling CAD applications and the introduction to 3-dimensional drafting and solid modeling. Topics include wireframe models, 3-D faces or work planes, rendering, and editing solid models.

ENGT 223

STRUCTURAL DETAILING

Instruction in the areas of structural drafting and design. Includes drafting and design of bolted and welded connections, specifications for structural members, and standard design concepts.

PREREQUISITES: ENGT 125 and ENGT 126.

ENGT 224

PROCESS PIPE DRAFTING

An introduction to process pipe drafting and design. Piping concepts and terminology will focus on pipe and fitting specifications, valves and instrumentation, piping equipment, and symbols. In addition, students will utilize piping drafting standards and concepts to create plans and elevations, isometric and spool drawings.

PREREQUISITES: ENGT 125 and ENGT 126.

ENGT 251

LAND DESKTOP - SURVEY ADD-ON

Study and use of the Civil Engineering and Survey industry-specific CAD overlay software for computer aided drafting. Focuses on the use of Land Development Desktop with AutoCAD on Civil/Survey specific applications.

PREREQUISITES: ENGT 128 and SURV 102.

ENGT 252

LAND DESKTOP - CIVIL ADD-ON

Study and use of the Civil Engineering and Survey industry specific CAD overlay software for computer aided drafting. Focuses on the use of Land Development Desktop with AutoCAD on Civil/Survey specific applications.

PREREQUISITES: ENGT 128 and SURV 102.

ENGT 256

STANDARDS, SPECIFICATIONS, AND CODES

This course provides an introduction to the as-built process and current civil improvement inspection practice. The course focuses on field measurements and inspection during and after construction of sewer, water, storm, and roadway civil improvements.

ENGT 258

CONSTRUCTION MATERIALS

An introduction to the engineering properties and testing requirements of construction materials. Focuses on aggregates, asphalt, and Portland cement concrete as construction materials.

ENGT 259

ENVIRONMENTAL TECHNOLOGY

This course provides an introduction to current environmental issues and how they relate to civil applications. The course focuses on endangered species act, surface water management, wetlands, and environmental mapping issues.

ENGLISH

COM 170

ORAL & WRITTEN COMMUNICATIONS

This course focuses on those workplace communication skills that employees need to send, receive, and interpret oral and written information. Following a review of writing fundamentals, learners will use principles and concepts of communication in occupational and general applications. Reading, writing, and speaking skills are included in this course.

PREREQUISITES: Accuplacer Reading Score of 71 or higher.
Students will learn proper fish spawning techniques emphasized. Safety is taught in all courses as it applies to the task or work area.

FISHERIES

FISH 100
INTRODUCTION TO SAFETY 2 CR
Proper safety precautions in the workplace will be emphasized. Safety is taught in all courses as it applies to the task or work area.

FISH 105
WATER QUALITY 1 CR
This course looks at the importance of water quality and how it is monitored. Students will monitor water quality at the hatchery and net pens to gain experience in this course.

FISH 111
SALMON ID BIOLOGY 3 CR
Identification of salmon and trout, life cycles and the characteristics of each of the species will be examined in this course.

FISH 125
SAMPLING TECHNIQUES 3 CR
Students will identify and use methods of sampling fish for numbers, age, and disease.

FISH 133
HATCHERY OPERATIONS I 5 CR
By working in hatcheries, students gain experience with brood stock, eggs, and hatchery equipment.

FISH 136
SPAWNING TECHNIQUES I 6 CR
Students will learn proper fish spawning techniques as utilized by state, federal, and private hatcheries. They will spawn fish at the college hatchery and other local hatcheries to become proficient in these skills.

FISH 146
FISH AND SHELLFISH BIOLOGY 3 CR
Fish and shellfish biology, basics of respiration, organs, life cycles, and basic requirements will be covered. Dissections will be performed.

ENGL& 101
ENGLISH COMPOSITION I 5 CR
A composition course in which students read, analyze, and write essays using a variety of rhetorical strategies, as well as develop and verbally express ideas clearly and effectively. The critical reading of essays will provide a basis for the student's own critical writing, which will reflect a command of college-level literacy standards. Attention to writing fundamentals and stylistic techniques will also be included.

PREREQUISITES: CPT score of 86 or higher on sentence skills and 85 or higher on reading. Word processing knowledge required.

FISH 155
ENVIRONMENTAL AWARENESS 3 CR
Awareness of the impact that people, industry, and development have on the environment related to the fisheries' industry will be covered. Included will be awareness of proper use and disposal of materials hazardous to the environment and how other industries can affect the fisheries industry and environment.

FISH 161
AQUACULTURE TECHNIQUES 6 CR
Students will be introduced to the skills required to culture shellfish, work at a salmon net pen farm, or culture other food or nonfood species.

FISH 170
HATCHERY OPERATIONS II 4 CR
Course will teach students the required skills to work in a hatchery. This course will emphasize hands-on skills. Students will work in hatcheries to gain experience with eggs, incubators, and hatchery equipment.

FISH 186
HATCHERY OPERATIONS III 10 CR
Students will work in hatcheries to gain experience by rearing fingerlings in ponds and net pens. Other hatchery equipment will be utilized.

FISH 194
FISHERIES CURRENT TOPICS 4 CR
In consultation with the instructor, students will develop customized objectives and individualized projects to increase their skills and knowledge in specific areas of current fisheries technology.

FISH 195
FIELD PROJECTS 6 CR
Practical application of work experience for students in a field of their choice with employees in industry. This allows the student to show prospective employers what skills and work habits they have.

FISH 196
FISHERIES CURRENT TOPICS 4 CR
In consultation with the instructor, students will develop customized objectives and individualized projects to increase their skills and knowledge in specific areas of current fisheries technology.

FISH 197
FISHERIES CURRENT TOPICS 4 CR
In consultation with the instructor, students will develop customized objectives and individualized projects to increase their skills and knowledge in specific areas of current fisheries technology.

FISH 198
FISHERIES CURRENT TOPICS 8 CR
In consultation with the instructor, students will develop customized objectives and individualized projects to increase their skills and knowledge in specific areas of current fisheries technology.

FISH 236
SPAWNING TECHNIQUES II 6 CR
Students will employ proper fish spawning techniques according to state, federal, and private hatchery procedures. They will transport eggs and milt, sterilize eggs, and use a moist air incubation unit to eye eggs and mark otoliths.

FTEC 200
APPLIED CONCEPTS I 10 CR
The student will focus on one of five specialty areas: Hatchery Technician, Fisheries Technician, Shellfish Technician, Net Pen Worker, or Habitat Enhancement Technician. The student will explore areas of employment and gain additional skills needed for each career choice.

FTEC 205
FIELD PROJECTS I 4 CR
The student will do an internship in one of the following specialty areas: Hatchery Technician, Fisheries Technician, Shellfish Technician, Net Pen Worker, or Habitat Enhancement Technician. The student will work with or under the direct supervision of an industry supervisor during all or part of the quarter.

FTEC 250
APPLIED CONCEPTS II 10 CR
The student will focus on one of five specialty areas: Hatchery Technician, Fisheries Technician, Shellfish Technician, Net Pen Worker, or Habitat Enhancement Technician. The student will explore areas of employment and gain additional skills needed for each career choice.

FTEC 255
FIELD PROJECTS II 4 CR
The student will do an internship in one of the following specialty areas: Hatchery Technician, Fisheries Technician, Shellfish Technician, Net Pen Worker, or Habitat Enhancement Technician. The student will work with or under the direct supervision of an industry supervisor during all or part of the quarter.

HEALTH & SAFETY

HLTH 103
CPR: ADULT HEARTSAVER 0.5 CR
This three hour course includes one person CPR, obstructed airway techniques, and risk factors of heart disease. Skills completion and written exam are required for card, which is good for two years. Pocket mask required.

HLTH 131
HIV/AIDS FOR COUNSELORS 0.5 CR
This workshop is designed for counselors and other health professionals needing four hours of HIV/AIDS education for licensure or professional update. The program meets Washington State certification requirements.

Curriculum subject to change. For current information, visit us on the web at: www.btc.ctc.edu
HLTH 133
HIV/AIDS: HEALTHCARE PROFESSIONAL 1 CR
This workshop is designed for the professional needing seven hours of HIV/AIDS education for licensure or professional update. The program utilizes a multi-media approach and meets Washington State certification requirements.

HLTH 150
FIRST AID INDUSTRIAL 1 CR
This 12-hour First Aid course is in compliance with WAC 296-800-15010 of the State of Washington and meets OSHA/WISHA requirements with emphasis on job-related accidents, injuries, and prevention of same. Course includes practical experience and Adult Heartsaver CPR. A written and skills verification of CPR is required by AHA. Both First Aid and CPR cards are good for two years.

HO 127
HEALTHCARE PROVIDER CPR 0.6 CR
This 6 hour basic life support course is designed for healthcare providers and includes adult one- and two-rescuer CPR, pediatric one-rescuer CPR, and barrier devices. Successful written and mannequin skill evaluation and attendance at all sessions is required to receive card. Course now includes an introduction to automatic external defibrillation.

HEALTH OCCUPATIONS

HO 105
PHARMACOLOGY 2 CR
This course is designed to assist the surgical technologist to provide safe and effective care to surgical patients by participating in activities that help to identify, manage, and apply general terminology to medications and solutions used in operating room settings.
PREREQUISITES: MATH 98, MATH 99, or equivalent.

HO 125
INTRO TO MEDICAL TERMINOLOGY 3 CR
This course is an introduction to medical word building. Students study words that pertain to body systems, anatomical structures, medical processes and procedures and a variety of diseases. Students will continue their development of medical terminology throughout their Surgery Technology program.
PREREQUISITES: Accuplacer Elementary Algebra score of 75 or higher.

HT 108
MEDICAL TRANSCRIPTION I 3 CR
This course is designed to assist the student in developing the basic medical language, grammar, and formatting necessary for medical typing and transcription.
PREREQUISITES: HT 126 and BIO 105, and typing 50 wpm.

HT 109
MEDICAL TRANSCRIPTION II 5 CR
This course provides working knowledge of the transcription practices with realistic cases.
PREREQUISITES: HT 108, typing speed of 50 wpm, and word processing knowledge.

HT 120
MEDICAL INSURANCE BILLING 5 CR
This course focuses on insurance billing procedures, billing requirements in relation to insurance companies, clinics, and physicians' offices; and insurance coding to include CPT and ICD-9-CM codes. Students will learn skills that will enable them to process insurance claims. Other subjects include basic health office duties as related to medical insurance, accounts receivable, and collection techniques.
PREREQUISITES: HT 126 and BIO 105.

HT 126
FUNDAMENTALS OF MEDICAL TERMINOLOGY 5 CR
The student will gain a basic knowledge of medical word building. The course will address root words, prefixes and suffixes, and terms that are used in diagnostic, operative, and symptoms relating to the various systems of the body. Emphasis is on correct spelling and pronunciation of selected common eponyms.

HT 129
COMPREHENSIVE MEDICAL TERMINOLOGY I 5 CR
This course is a comprehensive systems approach to the study of selected roots, prefixes, and suffixes; principles of word building; study of diagnostic, operative, and symptomatic terms of the various systems of the body. There is an emphasis on accurate spelling and pronunciation of all selected eponyms, clinical laboratory procedures and radiology procedures with associated terminology for each system. This course can be taken in place of HT 126.

HT 130
MEDICAL OFFICE PROCEDURES 5 CR
This course will help prepare the student to work in a medical facility for the purpose of organizing and handling medical records, respond to requests for billing information, maintain filing practices, and handle appropriate filing processes required in medical offices. Topics to be covered will include basic office skills, basic computer functions using Medi-Soft, legal issues as they relate to patient confidentiality and release of information standards, medical ethics, and basic knowledge of healthcare delivery systems.

HT 135
PHARMACOLOGY FOR THE MEDICAL OFFICE 2 CR
This course will introduce students to the various forms of medications, drug classifications, administration routes and how they work. Students will also learn the terminology associated with each, for those medications commonly prescribed in the medical office setting.
PREREQUISITES: HT 126 and BIO 105.

HT 145
HEALTHCARE RECORDS SYSTEMS 5 CR
Functions of medical record departments and record systems will be addressed. Hands-on process of hospital records, uses, content, and evaluation.

HT 230
MEDICAL CODING ICD-9 3 CR
Learn to assign codes in medical/health records to ensure accurate and complete reimbursement documentation. The focus will be on ICD-9 codes with some discussion of CPT codes.
PREREQUISITES: HT 126 and BIO 105 or equivalent.

HT 240
MEDICAL CODING CPT 4 CR
PREREQUISITES: HT 126 and BIO 105 or equivalent.

HT 242
MEDICAL CODING APPLICATIONS 3 CR
Builds on coding skills developed in HT 230 & 240 and includes practical experience coding medical records, as well as specific case study reviews.
PREREQUISITES: Program Coordinator or Instructor Permission.

HT 250
ADVANCED MEDICAL CODING 5 CR
A continuation of the procedures and practices of HT 230 & 240, and helps prepare the student for certification testing.
PREREQUISITES: HT 230 and HT 240.

HT 260
HEALTHCARE RECORDS INTERNSHIP 3 CR
With the help of their advisor, students will arrange work experience in a medical records office. May be a paid or an unpaid work experience.
PREREQUISITES: HT 145 and instructor permission.

HT 262
MEDICAL CODING INTERNSHIP 2 CR
Students will complete a medical coding work experience.
PREREQUISITES: Instructor permission.

HT 265
MEDICAL CODING & BILLING PRACTICUM 5 CR
This course uses the information learned in medical insurance billing and coding, and demonstrates proficiency in billing and coding procedures. Students, using simulated patient records and various insurance forms, will practice patient account statements and records. Medical ethics and laws as they pertain to patient information will also be addressed.
PREREQUISITES: HT 230, HT 240.

HT 270
EXCEL FOR THE MEDICAL OFFICE 2 CR
This course will teach the basics of MS Excel as it relates to functions commonly used in the medical office. Students will learn efficient use of a spreadsheet in order to create records pertinent to the medical office, such as patient and insurance information, operational and capital budgets, tracking quality indicators and productivity by person, and tracking delinquent and incomplete records by type.
HEATING, VENTILATION, AIR CONDITIONING AND REFRIGERATION

CREF 122
FUNDAMENTALS OF REFRIGERATION 5 CR
This course presents the fundamentals of vapor compression refrigeration, HVAC/R tools, equipment and refrigerants. Students prepare for certification under Section 608 of the E.P.A. regulations. Emphasis is placed on proper diagnostic and troubleshooting procedures. Lectures are supplemented by student's individual work on projects in the concurrent course CREF 123.

CREF 123
REFRIGERATION FUNDAMENTALS LAB I 5 CR
In this course emphasis is placed on proper system assembly, diagnostic and troubleshooting procedures, refrigerant handling procedures and safety. The concurrent course, CREF 122 is supplemented by student's individual work on projects in this course.

CREF 126
BASIC ELECTRICITY FOR HVAC/R 4 CR
This course presents the fundamentals of controls, motors, electrical theory and applications. Emphasis is placed on proper diagnostic and troubleshooting procedures. Lectures are supplemented by student's individual work on projects in concurrent course CREF 127.

CREF 127
REFRIGERATION FUNDAMENTALS LAB II 5 CR
This course provides the opportunity to use the fundamentals of electricity, tools and equipment, controls, motors, electrical theory. Emphasis is placed on proper diagnostic and troubleshooting procedures. Lectures in the concurrent course, CREF 126, are supplemented by student's individual work on projects in this course.

CREF 132
COMMERCIAL SELF CONTAINED SYSTEMS 4 CR
This course investigates medium and low temperature refrigeration systems and equipment used in commercial applications. Lectures are supplemented by student's individual work on projects in concurrent course CREF 133.

CREF 133
COMMERCIAL SELF CONTAINED SYSTEMS LAB 5 CR
This course presents medium and low temperature refrigeration systems and equipment used in commercial applications. Emphasis is placed on troubleshooting techniques on live equipment as installed in industry. The concurrent course, CREF 132 is supplemented by student's individual work on projects in this course.

CREF 135
COMMERCIAL ICE SYSTEMS THEORY & APPLICATION 3 CR
This course introduces the various types and modes of commercial ice production systems used in restaurants, institutions, and process applications. Wiring diagrams and sequence of operations are emphasized. Proper installation, maintenance and troubleshooting techniques are discussed.

CREF 137
COMMERCIAL ICE SYSTEMS LAB 4 CR
This course allows for practical application of concepts learned in CREF 135 for commercial ice systems. The student will install, maintain, and diagnose problems on a variety of actual operating ice machines. Students will be exposed to not less than 5 different manufacturer's designs, as all are different. The student will verify proper production, learn how to read wiring schematic, and diagnose and repair faults inserted by instructor. Maintenance and proper cleaning and sanitation are also stressed in the coursework.

CREF 139
COMMERCIAL ICE SYSTEMS INTERACTIVE LEARNING 2 CR
This course utilizes the subject of commercial ice production for the student to research the operation, wiring and manufacture of a particular selected commercial ice machine. The student will gain insight into the various methods employed by different manufacturers to produce ice. The student will prepare and deliver a presentation to the peer group on one selected brand and model of ice machine, and essentially teach the peer group on the aspects of installation, wiring, sequence of operation and maintenance. Steps for preparing the lesson, research, public speaking, audio visual aids, audience participation and self/peer evaluation are addressed in this course.

CREF 141
AIR PROPERTIES & PSYCHOMETRICS 3 CR
This course prepares the student with information about air and its properties, moisture levels, enthalpy, volume, relative humidity and density. Air measurement techniques are also explored. Classroom discussion is aided by hands-on lab activities on operating equipment.

CREF 143
HVAC SYSTEM DESIGN 3 CR
Understanding of the elements of proper HVAC system design is essential for the HVAC installer and service technician. This course focuses on Heat loss/Gain, BTU requirements for buildings, ventilation rates, duct design and application, system selection and installation variables. The student will design a complete system using an existing structure or assigned blueprint plans.

CREF 145
DUCT LAYOUT AND FABRICATION 3 CR
This entry level fabrication course is to prepare students for the HVAC sheet metal installation industry. Parallel line, radial line and triangulation layout techniques are utilized to develop sheet metal patterns of common fittings used in the installation of HVAC systems. Students will apply these techniques in the lab and fabricate assigned fittings.

CREF 147
APPLIED AIR CONDITIONING SYSTEMS 4 CR
This course prepares the learner to install, start-up, troubleshoot and diagnose problems in comfort cooling air conditioning systems. Emphasis is given to wiring techniques, proper refrigeration piping, controls, start-up and maintenance.

CREF 149
APPLIED HEAT PUMP SYSTEMS 4 CR
This course prepares the learner to install, start-up, troubleshoot and diagnose problems in residential and commercial heat pump systems. Emphasis is given to wiring techniques, proper refrigeration piping, controls, start-up and maintenance. Integration of auxiliary heat components, balance point identification, cost analysis to other fuels, and geothermal systems are all introduced and applied in the lab.

CREF 221
ELECTRIC HEATING TECHNOLOGY 3 CR
This course introduces electricity as a heat source for stationary and forced air systems. Emphasis is placed on electrical safety, BTU calculations, air-flow calculations, cost analysis, wiring diagrams, and troubleshooting techniques. Classroom discussions and hands-on lab activities are designed to enable students to quickly identify system problems and propose solutions.

CREF 223
GAS HEATING TECHNOLOGY 7 CR
This course provides hands-on theory and application of forced air and stationary gas heating systems used in residential and light commercial buildings. Natural gas (methane) and LPG systems are discussed and implemented. Emphasis is placed on diagnosis and troubleshooting techniques for service technicians.
FUEL OIL HEATING TECHNOLOGY 4 CR
This course provides hands-on theory and application of oil-fired heating systems in homes and commercial buildings. Proper system installation, set-up, diagnosis and troubleshooting techniques are emphasized.

HYDRONIC HEATING TECHNOLOGY 4 CR
This course explores the use of hydronics to heat residential and commercial buildings. Students will apply proper tools and techniques to identify components, design, install, maintain and troubleshoot problems in hydronic heating systems for residential and commercial use. Radiant heat systems and most types of commercially available fuels are utilized.

COMMERCIAL/INDUSTRIAL REFRIGERATION APPLIED COMPONENTS LAB 5 CR
Students apply the theory and application skills acquired in CREF 231 to operating systems in the lab. A proper start-up technique, adjustments, wiring schematics and evaluation of the operation of the systems is emphasized. Students work in teams, and rotate shifts weekly, allowing each student the diversity to work with all team members. Safety is foremost as most of these systems are high voltage multi-phase systems. Students diagnose and solve instructor inserted problems into the systems, make repairs and invoice the instructor.

LARGE TONNAGE CHILLERS 5 CR
This course presents a study of large capacity chillers systems. Systems that are covered in depth include centrifugal chilled water-cooling systems. Lectures are supplemented by student's individual work on projects.

COURSE DESCRIPTIONS

CREF 225
COURSE DESCRIPTIONS

CREF 227
HYDRONIC HEATING TECHNOLOGY 4 CR
This course explores the use of hydronics to heat residential and commercial buildings. Students will apply proper tools and techniques to identify components, design, install, maintain and troubleshoot problems in hydronic heating systems for residential and commercial use. Radiant heat systems and most types of commercially available fuels are utilized.

CREF 231
COMMERCIAL/INDUSTRIAL REFRIGERATION APPLIED COMPONENTS 5 CR
This course expands on commercial refrigeration systems presented in CREF 132-139. Industrial systems such as chillers for RSW, supermarket refrigeration, commercial chillers for process control, industrial open drive compressors, and associated components are studied. Each ancillary component is analyzed for compatibility, proper selection, operation, need, energy savings and equipment reliability. Wiring diagrams are emphasized and diagnosis of failed components is also addressed. How the system operates as a whole is critical and students are encouraged to research new and innovative applications for these systems.

CREF 233
COMM/INDUSTRIAL REFRIG APP COMPONENTS LAB 5 CR
Students apply the theory and application skills acquired in CREF 231 to operating systems in the lab. A proper start-up technique, adjustments, wiring schematics and evaluation of the operation of the systems is emphasized. Students work in teams, and rotate shifts weekly, allowing each student the diversity to work with all team members. Safety is foremost as most of these systems are high voltage multi-phase systems. Students diagnose and solve instructor inserted problems into the systems, make repairs and invoice the instructor.

CREF 236
LARGE TONNAGE CHILLERS 5 CR
This course presents a study of large capacity chillers systems. Systems that are covered in depth include centrifugal chilled water-cooling systems. Lectures are supplemented by student's individual work on projects or group work on lab projects including the teardown and reassembly of a centrifugal compressor, connecting and operating a 460 Volt Star Delta starter.

CREF 237
COOLING TOWERS & INTRODUCTION TO INDUSTRIAL WATER TREATMENT 1 CR
This course presents a study of cooling towers and the treatment of the water used.

CREF 238
CASCADE/TRANSPORT REFRIGERATION SYSTEMS 3 CR
This course presents a continuation of the course of study of refrigeration systems. Commercial systems that are covered in depth include ultra-low temp freezing systems and transport refrigeration systems. Lectures are supplemented by student's individual work on projects.

CREF 239
ABSORPTION REFRIGERATION SYSTEMS 1 CR
This course presents a continuation of the course of study of refrigeration systems. Commercial systems that are covered in depth are three types of absorption refrigeration systems. Lectures are supplemented by student's individual work on projects.

CREF 242
CONTROL THEORY FOR HVAC AUTOMATION SYSTEMS 4 CR
This course presents basic control theory for energy management and control systems. Lectures are supplemented by student's individual work on projects.

CREF 243
PNEUMATIC CONTROLS 4 CR
This course presents energy management and control systems as applied with pneumatic control systems. Lectures are supplemented by student's individual work on projects.

CREF 244
DISTRIBUTED DIGITAL CONTROL SYSTEMS 6 CR
This course presents energy management and control systems, as applied in Distributed Digital control systems. Lectures are supplemented by student's individual work on projects.

CREF 245
INTRO TO INDUSTRIAL BOILERS & WATER TREATMENT 2 CR
This course presents industrial boilers and combustion controls, advanced flame safeguards and chemical treatment of boiler water. Lectures are supplemented by student's individual work on projects.

CREF 246
CONTROL SYSTEM DESIGN & COMMISSIONING 2 CR
This course presents an opportunity to review the design and commissioning of various types of energy management and control systems, both pneumatic and distributed digital control systems. Lectures are supplemented by student's individual work on projects.

CREF 238
CASCADE/TRANSPORT REFRIGERATION SYSTEMS 3 CR
This course presents a continuation of the course of study of refrigeration systems. Commercial systems that are covered in depth include ultra-low temp freezing systems and transport refrigeration systems. Lectures are supplemented by student's individual work on projects.

CREF 239
ABSORPTION REFRIGERATION SYSTEMS 1 CR
This course presents a continuation of the course of study of refrigeration systems. Commercial systems that are covered in depth are three types of absorption refrigeration systems. Lectures are supplemented by student's individual work on projects.

CREF 242
CONTROL THEORY FOR HVAC AUTOMATION SYSTEMS 4 CR
This course presents basic control theory for energy management and control systems. Lectures are supplemented by student's individual work on projects.

CREF 243
PNEUMATIC CONTROLS 4 CR
This course presents energy management and control systems as applied with pneumatic control systems. Lectures are supplemented by student's individual work on projects.

CREF 244
DISTRIBUTED DIGITAL CONTROL SYSTEMS 6 CR
This course presents energy management and control systems, as applied in Distributed Digital control systems. Lectures are supplemented by student's individual work on projects.

CREF 245
INTRO TO INDUSTRIAL BOILERS & WATER TREATMENT 2 CR
This course presents industrial boilers and combustion controls, advanced flame safeguards and chemical treatment of boiler water. Lectures are supplemented by student's individual work on projects.

CREF 246
CONTROL SYSTEM DESIGN & COMMISSIONING 2 CR
This course presents an opportunity to review the design and commissioning of various types of energy management and control systems, both pneumatic and distributed digital control systems. Lectures are supplemented by student's individual work on projects.

CREF 238
CASCADE/TRANSPORT REFRIGERATION SYSTEMS 3 CR
This course presents a continuation of the course of study of refrigeration systems. Commercial systems that are covered in depth include ultra-low temp freezing systems and transport refrigeration systems. Lectures are supplemented by student's individual work on projects.

CREF 239
ABSORPTION REFRIGERATION SYSTEMS 1 CR
This course presents a continuation of the course of study of refrigeration systems. Commercial systems that are covered in depth are three types of absorption refrigeration systems. Lectures are supplemented by student's individual work on projects.

CREF 242
CONTROL THEORY FOR HVAC AUTOMATION SYSTEMS 4 CR
This course presents basic control theory for energy management and control systems. Lectures are supplemented by student's individual work on projects.

CREF 243
PNEUMATIC CONTROLS 4 CR
This course presents energy management and control systems as applied with pneumatic control systems. Lectures are supplemented by student's individual work on projects.

CREF 244
DISTRIBUTED DIGITAL CONTROL SYSTEMS 6 CR
This course presents energy management and control systems, as applied in Distributed Digital control systems. Lectures are supplemented by student's individual work on projects.

CREF 245
INTRO TO INDUSTRIAL BOILERS & WATER TREATMENT 2 CR
This course presents industrial boilers and combustion controls, advanced flame safeguards and chemical treatment of boiler water. Lectures are supplemented by student's individual work on projects.

CREF 246
CONTROL SYSTEM DESIGN & COMMISSIONING 2 CR
This course presents an opportunity to review the design and commissioning of various types of energy management and control systems, both pneumatic and distributed digital control systems. Lectures are supplemented by student's individual work on projects.

HUMAN RESOURCE MANAGEMENT

HRM 110
HUMAN RESOURCE MANAGEMENT 5 CR
Introduces the functional areas of human resource management and laws. Students discuss job analysis, recruitment, testing, interviewing, selection, placement, training, wage and salary administration, performance, evaluation and labor management.

HRM 120
SUPERVISION FUNDAMENTALS 5 CR
Supervisory effectiveness is critical for all organizations. This course emphasizes and gives practical exercises in needed supervisory skills and in how these skills are developed and used. The supervisor’s role in getting the work done right, helping to control costs and accomplishing the goals of the organization are stressed. This course covers what a supervisor is expected to do and provides the skills necessary to do the job.

HRM 130
TEAM BUILDING 5 CR
How to create, maintain and participate in group decision making with a goal of strengthening the business.

HRM 201
MANAGEMENT OF HUMAN RESOURCES: AN OVERVIEW 3 CR
This course covers basic employment law, components of human resources management, the role of human resources personnel, affirmative action, equal employment opportunity, confidentiality and records management. Coursework involves the practical application of concepts to the workplace.

HRM 205
RECRUITMENT & STAFFING POLICIES & PRACTICES 3 CR
This course provides an exploration of the key issues in recruitment, selection, and staffing of employees at all levels. Human resources planning, job descriptions and specifications, recruitment, the selection process, testing, employment interviews, and the evaluation of the selection process are discussed. Compliance with issues such as EEO, affirmative action, and the Americans with Disabilities Act (ADA) are addressed. Emphasis is on establishing procedures that ensure high quality candidates and employees.

HRM 207
FUNDAMENTALS OF EMPLOYEE BENEFITS & COMPENSATION 3 CR
An overview of base pay compensation and benefits. Topics include principles of pay systems, the relationship of pay systems on an organization’s needs, cost of benefits, statutory coverages, retirement plans, defined benefit approaches and contribution plans, profit sharing, life, dental, disabiliti-
ty, and health plans. Health and safety issues are also addressed.

PREREQUISITES: HRM 201, previous HR experience or department permission.

HRM 210
EMPLOYMENT LAW & LABOR RELATIONS  3 CR
This course provides a legal and practical overview of employee relations and labor relations in both union and nonunion environments. Communication styles, facilitation, grievances and discipline handling, crisis interventions, conflict resolution, labor relations, and the role of government in human resources management are addressed. It also emphasizes compliance issues, including OSHA, employee assistance harassment, and substance abuse.

PREREQUISITES: HRM 201 or previous HR experience or department permission.

HRM 220
TRAINING & STAFF DEVELOPMENT  3 CR
Training and staff development from a human resource perspective will be addressed. Employee orientation, career planning and development, cross training, management development, and succession planning are covered. This course also addresses learning styles, technical needs assessment, choosing instructors and programs, and program evaluation and modification.

PREREQUISITES: HRM 201 or previous HR experience or department permission.

HRM 235
HUMAN RESOURCE INFO SYSTEMS  2 CR
This course explores how technologies are transforming the workplace, the workforce, and the work of the HR practitioner. Considerations in evaluating appropriate software will be shared, as well as researching the pros and cons of several software applications.

PREREQUISITES: HRM 201 or previous HR experience or department permission.

HRM 240
RISK MANAGEMENT & SAFETY  3 CR
Risk management is the decision-making process involving considerations of political, social, economic, and engineering factors with relevant risk assessments relating to a potential hazard so as to develop, analyze and compare regulatory options and to select the optimal regulatory response for safety from that hazard. Essentially risk management is the combination of three steps: risk evaluation, emission and exposure control, and risk monitoring.

PREREQUISITES: HRM 201 or previous HR experience or department permission.

HRM 245
DIVERSITY IN THE WORKPLACE  1 CR
This course is designed to examine the various elements that create differences within society and the workplace. Also to be examined will be the current legalities regarding diversity in the workplace, and how to interface with employers that will enable them to work effectively in a diverse world. Also offered online.

PREREQUISITES: HRM 201 or previous HR experience or department permission.

HRM 255
STRATEGIC HUMAN RESOURCES  3 CR
This course covers how the human resource professional assists in the managerial process of forming a strategic vision, setting objectives, crafting a strategy, implementing and executing the strategy.

PREREQUISITES: HRM 201 or previous HR experience or department permission.

HRM 260
CONDUCTING INTERNAL INVESTIGATIONS  1 CR
Overview of the methodology and investigatory skills necessary for internal investigation in the workplace. Through readings, discussion and presentations, participants will learn the basic methodology of internal investigation, as well as the necessary interviewing skills to conduct an effective investigation. Topics include interviewing, what to look for during an investigation, how to conduct an investigation, and the various situations that require a formal and informal investigation.

PREREQUISITES: HRM 201 or previous HR experience or department permission.

HYPNOTHERAPY

HYPN 101
BASIC HYPNOSIS  5 CR
A beginners class which teaches basic hypnosis/self-hypnosis, and is the first of a 3-part series. Can be learned for personal growth, as well as a prerequisite for the study of professional hypnotherapy. It is approved by the International Medical and Dental Hypnotherapy Association, the National Society of Clinical Hypnotherapists, as well as other professional hypnosis associations.

HYPN 102
INTERMEDIATE HYPNOSIS  5 CR
This course is the second in a 3-part series that is designed to teach the serious student of hypnosis how to apply hypnotherapy techniques for motivation and goal achievement.

PREREQUISITES: HYPN 101.

HYPN 103
ADVANCED HYPNOSIS  5 CR
This course, the third in a series, is for the serious student wishing to use hypnotherapy as a career, or to supplement an existing healthcare field and practice. Upon completion, the student is eligible to apply for State Registration through the Department of Health.

PREREQUISITES: HYPN 102.

INSTRUMENTATION

INST 200
INTRO TO INSTRUMENTATION  2 CR
This course introduces you to the trade, terminology, and basic principles of instrumentation. It is a preparatory course for any one of three sections within the second year of instrumentation: measurement, control, and systems, enabling you to begin your second year of Instrumentation at the start of Fall, Winter, or Spring quarter.

INST 205
JOB PREPARATION I  1 CR
Preparation for employment, including resume preparation, cover letter writing, job search engine use, and interviewing skills.

INST 206
JOB PREPARATION II  1 CR
This course teaches you how to get the jobs that are not listed in classified ads or job search engines. You will learn how to professionally network, research employers for job potential, conduct informational interviews, and otherwise take an active approach in securing employment within your professional field.

INST 240
PRESSURE AND LEVEL MEASUREMENTS  7 CR
In this course you will learn how to precisely measure both fluid pressure and fluid solids level in a variety of applications, as well as accurately calibrate and efficiently troubleshoot pressure and level measurement systems.

INST 241
TEMPERATURE AND FLOW MEASUREMENTS  7 CR
In this course you will learn how to precisely measure both temperature and fluid flow in a variety of applications, as well as accurately calibrate and efficiently troubleshoot temperature and flow measurement systems.

INST 242
ANALYTICAL MEASUREMENTS  5 CR
This course teaches the basic principles of process analysis including pH, electrical conductivity, turbidity, and chemical constituency. A review of INST 240 (pressure and level measurement) and INST 241 (temperature and flow measurement) is also included in this course.

INST 250
FINAL CONTROL ELEMENTS  6 CR
In this course you will learn how to precisely control energy in process systems using fluid valves, motors, and other actuating devices. You will also learn how fluid power systems work and how to efficiently troubleshoot final control elements.

INST 251
PID CONTROLLERS AND TUNING  6 CR
This course teaches you how the most basic and widely-used control algorithm works: proportion-integral-derivative (PID). In this course you will see how the PID algorithm is implemented in pneumatic as well as electronic controllers, and also how to tune a PID controller for stability.
INSTR 252
PROCESS OPTIMIZATION AND CONTROL STRATEGIES 5 CR
This course teaches more advanced loop tuning techniques as well as advanced process control strategies, including cascade, feed forward, ratio, and model-based control algorithms. You will also explore common types of controlled processes found in industry to see how these algorithms are practically applied. A review of INSTR 250 (final control elements) and INSTR 251 (PID controllers and tuning) is included in this course.

INSTR 260
DATA ACQUISITION SYSTEMS 4 CR
This course reviews digital communication and analog/digital conversion theory learned in the first year (Core Electronics) courses, building upon that foundation to explore industrial data busses (including Ethernet) and indicating, data logging, and SCADA systems.

INSTR 261
PROGRAMMABLE LOGIC CONTROLLERS 6 CR
In this course you will learn how to wire, configure, and program programmable logic controllers (PLCs) to control real processes.

INSTR 262
DCS AND FIELD BUS 6 CR
This course teaches the basic principles of distributed instrumentation, including both distributed control systems (DCS) and Field/ bus" instruments. Safety instrumented system (SIS) concepts and components are also covered here. A review of INSTR 260 (data acquisition systems) and INSTR 261 (programmable logic controllers) is included in this course.

INSTR 269
AUTOCAD APPLICATIONS 5 CR
This course concentrates on AutoCAD applications for the instrumentation field.

INSTR 290
INTERNSHIP 10 CR
This optional elective course provides work experience in related industry refining technical and workforce skills in a work environment. Specific performance skills will be developed for each individual student internship. Clock hours are variable and may be repeated for clock hour credit.

LEGAL

LGL 127
LEGAL OFFICE PROCEDURES 5 CR
Designed to introduce students who have little or no background in the legal field with the terminology, background, and knowledge of the legal procedures required to work in a law office. It presents basic legal concepts and the various fields of law and outlines the preparation of documents commonly used in those fields. Student projects give the students practice in various areas of law.

LGL 132
LEGAL TERMINOLOGY/TRANSCRIPTION 5 CR
Designed to help students learn the legal terminology, English skills, legal formatting skills, and transcription guidelines needed to transcribe accurate legal documents in a law office.

PREREQUISITES: LGL 127.

LGL 211
LEGAL DOCUMENT PROCESSING 5 CR
Course makes use of a self-contained comprehensive job simulation designed to give the student practice on the types of activities most often performed in legal office settings. Gain a hands-on exposure to the various types of law while formatting documents. Word processing functions are incorporated into the course.

PREREQUISITES: LGL 132.

LGL 225
INTERNSHIP 3 CR
Students will work in a legal related job receiving pay or volunteering.

PREREQUISITES: Instructor permission.

LGL 226
INTERNSHIP 6 CR
Students will work in a legal office-related job receiving pay or volunteering.

PREREQUISITES: Instructor permission.

MACHINING

MACH 100
INTRODUCTION TO TRADE/OCCUPATIONAL SAFETY 1 CR
Overview of the program, college, and program policies and procedures, student equipment requirements, machine occupations, and material safety data.

MACH 101
MACHINE TECHNOLOGY I 3 CR
Basic machine tool operation and safety on grinders, lathes, mills, and drills.

MACH 102
MACHINE TECHNOLOGY II 3 CR
Covers saws and sawing, machine speeds, feeds, setup, and secondary drilling operations.

PREREQUISITES: MACH 100, MACH 101, and MACH 121.

MACH 111
BENCHWORK/HANDTOOLS 2 CR
The safe uses and selection of hand tools for holding, striking, assembly, and cutting.

MACH 113
MACHINERY'S HANDBOOK 1 CR
Introduction to the use of Machinery's Handbook, how to research, identify, and find basic information.

MACH 119
MACHINE FUNDAMENTALS IA 5 CR
This is the first in a two part series. This course provides for basic experience using pedestal grinders, lathes, hand tools, mills and material identification. This course is taken in conjunction with MACH 101 and provides students an opportunity to practice entry level machining skills.

MACH 120
MACHINE FUNDAMENTALS IB 5 CR
This is the second course in a two part series that provides for basic experience using pedestal grinders, lathes, hand tools, mills and material identification. This course is taken in conjunction with MACH 101 and provides students an opportunity to practice entry level machining skills.

MACH 122
MACHINE FUNDAMENTALS II 10 CR
A continuation of MACH 121, lathes, mills, drilling, setup, and secondary operations.

PREREQUISITE: MACH 121.

MACH 123
MACHINE FUNDAMENTALS III 10 CR
Includes advanced machine operation on a lathe and mills, machine accessories, job planning, and production methods.

PREREQUISITES: MACH 122.

MACH 125
QUALITY CONTROL 2 CR
The use of visual and precision instrument techniques for quality control. Surface finish and quality problem solving.

MACH 131
BLUEPRINT READING I 3 CR
Provides instruction for development in print reading using basic sketching techniques, lettering, dimensioning, lines, and makeup of a print as a form of communication.

MACH 132
BLUEPRINT READING II 3 CR
Covers the use of sectional views, thread specifications, dimensioning auxiliary views, geometric tolerance, welding symbols, processes and skill development in reading prints by using sketching techniques.

PREREQUISITE: MACH 131.

MACH 162
MATHEMATICS I 4 CR
Study of basic algebra, ratio and proportion, and plane geometry, and applying the principles learned to practical shop problems.

PREREQUISITE: MACH 100.

MACH 192
JOB PREPARATION 1 CR
Focuses on skills to seek and keep a job.

PREREQUISITE: COM 170.

MACH 201
MACHINE TECHNOLOGY IV 4 CR
Covers precision measuring tools, metal cutting technology, carbide cutting tools, and advanced grinding operations.

PREREQUISITES: MACH 103.
MACH 202  
MACHINE TECHNOLOGY V  2 CR  
Advanced milling machine setups and operations, speeds, feeds, and gear cutting. Includes indexing head calculations and the theory for using the rotary table.

MACH 212  
METALLURGY AND HEAT TREATMENT  3 CR  
Basic information about the manufacture of steels, the composition of selected metals, and the heat treating and hardening test of steels.  
PREREQUISITES: completion of third quarter requirements and MACH 201.

MACH 213  
APPLIED MACHINERY’S HANDBOOK  1 CR  
An introduction to the use of information in Machinery’s Handbook to solve shop-related problems.

MACH 214  
TOOL AND CUTTER GRINDING  3 CR  
Provides cutting tool nomenclature and the reconditioning of worn or dull cutting tools.

MACH 215  
HYDRAULICS  1 CR  
Designed to promote hydraulic principles, fundamental system components, and hydraulic oils.  
PREREQUISITES: Completion of three quarters in program.

MACH 221  
MACHINE FUNDAMENTALS IV  5 CR  
This course includes advanced machining techniques using computer aided machining practices. In addition, machining methods used for CNC programming and operation are emphasized.

MACH 222  
MACHINE FUNDAMENTALS V  10 CR  
Includes advanced instruction of turning, milling, and grinding machines. The selection and use of carbide cutting tools will be emphasized.

MACH 241  
INTRODUCTION TO CNC MACHINING  9 CR  
Introduction to the machine controls of the CNC milling machine and lathe. Also taught is the basic rapid and linear G codes needed for machine operation.

MACH 242  
CNC PROGRAMMING/OPERATION  9 CR  
Teaches manual programming and operation of the CNC milling and lathe machines and basic G & M commands.  
PREREQUISITES: completion of all theory, blueprint reading, and mathematics related to the program.

MACH 244  
CNC-CAD/CAM PROGRAMMING & OPERATIONS A  5 CR  
This is the first course in a two part series which focuses on advanced programming related to CNC, including macro, subroutines and computer-aided programming using the Master CAM programming system.

MACH 245  
CNC-CAD/CAM PROGRAM & OPERATIONS B  5 CR  
This is the second course in a two part series which focuses on advanced programming related to CNC, including macros, subroutines and computer-aided programming using the Master CAM programming system.

MACH 262  
MATHEMATICS II  4 CR  
Covers trigonometry and its function, working with right triangles and how they apply to the machining of parts. Also covers oblique triangles and the use of the law of sines and cosines.  
PREREQUISITES: MACH 162

MANAGEMENT

MGMT 101  
CONFlict MANAGEMENT  1 CR  
Conflict is described as a disagreement among two or more individuals. Managing the periodic incidence can prove to be challenging as well as stressful. This course will give the student the tools to understand the reasons that conflict exists, how to stimulate conflict in a healthy and competitive way in order to increase performance, control conflict, and resolve and eliminate conflict.

MGMT 102  
THE leadeRSHiP PRoeSS  3 CR  
What makes a good "leader"? Leadership in individuals, whether they seem to have been born with certain "traits," or have developed various leadership behaviors, is an area that has been studied for a long time. This course will examine the attributes of leadership, how it develops, the behaviors that need to be encouraged, those that need to be modified, as well as how to manage the leadership process.

MGMT 104  
DEFInING & MANAGING QUALITY CUSTOMER SERVICE  3 CR  
As a general rule customers go where they are wanted and stay where they are appreciated. Organizations, private or public, are judged on the level of service they deliver to the customer. This course will identify the barriers that employees have in delivering quality service, strategies for development, team building techniques, customer service management, and feedback.

MGMT 152  
SMall BUSINESS MANAGEMENT  3 CR  
Covers business structures, planning and organizing a business, purchasing an existing business or franchise, legal structure, cash flow, marketing, and changes businesses will encounter in the next five to ten years.

MGMT 210  
SUPERVISION FOR THE OFFICE  5 CR  
Demonstrates knowledge of appropriate office supervisory skills. Introduces students to the fundamentals of supervisory management. Through lectures, text, case studies, projects, and simulations students will develop an understanding of principles to be used as guides for supervision in an office.

MARKETING

MKT 100  
MARKETING FUNDAMENTALS  5 CR  
This course will provide a comprehensive survey of fundamental marketing principles and skills. Students will learn how marketing professionals develop strategy, research consumer needs, and identify target markets. In addition to covering the importance of global marketing and e-commerce, students will learn how to satisfy market opportunities with the “4 Ps,” product, pricing, promotion, and placement.

MATHEMATICS

MATH 098  
ELEmeNTARY ALGEBRA  5 CR  
This course will cover solving different forms of equations; manipulation of exponents and radicals as needed on the job; as well as factoring and graphing. It is equivalent to 1 year of high school algebra. This course is targeted for those students whose programs involve more algebra than included in BTC’s occupational and technical math courses. This course will also serve as a prerequisite to intermediate algebra or as a refresher for those students who have had algebra in the past.  
PREREQUISITES: Accuplacer Arithmetic score of 75 or higher or Math 85 with a grade of B- or higher

MATH 099  
INtErMeDIAte ALGEBRA  5 CR  
This course prepares students for entry into college level math courses. Topics include second degree equations and inequalities, relations and their graphs, exponential and logarithmic functions, and rational expressions. A graphing calculator is required.  
PREREQUISITES: Math 098 with a grade of C or higher. Accuplacer algebra score of 75 or higher.

MATH 100  
OCCUPATIONAL MATH  5 CR  
This course covers fractions, decimals, percents, ratios & proportions, English & metric measurement systems, geometry, and algebra. The contents will include relevant technical applications and the use of a calculator. Text required.  
PREREQUISITES: Accuplacer Arithmetic score of 38 or higher or Math 85 with a grade of B- or higher

MATH 107  
MATH IN SOCIETY  5 CR  
College level coverage of practical applications in many fields of study. Topics will include probability, statistics, finance, geometry, graphing, growth & decay, and right triangle trigonometry.  
PREREQUISITES: Math 99 - Intermediate Algebra with a C or above or BTC College Level Math score of 32 or higher.

Curriculum subject to change. For current information, visit us on the web at: www.btc.ctc.edu
MATH& 141
PRECALCULUS I  5 CR
The focus of this course will be functions. Students manipulate and graph linear, polynomial, rational, exponential, logarithmic, and quadratic functions. This course will also cover systems of equations, matrices/determinants, and their applications. PREREQUISITES: MATH 99 Intermediate Algebra with a C or above or BTC College Level Math score of 32 or higher.

MATH& 142
PRECALCULUS II  5 CR
The majority of this course will cover trigonometry. Students will explore trigonometry functions, right and oblique triangle trigonometry, graphing, trigonometry identities, laws of sine and cosine as well as trigonometric application problems. This course will also cover vectors in the plane and in space, along with parametric equations, polar coordinates and graphs of polar equations. PREREQUISITES: Precalculus I - MATH& 141

NURSING

NUR 101
COMMON HEALTH NEEDS  15 CR
This first course introduces the student to the concepts of health and wellness. A foundation for practice is established through the study of the history, legal parameters, and ethics of nursing. Common healthcare needs throughout the life span are addressed system by system, utilizing the nursing process as a problem solving technique essential to the practice of nursing as both an art and science. An emphasis is placed on safety as it relates to nursing practice. Further emphasis is placed on the needs of the elderly, including the process of death and dying. PREREQUISITES: BIOL& 242, HLTH 103, HLTH 133 and NUR 105 or equivalent.

NUR 101A
COMMON HEALTH NEEDS 1A  7 CR
The first course introduces the student to the concepts of health and wellness. A foundation for practice is established through the study of the history, legal parameters, and ethics of nursing. Common healthcare needs throughout the life span are addressed system by system, utilizing the nursing process as a problem solving technique essential to the practice of nursing as both an art and science. An emphasis is placed on safety as it relates to nursing practice and includes 7 hours of HIV/AIDS for healthcare workers. Further emphasis is placed on the needs of the elderly, including the process of death and dying. PREREQUISITES: BIOL& 242, HLTH 103, HLTH 133, and NUR 105 or equivalent.

NUR 101B
COMMON HEALTH NEEDS 1B  8 CR
This course is a continuation of NUR 101A whereby the student will integrate the concepts of health and wellness into the foundation of practice. Common healthcare needs throughout the life span are addressed system by system, utilizing the nursing process as a problem solving technique essential to the practice of nursing as both an art and science. An emphasis is placed on safety as it relates to nursing practice. Further emphasis is placed on the needs of the elderly, including the process of death and dying. PREREQUISITES: NUR 101A, NUR 102A

NUR 102
NURSING PRACTICE 1  7 CR
Concurrent with NUR 101, NUR 102 provides the student with an opportunity to learn and practice basic nursing skills, including assessment techniques, non-parenteral medication administration, and the fundamental techniques of physical care, such as bathing, positioning, and the use of proper body mechanics. An emphasis is placed on the care of the elderly and rehabilitation. Includes both college lab time, and clinical experiences in a long-term care facility. PREREQUISITES: BIOL& 242, HLTH 103, HLTH 133, and NUR 105 or equivalent.

NUR 102A
NURSING PRACTICE 1A  4 CR
Concurrent with NUR 101A, NUR 102A provides the student with an opportunity to learn and practice basic nursing skills which includes fundamen- tals of physical care such as bathing, positioning and the use of proper body mechan- ics. An emphasis will be placed on care of the el- derly and rehabilitation. This course includes both college lab time and clinical experiences in long-term facilities. PREREQUISITES: BIOL& 242, HLTH 103, HLTH 133, and NUR 105 or equivalent.

NUR 102B
NURSING PRACTICE 1B  3 CR
Concurrent with NUR 101B, NUR 102B provides the student with an opportunity to learn and practice basic nursing skills including assessment tech- niques and non-parenteral medication adminis- tration. An emphasis is placed on the care of the elderly and rehabilitation. This course includes both lab time and clinical experiences in long term facilities. PREREQUISITES: NUR 101A, NUR 102A

NUR 105
PHARMACOLOGY  2 CR
An introduction to the basic concepts required by nurses to provide safe and effective phar- macotherapeutics. The metabolism and actions of drugs, with an emphasis on absorption, duration of action, distribution in the body, and methods of excretion will be studied. Also introduces the nurs- ing implications, including the principles of safe drug administration, documentation, and client teaching. Students are expected to demonstrate competency in arithmetic computations, and to apply knowledge of related vocabulary and medi- cal symbols. PREREQUISITES: BIOL& 160, MATH 98 or MATH 99, or equivalent.

NUR 121
COMMON HEALTH DISTURBANCES I  15 CR
Prepares the student to assist people with common health disturbances in single or multiple sys- tems. The systems studied include the respiratory, cardiovascular, gastrointestinal, genitourinary, en- drocrine, and musculoskeletal systems. In addition, fluid and electrolyte disturbances, surgical asepsis, and perioperative care are addressed. All care is approached utilizing the nursing process. An em- phasis is placed on young, middle, and elderly adults. PREREQUISITES: All courses within NUR 010 or their equivalent.

NUR 121A
COMMON HEALTH DISTURBANCES 1A  7 CR
This course prepares the student to assist people with common health disturbances in single or multiple systems within the body. The systems studied include the respiratory, cardiovascular, gastrointestinal, genitourinary, endocrine, and musculoskeletal systems. In addition, fluid and electrolyte disturbances, surgical asepsis, and pre- operative care are addressed. All care is ap- proached utilizing the nursing process. An empha- sis is placed on young, middle, and elderly adults. PREREQUISITES: NUR 121A, NUR 121B

NUR 121B
COMMON HEALTH DISTURBANCES 1B  8 CR
This course is a continuation of NUR 121A which includes the study of respiratory, cardiovascular, gastrointestinal, genitourinary, endocrine and musculoskeletal systems, fluid and electrolyte dis- turbances, surgical asepsis and preoperative care. All care is approached utilizing the nursing pro- cess. An emphasis is placed on young, middle, and elderly adults. PREREQUISITES: NUR 121A, NUR 122A

NUR 122
NURSING PRACTICE II  7 CR
Concurrent with NUR 121, NUR 122 provides the student with an opportunity to learn and practice the skills associated with the care of patients with some common health disturbances in the respira- tory, cardiovascular, gastrointestinal, genitouri- nary, endocrine, and musculoskeletal systems, or a fluid and electrolyte disturbance. Sterile technique is covered, as well as subcutaneous and intramus- cular injection techniques. An opportunity to care for a client throughout the perioperative process is also provided. Includes college lab time, and clinical experiences in both acute and long-term care facilities. PREREQUISITES: NUR 121, NUR 122

NUR 122A
NURSING PRACTICE 2A  4 CR
Concurrent with NUR 121A, NUR 122A provides the student with an opportunity to learn and prac- tice the skills associated with the care of patients with some common health disturbances in the respi- ratory, cardiovascular, gastrointestinal, genito- urinary, endocrine and musculoskeletal systems, or a fluid and electrolyte disturbance. Sterile tech- niques are covered as well as subcutaneous and intramuscular injection techniques. An opportu- nity to care for a client throughout the peri-opera- tive process is also provided. Included is college lab time and clinical experiences in an acute care facility. PREREQUISITES: NUR 121B, NUR 102B

NUR 122B
NURSING PRACTICE 2B  3 CR
Concurrent with NUR 121B, NUR 122B provides the student with an opportunity to learn and practice the skills associated with the care of patients with some common health disturbances in the respira- tory, cardiovascular, gastrointestinal, genitouri- nary, endocrine and musculoskeletal systems, or a fluid and electrolyte disturbance. Sterile tech- niques are covered as well as subcutaneous and intramuscular injection techniques. An opportu- nity to care for a client throughout the peri-opera- tive process is also provided. Included is college lab time and clinical experiences in an acute care facility. PREREQUISITES: NUR 121B, NUR 102B

NUR 123
NURSING PRACTICE III  5 CR
Concurrent with NUR 122, NUR 123 provides the student with an opportunity to learn and practice the skills associated with the care of patients with some common health disturbances in the respira- tory, cardiovascular, gastrointestinal, genitouri- nary, endocrine, and musculoskeletal systems, or a fluid and electrolyte disturbance. Sterile technique is covered, as well as subcutaneous and intramus- cular injection techniques. An opportunity to care for a client throughout the perioperative process is also provided. Includes college lab time, and clinical experiences in both acute and long-term care facilities. PREREQUISITES: NUR 122, NUR 123
NUR 12B
NURSING PRACTICE 2B 3 CR
Concurrent with NUR 121B, NUR 122B provides the student with an opportunity to learn and practice the skills associated with the care of patients with some common health disturbances in the respiratory, cardiovascular, gastrointestinal, genitourinary, endocrine and musculoskeletal systems, or a fluid and electrolyte disturbance. Sterile technique is covered as well as subcutaneous and intramuscular injection techniques. An opportunity to care for a client throughout the peri-operative process is also provided. Included is lab time and clinical experiences in an acute care facility.
PREREQUISITES: NUR 121A, NUR 122A

NUR 131
COMMON HEALTH DISTURBANCES II 15 CR
Prepares the student to assist people with common health disturbances in single or multiple systems. The systems studied include the neurological, immune, and integumentary systems. Additionally, students will study clients with mental health disturbances, common pediatric disturbances, and normal mother/infant care. Nursing in both the clinical and office setting will be introduced, as well as basic intravenous therapy. In preparation for entry into nursing practice, students will explore the various leadership skills required of a Licensed Practical Nurse (LPN).
PREREQUISITES: NUR 121, NUR 122

NUR 131A
COMMON HEALTH DISTURBANCES 2A 12 CR
This course prepares the student to assist people with common health disturbances in single or multiple systems within the body. The systems studied include neurological, immune and integumentary systems. In addition, students will study clients with mental health disturbances, common pediatric disturbances and normal mother/infant care. Nursing in both the clinical and office setting will be introduced, as well as basic intravenous therapy. In preparation for entry into nursing practice, students will explore the various leadership skills required of a Licensed Practical Nurse (LPN).
PREREQUISITES: NUR 121B, NUR 122B

NUR 131B
COMMON HEALTH DISTURBANCES 2B 3 CR
NUR 131B is a continuation of NUR 131B. The systems studied include the neurological, immune and integumentary systems. In addition, students will study clients with mental health disturbances and normal mother/infant care. Nursing in both the clinical and office setting will be introduced, as well as intravenous therapy. In preparation for entry into nursing practice, students will explore the various leadership skills required of a Licensed Practical Nurse (LPN).
PREREQUISITES: NUR 131A

NUR 132
NURSING PRACTICE III 7 CR
Concurrent with NUR 131, NUR 132 provides the student with an opportunity to learn and practice the skills associated with the care of patients with some common health disturbances in the neurological, immune, and integumentary systems. Additionally, students will experience working with clients with mental health disturbances. Common pediatric disturbances and normal mother/infant care experience will be provided. Skills, such as basic, intravenous therapy, will be practiced in the college lab, and clinical experiences will be provided in a variety of health care settings, culminating in a series of clinical days closely approximating employment in a health care facility as a practical nurse.
PREREQUISITES: All courses within NUR 020.

NUR 211
NURSING DIMENSIONS I 7 CR
This course focuses on the role transition and role differentiation between Licensed Practical Nurse (LPN) and Registered Nurse (RN). The student is introduced to critical thinking and leadership skills required for professional nursing. Content focuses on understanding human health patterns while supporting the physiological changes of the client in the role of the Registered Nurse. Primary topics include priority setting, delegation, NCLEX plan, conflict, management, physical assessment, and alteration in mental health, fluid, electrolyte and acid base balance, cardiac, respiratory and renal systems across the life span (adult, aging, pediatric and pregnant mother). Integrated concepts are advocacy, cultural perspectives, communication, nutrition, pharmacology, and health education.

NUR 212
CLIENT CARE MANAGEMENT PRACTICE I 4 CR
Concurrent with NUR 211, NUR 212 provides the student with an opportunity to examine and evaluate current experience, determine clinical proficiencies, and through the process of portfolio development, expand clinical nursing expertise within the acute care setting (medical or surgical areas, pediatrics, and mental health).

NUR 221
NURSING DIMENSIONS II 6 CR
This course is a continuation of NUR 211 and focuses on health and developmental assessment through the life span (children, adult, pregnancy, and aging). Primary topics include ethical and legal issues, antepartum, intrapartum, and postnatal periods including the newborn, alteration in immune response, reproductive, and endocrine systems, multi-system failure and care of the client in intensive care. Integrated concepts are nursing process, advocacy, cultural perspectives, communication, nutrition, pharmacology, and health education.
PREREQUISITES: NUR 211, 212

NUR 222
CLIENT CARE MANAGEMENT PRACTICE II 4 CR
This course is a continuation of NUR 212. The student has the opportunity to examine and evaluate current experience, determine clinical proficiencies, and through the process of portfolio development, expand clinical nursing expertise within the acute care setting (intensive care, pediatrics and maternal/child).
PREREQUISITES: NUR 211, 212

NUR 231
NURSING DIMENSIONS III 5 CR
This course continues to focus on concepts of leadership such as quality and cost-effectiveness of care, interdisciplinary collaboration, and emerging care delivery models. Primary topics include alteration in integumentary, gastrointestinal, musculoskeletal and sensory neuro across the life span (adult, aging, pediatric and pregnant mother). Integrated concepts are nursing process, advocacy, cultural perspectives, communication, nutrition, pharmacology, and health education.
PREREQUISITES: NUR 221, NUR 222

NUR 234
ACUTE CRITICAL CARE 4 CR
Concurrent with NUR 231, NUR 234 is an individual clinical assignment intended to strengthen the student's clinical skills and assist them to make the final transition from Licensed Practical Nurse (LPN) to Registered Nurse (RN). The clinical objectives will be determined by self assessment of clinical experience, further education within this program, and the Nurse Practice Act. Completion of portfolio will be presented as culmination of the student's experience.
PREREQUISITES: NUR 221, NUR 222

OPERATIONS MANAGEMENT

OPMGT 105
INTRODUCTION TO OPERATIONS MANAGEMENT 5 CR
Introduces students to the fundamentals of business operations management and the administrative process relationships.

OPMGT 107
FUNDAMENTALS OF PROCESS MANAGEMENT 5 CR
Planning, leading, motivating, group dynamics and exploring the role of the facilitator are studied in this course.

OPMGT 119
STATISTICAL PROCESS CONTROL 5 CR
Understanding the current state of processes and the methodology of continuous improvement.

OPMGT 207
MATERIALS MANAGEMENT 5 CR
Overview of production materials planning, control, and capacity estimation.

OPMGT 215
PRODUCTION PLANT PLANNING 5 CR
Performance metrics development, the seven wastes, improving work flow, and the SMART test.

OPMGT 225
OPERATIONS MANAGEMENT SPECIAL TOPICS 5 CR
This course provides an opportunity for students to explore leading edge management innovations as they emerge into the industrial workplace.
OPMTG 250
PRACTICUM I 12 CR
The student evaluates, devises and implements a plan for a specific department. Upon completion the student presents documented findings in a report to faculty.

OPMTG 255
PRACTICUM II 12 CR
Students will develop and implement a detailed plan for a specific department. Upon course completion students will present a report examining the project.

PERSONAL FITNESS TRAINER

PFT 100
FOUNDATIONS OF HEALTH & FITNESS 6 CR
You will study the science and structure of the human organism and how it relates to exercise science. You will learn about food requirements, values and how food is broken down into usable fuel. You will develop and learn techniques to regulate and prescribe appropriate eating systems. You will learn operation and set up of digital and programmable exercise machinery, equipment repair and maintenance, facility safety, sports injury management and prevention and how gym etiquette is practiced. Program development helps you understand the many needs and requirements of your future client. You will learn the tools, skills and methods to determine how each client fits into the program schedule. Assessment of health risks, potential problem areas and special needs will be covered.

PFT 110
PROGRAM DEVELOPMENT & TRAINING PRINCIPLES 6 CR
Focusing on smooth, cardiac and skeletal muscle physiology, we will investigate structure, function and cellular adaptations with exercise. You will create exercise programs using scientific principles beginning with the fundamental beginner programs and working through advanced training development and implementation. Evaluation and assessment of programs will be heavily emphasized. This class will cover the mechanics of muscle development, as well as behavior and performance guidelines to achieve prescribed results with specialized instruction. The class is an introduction to the specialty field of the supplementation of nutrients, vital elements and their effects on aging and longevity. The principles to aid in prevention of degenerative health risks will be covered.
PREREQUISITES: PFT 100

PFT 120
FACILITY MANAGEMENT & MARKETING FOR A FITNESS TRAINER 6 CR
You will learn the day to day operations as a professional trainer in a fitness facility. This will include equipment maintenance, purchasing and budget management. You will learn multi-client training principles and guidelines for supervisor and management positions. The class covers the basics for designing an effective plan to run a successful training facility, as well as the evaluation of new and existing programs for implementation and development. This course is designed to assist the student in marketing their own personal trainer services as well as developing a successful marketing program for a progressive fitness facility. You will learn proven methods for marketing and research develop networking techniques and employment leads. The course will assist you in recognizing and developing personal talents to be better able to determine career direction.
PREREQUISITES: PFT 110

PHYSICS

PHYS& 121
GENERAL PHYSICS I 5 CR
Introduction to mechanics and physical reasoning strategies and investigation methods for students majoring in technically oriented fields not requiring a calculus based physics course. Newton’s laws, work and energy, kinematics conservation principles. Computer interfaced laboratory investigations, technical writing, problem solving, mathematical reasoning and scientific method of inquiry skills will be emphasized.
PREREQUISITES: Math 099 - Intermediate Algebra

PHYS& 122
GENERAL PHYSICS II 5 CR
Second in a three-course survey of physics for allied health, building construction, biology, forestry, architecture, and other programs. Topics include fluids, heat, thermodynamics, electricity, and magnetism. Laboratory work is integral to the course.
PREREQUISITES: Phys& 121 - General Physics I

PROCESS TECHNOLOGY

PTEC 101
INTRODUCTION TO PROCESS TECHNOLOGY 5 CR
In this course students will study various aspects of the Process Industry, including its history; roles, responsibilities, and expectations of the Process Technician; team dynamics; basic physics and chemistry; safety, and quality management. In addition, the course will cover basic components of the Process Industry environment, such as piping and valves; tanks, drums, and vessels; pumps and compressors; steam turbines; electricity and motors; heat exchangers; cooling towers and fans; furnaces and boilers; distillation columns; process control instrumentation; process utilities and auxiliary systems; and process print reading.
PREREQUISITES: PFT 100

PTEC 102
PROCESS TECHNOLOGY I (EQUIPMENT) 6 CR
The purpose of this course is to provide an overview of the equipment and tools used in the process industry, including piping, tubing, hoses and fittings; valves; pumps; compressors; turbines; motors and engines; power transmission and lubrication; heat exchangers; cooling towers; furnaces and boilers; filters and dryers; vessels; and process diagrams. Students will be introduced to many process related equipment concepts, such as purpose, components, operation, and the Process Technician’s role for operating and troubleshooting the equipment.

PTEC 103
SAFETY, HEALTH AND EQUIPMENT I 5 CR
In this course, students will study industrial hazards types, including physical, chemical, ergonomic, and biological. Within these four general types, specific agents, causative factors, and effects will be identified along with controls, alarms, and detection systems. The course will focus on hazardous chemicals found in the process industry.

PTEC 105
PROCESS TECHNOLOGY II (SYSTEMS) 5 CR
In this course, students will study the interrelation of process equipment and process systems. Specifically, students will be able to arrange process equipment into basic systems; describe the purpose and function of specific process systems; explain how factors affecting process systems are controlled under normal conditions; and recognize abnormal process conditions. In addition, students are introduced to the concept of system and plant economics.

PTEC 110
PROCESS INSTRUMENTATION I 6 CR
In this course, students will study process variables and the various instruments used to sense, measure, transmit, and control these variables. The course also introduces students to control loops and the elements that are found in different types of loops, such as controllers, regulators, and final control elements. The course concludes with a study of instrumentation drawings and diagrams along with a unit on troubleshooting instrumentation.

PTEC 190
SPECIAL TOPICS FOOD PROCESSING 3 CR
In this course, students will be introduced to the various methods and processes for producing foods. These will include the operations of heat, drying, reacting, mixing, separating, and granulating. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to food processing. This course may be either live, a hybrid, or on-line.

PTEC 191
SPECIAL TOPICS JOB SEARCH SKILL 3 CR
In this course, students will be introduced to the various skills and steps in finding a job in a process technology company. The course will cover resume writing, completion of applications, taking evaluation tests, portfolio preparation, and interviewing. Students will interview each other as well as be interviewed by panels of professionals. Students will also do a research project on a process technology company.

PTEC 192
SPECIAL TOPICS PULP & PAPER PROCESSING 3 CR
In this course, students will be introduced to the various methods and processes for producing pulp and paper. These will include the operations of feedstock preparation, digestion, bleaching, drying, reacting, mixing, separating, and pressing. The equipment necessary to provide and control
these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to pulp and paper processing. This course may be either live, a hybrid, or on-line.

PTEC 193
SPECIAL TOPICS UPSTREAM PROCESS
3 CR
In this course, students will be introduced to the various methods and processes for locating and producing oil. In addition, the geology of the formation of oil deposits will be covered as well as an overview of the regulations for oil exploration. The methods and operations include exploration, drilling, completion of the well. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to upstream processing. This course may be either live, a hybrid, or on-line.

PTEC 194
SPECIAL TOPICS WASTEWATER TREATMENT
3 CR
In this course, students will be introduced to the various methods and processes for wastewater treatment. These will include the steps of preliminary, primary, secondary and tertiary treatment which involve the operations of sedimentation, biological and chemical reacting, thickening, drying, filtration, mixing, and disinfection. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to pulp and paper processing. This course may be either live, a hybrid, or on-line.

PTEC 195
SPECIAL TOPICS BIODEisel
3 CR
In this course, students will be introduced in the various methods and processes for producing biodiesel. These will include the operations of feedstock preparation, reaction, mixing separating, and washing. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also prepare biodiesel in the laboratory and in a pilot plant. A project related to biodiesel production will also be required. This course may be either live, a hybrid, or on-line with access to the laboratory and pilot plant.

PTEC 196
SPECIAL TOPICS GREEN ENERGY
3 CR
In this course, students will be introduced to the various methods and processes for producing green energy. These will include the production of renewable energy by wind, solar, hydroelectric, wave, and biofuels. The equipment necessary to provide and control these operations; quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to green energy. This course may be either live, a hybrid, or on-line.

PTEC 197
SPECIAL TOPICS COOPERATIVE EDUCATION
3 CR
In this course, students will be given credit for courses or portions of courses taken at other educational institutions. Examples of these include trips to other PTEC schools to operate special pieces of equipment or learn specialized topics. Students will be required to perform the required portion of coursework and to prepare a written and oral report.

PTEC 203
SAFETY, HEALTH AND ENVIRONMENT II
5 CR
Continued instruction in the application of concepts presented in Safety, Health, & Environment I with an emphasis on emergency response concepts. The student will demonstrate appropriate response to emergency situation; recognize hazardous situations for personnel, environment, and the community; and apply team skills in response to emergency situations.

PTEC 205
DYNAMIC PROCESS CONTROL
5 CR
Course will provide the student with a basic understanding of electronic process control systems typically utilized in the petroleum, petrochemical, power generation, and pulp & paper industries. Course will further provide the student with specific knowledge regarding the operation of typical hydrocarbon distillation systems and fired furnaces. Multiple dynamic process simulators operating in a PC Lab environment will be utilized as the foundational elements of the course learning activities. Computer simulations of fired heaters and distillation systems will be operated in normal, off-normal, emergency, start-up and shutdown modes. The course will be conducted as a "hands on" operating experience using both small-group and individual simulation activities, assignments and scenarios.

PTEC 217
PROCESS TROUBLESHOOTING
5 CR
Course involves instruction in the different types of Process Technology troubleshooting techniques, procedures, and methods used to solve process problems. Topics include application of data collections and analysis, cause-effect relationships, and reasoning.

PTEC 220
PROCESS TECHNOLOGY PROJECT II
5 CR
This is a culminating project assignment for an individual or a group of students. The instructor may assign a specific topic for the project or work with a local industry/plant to define a particular project topic from a real-life situation. The student or the group of students will define the problem, resources needed, postulate the hypothesis/solution, research the problem and possible solutions, visit the plant, interview/consult with instructor/engineers/technicians and other resources, internet and develop a solution. The student or the group will then write the technical report defining the complete process from defining the problem, methodology applied, and their conclusion. This may also require building a piece of equipment, writing a software program, or writing safety or operational procedures.

PTEC 227
PROCESS TECHNOLOGY PROJECT III
5 CR
This may be a continuation or a separate project assignment as in the course PTEC 270. For the AAS degree, this is a culminating project assignment for an individual or a group of students. The instructor may assign a specific topic for the project or work with a local industry/plant to define a particular project topic from a real-life situation. The student or the group of students will define the problem, resources needed, postulate the hypothesis/solution, research the problem and possible solutions, visit the plant, interview/consult with instructor/engineers/technicians and other resources, internet and develop a solution. The student or the group will then write the technical re-
PMP 100
PROJECT MANAGEMENT FUNDAMENTALS 1 CR
As this course progresses you will learn effective methods for planning and sequencing project activities that include Work Breakdown Structure, Network Logic Diagram, and the Critical Path for completing a project on schedule; listing the cost elements included in a project budget and discussing ethical strategies for controlling both budget and schedule deviations; identifying communication methods and reporting tools that impact project objectives.

PMP 120
PROJECT MANAGEMENT - PMP PREP 2 CR
This course offers you a standards-based approach to successful project management across application areas and industries. PMP PREP focuses on the generally accepted standards of Project Management recognized by the Project Management Institute. This class will help prepare you for the Project Management Professional Certification exam. During this class you will discuss the phases of the Project Management Life Cycle to better understand the manager’s role in each phase of development; examine criteria for successful Project Management and the most common reasons for project failure; develop and discuss components of a Risk Management Plan; and explore techniques to develop a strong project team.

PMP 160
PROJECT MANAGEMENT 5 CR
Examines the theory and practice of project management from a managerial perspective. Students define projects, determine resource requirements, write requests for proposals, outline contract requirements, define and sequence tasks, and create project schedules.

PSYCHOLOGY

PSYC 111
INTERPERSONAL PSYCHOLOGY 5 CR
Topics include assertiveness, customer relations, teamwork, problem-solving/conflict resolution, business and work ethics, organizational development-skills, employment rights and responsibilities, equity and cultural issues, decision making, motivation, and self-esteem.
PREREQUISITES: Accuplacer reading score of 71 or higher

PSYC & 100
GENERAL PSYCHOLOGY 5 CR
An overview of the factors affecting behavior including topics related to theories of learning, the senses, perceptions, nervous system, emotions, personality theory, motivation, abnormal behavior and therapy, and social psychology.
PREREQUISITES: CPT score of 86 or higher on sentence skills and 85 or higher on reading. Word processing knowledge required.

PSYC & 200
LIFESPAN PSYCHOLOGY 5 CR
A systematic study of the developmental processes in humans from conception to late adulthood. Special emphasis will be given to the topics of physical development, cognitive development, and personality/social development.
PREREQUISITES: PSYC & 100 - General Psychology with a C or above or equivalent.

RADIOLOGY

RAD 250
MAMMOGRAPHIC THEORY I 3 CR
This course is includes course work in specialized mammographic equipment, computers used in digital imaging, film screen considerations, processing quality assurance, quality control testing, computer-aided diagnosis. This course also includes applications of patient care while in the Breast Imaging Center. Patient care includes psychological influences as well as physical environment. Students will study normal breast anatomy and physiology along with an in-depth study of breast pathology. Patient education in the form of breast self examination, nutritional considerations, radiation protection, pharmacology and current management techniques are included.
PREREQUISITES: ARRT registered or registry-eligible technologist

RAD 251
MAMMOGRAPHIC THEORY II 3 CR
This course includes course work in normal breast anatomy and physiology, breast pathology, sectional anatomy of the breast, routine positioning in screening and diagnostic imaging, special views in positioning and procedures, and interventional procedures.
PREREQUISITES: ARRT registered or registry-eligible technologist

RAD 252
MAMMOGRAPHICAL CLINICAL 2 CR
Students are responsible for securing an ACR accredited mammographic facility for their clinical experience. One Registered Mammographer must be identified and agree to coordinate student experiences. This program does not provide clinical affiliates, however we reserve the right to approve or disapprove clinical sites. The clinical experience will occur during the same quarter as didactic instruction. This course requires students to use the ARRT Mammography Clinical Experience Documentation Form to record clinical competencies and repetition of these procedures. Forms must be filled out accurately to gain acknowledgement of any procedure. Procedures must be verified by the initials of the supervising Mammographer or Mammography Radiologists. The student must provide the names and addresses of each mammographer initiating this form. Program approval of these professionals must be obtained before acquiring signatures.

RT 101
RADIOGRAPHIC POSITIONING I 5 CR
This course introduces the basic positioning techniques used in the radiography of the respiratory system, abdomen, and upper and lower extremities. Lab sections include peer positioning, film critique, anatomical identification, pathologies and an energized section using phantoms.
PREREQUISITES: Acceptance into Radiologic Technology Program

RT 102
RADIOGRAPHIC POSITIONING II 5 CR
This course introduces the basic positioning techniques used in the radiography of the bony thorax, spinal column, pelvic girdle and continuation of the upper and lower extremities. Lab sections include peer positioning, film critique, anatomical identification, pathologies and an energized section using phantoms.

RT 103
RADIOGRAPHIC POSITIONING III 5 CR
This course introduces the basic positioning techniques used in the radiography of the digestive system, urinary system, and cranium. Lab sections include peer positioning, film critique, anatomical identification, pathologies and an energized section using phantoms.

RT 110
INTRO TO RADILOGIC TECHNOLOGY 5 CR
This course provides the student with an overview of the foundations in radiography, skills to increase student success in the program, clinical orientation and the technologist’s role and professional responsibilities in the health care delivery system. Principles, practices, and policies of the health care organization will be discussed. Elements of ethical behavior will be addressed and students will ex-
amine a variety of clinical ethical issues and dilemmas. Legal terminology, conduct and principles will also be addressed in this course. Skills emphasized will include study techniques, note taking, study groups, and test taking skills. Personal wellness will be included. Students will be oriented to student services areas on campus and clinical sites. Program mission and outcomes will be discussed to include professional requirements and commitment necessary for program success.

RT 112
PATIENT CARE IN RADIOLOGY 4 CR
This course provides the student with basic concepts of patient care, including consideration for the physical and psychological needs of the patient and family. Routine patient care will be included, as well as infection control techniques, vital signs, safety and transfer positioning, medical emergencies, barium studies, oxygen therapy and catheters. Patient education and documentation will be addressed.

RT 114
LEADERSHIP SEMINAR 1 CR
This course is designed to encourage leadership principles in students including participation and project development for professional organizations.

RT 120
IMAGING AND PROCESSING 4 CR
This course is designed to establish a knowledge base in factors that govern and influence the production and recording of radiologic images. Emphasis will be on filming and electronic imaging with related accessories. Topics to be included are basic radiographic production, imaging standards, radiographic density and contrast, recorded detail, basic radiographic production, imaging standards, with related accessories. Topics to be included are basic radiographic production, imaging standards, radiographic density and contrast, recorded detail, distortion, exposure latitude, beam-limiting devices, beam filtration, technique formulation, exposure calculations, image receptors and processing. Lab exercises will provide application of theories using energized equipment and test tools.

RT 121
RADIOGRAPHIC PHYSICS I 4 CR
This course is designed to establish a knowledge base in atomic structure and terminology. Included are the nature and characteristics of radiation, x-ray production and the fundamentals of photon interactions with matter. An introduction to the principles of radiation protection is included. Lab activities will provide application for the course theories.

RT 122
QUALITY ASSURANCE 2 CR
This course is designed to examine principles of radiology quality assurance. Principles related to quality assurance will include differentiation between quality improvement/management, quality assurance and quality control with elements of a department quality assurance program. Lab activities will provide application of theories presented in class.

RT 123
RADIOGRAPHIC PHYSICS II 3 CR
This course is designed to establish a knowledge base in radiographic, fluoroscopic, mobile and tomographic equipment requirements and design. Content includes manual versus automatic exposure control, equipment calibration, beam restriction, and recognition of malfunctions.

RT 131
RADIOGRAPHIC CLINIC I 8 CR
This course consists of two clinical assignments of eight-hour work shifts per week. Students are assigned clinical experience in a radiology department to complete clinical competencies correlating with academic coursework.

RT 132
RADIOGRAPHIC CLINIC II 8 CR
This course consists of two clinical assignments of eight-hour work shifts per week. Students are assigned clinical experience in a radiology department to complete clinical competencies correlating with academic coursework.

RT 133
RADIOGRAPHIC CLINIC III 9 CR
This course consists of clinical assignments correlating with current academic course work. Assignments will include rotations at hospitals, clinical or doctors’ offices in regional areas. Rotations may include day, evening or weekend schedules.

RT 201
ADV PATIENT PROCEDURES & PATHOLOGY I 5 CR
This course includes applications of patient care, procedures and pathology related to trauma, surgical, pediatric, digestive, respiratory, urinary and skeletal/muscular systems. Students will present case studies incorporating patient history, care considerations, procedures and pathology.

RT 202
ADV PATIENT PROCEDURES & PATHOLOGY II 5 CR
This course includes applications of patient care, procedures and pathology related to reproductive, circulatory, lymphatic, endocrine, nervous and sensory organs. Students will present case studies incorporating patient history, care considerations, procedures and pathology.

RT 205
RADIOLOGY PHARMACOLOGY 2 CR
This course will provide basic concepts of pharmacology. Concepts included are pharmacokinetic and pharmodynamic principles of drugs, categories specific to drugs, actions and side effects of select medications, and legal and ethical status of radiographer’s role in drug administration.

RT 210
RADIATION BIOLOGY 3 CR
This course provides an overview of the principles of the interaction of radiation with living systems. The factors that affect biological response, to include acute and chronic effects of radiation. Includes examination of standards, measurements and requirements required by government guidelines.

RT 220
RADIOGRAPHIC PHYSICS III 3 CR
This course is to provide advanced study of the topics included in RT 123, Physics II, selection and equipment purchase, equipment requirements and design for advanced imaging modalities of mammography, cardiovascular and interventional, digital imaging, MRI and CT. Computer applications will be covered to include digital imaging, radiographic information systems, hospital information systems, and picture archiving communication systems.

RT 230
REGISTRY REVIEW & EMPLOYMENT READYNESS 3 CR
This course is designed to provide students with opportunities to prepare for registry review and employment readiness. Registry review will be provided utilizing presentations and computer applications. Students will prepare a professional portfolio for employment and practice interview skills.

RT 231
RADIOGRAPHIC CLINIC IV 11 CR
This course consists of clinical assignments correlating with current academic course work. Assignments will include rotations at hospitals, clinics or doctor’s offices in regional areas. Rotations may include day, evening or weekend schedules.

RT 232
RADIOGRAPHIC CLINIC V 12 CR
This course consists of three clinical assignments of eight-hour shifts per week. Students are assigned clinical experience in a radiology department to complete sixth quarter clinical competencies and select specialized rotations.

RT 233
RADIOGRAPHIC CLINIC VI 12 CR
This course consists of clinical assignments correlating with current academic course work. Assignments will include rotations at hospitals, clinics or doctor’s offices in regional areas. Rotations may include day, evening or weekend schedules.

RESIDENTIAL HOME INSPECTION

RHI 110
RESIDENTIAL HOME INSPECTION 15 CR
This comprehensive training program for professional home inspection combines classroom instruction with field training to provide the student with the necessary knowledge to start his or her own professional home inspection business or seek employment with a residential home inspection firm. Upon completion of the program, the student will receive a Bellingham Technical College Certificate and be prepared to take, and pass, the National Home Inspector Exam, the Washington State Structural Pest Inspector Exam or any exam required by the leading home inspection associations or societies. Text books included with tuition.
SALES

ENTREPRENEURSHIP FUNDAMENTAL  4 CR
This course deals with organizing and operating a small business. Topics include development of a business plan, failure factors in small business, source of capital, record keeping, financial statements, taxation, marketing, and legal and regulatory issues and management principles.

SAL 100
SELLING FUNDAMENTALS  5 CR
Course examines the principles and techniques of professional selling; the social, ethical and legal issues in selling; the entire sales process from prospecting to follow-up; the proper use of one's time and sales territory; and the financial side of selling. State-of-the-art selling strategies, practices, and techniques are presented in a "how-to" fashion.

SAL 110
HI-TECH TOOLS FOR SELLING  3 CR
Students will become comfortable with the hi-tech tools that are most commonly used by a sales specialist. Students will use customer relations management tools, telecommunications tools, and internet based presentation tools.

SAL 115
SALES TECHNIQUES & PROCEDURES  5 CR
This class will focus on sales techniques and procedures that have proven successful. Students will be given many opportunities in class to practice these techniques and procedures. Students will also learn how to create and present sales presentations and proposals.

SAL 120
E-SALES  5 CR
Introduces the business processes in the new economy with specific emphasis on use of commerce sites for sales and customer service.

SAL 140
MARKETING RESEARCH & TERRITORY MANAGEMENT  5 CR
Presents the structure and use of market research in sales territory management decision making. Students learn data analysis and interpretation skills that lead to sound decisions in personal territory management

SAL 190
WORK BASED LEARNING I  6 CR
Students will intern in a sales position for 180 hours. The position must be approved by the instructor. Working with an instructor, a defined list of objectives will be identified for the internship. The internship may be paid or unpaid. This internship should be taken midway through the program. PREREQUISITES: Instructor permission

SURGERY TECHNOLOGY

CSC 136
CENTRAL SERVICE CLINICAL  1 CR
This course is to provide the student with practical experience through internship at hospitals and surgery centers in the area of central services and sterile processing. The students will focus on the methods of sterilization, cleaning, processing, packaging, distribution, storing, and inventory control of surgical instruments, trays, and equipment. PREREQUISITES: SURG 120 with a C or above and instructor approval

SURG 120
SURGERY TECHNOLOGY I  10 CR
An introduction to surgical technology where the student will gain theoretical and practical knowledge of general equipment, instrumentation, surgical team member roles, and health care facilities and their management. Includes physical, psychological, and ethical aspects of patient care; principles of aseptic technique, sterilization, and safety in the operating room.

SURG 125
SURGERY TECHNOLOGY LAB  10 CR
Principles and techniques of operating room procedures. Includes surgical scrub techniques, gowning and gloving, aseptic and sterile technique, creating and maintaining a sterile field and basic instrumentation usage. Hands on practice of scrub role functions

SURG 133
SURGERY TECHNOLOGY II  10 CR
Surgical supplies, wound healing, anesthesia concepts and suture selection relating to the surgical patient. Includes additional intra-operative care techniques and the technologists’ role in case preparation and surgical procedures. PREREQUISITES: SURG 120, SURG 125, and HO 105.

SURV 102
FUNDAMENTALS OF SURVEYING I  7 CR
Emphasis is placed on familiarization with the different types of surveys and their purpose and teaches the student to be able to differentiate between “accuracy” and “precision.” It teaches the student to measure distances in a vertical direction and relate these measurements to a datum plane or elevation from sea level. Course also teaches the student how to measure directions from known points to find or establish other points and will enable the student to gain necessary skills in operating surveying instruments. PREREQUISITES: MATH 111 and instructor’s permission

SURV 103
FUNDAMENTALS OF SURVEYING II  5 CR
Emphasis on field work with the Total Station and Digital Level. A traverse will be run and adjusted and a topo made of the enclosed ground. PREREQUISITES: SURV 102.

SURV 104
CONSTRUCTION AND HIGHWAY SURVEYS  6 CR
Students will learn stakeout procedures for a variety of construction projects. In addition, the students will develop techniques to help the student learn to use horizontal and vertical curves in the field and office to join tangent lines. The layout of a horizontal curve will also be done as a portfolio project.

SURV 112
PUBLIC LANDS SURVEY SYSTEM  5 CR
Course will familiarize the student with the public land system of the U.S. and the subdivision of sections.

SURV 113
BOUNDARY/LEGAL PRINCIPALS  5 CR
Explores the importance of various laws dealing with the survey of land boundaries, and the State and Federal laws about ownership and title.
SURV 116
SURVEY DATA SYSTEMS 4 CR
A comprehensive study of transferring data between the data collector and the computer.

SURV 140
FUNDAMENTALS OF GIS & GPS 4 CR
Students develop knowledge and designing skills in topology, features, attributes, relational operators, data capture, coverage editing, coordinate systems, and map projections.

SURV 152
ZONING, PERMITTING AND PLATTING 4 CR
Introduction to Whatcom County and City of Bellingham zoning ordinances and an introduction to the various state, county, and city permits associated with construction and land use in Whatcom County.

SURV 191
PROFESSIONAL DEVELOPMENT AND SAFETY 2 CR
Provides an introduction to the licensing and certification procedures for land surveyors and engineers in the State of Washington as well as the R CWs and WACs that apply. The course also provides an examination of safety hazards and accident awareness that is related to both professions.

SURV 201
ADVANCED SURVEY SEMINAR 7 CR
Offers opportunities for the second year student to study advanced techniques in GPS, GIS, Data Collection, Research, and Surveying/Mapping Software. The structure is self-motivated and supports transition from college structure to jobs in the Surveying and Mapping profession.

SURV 202
GPS SYSTEMS 7 CR
Global Positioning System software will be used to adjust raw field data collected with Trimble 4000 SST receivers.

SURV 204
ENVIRONMENTAL MAPPING 4 CR
Coursework includes current industry mapping techniques and equipment as it relates to environmental issues such as wetlands mapping and habitat restoration.

SURV 205
ADVANCED GIS APPLICATIONS 7 CR
An advanced course in desktop mapping focusing on the use of the extensions in Geographic Information Systems applications.
PREREQUISITES: ENGT 128, and ENGT 153.

SURV 252
LAND DEVELOPMENT DESKTOP II - SURVEY 6 CR
Study and use of the Civil Engineering and Survey industry specific CAD overlay software for computer aided drafting. Focuses on the use of Land Development Desktop overlay products for the AutoCAD 14 software with Civil/Survey specific applications.
PREREQUISITES: ENGT 128 and SURV 102.

TOTAL QUALITY MANAGEMENT

TQM 109
INTRODUCTION TO TOTAL QUALITY MANAGEMENT 5 CR
Provides an overview of quality planning, quality assurance, and quality control. Students will learn the key factors that are critical for customer satisfaction in your business; be introduced to the processes and the methodology of continuous process improvement; discover the immediate and long-term effects of different quality levels; and understand the multi-dimensions of quality.

TQM 200
SIX SIGMA - STATISTICAL ANALYSIS TOOLS 5 CR
You will learn when to use many of the proven Six Sigma problem solving methods and statistical tools to contribute to the success of your organization. This Six Sigma Green Belt course follows the DMAIC (Define, Measure, Analyze, Improve, Control) model and teaches the soft skills required to participate in projects effectively.

TQM 209
CASE STUDIES IN QUALITY MANAGEMENT 5 CR
Students use advanced Total Quality Management techniques and apply them to their business.
PREREQUISITES: EDUC 131

TRANSPORTATION

TRANS 101
BASIC TRANS. SERVICE & SYSTEMS I 5 CR
This course provides an introduction to the transportation industry covering various aspects such as Occupational Health and Safety, Measuring, Fasteners, Tools and Equipment, and Service Information. Students acquire the skills needed for basic vehicle servicing while gaining an overview of all of the transportation systems.
PREREQUISITES: Program admission or instructor permission

TRANS 102
BASIC TRANS. SERVICE & SYSTEMS II 5 CR
This course provides an introduction to the transportation industry covering various aspects such as Shop Equipment Use, Brakes, Basic Vehicle Services, and Steering and Suspension Theory. Students acquire the skills needed for basic vehicle servicing while gaining an overview of all of the transportation systems.
PREREQUISITES: TRANS 101 or instructor permission

TRANS 103
BASIC TRANS. SERVICE & SYSTEMS III 5 CR
This course provides an introduction to the transportation industry covering various aspects such as Engine Fundamentals, Engine Performance, Transmissions, HVAC, and Electrical. Students acquire the skills needed for basic vehicle servicing while gaining an overview of all of the transportation systems.
PREREQUISITES: TRANS 102 or instructor permission.

VETERINARY ASSISTANT

VET 117
VETERINARY ASSISTING INTERNSHIP 2 CR
This course provides students, who have successfully completed Vet 101 with an opportunity to gain hands-on experience and apply knowledge in an animal hospital or clinic.
PREREQUISITES: Student must also be enrolled in Applied Principles 105 or 107, depending on quarter of instruction and instructor assignment.

VETERINARY TECHNICIAN

VETT 101
VETERINARY NURSING I 5 CR
Upon completion of this module, the veterinary assistant and veterinary technician student will be able to safely and effectively obtain subjective and objective patient data that will allow accurate evaluation of the patient with minimum stress and maximum safety. Also, the veterinary assistant and veterinary technician student will be able to carry out therapeutic techniques in order to achieve maximum health benefits for the patient.

VETT 102
VETERINARY ANATOMY & PHYSIOLOGY I 5 CR
Upon completion of this course, the veterinary assistant and veterinary technician student will be knowledgeable in: 1) the function of basic cell structure; 2) skeletal anatomy and physiology; 3) integument and muscular systems; 4) the respiratory and cardiovascular systems; 5) the hemolymphatic, gastrointestinal, endocrine, reproductive, urinary, and nervous systems.

VETT 103
VETERINARY MEDICAL TERMINOLOGY 3 CR
Upon completion of this module, the veterinary assistant and veterinary technician student will: understand terms of anatomical topography, nursing records and pharmaceutical, emergency and surgical, medicine, and patient description terms; students should also be comfortable and accurate with metric system conversion.

www.btc.ctc.edu
VETT 104  
**VETERINARY NUTRITION I**  3 CR  
Given the characteristics of the patient, the veterinary assistant and veterinary technician student will understand appropriate and inappropriate dietary components for various life stages to promote optimal health. Also, the veterinary assistant and veterinary technician student will be able to explain nutritional recommendations to clients and reinforce owner compliance.

VETT 105  
**LEARNING FOR A LIFETIME**  2 CR  
The goals of this module are to enable the student to learn the materials of veterinary technician medicine in a logical, goal-oriented manner. The veterinary technician student should be empowered with critical thinking and problem-solving skills. The veterinary technician student should be able to utilize a variety of reference media and access that material for quality of content. Finally, the veterinary technician student should be able to tailor study skills to address their personal strengths and weaknesses with the goal of maximizing retention of material learned during the veterinary technician program and in continuing education pursuits throughout his or her career.

VETT 106  
**MICROBIOLOGY, VIROLOGY, & MYCOLOGY**  3 CR  
Upon completion of this module, the veterinary assistant and veterinary technician student will be able to classify, collect, and culture bacteria, the veterinary assistant or veterinary technician student will also be knowledgeable in mycology and virology.

VETT 107  
**SMALL ANIMAL PARASITOLOGY**  3 CR  
Upon completion of this module, the veterinary assistant and veterinary technician student will be able to: 1) identify and describe the life cycle of ecto- and endo-parasites, 2) understand the importance of parasites in veterinari and zoonotic disease, 3) understand the importance of, and demonstrate proper diagnostic fecal techniques, 4) identify parasite ova, adults and non-parasite artifacts, 5) review therapy and prevention of parasitic diseases.

VETT 108  
**RADIOLOGY I**  6 CR  
Given the characteristics of the patient and the radiographic study that has been requested, the veterinary assistant and veterinary technician student will be able to prepare the radiographic equipment, measure the animal using topographic landmarks and choose the appropriate radiographic technique to provide maximum diagnostic benefit in an appropriate and safe manner. The veterinary technician student will be able to assess the image quality and offer options to correct deficiencies.

VETT 109  
**LABORATORY SCIENCES**  6 CR  
Upon completion of this module, the veterinary assistant and veterinary technician student will be able to properly handle and submit appropriate samples for diagnostic analysis to ensure maximum accuracy of results. Also, give the characteristics of the laboratory equipment; the student will determine proper maintenance and quality control procedures to ensure accurate results.

VETT 110  
**VETERINARY ANATOMY & PHYSIOLOGY II**  3 CR  
Upon completion of this module, the veterinary technician student will be knowledgeable in: 1) unique equine features: head and gastrointestinal tract and reproductive tract, 2) unique ruminant features: gastrointestinal tract and reproductive tract and foot, and 3) avian anatomy.

VETT 111  
**SMALL ANIMAL MEDICINE I**  4 CR  
Upon completion of this module, the veterinary technician student will be knowledgeable in: 1) the general approach to medical problems and become familiar with systemic diseases, 2) respiratory and cardiac diseases, 3) gastrointestinal diseases, 4) urinary tract diseases, 5) liver and pancreas diseases, 6) endocrine diseases, 7) neurologic diseases, 8) erythrocytes, platelets, and coagulation.

VETT 112  
**VETERINARY NURSING II: SURGICAL**  5 CR  
Given the characteristics of the patient and the surgical procedure to be performed, the veterinary technician student will be able to: 1) assess the patient’s pre-surgical status and tests and report to the veterinarian, 2) verify the owner’s consent to the procedure and its cost, 3) identify and apply appropriate surgical site preparation of hair clipping and decontamination, 4) position the patient appropriately for maximum surgical convenience and safety, and 5) maintain aseptic technique for surgical facility and equipment.

VETT 113  
**IMMUNOLOGY & PHARMACOLOGY I**  3 CR  
Upon completion of this module, the veterinary technician student will be able to calculate the correct amount of medication in the prescribed form and administer it by the prescribed route as directed by a veterinarian. The veterinary technician student shall also be able to differentiate between normal and abnormal responses to medications and communicate necessary information to clients in order to maximize safety and compliance for effective treatment. Finally, the veterinary technician student should be proficient at inventory control procedures, especially as applied to controlled substances.

VETT 114  
**DENTISTRY**  4 CR  
Upon completion of this module, the veterinary technician student will be knowledgeable of: 1) dental anatomy and pathophysiology, 2) dental radiographs, 3) dental instruments and usage, 4) large animal dentistry (equine and swine), and 5) small mammal dentistry and avian beaks.

VETT 115  
**RADIOLOGY II**  4 CR  
Given the characteristics of the patient and the radiographic study that has been requested, the veterinary assistant and veterinary technician student will be able to prepare the radiographic equipment, measure the animal using topographic landmarks and choose the appropriate radiographic technique to provide maximum diagnostic benefit in an appropriate and safe manner. The veterinary technician student will be able to assess the image quality and offer options to correct deficiencies.
VETT 120  
ANESTHESIA  
5 CR  
Given the characteristics of the anesthetic patient and the procedure, (assisted by the veterinarian) the veterinary technician student will assess patient risk status and determine appropriate peri-anesthetic, anesthetic and pain management protocols. also (assisted by the veterinarian), the veterinary technician student will choose appropriate monitoring equipment and techniques to maintain safe anesthesia, pain management and anesthesia recovery.

VETT 121  
EXOTIC ANIMAL MEDICINE  
3 CR  
Given the unique requirements for exotic species, the veterinary technician student will safely obtain subjective and objective data that will allow evaluation of these animals. the veterinary technician student will be able to: identify husbandry issues and recognize normal from abnormal behaviors and vital signs.

VETT 122  
VETERINARY NUTRITION II  
2 CR  
Upon completion of this module, the veterinary student will be knowledgeable of 1) nutrition and recovery care, 2) therapeutic nutrition, 3) small mammal and avian nutrition, 4) nutrition of lizards, snakes, and turtles.

VETT 123  
VETERINARY NURSING IV  
5 CR  
Upon completion of this module, the veterinary technician student will be able to safely and effectively obtain subjective and objective patient data that will allow accurate evaluation of the patient with minimum stress and maximum safety. also, the veterinary assistant and veterinary technician student will be able to carry out appropriate therapeutic techniques in order to achieve maximum health benefits for the patient.

VETT 124  
SPECIALTY MEDICINE  
3 CR  
Upon completion of this module, the veterinary technician student will be knowledgeable of the following veterinary medicine specialties: 1) ophthalmology, 2) dermatology, 3) oncology, 4) alternative and complementary medicine, 5) physical therapy, 6) cardiology, 7) theriogenology, and 8) hospice care.

VETT 125  
HUMANITY OF VETERINARY MEDICINE  
2 CR  
Upon completion of this module, the veterinary technician student will be able to effectively contribute to the professional and efficient operation of the veterinary facility in order to provide maximum benefits to clients, patients, and the facility. also, the veterinary technician student will be able to effectively and accurately acquire and convey information to the client and to veterinary colleagues.

VETT 126  
PHARMACOLOGY II  
3 CR  
Upon completion of this module, the veterinary technician student will be knowledgeable of 1) gastrointestinal drugs, 2) hormones, 3) anticonvulsants, 4) therapies for the following: hypertension, airway disease, allergic disease, heart disease, and behavior disorders.

VETT 130  
VETERINARY CLINICAL WORK EXPERIENCE  
10 CR  
A cooperative effort between practicing veterinary facilities and Bellingham Technical College to provide hands-on training. student will observe, assist, and perform tasks at selected facilities as directed by veterinary staff, using all knowledge gained during the program.

---

WELDING

WLD 101  
WELDING SAFETY I  
2 CR  
Introduction to the general welding industry, shop safety and orientation to the metal shop environment. Also electrical and compressed gas cylinder safety, and safe applications with grinders, band saws, and ironworkers.

WLD 102  
WELDING SAFETY II  
2 CR  
In depth welding & fabricating industry safety topics, including: general fabrication shop hazards; outside construction hazards; confined spaces, fire watch, fall protection hazard training and respirator/fresh air breathing apparatus training.

WLD 103  
HAND AND POWER TOOLS  
4 CR  
This course introduces students to the safe and proper use of hand and power tools used in the aluminum welding and fabrication trade. The uses, set-up, trouble shooting, maintenance, and proper care will be covered.

WLD 104  
CAREER OPPORTUNITIES FOR WELDERS  
2 CR  
Survey course introduces students to careers in the welding & fabricating industry. Lecture topics will include code and non-code welding, fabricating, structural steel welding, aluminum welding, pipe welding & fitting, artistic, creative, and architectural welding, and local opportunities in the shop, refinery, and marine based industries. Guest speakers and tours of local industry will enhance the course to give students a broad-based view of the industry.

WLD 105  
THERMAL CUTTING PROCESSES  
3 CR  
This course will introduce the student to the basics of plasma arc cutting, and oxy-fuel cutting processes; Cutting Safety; Theory of Gases; and hands-on Lab practice cutting exercises. Compressed bottle handling and equipment safety and orientation will be stressed.

WLD 106  
PRINT READING I  
2 CR  
Course will cover basics of Welding Symbols and Print Reading for Welders. Classroom Discussion will include understanding & comprehending prints and drawings, and their application in the workplace. Lab includes reading and drawing exercises.

WLD 107  
WELDING LEADERSHIP I  
1 CR  
Team and organizational skills are highlighted in this creative activity. Students will practice these skills by participating in the planning, organizing, and execution of a multifaceted public performance event, the BTC Welding Rodeo, a two day welding skills competition. Students will combine their accumulated knowledge and skills in proper welding, cutting, and fabricating techniques, safety, Metallurgy, equipment set-up and troubleshooting, and material handling techniques. Students will also apply soft skills such as interpersonal relations in the workplace, event staging, advertising and promotion, creative thinking, team cooperation and leadership skills. Attendance during the 2-day event (usually Friday & Saturday) is required.

WLD 110  
SMAW I  
4 CR  
Students will learn applications of power sources, electrode identification, and basic steel Metallurgy, while practicing lab techniques in E6010 Shield Metal Arc Welding Process in the 1F, 2F, and 3F positions, and E7018 in the 2F and 3F positions in the Weld Booth.

WLD 120  
GMAW I  
4 CR  
Introduction to the gas Metal Arc Welding, welding process for mild steel. Power sources, techniques, Shielding Gases, Metallurgy, and electrode identification will be covered. The student will learn the application of this process through lab practice in the weld booth.

WLD 121  
GMAW ALUMINUM I  
4 CR  
This introduction to the gas metal arc welding process covers safety, power sources, metallurgy, gases, filler metals, and lab practice on aluminum.

WLD 130  
FCAW I  
4 CR  
Course covers the flux core arc welding, including dual shield and self-shielding processes. Lectures include process safety and applications, power sources, shielding gases, FCAW electrodes and metallurgy. Lab practice will be on mild steel in the weld booth.

WLD 140  
GTAW I  
4 CR  
This Introduction to Gas Tungsten Arc Welding process covers safety, power sources, metallurgy, gases, filler metals and welding lab practice on mild steel in the weld booth.
WLD 141
GTAW ALUMINUM I  4 CR
This introduction to gas tungsten arc Welding process covers safety, power sources, metallurgy, gases, filler metals, and lab practice on aluminum.

WLD 150
STEEL FABRICATING I  2 CR
Students will learn and apply basic layout and fabricating techniques, applying simple print reading concepts, and cutting and welding techniques, to produce simple fabricated small projects. GMAW, and FCAW welding processes may be used, as well as Plasma and Oxy/Fuel Thermal Cutting processes, and introduction to bevellers. The importance of accurate measuring; precision squares, angles, drilling and leveling; attention to detail, neatness, and the finished product will be demonstrated in an approved Small Fabrication Project. 
PREREQUISITES: WLD 101,102,103,105,106

WLD 151
ALUMINUM FABRICATION I  3 CR
Weld joint theory & prep, fabricating aluminum and shapes, application of print reading basics. Storage and handling techniques, metal preparation for fitting and welding, fixture and jiggling tools and contamination and distortion control will be demonstrated and practiced. The importance of accurate measuring; precision squares, angles, drilling and leveling; attention to detail, neatness, and the finished product will be demonstrated in an approved Small Fabrication Project.
PREREQUISITES: WLD 101,102,103,105,106

WLD 206
PRINT READING II  3 CR
Students will learn to use prints and drawings used in the welding trade. Students will study interpretation of basic drawings and prints, dimensions, terminology, notes, applied mathematics and sketching and drawing techniques. Students will create their own working drawing of existing object or a new project that is approved by instructor.
PREREQUISITES: WLD 106

WLD 207
WELDING LEADERSHIP II  1 CR
Team and organizational skills are highlighted in this creative activity. Students will practice these skills by participating in the planning, organization, and execution of a multifaceted public performance event such as the BTC Welding Rodeo, a two day welding skills competition. Students will combine their accumulated knowledge and skills in proper welding, cutting, and fabricating techniques, safety, Metallurgy, equipment set-up and troubleshooting, and material handling techniques. Students will also apply soft skills such as interpersonal relations in the workplace, event staging, advertising and promotion, creative thinking, team cooperation and leadership skills. Attendance during the 2-day event (usually Friday & Saturday) is required.

WLD 208
METALLURGY  3 CR
Lecture examines theory and application of metallurgical principles as they are applied to design, formation, selection, heat treating and distortion, heat effects on crystalline structure, and welding of non-ferrous and ferrous metals and their alloys, and includes a comprehensive study of welding filler metals and ANSI/AAS designations.

WLD 209
CODES AND STANDARDS  2 CR
Lecture will cover discussion of commonly used Destructive and Non-Destructive Weld Testing processes and techniques, Visual Weld Inspection parameters and techniques, and industry accepted codes and welding standards, publications, and standardizing organizations; including AWS/ASME, ANSI, and WABO.

WLD 210
SMAW II  4 CR
Shield metal arc welding on steel in all positions using fillet and groove plates and structural shapes in the welding booth.
PREREQUISITES: WLD 110

WLD 215
SMAW PIPE  4 CR
Shield Metal Arc Welding of 8” Schedule 80 open root steel pipe in the 6G position in preparation for the WABO Structural Pipe Welding Certification Test (WABO Testing is offered in-house). This pipe welding preparation mirrors the AWS/ASME VII, IX and ANSI B31.3 SMAW Pipe Welding Certification Standards for 6"XH pipe for pressure piping applications required by local refineries and affiliated industry.

WLD 216
SMAW PRACTICES II  2 CR
SMAW process in various positions with various electrodes for the beginner or advanced welder.
PREREQUISITES: WLD 216

WLD 217
ADVANCED SMAW PRACTICES  3 CR
Lab exploring avenues for overcoming the difficulties of advanced SMA welding, including mirror welding, confined space applications, and out of position welding.
PREREQUISITES: WLD 216

WLD 222
GMAW ALUMINUM II  4 CR
Continuation of GMAW with fillet and groove welds in all positions. Pulse processes, Power Sources, Shielding Gases and Applications will be discussed.
PREREQUISITES: WLD 121

WLD 223
GMAW PRACTICES  2 CR
GMAW process in various positions on various thicknesses of material for the beginner or advanced welder.
PREREQUISITES: WLD 223

WLD 224
ADVANCED GMAW PRACTICES  3 CR
GMAW welding practice on steel in all positions.
PREREQUISITES: WLD 223

WLD 230
FCAW II  4 CR
Flux Core Arc welds on steel in all positions using fillet and groove plates and structural shapes simulating real world working conditions. Flux Core Arc Welding principles and applications for self-shielding electrodes and metal-cored electrodes will also be examined and practiced in the welding booth, the Modular Training Facility, and in outside applications.

WLD 231
FCAW PRACTICES  2 CR
FCAW process in various positions on various materials for the beginner or advanced welder.

WLD 242
GTAW ALUMINUM II  4 CR
This course focuses on GTAW with fillet and groove welds in all positions on aluminum.
PREREQUISITES: WLD 141

WLD 243
GTAW PRACTICES  2 CR
GTAW process in various positions on various materials for the beginner or advanced welder.

WLD 244
SMAW ALLOY PIPE WELDING  3 CR
Metallurgy of Chrome-Moly and high carbon pipe will be discussed in relation to the need for pre-weld and post-weld heat treatments. Heat treating methods will be discussed and practiced in lab fit-up and GTAW and SMAW E502 and E505 welding of 5 & 9 Chrome-Moly pipe for refinery applications.

WLD 245
ADVANCED GTAW PRACTICES  3 CR
Lab focuses on proper joint preparation, fit-up and welding of alloy plate, including stainless steel GTAW welding, open root butt welds and various alloys and carbon steel.
PREREQUISITES: WLD 243

WLD 246
GTAW ALUMINUM PRACTICES  2 CR
GTAW Aluminum welding practice in all positions.

WLD 252
ALUMINUM FABRICATION II  5 CR
This course covers advanced fabricating techniques for the job site, including material handling practice and safety, crane & hoist operation & safety, confined spaces and fresh air training. In position welding utilizing GMAW and GTAW on fillet and groove welds in all positions, and cutting and Air Carbon Arc Gouging techniques in the Modular Training Facility. Fall protection & scaffold safety, and use of large shop equipment (brake, shear, power rolls).
PREREQUISITES: WLD 151
WLD 254
STEEL FABRICATING II  5 CR
This course covers advanced fabricating techniques for the jobsite, including material handling practice and safety, crane & hoist operation & safety, confined spaces and fresh air training, in position welding utilizing proper SMAW, GTAW, and FCAW technique in all positions, and cutting and Air Carbon Arc gouging techniques in the Modular Training Facility. Also includes fall protection & scaffold safety, and use of large shop equipment (brake, shear, power rolls).
PREREQUISITES: WLD 150

WLD 256
PIPE FITTING I  5 CR
Theory and practicum, including basic trade math, measuring tools and techniques, pipe welding layout and fit-up techniques for large-bore and small-bore steel pipe; pipe materials and fittings; pipe fitting safety, tools and techniques; and preparation of beveled pipe joints for welding. Course will include theory and application of prefabrication and field fit-up of pipe and piping systems, and welding to WABO structural, AWS and ASME Pressure Pipe welding standards.

WLD 257
PIPE FITTING II  5 CR
Theory and practicum based on Piping Industry Codes and Standards will include trade math and trigonometric functions in laying-out angles and offsets; pipefitting calculations; special pipefitting problems, including branch connections, headers, fabrication piping systems involving reducers, offsets and rolling offsets. Also included will be special fit-up considerations for alloy pipe, and pipe support systems; theory of fit-ups to pumps, filters, pressure vessels; bolts, flanges, gaskets, bolt-up and blanking techniques; and rigging for piping installations in the Fabrication Module simulating real world conditions will be applied. This course will be based extensively on The Pipe Fitter’s Blue Book by Graves.
PREREQUISITES: WLD 256

WLD 258
STEEL FAB PROJECTS  3 CR
Guided Fabrication projects in steel, including Safety and proper operation of overhead cranes and jib cranes.

WLD 259
ADVANCED STEEL FABRICATION PROJECTS  4 CR
Guided and self guided steel fabrication projects.
PREREQUISITES: WLD 258

WLD 261
ADVANCED STRUCTURAL STEEL WELDING  6 CR
Advanced welding techniques in simulated real-world conditions, in Lab Training Module, including out-of-position welding and mirror welding techniques in one or more process using SMAW, GMAW, FCAW, or GTAW processes.

WLD 262
GTAW PIPE WELDING  6 CR
GTAW open root welding on pipe (including carbon steel and alloy pipe welding techniques). Pipe fitting techniques for GTAW carbon and alloy pipe; back-gas purging techniques; heat treating for special alloys; GTAW remote amperage adjustment and scratch-arc techniques; welding in the booth and in the Fabrication Module.

WLD 270
ALUMINUM TESTING  6 CR
This course will introduce destructive and non-destructive testing of weld joints to aluminum welding standards and will prepare students for testing processes and techniques and will require a successful in house certification welding test GTAW and GMW to WABO, AAS or ABS Standards.

WLD 271
WABO/ASME TESTING I  6 CR
This course requires successful completion of at least one WABO Certification Test (SMAW, FCAW, GMW, GTAW) on 1” Plate, or 3/8” Plate; or WABO Certification Test on 8” Schedule 80 Pipe, or ASME Qualification Test on 2” x 5/8” wall pipe. Instructor permission required.

WLD 273
TESTING I  4 CR
Guided Lab practice in preparation for WABO/ASME/ABS/in-house testing. Welder qualification and certification testing. Processes may include FCAW, SMAW, or GMW in all positions, including fit-up, and NDE principles.
PREREQUISITES: WLD 270, 271, 272, or equivalent; Instructor Permission

WLD 275
CAPSTONE  6 CR
A culminating project consisting of a portfolio, resume and job search element, and a culminating fabrication project of the student’s choice under the direction of staff.

WLD 279
WELDING UPGRADE - DAYTIME  2 CR
A course for welder to upgrade skills in all weld materials and positions.

WLD 298
CREATIVE WELDING  2 CR
Safety, specialized welding and cutting processes, fabrication and finishing techniques, aesthetics, connotations of materials, sculpture as metaphor and collage of materials. Materials supplied by student.
PREREQUISITES: Instructor permission

WLD 299
WELDING INTERNSHIP  5 CR
Industry on-the-job experience per individualized opportunities under guided practice.
PREREQUISITES: Instructor permission

STUDENT CODE OF CONDUCT

Students are encouraged to become familiar with this document. Copies may be requested from the office of the Vice President of Student Services, College Services Building.

CHAPTER 495B-120

NEW SECTION

WAC 495B-120-010 Definitions - The definitions set forth in this section apply throughout this chapter.

1. “Board” means the board of trustees of Bellingham Technical College.
3. “Liquor” means the definition of liquor as contained within RCW 66.04.010.
4. “Drugs” means a narcotic drug as defined in RCW 69.50.101, a controlled substance as defined in RCW 69.50.201 through 69.50.212, or a legend drug as defined in RCW 69.41.010.
5. “College facilities” means the real property controlled or operated by the college and includes all buildings and appurtenances affixed thereon or attached thereto.
6. “President” means the chief executive officer of the college appointed by the board of trustees.
7. “Disciplinary officials” means the hearing committee as denominated in WAC 495B-120-170, the dean of student services, the vice-president for instruction, and the president.
8. “Student” means a person who is enrolled at the college.
9. “Disciplinary action” means the warning, probation, expulsion, suspension, or reprimand of a student under WAC 495B-120-120 for the violation of a rule adopted in this chapter.

NEW SECTION

WAC 495B-120-020 Statement of Purpose

1. Bellingham Technical College is maintained by the state of Washington for the provision of programs of instruction in higher education and related community services. Like any other institution having its own special purposes, the college must maintain conditions conducive to the effective performance of its functions. Consequently, it has special expectations regarding the conduct of the various participants in the college community.
2. Admission to the college carries with it the prescription that the student will obey appropriate laws, will comply with the rules of the college and college community. This includes an expectation that the student will conduct himself or herself as a responsible member of the college community. The definitions set forth in this section apply throughout this chapter.
3. Sanctions for violations of college rules or conduct that interferes with the operation of college affairs will be dealt with by the college, and the college may impose sanctions independently of any action taken by civil or criminal authorities. In the case of minors, misconduct may be referred to parents or legal guardians.

NEW SECTION

WAC 495B-120-030 Jurisdiction - All rules in this chapter concerning student conduct and discipline apply to every student enrolled at the college whenever the student is engaged in or present at a college-related activity whether occurring on or off college facilities.

NEW SECTION

WAC 495B-120-035 Hazing

1. Bellingham Technical College prohibits college-sponsored organizations, associations or living groups and their members from engaging individually or collectively in hazing activities.
2. Hazing is defined as any method of initiation into a student organization, association or living groups, or any pastime or amusement engaged in with respect to such an organization or living group that causes, or is likely to cause, bodily danger or physical harm, or serious mental or emotional harm, to any student or other person attending any institution of higher education or postsecondary institution. “Hazing” does not include customary athletic events or other similar contests or competitions.
3. Penalties.
   a. Any organization, association or student living group that knowingly permits hazing shall:
      1) Be liable for harm caused to persons or property resulting from hazing; and
      2) Be denied recognition by Bellingham Technical College as an official organization, association or student living group on the Bellingham Technical College campus. If the organization, association or student living group is a corporation, whether for profit or nonprofit, the individual directors of the corporation may be held individually liable for damages.
   b. The student conduct code, WAC 495-120-040 through 495-120-150, may be applicable to hazing violations.
   c. Members of student organizations, associations or living groups who participate in or conspire to participate in hazing activities will be subject to appropriate college disciplinary actions in accordance with the student conduct code.
   d. Other disciplinary actions for individuals of student organizations, associations or living groups participating in hazing activities may include forfeiture of any entitlement to state-funded grants, scholarships or awards for a period of time determined by the college.
   e. Hazing violations are also misdemeanors punishable under state criminal law according to RCW 9A.20.021.
      1) Impermissible conduct associated with initiation into a student organization, association or living group or any pastime or amusement engaged in, with respect to the organization, association or living group, will not be tolerated.
      2) Impermissible conduct which does not amount to hazing may include conduct which causes embarrassment, sleep deprivation or personal humiliation, or may include ridicule or unprotected speech amounting to verbal abuse.
      3) Impermissible conduct not amounting to hazing is subject to any sanctions available under the student conduct code, WAC 495-120-040 through 495-120-150, depending upon the seriousness of the violation.

NEW SECTION

WAC 495B-120-040 Student Misconduct – Disciplinary action may be taken for a violation of any provision of this student code, for a violation of other college rules which may from time to time be properly adopted, or for any of the following types of misconduct:
1. Smoking is prohibited in all buildings and other areas so posted by college officials;
2. The possession, use, sale, or distribution of any alcoholic beverage or illegal drug on the college campus is prohibited. The use of illegal drugs by any student attending a college-sponsored event is also prohibited, even though the event does not take place at the college. The use of alcohol by any student attending such events on noncollege property shall conform to state law;
3. Engaging in lewd, indecent, or obscene behavior;
4. Where the student presents an imminent danger to college property or the operation of college affairs will be dealt with by the college, and the college may impose sanctions independently of any action taken by civil or criminal authorities. In the case of minors, misconduct may be referred to parents or legal guardians.
5. Academic dishonesty, including cheating, plagiarism, or knowingly furnishing false information to the college;
6. Willful failure or demonstrated inability to comply with school standards regarding academic progress and attendance as set forth in the application for enrollment;
7. The intentional making of false statements or filing of false charges against the college and members of the college community;
8. Forgery, alteration, or misuse of college documents, records, funds, or instruments of identification with the intent to defraud;
9. Theft from or damage to college premises or property, or theft of or damage to property of a member of the college community or college premises;

10. Failure to comply with the direction of college officials acting in the legitimate performance of their duties;

11. Weapons, explosives, and dangerous chemicals. Illegal or unauthorized use or possession of any device or substance which can be used to inflict bodily harm or to damage real or personal property;

12. Sexual harassment. Engaging in unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature where such behavior offends the recipient, causes discomfort or humiliation, or interferes with job or school performance.

NEW SECTION

WAC 495B-120-045 Loss of Eligibility — College-Sponsored Activities - Any student found to have violated chapter 69.41 RCW, legend drugs, by virtue of a criminal conviction or by final decision of the college president shall, in lieu of or in addition to any other disciplinary action which may be imposed, be disqualified from participation in any college-sponsored events or activities.

NEW SECTION

WAC 495B-120-050 Civil Disturbances - In accordance with provisions contained in RCW 28B.10.571 and 28B.10.572:

1. It shall be unlawful for any person, singly or in concert with others, to interfere by force or violence with any administrator, faculty member or student of the college who is in the peaceful discharge or conduct of his duties or studies.

2. It shall be unlawful for any person, singly or in concert with others, to intimidate by threat of force or violence any administrator, faculty member or student of the college who is in the peaceful discharge of his duties or studies.

3. The crimes described in RCW 28B.10.571 and 28B.10.572 shall not apply to any administrator or faculty member who is engaged in the reasonable exercise of their disciplinary authority.

4. Any person or persons who violate the provisions of subparagraphs (1) and (2) above will be subject to disciplinary action and referred to the authorities for prosecution.

NEW SECTION

WAC 495B-120-060 Free Movement On Campus -

The president is authorized in the instance of any event that he or she deems impedes the movement of persons or vehicles or which he or she deems to disrupt the ingress or egress of persons from the college facilities, to prohibit the entry of, or withdraw the license of, or privileges of a person or persons or any group of persons to enter onto or remain upon any portion of the college facility. The president may act through the dean of student services or any other person he may designate.

NEW SECTION WAC 495B-120-070 Right To Demand Identification - For the purpose of determining whether probable cause exists for the application of any section of this code to any behavior by any person on a college facility, any college personnel or other authorized personnel may demand that any person on college facilities produce evidence of student enrollment at the college.

NEW SECTION

WAC 495B-120-080 Academic Dishonesty/Classroom Conduct

1. Academic dishonesty: Honest assessment of student performance is of crucial importance to all members of the academic community. Acts of dishonesty are serious breaches of honor and shall be dealt with in the following manner:

a. It is the responsibility of the college administration and teaching faculty to provide reasonable and prudent security measures designed to minimize opportunities for acts of academic dishonesty which occur at the college.

b. Any student who, for the purpose of fulfilling any assignment or task required by a faculty member as part of the student’s program of instruction, shall knowingly tender any work product that the student fraudulently represents to the faculty member as the student’s work product, shall be deemed to have committed an act of academic dishonesty. Acts of academic dishonesty shall be cause for disciplinary action.

c. Any student who aids or abets the accomplishment of an act of academic dishonesty, as described in subparagraph (b) above, shall be subject to disciplinary action.

d. This section shall not be construed as preventing an instructor from taking immediate disciplinary action when the instructor is required to act upon such breach of academic dishonesty in order to preserve order and prevent disruptive conduct in the classroom. This section shall also not be construed as preventing an instructor from adjusting the student’s grade on a particular project, paper, test, or class grade for academic dishonesty.

2. Classroom conduct: Instructors have the authority to take whatever summary actions may be necessary to maintain order and proper conduct in the classroom and to maintain the effective cooperation of the class in fulfilling the objectives of the course.

a. Any student who, by any act of misconduct, substantially disrupts any college class by engaging in conduct that renders it difficult or impossible to maintain the decorum of the faculty member’s class shall be subject to disciplinary action.

b. The instructor of each course offered by the college is authorized to take such steps as may be necessary to preserve order and to maintain the effective cooperation of the class in fulfilling the objectives of the course; provided that a student shall have the right to appeal such disciplinary action to the dean of student services.

NEW SECTION

WAC 495B-120-090 Campus Speakers

1. Student organizations officially recognized by the college may invite speakers to the campus to address their own membership and other interested students and faculty if suitable space is available and there is no interference with the regularly scheduled program of the college. Although properly allowed by the college, the appearance of such speakers on the campus implies neither approval nor disapproval of them or their viewpoints. In case of speakers who are candidates for public office, equal opportunities shall be available to opposing candidates if desired by them. Speakers are subject to the normal considerations for law and order and to the specific limitations imposed by the state constitution which prohibits religious worship, exercise or instruction on state property.

2. In order to insure an atmosphere of open exchange and to insure that the educational objectives of the college are not obscured, the president, in a case attended by strong emotional feeling, may prescribe conditions for the conduct of the meeting, such as requiring a designated member of the faculty as chairman, or requiring permission for comments and questions from the floor. Likewise, the president may encourage the appearance of one or more additional speakers at any meeting or at a subsequent meeting so that other points of view may be expressed. The president may designate representatives to recommend conditions such as time, manner, and place for the conduct of particular meetings.

NEW SECTION

WAC 495B-120-100 Distribution Of Information

1. Handbills, leaflets, newspapers and similar materials may be distributed free of charge by any student or students, or by members of recognized student organizations at locations specifically designated by the vice-president of instruction; provided such distribution does not interfere with the ingress or egress of persons or interfere with the instructional process or the free flow of vehicular or pedestrian traffic. 2. Such handbills, leaflets, newspapers and related matter must bear identification as to the publishing agency and distributing organization or individual.

3. All nonstudents shall register with the vice-president of instruction prior to the distribution of any handbill, leaflet, newspaper or related matter. Such distribution must not interfere with the instructional process or the free flow of vehicular or pedestrian traffic. 4. Any person or persons who violate provisions of subparagraphs (1) and (2) above will be subject to disciplinary action.
NEW SECTION
WAC 495B-120-110 Commercial Activities
1. College facilities will not be used for a commercial solicitation, advertising or promotional activities except when such activities clearly serve educational objectives, including but not limited to display of books of interest to the academic community or the display or demonstration of technical or research equipment, and when such commercial activities relate to educational objectives and are conducted under the sponsorship or at the request of the college, or the student association if such solicitation does not interfere with or operate to the detriment of the conduct of college affairs or the free flow of vehicular or pedestrian traffic.
2. For the purpose of this regulation, the term "commercial activities" does not include handbills, leaflets, newspapers and similarly related materials as regulated in WAC 495B-120-100.

NEW SECTION
WAC 495B-120-120 Disciplinary Process
1. Any infractions of college rules may be referred by any college faculty or staff member to the dean of student services or in his or her absence the vice-president for instruction for instruction. That official shall then follow the appropriate procedures for any disciplinary action which he or she deems necessary relative to the alleged misconduct. In addition, a student may appeal disciplinary action taken by an instructor or faculty member pursuant to the provisions in WAC 495B-120-180.
2. The disciplinary official may take whatever action deemed appropriate within the framework of these rules. If the student concludes that any sanctions imposed are inappropriate, the student may appeal to the student disciplinary committee.
3. If a referral or an appeal is made to the student disciplinary committee, the committee shall hold a hearing, reach conclusions and may impose sanctions. If the student concludes that the action of the disciplinary committee is inappropriate, the student may appeal the matter to the president of the college.
4. The president of the college, after reviewing the case, may reverse, sustain or modify any sanctions which may have been imposed by the student disciplinary committee. The decision of the president is final.

NEW SECTION
WAC 495B-120-130 Disciplinary Terms - The definitions set forth in this section apply throughout WAC 495B-120-135 through 495B-120-200.
1. Disciplinary warning means oral notice of violation of college rules.
2. Reprimand means formal action after censuring a student for violation of college rules or for failure to satisfy the college’s expectations regarding conduct. Reprimands are made in writing to the student by the disciplinary official. A reprimand indicates to the student that continuation or repetition of the specific conduct involved or other misconduct will result in one or more serious disciplinary actions described below.
3. Disciplinary probation means formal action placing conditions upon the student’s continued attendance because of violation of college rules or for failure to satisfy the college’s expectations regarding conduct. The disciplinary probation official placing the student on probation will specify, in writing, the period of probation and the conditions. Disciplinary probation warns the student that any further misconduct will result in dismissal from college. The disciplinary probation period will extend to graduation or other termination of the student’s enrollment in the college.
4. Summary suspension means temporary dismissal from the college and temporary termination of a student’s status for a period of time not to exceed ten days which occurs prior to invocation of the formal hearing procedures specified in these rules due to a necessity to take immediate disciplinary action, where a student presents an imminent threat to the college property, or to himself or herself or other students or persons in college facilities on or off campus, or to the educational process of the college.
5. Suspension means temporary dismissal from the college and temporary termination of student status for violation of college rules or for failure to meet college standards of conduct.
6. Expulsion means dismissal from the college and termination of student status for violation of college rules or for failure to meet the college standards of conduct for an indefinite period of time or permanently.

NEW SECTION
WAC 495B-120-135 Refunds and Access
1. Refund of fees for the quarter in which disciplinary action is taken shall be in accordance with the college’s refund policy.
2. A student suspended on the basis of conduct which disrupted the orderly operation of the campus or any facility of the district may be denied access to all or any part of the campus or other district facility.

NEW SECTION
WAC 495B-120-140 Readmission After Suspension or Expulsion
- Any student suspended from the college for disciplinary reasons will normally be readmitted upon expiration of the time period for which the suspension was issued. If the student has been expelled or feels that circumstances warrant reconsideration of a temporary suspension prior to its expiration, or if the student was suspended with conditions imposed for readmission, the student may be readmitted following approval of a written petition submitted to the dean of student services. Such petition must state reasons which support a reconsideration of the matter. Before readmission may be granted, such petition must be reviewed and approved by the college president or designee.

NEW SECTION
WAC 495B-120-150 Re-establishment of Academic Standing
- Students who have been suspended pursuant to disciplinary procedures set forth in WAC 495B-120-120 and 495B-120-130 and whose suspension upon appeal is found to have been unwarranted shall be provided the opportunity to re-establish their academic and student standing to the extent possible within the abilities of the college, including an opportunity to retake examinations or otherwise complete course offerings missed by reason of such action.

NEW SECTION WAC 495B-120-160 Disciplinary Authority of the Dean of Student Services and Vice-President for Instruction
1. The dean of student services or, in his or her absence, the vice-president for instruction of the college, is responsible for initiating disciplinary proceedings for infractions of rules. The dean of student services or, in his or her absence, the vice-president for instruction, may delegate this responsibility to members of their staff and they may also establish committees or other hearing bodies to advise or act for them in disciplinary matters.
2. In order that any informality in disciplinary proceedings not mislead a student as to the seriousness of the matter under consideration, the student involved shall be informed at the initial conference or hearing of the several sanctions that may be involved for the misconduct.
3. After considering the evidence in a case and interviewing the student or students involved, the dean of student services or, in his or her absence, the vice-president for instruction, may take any of the following actions:
   a. Terminate the proceeding, exonerating the student or students;
   b. Dismiss the case after whatever counseling and advice may be appropriate;
   c. Impose disciplinary sanctions directly, subject to the student’s right of appeal as described in this chapter. The student shall be notified in writing of the action taken except that disciplinary warnings may be given verbally;
   d. Refer the matter to the student disciplinary committee for appropriate action. The student shall be notified in writing that the matter has been referred to the committee.
4. This section shall not be construed as preventing the appropriate official, as set forth in subsection (1) of this section, from summarily suspending a student. In the event of summary suspension, the student will be given oral or written notice of the charges, an explanation of the evidence, and an informal opportunity to present his or her side of the matter. The student will also be given an opportunity to invoke the
formal hearing process set forth in this chapter.

NEW SECTION

WAC 495B-120-170 Student Disciplinary Committee

1. The student disciplinary committee, convened for that purpose, will hear, de novo, and make recommendations on all disciplinary cases referred to it by the appropriate authority or appealed to it by students. The committee will be composed of the following persons:
   a. An administrator appointed by the president of the college or a designee;
   b. Two members of the faculty, appointed by the college president or a designee;
   c. Two representatives from the student council, appointed by the college president or a designee;
   d. A counselor appointed by the college president or a designee.

2. None of the above-named persons shall sit on any case in which he or she is a complainant or witness, in which he or she has a direct or personal interest, or in which he or she has acted previously in an advisory or official capacity. Decisions in this regard, including the selection of alternates, shall be made by the college president or a designee. The disciplinary committee chairperson will be elected by the members of the disciplinary committee.

3. The committee may decide that the student involved:
   a. Be given a disciplinary warning;
   b. Be given a reprimand;
   c. Be placed on disciplinary probation;
   d. Be given a suspension;
   e. Be expelled;
   f. Be exonerated with all proceedings terminated and with no sanctions imposed;
   g. Be disqualified from participation in any school-sponsored activities.

NEW SECTION

WAC 495B-120-180 Procedural Guidelines

1. The student, if he or she wishes to appeal, has a right to a fair and impartial hearing before the committee on any charge of misconduct. The failure of a student to cooperate with the hearing procedures, however, shall not preclude the committee from making its findings of fact, reaching conclusions and imposing sanctions. Failure of the student to cooperate may be taken into consideration by the committee in recommending penalties.

2. The student shall be given notice of the date, time and place of the hearing, the charges, a list of witnesses who will appear, and a description of any documentary or other physical evidence that will be presented at the hearing. This notice shall be given to the student in writing and shall be provided in sufficient time to permit him to prepare a defense. The notice may be amended at any time prior to the hearing, but if such amendment is prejudicial to the student's case, the hearing shall be rescheduled to a later date if so requested in writing by the student.

3. The student or his or her representative shall be entitled to hear and examine the evidence against him or her and be informed of the identity of its sources; and shall be entitled to present evidence in his or her own behalf and question witnesses as to factual matters. The rules of evidence need not be applied at this hearing. The student shall have all authority which is possessed by the college to obtain information or to request the presence of witnesses or the production of other evidence relevant to the issues at the hearing.

4. Only those matters presented at the hearing, in the presence of the student involved, will be considered in determining whether the student is guilty of the misconduct charged but the student's past record of conduct may be taken into account in formulating the committee's recommendation for disciplinary action.

5. The student may be represented by counsel and/or accompanied by an advisor of his choice.

6. Hearings conducted by the committee may be held in closed session at the discretion of the committee, the only exception being when the student involved invites particular persons or requests an open hearing. If at any time during the conduct of the hearing invited persons are disruptive of the proceedings, the chairperson of the committee may exclude such persons from the hearing room.

7. A majority of the committee shall set the time, place and available seating capacity for a hearing.

8. All proceedings of the committee will be conducted with reasonable dispatch and terminated as soon as fairness to all parties involved permits.

9. An adequate summary of the proceedings will be kept. As a minimum, such summary would include a tape recording of testimony. Such record will be available for inspection and copying in the office of student services during regular business hours.

10. The student will be provided with a copy of the findings of fact and the conclusions of the committee. The student will also be advised of his or her right to present, within ten calendar days, a written statement of appeal to the president of the college before action is taken on the decision of the committee. In the case of an unmarried student under eighteen years of age, written notice of any action involving dismissal or disciplinary probation is sent to the parents or guardian of the student.

11. The committee chairman shall establish general rules of procedures for conducting hearings consistent with these procedural guidelines.

NEW SECTION

WAC 495B-120-190 Appeals - Any disciplinary action may be appealed as described below. Notice of an appeal by a student shall be made in writing and addressed to the dean of student services within ten calendar days of the college's giving of the notice of the disciplinary action. Notice to the student of the disciplinary action shall be deemed complete when the final, written decision is either personally served, or is posted by either certified or registered mail to the address of record as maintained in the enrollment office.

1. Disciplinary action by a faculty member or other college staff member may be appealed to and, if appealed, shall be reviewed by, the dean of student services, or in his or her absence, the vice-president for instruction.

2. Disciplinary action by the appropriate disciplinary official may be appealed to and, if appealed, shall be reviewed by the student disciplinary committee.

3. Disciplinary action by the student disciplinary committee may be appealed to and, if appealed, shall be reviewed by the college president or a designee.

4. Disciplinary action by the president or designee shall either indicate approval of the conclusions by sustaining the decision or shall give directions as to what other disciplinary action shall be taken by modifying the decision, or shall nullify previous sanctions imposed by reversing its decision. The decision of the president or his or her designee shall be final.

NEW SECTION WAC 495B-120-200 Reporting, Recording and Maintaining Records - Records of all disciplinary cases shall be kept by the disciplinary official taking or initiating the action. Except in proceedings where the student is exonerated, all documentary or other physical evidence produced or considered in disciplinary proceedings and all recorded testimony shall be preserved, insofar as is reasonably possible, for five years. No other records of proceedings wherein the student is exonerated, other than the fact of exoneration, shall be maintained in the student's file or other college repository after the date of the student's graduation or not more than five years.

DEGREE & CERTIFICATE PROGRAMS COLLEGE STANDARDS

The primary objective of Bellingham Technical College is to prepare an educated workforce. In training students, Bellingham Technical College stresses equally the development of technical skill, communication and interpersonal skills, positive work habits, and attitudes that are required for employment. In light of this, Bellingham Technical College expects the following:

**Progress**
Each student will demonstrate satisfactory progress toward meeting program objectives as documented by the program instructor on the student’s grading record. Satisfactory progress is denied as maintaining a minimum 2.0 cumulative grade point average and completion of a minimum of 67% of the enrolled course work each quarter. Individual degree/certificate programs may require higher level grades in program or individual course requirements in defining satisfactory progress. These requirements will be published and made available to students upon enrollment. Degree/Certificate program students must attain a minimum cumulative grade point average of 2.0 for the total program in order to be eligible for a program completion degree/certificate.

**Attendance**
A minimum of 90% monthly attendance is required to maintain satisfactory progress.

**Student Code of Conduct**
All students are subjected to the Bellingham Technical College Student Code of Conduct published in Chapter 495B-120 of the Washington Administrative Code of Conduct and as defined in the Student Handbook. Disciplinary action may be taken for a violation of any provision of the student code, for violation of other college rules, or for other types of misconduct defined in the BNWC Student Code of Conduct. Enrollment in the college carries with it the requirement that the student will conduct himself or herself as a responsible member of the community. This includes an expectation that the student will obey appropriate laws, will comply with the rules of the college and its departments, and will maintain a high standard of integrity and honesty. Sanctions for violations of college rules or conduct that interferes with the operation of college affairs will be dealt with by the college, and the college may impose sanctions independently of any action taken by civil or criminal authorities. In the case of minors, misconduct may be referred to parent or legal guardians.

**Program & Credit Course Refund Schedule**
Refund Schedule (applicable to programs requiring an admissions application)

- **100%** refund if official withdrawal is submitted through the 5th instructional day.
- **40%** refund of official withdrawal is submitted between the 6th Instructional Day and 20th Calendar Day.
- There are no refunds on or after the 21st Calendar day.
- Program refunds are based on Program quarterly start dates, not individual course start dates

*An Official Withdrawal is defined as when a student has submitted a completed Add/Drop form to the Registration Office before the withdrawal deadline. The refund will be calculated based on the date the form is submitted rather than the last day of attendance.

*Students who stop attending a course or program without notice and do not officially withdraw will forfeit all claims to a refund of tuition and fees and will receive a failing grade of F.

*The college may extend the refund period or students with medical reasons or for those called into military service of the United States. Written documentation must be provided for consideration for an exception.

*All requests for exception to the Refund Policy must be submitted to the Director of Registration and Enrollment for determination.

*Refunds for payment made by cash or check will be processed through the Business Office and mailed within 3 weeks. Refunds for credit cards will be processed in 2 business days.

**PROGRAMS & COSTS ARE SUBJECT TO CHANGE WITHOUT NOTICE.**

Bellingham Technical College provides equal opportunity in education and employment and does not discriminate on the basis of race, ethnicity, creed, color, sex, national origin, age, marital status, religious preference, the presence of any sensory, mental, or physical disability, reliance on public assistance, sexual orientation, status as a disabled person or Vietnam-era veteran, or political opinions or affiliations. The College complies with all Washington State anti-discrimination laws (RCW 49.60) and the following federal laws relating to equal opportunity: Title VI and VII of the Civil Rights Act of 1964, Title IX of the Educational Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA). Questions regarding Title IX, Section 504, equal opportunity, affirmative action, or the ADA can be directed to Bellingham Technical College’s Human Resources Office, Building A, Room A2, or call (360) 752-8354 or 752-8515/TTY.
