MESSAGE FROM THE PRESIDENT

Welcome to Bellingham Technical College!

If you’re looking for high quality, high-tech, hands-on learning that will give you the tools you need to succeed in the job market, you’ve come to the right place. Bellingham Technical College is changing lives by graduating students with living-wage jobs and giving them a competitive edge for employment. I am continually moved by the perseverance and determination of our students as they pursue an education that will improve their lives, support their families and contribute to their communities.

Take the first step toward your new career by talking with one of our Admissions specialists and taking a tour of our campus.

I encourage you to apply to BTC and join the ranks of BTC’s graduates. We have 39 associate degrees, 55 certificates and two bachelor of applied science degrees, with programs that cover engineering, manufacturing, healthcare, office skills and more. Find the program that best aligns with your aspirations, and get started. We’ll be with you every step of the way.

Sincerely,

Kimberly Perry, Ed.D
President

ABOUT OUR COLLEGE

BTC History
Bellingham Technical College began in 1957, serving Whatcom County adults as Bellingham Vocational Technical Institute, and was operated by Bellingham School District. In 1991, through state legislative action, the institution was designated a member of the Washington State Community and Technical College system as Bellingham Technical College (BTC). The college is located in a district of 2,210 square miles with a population of over 212,284. The majority of students are local, with a growing number moving to the area to enroll at BTC.

About Our Students
In the 2017-18 academic year, the college served over 5,300 students. In fall of 2017, the student body was 55% female and 45% male, with at least 29% students of color and 34% first-generation college students. The average student age was 31 years old. BTC served 2,200 full-time equivalent students. Of students leaving with at least 45 credits, 81% are employed within nine months of their last BTC course enrollment.

(Data sources: BTC Operational Data Store, SBCTC After College Outcomes Dashboard)

Accreditation Status
Bellingham Technical College is accredited by the Northwest Commission on Colleges and Universities (NWCCU), an institutional accrediting body recognized by the Council for Higher Education Accreditation and the United States Department of Education. BTC’s accreditation was reaffirmed in February 2016.

Accreditation by NWCCU indicates that BTC meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future.

Accreditation by NWCCU applies to the institution as a whole. It provides reasonable assurance about the quality of opportunities available to students who attend the institution. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates.

Inquiries regarding BTC’s accredited status should be directed to BTC’s administrative staff or by contacting the Northwest Commission on Colleges and Universities, 8060 165th Avenue NE, Suite 100, Redmond, WA, 98052, 425.558.4224, www.nwccu.org.

In addition to institutional accreditation, many of BTC’s programs (e.g., Culinary Arts, Dental Assisting, Dental Hygiene, Nursing, Surgery Technology, Veterinary Technician) have national certification or accreditation. These are highlighted in the program descriptions.

Advisory Committees
The degree and certificate programs at Bellingham Technical College rely on the involvement and support of approximately 375 business and industry employers and employees from the community. Advice and direction offered by experts in the working world ensure that students are acquiring knowledge and skills that are in demand in the workforce.

An advisory committee representing each specific professional technical field meets regularly with faculty of the same instructional area on matters of curriculum review and development, facilities and equipment, guidance and career advisement, employment opportunities and placement, plus public relations and promotional activities.

Drug-Free Workplace
Bellingham Technical College is committed to providing a drug-free, healthy, safe, and secure workplace and environment, and has implemented a drug and alcohol abuse, prevention, and assistance program. The College will annually notify employees and students that the unlawful possession, use, or distribution of illicit drugs and alcohol on College property, or as any part of College activity, is prohibited. (WAC 4958-121-040 (12-14))

Bellingham Technical College intends to promote a drug-free, healthy, safe, and secure work environment. The unlawful manufacture, distribution, dispensation, possession, or use of alcohol or any controlled substance is prohibited in or on property owned or controlled by Bellingham Technical College. The use of alcohol or any unlawful controlled substance while in or on property owned or controlled by Bellingham Technical College is prohibited. While state law permits the recreational use of marijuana, federal law prohibits such use on college premises or in connection with college activities. Prescription drug usage must be accomplished in a lawful and safe manner pursuant to a valid medical prescription. No employee will report to work while under the influence of alcohol or any unlawful controlled substance. A controlled substance is defined by RCW 69.50.201 through RCW 69.50.214 or pursuant to Title 21 USC Section 821 (Schedules I-IV), as now enacted or subsequently amended.

BTC recognizes drug dependency to be an illness and major health problem. The institution also classifies drug usage and abuse as a potential safety and security problem. Employees needing assistance in dealing with such problems are strongly encouraged to utilize the Employee Assistance Program, provided by health insurance plans, when appropriate.

Equal Opportunity Statement
Bellingham Technical College provides equal opportunity and access in education and employment and does not exclude, deny benefits to, or otherwise discriminate against any person on the basis of race, ethnicity, creed, color, sex (including pregnancy and parenting status), gender identity or expression, citizenship status, national origin, age, marital status, religious preference, the presence of any sensory, mental, or physical disability, reliance on public assistance, sexual orientation, veteran status, or genetic information under any of its programs, activities and services. The College complies with all Washington State anti-discrimination laws (RCW 49.60) and the following federal laws relating to equal opportunity: Title VI and VII of the Civil Rights Act of 1964, Title IX of the Educational Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act (ADA) of 1990.

The following person has been designated to handle inquiries regarding non-discrimination, equal opportunity, affirmative action or the ADA policies: Executive Director of Human Resources, 3028 Lindbergh Avenue, Bellingham, WA 98225, 360.752.8354. For Title IX/504 compliance, contact: Vice President of Student Services, 3028 Lindbergh Avenue, Bellingham, WA 98225, 360.752.8440.

BTC publications are available in alternate formats upon request by contacting the Accessibility Resources office at 360.752.8576.
2018-2023 STRATEGIC PLAN

VISION
Bellingham Technical College will be a recognized leader in providing innovative and effective technical education, maximizing student potential and supporting the regional economy through development of a competitive workforce.

MISSION
Bellingham Technical College provides student-centered, high-quality professional technical education for today’s needs and tomorrow’s opportunities.

THEMES
Teaching & Learning: Foster teaching and learning through quality instructional methods, effective student learning environments, job skills training, and professional development.

Student Career Preparation & Achievement: Facilitate student career preparation and achievement through career advising, workplace readiness and soft skills training, job placement and support, and strong employer relationships.

Innovation & Responsiveness: Promote innovation and responsiveness by keeping up with current workplace practices, trends, and latest technology; supporting adaptation to change; and developing external partnerships.

Campus Community & Culture: Strengthen campus community and culture through a collaborative workplace, connected infrastructure, transparent governance, respectful and open communication, and a welcoming and safe environment.

VALUES
As a learning community, Bellingham Technical College is committed to educational excellence and equity realized through a positive, values-based campus environment. To fulfill BTC’s mission and vision, the college will adhere to the following values:

STUDENT-CENTERED
Creating a supportive and inclusive community that results in a high level of student competence, professionalism, and success.

RESPONSIVE
Embracing positive, effective change that creates opportunity and meets current and emerging needs.

COLLABORATIVE
Creating and leveraging partnerships and resources to achieve shared values and goals for students, the college, and the community.

PRINCIPLED
Promoting a culture of respect and accountability, reflecting integrity in decision-making, and ensuring responsible stewardship of all resources.

BELLINGHAM TECHNICAL COLLEGE FOUNDATION
The Bellingham Technical College Foundation’s mission is to change lives by expanding access to quality education.

The Foundation Board of Directors and staff forward this mission by partnering with individuals, businesses, alumni, grant-making institutions, and other community organizations.

Established in 1987 as a nonprofit, tax-exempt organization, the Bellingham Technical College Foundation is governed by a volunteer board of directors. Early on, the foundation’s primary function was to serve as a conduit for scholarship awards and gifts of in-kind equipment. Since the first staff was hired in 1997, the BTC Foundation has played an increasingly important role in enhancing student success and helping Bellingham Technical College reach its goals.

The Foundation Board has set ambitious three-year fundraising goals (2017-20), including the commitment to raise:

- $900,000 to support scholarships for BTC students;
- $150,000 in direct support of BTC programs;
- $410,000 to support the foundation’s “Greatest Need” fund, which supports a variety of campus priorities, including: emergency grants and other assistance for students; faculty and staff professional development; support for BTC veterans; and the campus Food Pantry

There are many ways to support BTC through the foundation, including: making an annual or named scholarship donation, establishing an endowed scholarship through the foundation, donating gifts of stock or other assets, making a pledged gift over time, or donating equipment to support our college’s programs. If you or someone you know would like to support the BTC Foundation’s mission, you may do so online at www.btc.edu/foundation, or by calling us at 360.752.8684. We are happy to assist you in any way possible.

BTC transforms lives. The BTC Foundation is privileged to be able to work on behalf of the college and to champion student success. The foundation is located on the second floor of the Morse Center Building (rooms 201-202).

LIMITS OF CATALOG

Bellingham Technical College reserves the option to amend, modify, or revise
any provision of this catalog and its programs for any reason, including but not limited to:
• A lack of funds to operate a program or course
• Unavailability of faculty
• A change in administrative or Board of Trustees policy
• A change in laws, rules, or regulations of the State of Washington which
governs the operation of technical colleges.

Instructional sites are easily accessible to students using wheelchairs or crutches. Building M is not barrier-free. Disabled students who wish to take a class at a site which does not accommodate their disability should contact Accessibility Resources at 360.752.8345 or AR@btc.edu.
ADMISSION AND ENROLLMENT

College Services Building, Room 106
Email: admissions@btc.edu Phone: 360.752.8345

Prospective students must apply for admission to the college before they register for courses in a degree/certificate program. Students may register for full-time or part-time, based on personal preference, availability of space, and/or specific program offerings. Many core courses within a program will be offered at various times throughout the program, as scheduled by the instructor. General education course offerings vary; some may be offered in online and hybrid format. In some programs, specific courses required for a degree or certificate may only be offered in certain quarters. Students should consult their academic and career advisor or BTC faculty advisor to assist in determining the best schedule option to meet their needs.

Full-time program students typically enroll in 15-21 credits per quarter: 15 credits if taking primarily academic classes and a higher credit load if taking vocational classes. To qualify as full-time, students must enroll in at least 12 credits of program-related coursework. Part-time program students typically enroll in 6-11 credits; not all programs allow for a part-time schedule. The maximum amount of credits a student may enroll in per quarter is 26. Enrollment in more than 26 credits requires written approval from the program Dean.

Placement assessment is required for degree- and certificate-seeking students in most programs. Students may use multiple measures for placement assessment including transferred-in placement test scores or transcripts from a previous college, Smarter Balance scores, SAT and ACT scores, or transcripts from a high school (up to five years from graduation) for evaluation to waive part or all of the placement test.

Specific program information is defined in the Programs of Study section of this catalog.

ASSESSMENT CENTER

PLACEMENT TESTING

Building H, Room 4
Email: assessment@btc.edu Phone: 360.752.8335

Student success in individual degree/certificate programs and in subsequent employment is closely related to the ability to read and compute. Acceptance into specific degree/certificate programs and course placement is determined in part by students’ demonstration of reading, writing and mathematics competency at the level identified for program and course success. Students seeking enrollment in most programs must achieve required scores in writing, sentence skills and mathematics. BTC uses an assessment placement test to assess students’ academic skill levels. The assessment testing requirement may be waived upon evaluation of the multiple measures mentioned in the Admissions and Enrollment section. Official high school or college transcripts are required from a regionally accredited college or university in order to receive consideration for waiving parts or all of the placement test. All assessment test waiver requests should be made to the Admissions and Student Resource Center. The assessment test is available on a drop-in basis through the Assessment Center. Visit the Assessment Center website, www.btc.edu/Assessment, for schedule, location and resources for test preparation. The first initial assessment test fee includes one retest in each subject area within a 12-month period. Test scores are valid for five years. Students must present picture identification and payment receipt when they report for testing.

ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.

GED TESTING

Building H, Room 4
Email: assessment@btc.edu Phone: 360.752.8335

GED testing is offered through the BTC Assessment Center. Visit GED.com for information about the computerized GED test, registering and scheduling your GED test, transcript information and more. Contact the Assessment Center for additional information. Students must present a government-issued picture ID at the time of testing.

Testing candidates under the age of 19 need to complete a Request for Approval to Test, available at their last school of attendance with a signature from their former school administration. Students must access the GED website to request testing accommodations.

ADDITIONAL TESTING

The BTC Assessment Center also offers a variety of industry and program tests to include ASE, ATI TEAS, Certiport, MOS, NATE and Pearson VUE. To learn more, visit the website, www.btc.edu/Assessment.

ENROLLMENT SERVICES

PROGRAM ADMISSION PROCEDURE

New students may be admitted into degree/certificate programs at the beginning of each quarter. Some programs have established entry dates or multiple start dates throughout the year. Contact the Admissions and Student Resource Center at 360.752.8345 to schedule an appointment with an Academic Advisor for more information. Advisors can also assist in exploring career options.

1. Complete an online application for BTC programs through the Washington State Web Admissions Center at: www.btc.edu/apply. Applications for college admission are accepted at any time. Applicants who complete the admissions process are placed on an interest list and will receive pertinent program entry information while waiting for a program opening. Students are encouraged to apply for financial aid by completing the Free Application for Federal Student Aid (FAFSA) online. Learn more at www.btc.edu/FinancialAid.

2. Assess your starting point. Degree- and certificate-seeking students need to determine their math and English starting points. Placement may be determined by multiple measures. These measures include:
   a. The assessment test or equivalent placement test, to achieve required scores for the specific program or college coursework as defined below. If the assessment scores are below the level identified for the specific program, the student may retest as stated in the Assessment Center section. The assessment test is available on a drop-in basis through the Assessment Center. Visit the Assessment Center website, www.btc.edu/assessment for schedule, location and resources for test preparation. The assessment test fee includes one retest in each subject area within a 12-month period. Test scores are valid for five years. Students must present photo identification and payment receipt when they report for testing.
b. Washington State CTC Approved Placement Reciprocity Agreement Policy. BTC will accept course placement from local skills assessment as well as course placement from pre-college math and English courses taken at any Washington state community and technical colleges (CTC) within five years. If you have completed placement testing at another college or university within the last five years, you may submit the official scores to the Admissions and Student Resource Center for equivalency to the assessment test scores.

c. An official college transcript from a regionally accredited college or university, indicating the applicant has completed a minimum of three (3) credits for a course in English and/or mathematics with a C (2.0) grade or above, which at that college is deemed a prerequisite for a course equivalent to the BTC course in which the student wishes to place, may have the assessment test requirement waived upon evaluation of an official transcript.

d. High school transcripts with math and English grades, up to five years after graduation, may be evaluated for placement. If the grade does not meet the minimum requirement identified for a specific program, the student will need to take the assessment test.

e. Official Smarter Balance scores may be submitted for evaluation and placement. If the Smarter Balance scores fail to meet the minimum requirements, the student will need to take the assessment test.

f. Other tests (i.e., SAT, ACT, and COMPASS) may be considered to waive all or part of the assessment test.

g. Certain programs require higher placement in general education requirements in reading and mathematics.
   - Students interested in programs that require English Composition I (ENGL& 101), such as Associate Degree Nursing, must test into the course or complete preparatory coursework, such as Fundamentals of English (ENGL 092 ) and Reading Skills (RDG 085 ), or Oral and Written Communications (AENGL 100).
   - Students interested in programs that require Precalculus I (MATH& 141), such as Engineering, Instrumentation and Control Technology, or Electronics, must test into Precalculus I or complete Intermediate Algebra (MATH 099) at a minimum.

3. GET Started at BTC. Meet with Advising and Careers Services staff as they help you navigate your Goals, create an Education Plan, and give you the tools to be Tech ready. A hold will be placed until the student meets with an Academic Advisor.

4. Prepare to attend your classes. New students are encouraged to participate in New Student Orientation. The orientation is an opportunity for students to make connections, learn about resources, tour campus, and attend an optional Technology Camp.

Some programs have core program course requirements, which may include but are not limited to:
   - Criminal background check
   - Prerequisite course requirements
   - Evidence of high school completion or equivalent
   - Driving record (abstract) & driver’s license

Please view program description for additional details. Applicants seeking advanced placement admission should follow the procedures listed under Transferring & Earning Credits.

ADMISSION AND ENROLLMENT POLICY

In accordance with WAC 131-12-010, any applicant to Bellingham Technical College seeking admission or enrollment shall be accepted on a space-available basis when, as determined by the president or designee, such applicant:

1. Is competent to profit from the curricular offerings of the college. For degree/certificate programs, attainment of identified scores in reading comprehension, sentence skills and arithmetic or algebra on the assessment test or scores from multiple measures are required.

2. Would not, by his or her presence or conduct, create a disruptive atmosphere within the college inconsistent with the purposes of the institution.

3. Is 18 years or older or is a high school graduate or has a GED or has completed homeschooling as defined by state law or has applied for special student program admissions under the provisions of a student enrollment options program, such as Running Start or a successor program.

NOTE: To be eligible for federal or state Financial Aid, a student must be a high school graduate, have a GED, or have completed homeschooling as defined by state law.

LOCAL ENROLLMENT OPTION

Bellingham Technical College will admit a student to degree/certificate programs and courses who:

1. Is 16 years of age or older.

2. Meets the requirements of Section 1 and Section 2 above.

3. Is not currently enrolled in high school or, if currently enrolled in high school has written approval (if required) from the sending high school to enroll, and agrees to pay all regular tuition and fees.

(See Underage Admission or Enrollment Appeal listed below.)

ADMISSION AND ENROLLMENT POLICY

APPEAL PROCEDURE

Persons who have been denied admission or enrollment may appeal the decision. The appeal should be directed in writing to the Vice President of Student Services. Such written petitions must include, at minimum, the reasons that support reconsideration of the application or the policy. Any appeal to the Admission and Enrollment Policy must be reviewed and approved by the college President or designee. Persons may further appeal the decision of the Vice President of Student Services by requesting an Admission Appeal Hearing.

UNDERAGE ADMISSION OR ENROLLMENT APPEAL

The College does not desire to replace or duplicate the functions of the local public and private schools. Persons who do not meet the regular admission and enrollment standards and who are under sixteen (16) years of age may appeal for special admission to degree/certificate programs or continuing education courses. Requests for consideration of an underage admission or permission to register in a course must be submitted to the Vice President of Student Services.
2019-2020 Getting Started

in writing at least one week prior to the start of a quarter or start date of a continuing education class. The written request by the student must include evidence that the person:

1. Is competent at an appropriate academic level and/or technical skill level.
2. Demonstrates the ability to participate in an adult learning environment.

(Also see Local Enrollment Option listed above.)

IMPACT! A Youth Re-Engagement Program for ages 16-21
IMPACT! Youth Re-engagement is a free program for eligible students that creates a path to academic and career success for students who have dropped out, or are at severe risk of dropping out, of high school. The program is flexible, with each student working with an advisor to make realistic goals for high school completion and their career. The IMPACT! program has the ability to cover tuition, fees and books for students, with the ultimate goal of getting more students associate degrees and certificates, or ready to transfer to a four-year college or university for a bachelor’s degree. All students who graduate from a Washington state community college or technical college will receive a Washington State High School Diploma, which will be posted on their college transcript. Find out more at www.btc.edu/impact.

DUAL CREDIT (Earn college credit while still in high school)
BTC offers two pathways to students who want to earn college credit while in high school, giving students a great way to jumpstart their college degree and save money. Students can check out our options, Running Start and Career and Technical Education (CTE) Dual Credit, through our interactive Dual Enrollment Web Tool. For more information, contact our High School Relations Program Manager at rstart@btc.edu or at 360.752.8365.

Career and Technical Education (CTE) Dual Credit
CTE Dual Credit is a dual credit program offering high school students the opportunity to earn college credit for articulated high school courses. Working together, high school and college instructors have identified certain high school career and technical education courses that meet the course requirements of comparable college courses. These courses are identified as CTE Dual Credit approved. Students enrolled in these courses may be eligible to receive BTC college credit through the schools’ articulation agreements with BTC.

Students who complete approved high school CTE Dual Credit courses with a grade of B or better and complete all required course competencies will be eligible for BTC college credit. However, the student will not automatically receive credit; they must complete online registration for the course in the Statewide Enrollment and Reporting System (SERS) and print, complete, and submit the registration form to the Whatcom CTE Dual Credit Consortium. Registration instructions are available in the career and counseling centers at each area high school. All high school CTE Dual Credit courses articulated for college credit at BTC will be transcripted with the grade earned in the student’s high school course. Courses are only transcripted within the academic year the student completes the coursework. Back-dating is not allowed.

Award of articulated credits through BTC does not guarantee or imply acceptance of such credits by other higher education institutions. To inquire about course acceptance/transferability, please contact the destination institution. For a list of eligible courses by high school and additional information, visit Whatcom County’s CTE Dual Credit website at www.btc.edu/ctedualcredit.

Running Start
Running Start is a statewide program that allows qualified high school juniors and seniors to attend BTC tuition-free (up to 15 credits per quarter, other costs apply). Students are enrolled simultaneously in high school and college classes (or just college classes) and may receive both high school and college credit for classes completed at BTC. Students may choose to begin their degree or certificate program and/or complete many of their high school requirements at BTC. A student’s public school district is ultimately responsible for determining a student’s Running Start eligibility. Sign up for an information session at www.btc.edu/RSEvents.

Running Start students are expected to attend and complete the entire course and receive a satisfactory grade in order to receive credit. Running Start will not fund course challenges. The Running Start program is not available during Summer Quarter; however, students interested in attending Summer Quarter may elect to attend summer classes and self-pay tuition and fees.

All Running Start students, including homeschool and private school students, must be registered with a public school district. A high school counselor or school district official, BTC advising representative, the student, and a parent/guardian must sign the Running Start Enrollment Verification Form (RSEVF) each quarter for Running Start eligibility. An appointment should be made with the High School Relations Program Manager after the high school completes the RSEVF each quarter for assistance with course selection, registration, support information, and funding information. Students must register in person and pay class and program fees by the quarter due dates published at www.btc.edu/calendar (exception: students who register during summer for fall classes are given until the Friday following Labor Day to submit required paperwork and pay any remaining balance).

A Running Start Tuition Fee Waiver is available on the BTC Running Start website for eligible students. Running Start students must meet eligibility criteria outlined by Statute RCW 28A.600.310 and submit the waiver request form with supporting documentation no later than the first day of classes. Qualified students are not required to pay the Running Start Fee per credit or excess tuition based on FTE. All Running Start students are still responsible for all other class and program fees, books, supplies, and transportation. Additional financial support may be available in the form of scholarships/financial assistance and/or a book-loan program. Visit the BTC Running Start website or contact the High School Relations Program Manager with questions about financial support.

The steps to become a Running Start student at BTC are:

- Complete an Admissions application and indicate Running Start as the Program of interest. Attending a Running Start Information Session is strongly recommended.
- Placement
- Running Start Paperwork
- Advising and Registration
- Orientation

*More detailed information about these steps can be viewed on the Running Start webpage at www.btc.edu/RunningStart.

What does Running Start cover?

- Running Start-eligible credits are tuition free (other costs apply and may show on the “tuition” line of a student’s schedule).
For students to be eligible for Running Start each quarter:

- The Running Start Enrollment Verification Form (RSEVF) must be complete to be valid.
- The number of college credits students are allowed for Running Start at BTC is determined by the high school and is based on the number of high school FTE (full time equivalent) provided on the RSEVF.

Each class must meet all of these guidelines to qualify as Running Start and tuition free (but there are fees):

- College-level class (100-400 level, not below 100, not in 900 level)
- Credit class – for college credit (not non-credit or non-graded)
- State Support (not self-support)
- Approved by the School District
- Required as part of the program into which you are admitted
- Within the allowed hours/credits (FTEs) indicated on the Running Start Enrollment Verification Form
- You will be attending class all quarter (not challenging the class – If you challenge a class, you will be required to pay full price.)
- Class is taken during Fall, Winter, or Spring quarters (Running Start is not available Summer Quarter. Summer students pay full price.)

For more information, contact the High School Relations Program Manager at 360.752.8365 or email rstart@btc.edu.

What costs do Running Start students pay?

Running Start students pay tuition for credits that are not Running Start eligible. Students pay for program and class fees, books, materials and supplies; and for uniforms, tools, transportation and meal costs.

Tuition

Running Start students are charged resident-rate tuition for credits that are not Running Start eligible. After Running Start eligible credits, the next 10 credits are at the 1-10 credit resident rate, with any additional credits after that at the 11-18 credits resident rate. Many programs at BTC require more than 15 credits per quarter. See Tuition Rates and Cost Estimates.

Running Start Fee

The Running Start Fee is made up of the Administrative, Operating and Building. It appears as a tuition line item.

For the current Running Start Fee rate, go to www.btc.edu/tuition and see “Running Start Cost.”

Low Income? Contact the High School Relations Program Manager at rstart@btc.edu or call 360.752.8365 if you think you may qualify for the Low Income Running Start Waiver, which waives the Running Start Fee.

Program & Class Fees

Running Start students are responsible to pay all program and class fees.

Program & class fees address distinct and specified costs such as lab assistants, supplies, materials, equipment, rentals, software licensing, replacement and upgrade, maintenance, and other operational costs specific to the class and/or program.

When is payment due for Running Start students?

Generally, tuition and fees are due at the following times. For specific dates, see our BTC College Calendar. Upcoming dates are also posted in myBTC portal.

Summer: mid-June (full price - no Running Start in Summer Quarter)
Fall: mid-August* (timing exception for Running Start)
Winter: mid-December
Spring: mid-March

*Fall Quarter Running Start students are given until the Friday after Labor Day to pay tuition and fees due to high school staff availability during the summer. Signed Running Start Enrollment Verification and payment are due on the Friday after Labor Day.

TUITION & FEES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

VETERAN ADMISSION PROCESS

Bellingham Technical College is honored to have veterans as part of our community and is committed to ensuring that all veterans, active duty personnel, reservists, and their families have access to the educational benefits and resources entitled to them. Below are the admission steps tailored for student veterans. You can also find these steps and more information on our website: www.btc.edu/VeteransSteps

1. Complete an online application for BTC programs through the Washington State Web Admissions Center at: www.btc.edu/applyonline. Applications for program admission are accepted at any time. The application will be kept on file for a period of one year after the date of application. Applicants will need to reapply after one year of inactivity.

2. Apply for VA Education Benefits. To learn about VA education benefits, please review the Department of Veterans Affairs website. Next, you can complete the Veterans Online Application through the VONAPP website www.va.gov. It typically takes 6-8 weeks to receive your Certificate of Eligibility, so it is important to plan ahead. If you have questions or need assistance with your application please call 1-888-GIBILL1 1.888.442.4551 to speak with an Education Case Manager.

3. Send in your military and civilian academic transcripts. The Department of Veterans Affairs requires that any other college transcripts and military training transcript be evaluated for transfer-in credit. This is not an optional step; all transcripts must be evaluated prior to admission. You will need to complete an Evaluation Request Form and have official copies of your transcripts from previous colleges and your military transcripts delivered to BTC. Once we have all of your transcripts and the evaluation request form on file, the evaluation process typically takes up to 3 weeks. Student veterans using educational benefits are not permitted to opt out of prior credit evaluation. For more information regarding transcript evaluation and access to the Transcript Evaluation Policy, please visit the Veterans Support page on BTC’s website at: www.btc.edu/veterans

4. Complete the assessment test. If your transcripts are not sufficient to determine course placement you will need to complete an assessment test. It is not a pass/fail test; it simply measures your current skill level. Your scores will help you choose the right classes, make a plan, and obtain any needed support services.

www.btc.edu
Starting with the assessment test means a more successful college experience. No appointment is needed to take the test. Just pay the $25 fee to the BTC Cashier or Campus Store, and bring your receipt to the Assessment Center. Plan to spend about two hours. Your assessment test will be administered in the Assessment Center, Building H, Room H4. Assessment Center hours are posted at www.btc.edu/assessment.

5. Schedule an appointment with our Veterans Coordinator and Certifying Official. Our Veterans Coordinator will meet with you, so you can learn about on-campus resources and opportunities provided specifically for student veterans. Our Certifying Official will collect all required paperwork and documentation. You will need to work directly with our Certifying Official in regards to your VA Education Benefits. For more information about the required paperwork please visit our website at www.btc.edu/veterans.

6. As a student Veteran in a BTC education program, you will have a quarterly priority registration access time. Your registration access time is located in myBTC portal. Registering at this time allows you to enroll on the first day of registration with new student veterans and with continuing student veterans.

DEGREE/CERTIFICATE PROGRAM RE-ADMISSION POLICY

Students seeking re-admission to degree/certificate programs may return one time only to the same program at priority placement for a negotiated re-entry date. Re-admitted students will be enrolled on a space-available basis, and will be required to re-submit a Degree/Certificate Program Admissions Application and meet any new program admissions requirements. This may include repeating the assessment test to meet current program-level requirements. The Advanced Placement-Permission Slip, which can be obtained from the Admissions and Student Resource Center or via our website, will need to be completed by the student and turned into the Admissions and Student Resource Center when signatures are obtained.

Students seeking program re-admission who have not officially withdrawn or who are seeking program admission in a different degree/certificate program must complete the BTC application process, including meeting all program admissions requirements at the time of application for enrollment.

INTERNATIONAL STUDENTS

Bellingham Technical College (BTC) issues the M-1 and F-1 Certificates of Eligibility for technical professional program and Direct Transfer Degree students. Based on program and length of study, the Principal Designated School Official (PDSO) will determine which VISA is most appropriate for international applicants.

The M-1 Certificate of Eligibility is issued for a period of 12 months. If enrolled in a program longer than 1 year, an Extension of Stay I-538 or application for M-1 VISA is required. M-1 students must be enrolled full-time every quarter (including summer quarter), may not change their program of study, and may not hold employment while in attendance at BTC.

In comparison, F-1 Certificate of Eligibility is not limited to the 12-month period but is issued for the length of the program. F-1 students may change their program of study and may hold employment on campus.

Before international students can be admitted into Bellingham Technical College or issued a Certificate of Eligibility Form I-20 for Student Visa, the following admissions requirements and steps must be completed:

General International Student Requirements:

- Age Restriction: Applicants must be 16 years of age before enrollment.
- Admissions Application: Applicants must complete and submit an International Student Admissions paper application. The Washington State Web Admissions online application is not accepted for international students.
- Placement Assessment: Applicants must demonstrate competency in English before an I-20 can be issued. English and math assessment is required before an application can be accepted for program entry. Students in the United States may take the BTC assessment test to accomplish math, sentence structure, and reading score requirements. BTC also accepts equivalent college placement scores, the TOEFL (contact Admissions for specifics), IELTS, or certain college coursework for assessment waiver. To inquire more about assessment requirements, please email Admissions at admissions@btc.edu or call 360.752.8345.
- Other Requirements: The following programs have additional prerequisites or admissions requirements: Automotive Technology, Dental Assisting, Dental Hygiene, Diesel Technology, Nursing, Process Technology, Radiologic Technology, Surgery Technology, and Veterinary Technician. Applicants to these programs should contact Admissions at admissions@btc.edu or 360.752.8345 regarding requirements before submitting an application.

When the admissions process is complete and when space is available, applicants are accepted into their program of study. Program start times vary depending on the program and space availability. Some programs have prerequisites, which can impact the VISA application timeframe. Once confirmation of start date has been received, international program students must make an appointment with the DSO in the Admissions and Student Resource Center to be issued an I-20 to begin the VISA application process. The following items are required for issuance of an I-20:

I-20 Issuance Requirements:

- Confirmation of acceptance and start date: Applicants must receive confirmation that they have been admitted into a BTC program of study and given confirmation of when they will be allowed to begin their full-time program of study.
- Financial Responsibility: Applicants must provide evidence of ability to finance educational and living costs while in attendance. Students independently supporting themselves must submit the International Student Verification of Funds form with the appropriate signatures. If the applicant is being supported by family funds or other patron, the party who provides the support should sign the Sponsor’s Statement of Support form. Bank verification showing the availability of funds meeting or exceeding annual program costs is also required.
- Student Agreement: Applicants are required to read and sign and adhere to the International Student Agreement.

An official transcript must accompany any request for acceptance of transfer credit, prerequisite credit, or test waiver from the college or university attended. If the college or university is located outside the United States, the class and credits must be evaluated to the U.S grading/credit system by an independent credit evaluation agency. Several of these services are listed below.
CLASS REGISTRATION

Students may select and register for a variety of courses intended for employment training, retraining, or upgrading, as well as for personal enrichment, and business and professional development. Class information is published online under Take A Class. Continuing Education courses do not require an admission application in order to register.

REGISTRATION & ENROLLMENT

- A student is considered officially enrolled in a course or program after registering and paying all tuition and fees by specific due dates.
- Each student has the responsibility of registering online in myBTC portal or submitting a completed Registration Form to the Registration Office, reviewing the accuracy of the Student Schedule, and paying tuition and fees each quarter by the due date specified on the college calendar, located at www.btc.edu/calendar.
- Registering with instructor permission requires staff assistance. Use an Override Request Form or email the class instructor with enough details that Registration staff can add you to the class if your instructor forwards your email with instructor permission granted.
- Students may be dropped for nonpayment from classes if the student’s tuition and fees are not paid in full when due.
- Attend the first class! Students may be dropped from classes if the student fails to attend and there is no class participation in a course activity by the second day of class. Non-attendance and no course participation by the second class is considered a No Show.

REGISTRATION DATES AND TIMES

- New Student Registration and General Registration dates are posted on the college calendar, located at www.btc.edu/calendar.
- Registration access times for continuing degree/certificate program students are assigned by cumulative credits earned at Bellingham Technical College, with student veterans registering first. Generally, continuing students register for Summer and Fall in May, Winter in November, and Spring in February. Check your individual access time in myBTC portal. Please register at your assigned time or as soon as you can after it.
- Refund dates and drop/withdraw dates are posted for full-quarter-length state-support classes. If your class is shorter, the dates are calculated on a pro-rated basis.
- The last day to withdraw or change your schedule is the last day you may make any changes to your schedule for the quarter. (Exception: If a short class begins after this date, you may be able to add/drop/withdraw in writing. Contact the Registration Office regarding specific classes that start toward the end of the quarter.)

CLASS WAITLISTS

Class waitlists are available for open enrollment classes. One-day classes do not have a class waitlist. There is no waitlist on a class reserved for a continuing cohort of students.

Students are responsible for choosing to be placed on a class waitlist and removing a class waitlist if they no longer wish to take the class. Students can view and manage class waitlists in myBTC portal. Students are automatically registered into class through the first night of the quarter. Instructor permission is required beyond the first day of class. Refunds will not be granted if a student registered into a class from a class waitlist and did not drop the class.

CHANGING CLASSES

Students add and drop classes in myBTC portal. Written requests are accepted in person on a signed Add/Drop Form, Override Request Form, or by a specific and detailed email from the student’s email account. Non-attendance in a class for which a student is officially enrolled does not constitute an official drop or withdrawal.

Students receiving financial aid should consult with the Financial Aid Office before requesting to drop a class, as doing so may impact the financial aid award.

Students may change their schedule prior to the quarter start, as space in a class allows. After the quarter begins, students will have the first five (5) instructional days of the quarter and two-three (2-3) days in Summer Quarter to change their schedule. Adding a class will depend on space available. Instructor permission is required to add a class after the fifth day of the quarter and second or third day in Summer Quarter. Academic/General Education classes require permission to add the class after the second (2nd) day of the quarter. A few programs require permission if the class has started. If there is a class waitlist, priority will be given to students based on their class waitlist position. If space is available and students have met all prerequisite requirements of the course, they may enroll. If the class is full, students may enroll in the class by obtaining written permission from the instructor.

DROPPING CLASSES

Students may remove a class from their schedule in myBTC portal. Written requests are also accepted in person on a signed add/drop form, or by a specific and detailed email from the student’s email account.

A class is dropped if the student removes the class by the census date of the class, which is the 10th day (excludes weekends and legal holidays) of the quarter or 20% of the class as calculated by the computer. A dropped class is removed from the student’s class schedule and transcript.

WITHDRAWAL PROCEDURE

1. We strongly recommend that you meet with your advisor to discuss plans for withdrawal and potential plans for return.
2. Removing a class after the class census date (the 10th day of the quarter or 20% of the class) results in a withdrawal. The class will appear on your student schedule and transcript with a W grade. It will not calculate in your GPA, but it may count as a class attempted for Financial Aid satisfactory progress.
3. Students receiving financial aid should contact the Financial Aid
Office to give notification of intent to withdraw and to determine the impact on their financial aid status of withdrawing.

4. To officially withdraw from a course, students must withdraw online or submit an Add/Drop form to Registration by the quarterly withdrawal deadline. Refer to the online college calendar for specific dates each quarter. Students who do not officially withdraw from the college, or never attended, will forfeit any refund to which they may be entitled and may be issued a failing grade by their instructor. For short classes, BTC calculates withdrawal deadlines based on start date, end date, and 75% of instructional days.

5. If withdrawing completely online from BTC, complete a brief Withdrawal Survey.

6. Submitting a petition for a Hardship Withdrawal allows students who cannot complete a quarter due to unanticipated medical emergencies (not short-term or chronic illnesses), a call to active military duty or an emergency or family crisis to request to be withdrawn from all classes by the last day of their enrolled quarter. Third-party documentation is required, and tuition and fee refunds apply only to medical reasons and military call up. No petitions for Hardship Withdrawals will be accepted after the last day of the quarter.

7. BTC reserves the right to administratively withdraw students with notification under the following conditions:
   - Student meets the criteria of a No Show
   - Student has not paid tuition and fees by the payment deadline or financial aid funding has been terminated
   - Student has not successfully fulfilled the prerequisites for a class or program
   - Student has exceeded the class repeat limit of a total of three times
   - Student is academically suspended, enrolled for the next quarter, and does not have an academic improvement plan by the 5th day of the quarter
   - Student violates the Student Code of Conduct

COST OF ATTENDANCE
When estimating the cost of attending Bellingham Technical College, you will take into consideration

1. Tuition rates
2. Program & Class Fees
3. Books, Supplies, Uniforms, Tools, and any additional items needed for your specific program
4. Living expenses

Cost information is available online at www.btc.edu/tuition.

Each program provides cost estimates on our website under Degrees & Classes.

TUITION AND FEES
All tuition and fees must be paid by the due date for the enrollment period. The College evaluates and adjusts the tuition and fees annually to conform to state legislative regulations and program/course costs. Adjustments in tuition and fees become effective at the time they are implemented. Because changes may be made during the academic year, an up-to-date listing of tuition and fees for any program is available on the BTC website. All applicants should go to www.btc.edu/tuition to obtain a current tuition and fee schedule at the time of application and before payment is due. Tuition and fee charges will vary depending on credit load and program fees.

TUITION
Tuition is based on residency. See www.btc.edu/residency. Tuition rates are published online at www.btc.edu/tuition.

PROGRAM AND COURSE FEES
Program and course fees are in addition to tuition and address distinct costs such as lab fees and assistants, supplies, materials, equipment, rentals, software licensing/replacement/upgrade, maintenance, and other operational costs.

OTHER FEES
Check www.btc.edu/tuition for up-to-date information for:
   - Background check for Health programs
   - Replacement Student Body Card
   - Official Transcript (order online)
   - Replacement Degree/Certificate (per copy)
   - Replacement First Aid or CPR card

REFUND POLICY
STATE-FUNDED CREDIT CLASS REFUND POLICY
(Supported with State funds)
   - 100% refund if a student withdraws from a class through the 5th instructional day of the quarter.
   - 50% refund if a student withdraws after the 5th instructional day through the 20th calendar day of the quarter.

Classes with start and end dates other than the start and end of the quarter:
   - Refunds for state-supported classes that start before or after the regular quarter begins will be processed in proportion to the tuition and fee refund percentages above. Refund deadlines may differ for classes with different start dates and classes that start mid-quarter.
   - Refunds for state-supported classes that are shorter than the full quarter and begin any time during the quarter will be processed in proportion to the tuition and fee refund percentages above.
   - State-supported classes that meet only once must be dropped prior to the class meeting time to be refund eligible.
   - Summer quarter consists of a six-week session and an eight-week session. Refund dates are prorated.
ACADEMIC HOLDS

In order to collect outstanding parking fines, library fines and obligations, or other financial debt to the college, the college may:

- Block enrollment of classes
- Withhold official transcripts
- Withhold diplomas

Students on academic probation or suspension will have an academic hold placed on their record until they meet with an assigned point of contact to discuss their academic progress. See Academic Standards and Progress.

WASHINGTON STATE RESIDENCY

Students will be initially classified as resident or non-resident based on the information provided on the Admissions Application. Bellingham Technical College complies with applicable state laws regarding residency classification. Washington residency law is codified in RCW 28B.15 and further explained in WAC 250.18.

In general, a student is considered a resident for tuition and fee purposes under the following conditions:

1. The student is a US citizen, or has permanent or temporary resident status, or holds Refugee-Parolee or Conditional Entrant status with the United States Immigration and Naturalization Service, or is otherwise permanently residing in the United States under color of law; and

2. The student is financially independent for the current calendar year and the calendar year prior to which application is made (if the student is not financially independent, then his/her residency is based on whether one or both parents have met all residency requirements); and

3. The student (or, if financially dependent, at least one of the student’s parents) is in Washington primarily for reasons other than educational and has officially established Washington residency; and

For information about how to request reclassification, BTC accepted waivers, and residency forms, see wwwbtc.edu/residency.

Students taking only classes in Transitional Studies, Child & Family Studies, First Aid, or self-support classes are not subject to residency requirements. If you move from these classes into state-funded academic and/or vocational classes, residency requirements will be applicable.

BTC Tuition Waiver

Bellingham Technical College offers a partial Tuition waiver for US Citizens and students holding Permanent Resident status who are residents of the 50 States and US Territories. This waiver is applied as part of our Admissions process.

TAX CREDIT INFORMATION

Several education tax benefits are available to lessen the burdens of higher education. Tax credits such as the American Opportunity Tax Credit or the Lifetime Learning Credit may be claimed for qualified tuition and educational expenses. After the end of each tax year, students will be mailed a 1098T form reflecting qualified payments to BTC from the Washington State Board of Community

www.btc.edu
and Technical Colleges. This form, which is also viewable online using your student login information, can be used to complete the appropriate tax credit claim forms. Contact your tax advisor or the IRS for assistance with these credits or other tax questions.

**PAYING FOR COLLEGE**

Financial Aid  
College Services Building, Room 101  
Email: finaid@btc.edu  Phone: 360.752.8351

**BTC Federal School Code: 016227**

Bellingham Technical College believes people should have the opportunity to achieve their educational goals, and we are here to help support your educational efforts. To help finance your education, you must become familiar with Student Financial Resources, which includes the Financial Aid Office and the Workforce Funding and Student Support Office. To learn more, visit our website at www.btc.edu, read the Student Financial Aid Handbook (located under Financial Aid Forms or in your Financial Aid Portal), or contact our office.

Financial aid is available for eligible students who enroll in certificate or degree programs; however, not all programs are eligible for financial aid. Students and their families need not be low-income to qualify for some types of financial aid. Applying for financial aid as early as possible and meeting the institutional priority date allows students’ aid applications to be reviewed before the beginning of the quarter, and a better chance of receiving limited first-come first-served funding.

Students must demonstrate a financial need to be eligible for most types of assistance. Financial need is calculated as the difference between the cost of attending school and what you and your family can afford to pay.

**SAMPLE CALCULATION FORMULA:**

\[
\text{Cost of Attendance - Expected Family Contribution} = \text{Financial Need}
\]

The Free Application for Federal Student Aid (FAFSA) is the basic form to apply for assistance; it is your passport to financial aid. Information you provide on the FAFSA determines your Expected Family Contribution, eligibility for grants, scholarships, work-study, and Federal Loans.

**TUITION PAYMENT PLAN**

Nelnet Business Solutions, an approved third-party vendor, allows students to pay for tuition and fees over time during the quarter. Tuition payment plans break down your tuition balance into affordable monthly payments. There’s no interest, payment options are flexible, setup fees are affordable, and it’s easy to enroll. Find out more at http://www.btc.edu/CurrentStudents/StudentResources/NelNet.aspx.

**FINANCIAL AID PROGRAMS**

**FINANCIAL AID APPLICATION PROCEDURE**

Complete and submit the Free Application for Federal Student Aid (FAFSA) online. This application collects financial data and other information used to calculate the Expected Family Contribution (EFC), which determines a student’s basic aid eligibility. Students may complete their FAFSA online at www.fafsa.ed.gov. To use this site, you must create an FSA ID at fsaid.ed.gov. Once BTC receives your FAFSA, other information may be requested from you to complete your file. The Financial Aid office will contact you via the email address on your FAFSA to let you know what is still needed. Most of the necessary forms may be downloaded from the Student Financial Aid Portal at www.btc.edu/financialaidportal, or from the financial aid forms section of the BTC Financial Aid website at www.btc.edu/financialaidforms.

Be certain that all required information has been received to complete your file. Students must reapply for financial aid each academic year by submitting a new FAFSA after October 1 prior to the new award year. Each financial aid year begins with Summer Quarter and ends with Spring Quarter. Since some funding is first-come, first-served, you should apply as soon as possible.

**ELIGIBILITY REQUIREMENTS**

Students are eligible for financial aid if they are:

1. Attending a financial aid-eligible program for the purpose of obtaining a degree or certificate at the college. (Some certificate programs may not be eligible for certain types of aid. Check with the Financial Aid Office or on the Financial Aid webpage to verify program eligibility.)
2. U.S. citizens or eligible non-citizens.
3. Making satisfactory academic progress in a program of study as defined by the financial aid satisfactory progress criteria.
4. Not in default on any previous student loans or owing a refund on any grants.
5. Registered for the military draft with Selective Service (if male), as required by law.
6. High school graduates, have a GED, or have completed homeschooling as defined by state law.

Only classes required for a student’s aid-eligible program may count toward financial aid awarding.

Students who have the equivalent of a bachelor’s degree (including degrees earned in a foreign country) are limited to applying for Federal Loans and work-study assistance. Students will be notified of their financial aid award by email.

**SATISFACTORY ACADEMIC PROGRESS**

To remain in good standing, students need to maintain a cumulative 2.0 grade point average and complete at least two-thirds of their attempted credits. All attempted credits count, no matter who paid for them. Contact the Financial Aid Office or visit the Financial Aid section of the BTC website.

**FEDERAL FINANCIAL AID REFUND POLICY**

Students who receive federal financial aid are subject to the federal Return to Title IV Funds regulations. Under these regulations, aid eligibility for students receiving federal aid must be recalculated under most circumstances if a student withdraws from classes early or ceases to attend during the quarter. If they do not complete 60% of the quarter, some students may owe a repayment to federal and/or state aid programs, including Pell Grant, FSEOG, student loans, SNG, and other funds. Financial aid funds are governed by state and federal regulations, and any amounts owed are separate from and may be in addition to the college’s own tuition refund policy. For a copy of the Return to Title IV Funds refund policy, please see the Student Financial Aid Handbook online or in your Financial Aid Portal.
AVAILABLE FINANCIAL AID PROGRAMS

This is a brief summary of some of the financial aid available at BTC. For a more detailed account of awards and requirements, please see the Student Financial Aid Handbook on our website or in your Financial Aid Portal.

FEDERAL PELL GRANT
The federal Pell Grant is free monetary assistance for educational expenses. Students who have earned a bachelor’s degree are not eligible. Like other grants, the Pell Grant is adjusted for less than full-time enrollment.

FEDERAL SEOG GRANT
The Supplemental Educational Opportunity Grant is awarded to high-need students who apply early in the year (funds are limited). Students must be eligible for the Pell Grant to receive this assistance.

WASHINGTON STATE NEED GRANT
The State Need Grant is available for Washington residents only. It is adjusted for less than full-time enrollment and may not exceed the amount of allowable tuition and fees each quarter. Although this is a state grant, eligibility is determined by completion of the FAFSA or WASFA for DREAMer (undocumented) students.

SCHOLARSHIPS
Scholarships, like grants, offer free monetary assistance for educational needs. Scholarships are offered by the BTC Foundation, organizations associated with the college, and by outside agencies. For a current list of resources, please visit our website or read the Student Financial Aid Handbook on our website or in your Financial Aid Portal.

STUDENT WORK STUDY
Work Study is part-time employment funded by federal or state financial aid funds. Interested students should contact the Financial Aid Office. State Work Study is available only to Washington state residents. Students may work up to 19 hours a week. Students must be enrolled at least half-time. All placements are on campus.

FEDERAL DIRECT AND PLUS STUDENT LOANS
The Federal Direct student loan is guaranteed by the federal government; students do not need established credit to qualify. Students must be enrolled in at least 6 program-eligible credits (half-time) to qualify. Repayment begins up to six months after you leave school or drop below half-time. The Parent Plus Loan is available for eligible students. If approved, parents may borrow up to the cost of the student’s budget, minus any other aid.

VETERANS BENEFITS
Veterans or dependents of veterans who are eligible for education benefits must apply for admission to the college. Contact the college Veteran Certifying Official as early as possible before enrolling. All certificate and degree programs are eligible for veteran education benefits. Call 360.752.8345 for an appointment with the coordinator.

BTC FOUNDATION SCHOLARSHIPS FOR STUDENTS
The BTC Foundation awards more than $275,000 in scholarships each year to an average of 50% of the students who apply. The scholarship application is available online at the beginning of Spring Quarter with the application deadline typically on or around June 30. Learn more at www.btc.edu/scholarships.

PASSPORT TO CAREERS
Passport to Careers assists foster youth with the cost of attending college (tuition, fees, books, housing, transportation, and some personal expenses), and specialized support services from a designated college staff member. Passport serves former foster youth who: 1) spend at least one year in foster care in Washington state after their 16th birthday, 2) emancipate from care on or after January 1, 2007, 3) enroll at least half-time in an eligible college by their 22nd birthday, 4) maintain Washington residency, and 5) are working toward earning their first degree or certificate. For more information call 360.752.8468 and find us at www.btc.edu/passport.

WORKFORCE FUNDING & STUDENT SUPPORT
Workforce Funding & Student Support, a program within Student Financial Resources (College Services Building, 102), oversees some additional student funding resources. Students may be eligible for funding beyond their FAFSA financial aid package (see Financial Aid section).

BASIC FOOD EMPLOYMENT & TRAINING (BFET)
BFET is a funding source to assist students get on and stay on their educational path. Students may be eligible if they receive or are eligible for federal Basic Food Assistance (food stamps) and do not receive TANF (Temporary Assistance to Needy Families). BFET can help with college and other support services. BFET at BTC facilitates child care subsidy eligibility through the Department of Social and Health Services (DSHS). Enrolling in the BFET program also keeps Basic Food recipients in good standing with DSHS so their food benefits will continue while they attend college. Call 360.752.8468 for more information and find us at www.btc.edu/bfet.

OPPORTUNITY GRANT
The Opportunity Grant program is designed to help low-income students get prepared for and enter programs at Bellingham Technical College that will result in high-demand, high-wage occupations. The grant provides tuition for 45 credits and fees up to $200, as well as $1,000 for books and tools. The program is available to students below 200% of the federal poverty level who are Washington state residents, have earned less than an associate's degree, and are interested in any of the following programs: Welding, Machining, Electrician, Industrial Maintenance & Mechatronics, Instrumentation & Control Technology, Mechanical Engineering, HVAC, Electronics, Process Technology, Automotive Technology, Diesel Technology, Surgery Technology, Radiologic Technology, Nursing, Dental Hygiene, and Dental Assistant (eligible programs are subject to change). Opportunity Grant supports students through financial aid planning, program choice, academic advising, and support services. For more information on how to apply, call 360.752.8468 and find us at www.btc.edu/opportunitygrant.

WORKFIRST
WorkFirst is available to low-income parents who receive Temporary Assistance to Needy Families (TANF) through DSHS. WorkFirst provides tuition, books, and fees for qualified students as funding permits. This program at BTC can financially assist WorkFirst parents who are receiving a TANF cash grant, and do not have other financial aid sufficient to pay for tuition, books, and fees. Other support services are provided as well. Students in this program are required to work closely with the WorkFirst staff at BTC, even when other funding is paying for college. To apply, contact your Case Manager or Social Worker at DSHS. Students choose a career plan that may include development of basic skills, better employability skills, or a new career, in order to progress in a pathway toward employment. Contact WorkFirst staff at 360.752.8468 and find us at www.btc.edu/workfirst.
WORKER RETRAINING
The Worker Retraining program is designed to help dislocated workers in a variety of situations. The Worker Retraining program may provide assistance to students who: 1) have been laid off or have received a layoff notice, 2) currently receive or are eligible to receive unemployment benefits, 3) have exhausted unemployment benefits within the last four years, 4) are displaced homemakers, 5) were self-employed but closed the business due to economic conditions in the community, 6) are veterans who were discharged within the past four years.

Bellingham Technical College can typically financially assist eligible students during their first quarter, or to bridge a gap in funding at any point in a program of study. In addition to potential funding for a quarter, Worker Retraining offers assistance in a variety of other arenas, including program ready list priority under some circumstances, and coordination of programs and services with WorkSource and the Employment Security Department. To find out more, please contact the Bellingham Technical College Worker Retraining Coordinator at 360.752.8468 and find us at www.btc.edu/workforcefunding.

DREAMERS (UNDOCUMENTED STUDENTS)
Bellingham Technical College (BTC) is committed to assisting all students succeed, regardless of citizen status. New state law and funding has increased opportunities for non-citizens to access higher education. At BTC, these students are called DREAMers. For more information on admissions, financial aid and DACA, please call 360.752.8468 or find us at www.btc.edu/dreamers.

ADVISING & CAREER SERVICES
Admissions & Student Resource Center
College Services Building, Room 106
Email: advising@btc.edu Phone: 360.752.8345

Once students declare their program intent at BTC, they will be assigned an academic and career advisor who will help ensure they are on track with course planning and ready to enter their program of choice. Once the student is enrolled in their program, a faculty member will serve as the advisor for the remainder of the program. However, their advisor in the Entry Services & Advising Department will stay connected to the student to assist with career development activities.

Enrolled students may find their advisor name and contact information by entering their SID at www.btc.edu/MyAdvisor

Academic and career advisors work with students in a variety of ways to help them achieve both their educational and career goals:

• Set academic goals that are relevant to the student's desired career field
• Create an education plan that helps guide a student in choosing courses for future quarters
• Learn about the different technology resources students use at BTC and practice tech readiness

Contact Academic & Career Services if you have questions.
ADVISING & CAREER SERVICES

Admissions & Student Resource Center
College Services Building, Room 106
Email: advising@btc.edu Phone: 360.752.8345
Website: www.btc.edu/Advising

Advising and Career Services staff offer educational pathway planning and career development to BTC students through individualized support services and connecting students and alumni to industry leaders. Staff work with students to:

- Explore career pathways using vocational assessments, employment trends and more
- Build an educational plan to know which courses are needed to enter and satisfy graduation requirements
- Provide support with job and internship searching, including résumé and cover letters, interviewing, applications, etc.
- Identify action items and next steps to address challenges that may impact success in college
- Establish realistic and attainable academic and career goals
- Connect with potential funding sources to pay for college

COUNSELING SERVICES

College Services Building, Room 106
Email: counseling@btc.edu Phone: 360.752.8345

Counseling services are available to students, including academic, career, and personal counseling. Academic counseling is provided to assist with issues such as educational planning, adjusting to college life, study and time management skills, and test anxiety. Career counseling includes exploration of values, skills and temperament for various careers, research into the world of work, career goal setting, and career assessments. Personal counseling is available for crisis management, stress and anxiety, depression, grief and loss, anger, abuse, cultural conflicts, relationship issues, and referrals to community resources.

STUDENT SUPPORT SERVICES: TRIO

Campus Center Building, Room 220A
Email: trio@btc.edu Phone: 360.752.8640

TRiO supports students in achieving their goals of adjusting to college life, succeeding in their classes, graduating with a degree or certificate, and starting their career or transferring to a four-year university. The TRIO program includes personalized success coaching, one-on-one or small group tutoring, a TRiO student lounge, the opportunity to apply for TRiO scholarships, cultural/educational events, and leadership opportunities. TRIO Student Support Services at BTC is a federally funded program and one of a national network of TRiO programs. See BTC's website for more information about services and eligibility: www.btc.edu/TRIO

ACCESSIBILITY RESOURCES: ACCESS AND DISABILITY SERVICES

College Services Building, Room 106
Email: ar@btc.edu Phone: 360.752.8345

Accessibility Resources (AR) exists to create an accessible college community, where students with disabilities have an equal opportunity to fully participate in all aspects of the educational environment. No student shall, on the basis of his or her disability, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any college program or activity. We cooperate through partnerships with students, faculty, staff, and outside agencies to promote student independence and to ensure recognition of their abilities, as well as their disability challenges. Additionally, AR maintains compliance with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act of 1973, and State of Washington Laws of 1994, Chapter 105.

To receive academic adjustments, students are responsible for formally requesting accommodations in a timely manner, as well as providing documentation prepared by a certified medical doctor, psychologist, or psychiatrist with credentials to diagnose the student’s disability. For complete documentation guidelines, please visit our website at www.btc.edu/ar.

An initial appointment with the AR Director is required to access accommodations through BTC’s AR Office. While documentation is only submitted once, accommodation requests need to be made each quarter of attendance, optimally four weeks prior to the quarter start date. Late requests may result in a delay of accommodation placement. Call 360.752.8345 for more information.

REGIONAL SUPPORT SERVICES

Campus Center Building, Room 300
Email: diversity@btc.edu Phone: 360.752.8377

Diversity/Multicultural Support Services assists students with diverse cultural and ethnic backgrounds, abilities, genders, and languages of origin to access, pursue, and attain success in achieving their educational goals. Students seeking assistance should contact the Director of Multicultural and Student Support Services, or schedule an appointment at Diversity/Multicultural Support Services.

Registration provides support to students to meet their educational and career goals. Our goal is to educate and empower students to successfully navigate the registration process to program completion. Services provided by Registration include: processing class registration and class changes (adds/drops/withdrawals), enrollment verifications, processing official transcript requests, maintaining student records, notifying students who do not meet satisfactory progress, degree audit assistance and verifying program course requirements at the time of completion.

REGISTRATION

College Services Building, Lobby
Email: registration@btc.edu Phone: 360.752.8350

DIVERSITY/MULTICULTURAL SUPPORT SERVICES

Campus Center Building, Room 300
Email: diversity@btc.edu Phone: 360.752.8377

Diversity/Multicultural Support Services assists students with diverse cultural and ethnic backgrounds, abilities, genders, and languages of origin to access, pursue, and attain success in achieving their educational goals. Students seeking assistance should contact the Director of Multicultural and Student Support Services, or schedule an appointment with the AR Director.
Creating and nurturing a diverse campus is a central goal in Bellingham Technical College’s mission of delivering superior professional technical education for today’s needs and tomorrow’s opportunities. Engaging with and learning to honor a range of perspectives and backgrounds is of paramount importance to the college, and in keeping with the spirit that is BTC. BTC continuously strives to create an egalitarian environment in which students, faculty, and staff are encouraged to participate in the life of the campus, free from harassment and discrimination. Ranging in age from 16 to 60+, our student body is composed of more than 20 ethnic backgrounds, as well as single parents, veterans, adults seeking new careers, immigrants, GED holders, English language learners, and first-time college students. Regardless of motivation, all seek an education and share a common goal of enriching their own lives and that of their communities. BTC encourages diversity on our campus by welcoming, respecting, and supporting people of every ethnicity, nationality, culture, gender, age, sexual orientation, religious belief, physical ability, and socioeconomic background.

VETERANS SUPPORT SERVICES
Campus Center Building, Room 300
Email: veterans@btc.edu
Phone: Director of Multicultural and Student Support Services 360.752.8377

Creating and nurturing a diverse campus is a central goal in Bellingham Technical College’s mission of delivering superior professional technical education for today’s needs and tomorrow’s opportunities. Bellingham Technical College is honored to have veterans as part of our community and is committed to ensuring that all veterans, active duty personnel, reservists, and their families have access to the educational benefits and resources entitled to them. Below is a selection of services that we offer to our veteran community.

Early Registration for Veteran Students
As a veteran enrolled in a BTC educational program, you get to register first for next quarter classes. Watch for your registration access time in myBTC portal and register right after your assigned time.

Residency Status Review
If you are a veteran with non-resident status whose separation date is within the last three years, we would like to review your residency status. The VA School Certifying Official at BTC is able to assist student veterans and dependents with residency questions and paperwork.

Advising/Educational Plan
Our Advising and Career Services office has staff available who are acquainted with veterans’ concerns regarding course scheduling. Email: advising@btc.edu

Benefits, Resources, Residency and more
See BTC’s website at www.btc.edu/veterans for details.

Student Veterans of America, BTC chapter
The BTC Veterans Club, a chapter of Student Veterans of America (SVA), consists of a board of elected student executives and staff advisors, and convenes weekly for lunchtime meetings open to the general campus community. The purpose of this club is to foster peer support within the veteran community on campus, give veterans a place to meet one another, and act as a platform for discussing and advocating for veterans’ academic needs. This club is recognized nationally by the SVA, as well as internally by the Associated Students of Bellingham Technical College (ASBTC).

Club meetings
Wednesday from 11am – 12pm in Building B, Room B-12
All enrolled veterans are welcome.

Graduation Honor Cords
BTC veteran graduates are given Veteran Honor Cords for the Commencement Ceremony. Pick up your Veteran Honor Cord during Commencement check-in.

TRANSITIONAL STUDIES
Building A
Email: ts@btc.edu Phone: 360.752.8494

The mission of the Transitional Studies program is to prepare students for lifelong success by facilitating basic academic learning, college preparation, and workplace behaviors and attitudes. Find out more about Transitional Studies programs online at www.btc.edu/TransitionalStudies

The Transitional Studies program offers:
- College Readiness including reading, writing, and math
- High school equivalency (GED)
- Youth Re-engagement Program (IMPACT!)
- High school completion (WA State diploma)
- English Language Acquisition (ELA) for immigrants and Limited English Proficient (LEP) DSHS clients
- Career pathway planning
- Integrated Basic Education and Skills Training (I-BEST)

Adults seeking Transitional Studies classes should contact the Transitional Studies office for information. Transitional Studies hours are Monday through Friday from 8:00 am to 4:00 pm.

The Transitional Studies program is open to adults who meet the following requirements:
- Need basic education skills (reading, writing, math, English language)
- Lack a high school diploma or equivalency (GED)
- Commit to regular attendance
- Have ability to participate positively in an adult learning environment
- 16 years or older and not enrolled in a K-12 school

Limited English Proficiency (LEP) Pathway English Language Acquisition (ELA)

Sixteen- to eighteen-year-olds must submit a Request for Approval to Test Form signed by a high school representative.

The Limited English Proficient (LEP) pathway ELA program is a specially funded class for recent immigrant adults referred through DSHS. ELA Levels 1 through 4 are taught in this program.

www.btc.edu
ASSOCIATED STUDENT GOVERNMENT

Campus Center, Room 300
Email: asbtc@btc.edu Phone: 360.752.8357

The Associated Students of Bellingham Technical College (ASBTC) comprises all enrolledBTC students. Through the ASBTC, students have a voice to assure that student issues and concerns are heard. ASBTC’s mission is to enhance the academic and personal lives of students by providing diverse and cultural opportunities with meaningful learning experiences that complement classroom education and enrich student life.

Students who participate in student government help establish campus policies and procedures, allocate the services and activities fees, serve on college and student committees, and evaluate student programs and services to meet the changing needs and interests of the students.

Interested in participating in student governance? Contact ASBTC now!

ASBTC Goals:

- Provide a means of self-governance for BTC students.
- Promote the educational, cultural and social welfare of BTC students.
- Guarantee an equal opportunity for student participation and representation.
- Foster cooperation among students, faculty, administration, and the community.

ASBTC also provides student clubs. Come to the Student Center (Campus Center, Room 300) to learn about all the clubs that are available.

ASBTC is fully supported by BTC faculty, staff, administration, and trustees. Joining is a great way to get involved with issues that affect all students and to develop skills in leadership, cooperative governance, and community building.

PHI THETA KAPPA HONOR SOCIETY

College Services Building, Room 106
Email: ptk@btc.edu

Bellingham Technical College is pleased to offer membership in Phi Theta Kappa to students who exhibit academic excellence in associate degree programs. Phi Theta Kappa, the international honor society of two-year colleges, aims to recognize and encourage scholarship among associate degree students. BTC’s Beta Lambda Beta chapter of Phi Theta Kappa was chartered in 2002.

Invitation to membership is extended by the chapter to students who have completed at least 24 credits of coursework leading to an associate degree, in which they have a grade point average of 3.5 or higher. Students pay a membership fee and are given access to online services and activities provided by Phi Theta Kappa.

Phi Theta Kappa provides opportunities for the development of leadership and service through chapter involvement and community service projects. Phi Theta Kappa meets bi-weekly on campus. All members are encouraged to participate and get involved, but participation is not a requirement of membership.

LIBRARY

Campus Center Building, 3rd Floor
Email: library@btc.edu Phone: 360.752.8383

The Bellingham Technical College Library supports student research and learning. Books, DVDs, journals, eBooks, and digital resources are specifically selected to support the college curriculum. The BTC Library’s digital resources include eBooks and journal databases that offer access to full-text journals, and newspapers. Access to the BTC Library’s catalog and digital resources is available at www.btc.edu/library.

Library users are encouraged to ask for help. Library staff can give you individual assistance and instruction from the Information Desk and through the Book-A-Librarian service in-person or online. If you need information that is not available at BTC, we can help you borrow material from other libraries through interlibrary loan.

The BTC Library features the Information Commons, the campus’s open computer lab. The BTC Library is the front line of support for all student technology questions. There are computers equipped with software to support program coursework, an Information and Digital Literacy classroom, and a computer station equipped with accessibility support software. Students may access the wireless network using their personal devices.

Students may check out digital cameras, digital recorders, flash drives, laptops, and iPads at the Library Information Desk. To facilitate both quiet and group study there are eight group study rooms in addition to tables and casual lounge furniture. The eLearning and Media/Copy Services Departments are also located in the BTC Library.

Round-the-clock chat reference service is available at www.btc.edu/library/AskLibrarian. Library staff are always available to help you with your research, information, and technology questions.

CAMPUS STORE

Campus Center Building main floor
Phone: 360.752.8342

The BTC Campus Store is located on the ground floor of the Campus Center building. There you can find required texts, materials, and supplies to purchase for degree/certificate programs and courses.

Bring your printed class schedule and the staff will help find your required items. Text lists can be found at www.btc-store.com. Printed copies of the lists are also available to use inside the store. You may purchase a copy of any list for 10 cents per copy. The Campus Store also carries office supplies, software, flash drives, calculators, book bags, BTC apparel, emblem gifts, coffee, soda, pastries, candy, and other snacks. Services include outgoing fax service, outgoing package shipping, stamp sales, bus pass sales, and special orders.

Students funded through an independent funding agency (DVR, Labor and Industries, etc.) or Workforce Investment Act (WIA) must work with counselors from their agency prior to purchasing books and supplies. Students receiving financial aid checks from BTC must pay for books and supplies at the time of purchase. The Campus Store does not cash financial aid or other two-party checks. The store accepts cash, VISA, MasterCard, and most debit cards.
FOOD SERVICES

G Building and Campus Center Building, main floor
Phone: 360.752.8471

Food service is available in the Lindbergh Avenue Deli & Grill in Building G and at the Culinairé Express window in the Cafeteria (G Building). Both are open to the public at selected times throughout the year. Please visit www.btc.edu/CafeCulinaire for more information.

Vending machines are located in the Campus Center building, Building C, Building G, Building J, Building U, Haskell Center, Des McArde Center, and Morse Center. The Campus Store, located in the Campus Center building, also sells a variety of snacks and beverages.

INSURANCE

The college does not provide students with medical or accident insurance. We encourage students who lack personal accident insurance to purchase it if they are enrolled in any degree/certificate program that involves working with machinery. Some programs require student insurance before beginning clinical internships.

Bellingham Technical College students may purchase voluntary student accident and health insurance. Insurance information is available in the Admissions & Student Resource Center in the College Services Building or by calling 360.752.8345.

PARKING

Visitor parking is located in front of the College Services building, the CS lot, at the east end of the campus off Nome Street and the west end of campus in the Y building lot. The C building lot, on Lindbergh and Gilligan Way is reserved for Dental patients and Culinairé customers. Registered students, faculty and staff are not visitors and are subject to parking violation tickets, immobilization, and/or towing. Visitors are required to sign in at the Visitors sign-in counters for each lot. Sign-in locations are in the foyers of the College Services building for the CS lot, the A building lobby for the Y lot and in the Dental Clinic in C building and Culinairé for the C lot. Visitor parking is limited to 2 hours.

General free parking in designated spots only is accessed via West Illinois Street in the three (3) parking lots located north of the campus buildings. Designated spots are those parking spaces indicated by a white line on both sides of the vehicle when parked. Parking lots off Nome Street or Lindbergh Avenue are restricted parking for permit, carpool, and handicap parking as designated.

Motorcycle parking is available in four (4) areas around campus and is marked as such.

Maps indicating the appropriate place to park for general, visitor, ADA, and motorcycle parking are available at the Information desk in the College Services lobby as well as in the Library on the third floor of the Campus Center.

Failure to adhere to parking rules as designated on parking lot signage will result in the following:

- Parking violation ticket
- Fines
- Holds on registration, transcripts, financial aid, degrees or certificates
- Immobilization, and/or towing

ADA parking is available in the MC, DMC, CS, H, Y and West parking lots. Parking in ADA-designated spaces requires an approved ADA parking permit. You can obtain the ADA parking permit by accessing a required form at www.dol.wa.gov/forms/420073.pdf. A portion of this form will need to be filled out by your physician. Once completed take the form to any licensing office to receive your ADA permit over the counter.

Information on carpool parking spaces can be obtained by calling the Cashier in the College Services building at 360.752.8311.

The following situations are subject to vehicle immobilization and/or towing; fees are associated with the release of the immobilization device and with towing at the owner’s expense:

- Any vehicle that receives three (3) parking violations will be subject to immobilization and/or towing when the third violation or subsequent violations are issued; this is regardless of whether prior fines are paid in full. (Towing companies charge by the hour and by the day for impounded vehicles.)
- Any vehicle parked in a fire lane or in handicap parking without a handicap parking permit are subject to towing and a parking citation by the Bellingham Police Department
- Vehicles left overnight or through the weekend on college property are subject to towing

The Parking Hotline number for immobilized or towed vehicles is 360.752.8798.

The college assumes no liability for vehicles parked in the campus parking lots.

Disputes on violations may be forwarded to the Vice President of Administrative Services or the Vice President of Student Services for disciplinary action.
TUTORING SERVICES

Building H, Room 9 (Math) and Room 15 (Writing & English)
Email: tutoring@btc.edu Phone: 360.752.8499

Bellingham Technical College provides free drop-in tutoring to students enrolled in tuition and fee-bearing courses all year when classes are in session. Tutors are recruited in all subjects where tutoring assistance is requested. To request tutoring assistance, contact the Tutoring Center to complete a Request Form. The current drop-in tutoring schedule is available at www.btc.edu/tutoring. If students request tutoring in an area not currently offered on the schedule, staff will do their best to locate a tutor in that subject.

PROGRAM SERVICES FOR THE PUBLIC

Some of the college’s degree/certificate programs provide services or repairs for staff, students, and the general public, if the work needed applies to the training of students in the program without negatively impacting community private enterprise. Services include automotive, auto collision, and dental.

The BTC Dental Clinic is open to the public and welcomes new patients from September through June. Dental care is provided by a licensed dentist from the community, and dental assisting and dental hygienist students under the direction of certified faculty members. The clinic provides low-cost dental care on a cash-only basis. For an appointment, contact the clinic at 360.752.8349.
ACADEMIC REQUIREMENTS

DEGREE/Certificate Programs
The Associate of Applied Science (AAS) degree is awarded for completion of a comprehensive program of study in professional technical education designed to prepare graduates for technician-level employment. Programs leading to the AAS degree are 90 or more credits in length.

The Associate of Applied Science - Transfer (AAS-T) option contains the technical courses needed for job preparation, as well as a minimum of 20 credits of transferrable general education coursework in English and math, and in humanities, social science, or natural science.

Direct Transfer Agreement/Major-Related Program (DTA/MRP) and Associate in Science-Transfer/Major-Related Program (AS-T/MRP) degree options are designed for students who intend to complete a bachelor’s degree at a four-year institution before entering the workforce. Completion of these BTC 90-plus credit degrees prepares students to transfer with junior status to a participating college or university.

The Bachelor of Applied Science (BAS) degree is a two-year degree added on top of an existing associate degree or previous bachelor degree.

A certificate of completion is awarded for successful completion of an approved course of study totaling less than 90 credits within a program of professional technical education.

Upon successful completion of an AAS, AAS-T, DTA/MRP, or AS-T/MRP degree, a state high school (HS) diploma is available to students who have not otherwise satisfied the State Board of Education’s high school graduation requirements. Students must meet eligibility criteria as defined in bill SHB 1758 and submit an online High School Diploma application. Once verified, High School Diploma will be posted to the student’s BTC transcript along with the earned degree.

Students may elect to graduate under the provisions of the catalog in force either at the time of entry OR at the time of completion, providing four (4) years have not lapsed AND the student has remained continuously enrolled in the program. Students needing longer than four years to complete a given degree or certificate will be subject to any updated completion requirements.

In determining if the requirements for graduation have been met, the college provides assistance through faculty advisors, academic advisors, counselors, and the college catalog. However, the final responsibility for meeting all completion requirements rests with the student. Students have the responsibility of verifying specific completion requirements with their advisor and Degree Audit.

GENERAL COMPLETION REQUIREMENTS
1. Complete, with a passing grade, all technical and academic core courses as listed on the program pages defining requirements for individual degrees/certificates. Some degree/certificate programs may require minimum grades in required courses. See the Programs of Study pages.
2. Use the online Degree Audit to obtain an unofficial audit of classes you have completed and are registered for against the requirements for a specific certificate or degree.
3. Complete and submit the online BTC Graduation Application for each degree or certificate requested to the Registration Office for an official verification of completion.
4. Meet all financial obligations to the college.
5. Earn a cumulative grade point average of 2.0 or above. Individual programs may require a higher grade point average. Your cumulative GPA includes all grades on your transcript.
6. Complete 15 college-level credits in the required course work at BTC.
7. BTC may verify and award certificates and degrees as they are earned.

PROGRAM CLOSURE
BTC is committed to student completion of professional technical degrees and certificates. In the event of a degree or certificate program termination, the College will make effort to assist students in the completion of program requirements within a specific timeframe.

COMMENCEMENT CEREMONY
All students who complete a program of 45 credits or more by the preceding fall, winter, spring and following summer quarters are eligible to participate in the June Commencement Ceremony. Students must submit an online graduation application and Commencement Participation form by the published deadline. Guest tickets (no charge) are required for the Commencement Ceremony, and each participating graduate receives four tickets that can be picked up at the Commencement Countdown event. Black cap and gown are required and can be purchased through the BTC Campus Store.

GENERAL EDUCATION REQUIREMENTS
General education courses are included in the programs to prepare students with communication, computation, and interpersonal skills required for success. All candidates for degrees and certificate options of one year (45 credits) or longer in length must satisfy the requirements for general education.

Each program has specific requirements unique to that field of study and employment or transfer. For specific General Education requirements, see individual program pages in the catalog, online at www.btc.edu/Degrees, in Degree Audit.

Minimum General Education Requirements
Certificates of 45 credits or more and Associate of Applied Science (AAS) degrees require a minimum of 3-5 credits in Communications, 3-5 credits in Mathematics, and 3-5 credits in Human Relations.

Associate of Applied Science-Transfer (AAS-T) degrees require a minimum of 5 credits in English Composition (ENGL 101 ), 5 credits in college-level Mathematics, and 10 credits in Science, Social Science or Humanities.

Direct Transfer Agreement/Major-Related Program (DTA/MRP) and Associate in Science-Transfer/Major-Related Program (AS-T/MRP) degrees require General Education to satisfy transfer requirements for universities. See requirements at www.btc.edu/degrees.

Bachelor of Applied Science degree requirements are posted at www.btc.edu/degrees.

Classes falling into each of the required categories are listed at www.btc.edu/Academics. Specific programs may be more prescriptive and require a particular class within one of these categories.
or may require additional General Education requirements. These requirements are catalog-year specific. Refer to program information at www.btc.edu/Degrees and talk with your advisor regarding particular requirements.

**STUDENT GRADES**

**GRADING POLICY**

BTC uses the following letter grading symbols:

<table>
<thead>
<tr>
<th>GRADE</th>
<th>POINT VALUE</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>

</tbody>
</table>

**INTERPRETATION OF GRADE SYMBOLS**

**A (4.0) Excellence in Achievement of Competency**

In relation to the standards set for the course, the student has done an exceptionally high level of work and has achieved all competencies.

**B (3.0) Above Average Achievement of Competency**

In relation to the standards set for the course, the student has significantly exceeded the average and has achieved all competencies.

**C (2.0) Average Achievement of Competency**

In relation to the standards set for the course, the student accomplished an average level of work and, at a minimum, has achieved all competencies.

**D (1.0) Below Average Achievement of Competency**

In relation to the standards set for the course, the student did not do average work and did not meet the minimum level competencies.

**F (0.0) Failure to Achieve Minimum Competency**

The student failed to progress toward minimum competencies and performed at exceptionally low level of skill. Student must repeat degree/certificate program course requirement in which an F grade has been earned.

**NOTE:** + and - symbols are used with traditional letter grades A through D to differentiate level of achievement within a grade range. The + symbol is not used with the letter grade A, the - symbol is no longer used with the letter grade D, and neither the + or - symbols are used with the letter grade F.

The following grades are also used when appropriate and are not calculated in the grade point average.

**AU - Audit**

This designation is used for continuing education courses only and must be requested by the student before the course begins or prior to the second class session. This grade is not used for academic courses or degree/certificate programs course requirements. No credit will be awarded for Audit classes. The student must pay regular tuition and fees.

**CR - Credit for Prior Experiential Learning/Academic Credit for Prior Learning (ACPL)**

Prior experiential learning is credit granted toward the award of a degree or certificate for prior learning experiences, demonstrated through various means of assessment, to be the equivalent of learning gained through formal collegiate instruction. Credits are earned.

**I - Incomplete**

The student completed a significant portion (75% or more) of the course requirements, but did not complete all requirements by the end of the quarter. For a student to receive a letter grade, a contract for completing the competencies must be established with the instructor and all work completed according to the contract within one year from the date the I grade was received. Failure to achieve satisfactory completion by the deadline will result in the grade changing from an I to an F.

**I with letter grade - In-Progress**

The student has completed a significant portion of the course at the time of grading and is performing at the level of the grade identified. In-Progress grades will post each quarter until all course requirements are completed. A final grade will be posted in the quarter of completion.

**NP - No Pass**

In relation to the standards set for the course, the student did not meet the requirements. No Pass is used for internship courses, work-based learning experiences, and clinical courses.

**P - Pass**

In relation to the standards set for the course, the student met all requirements. Pass/No Pass is used for internship courses, work-based learning experiences, and clinical courses. Credits are earned.
R - Repeat (after letter grade)
A grade qualifier that indicates the course has been repeated. Only the highest grade will compute into the cumulative GPA. This indicator appears after the letter grade of the lowest grade.

T - Transfer credit (valid grade prior to Summer Quarter 2009)
Transfer Credit granted for coursework completed from other regionally accredited institutions, as determined by the designated transcript evaluator or dean through evaluation of official transcripts. Effective Summer Quarter 2009, cumulative transfer credits will be noted on the student transcript.

V - Unofficial Withdrawal (valid grade prior to Fall Quarter 2010)
The student discontinued the course and did not officially withdraw.

W - Official Withdrawal
A system-awarded grade for students who officially withdraw from a course or program prior to the end of the quarter, or the designation of an administrative withdrawal of the student by the college.

GRADING POLICY/GRADING CHANGES
A grade posted on a student’s transcript is considered final. If a student believes there has been a grading error, it is the student’s responsibility to contact the instructor right away. Instructors can submit grade changes due to an error no more than four quarters following the end of the quarter. Grades can be viewed on myBTC portal or at www.btc.edu/transcripts within three business days of posting. Quarterly grades for all graded programs and courses are available from the time the grade was awarded.

COURSE REPEAT
- Students who repeat a course need to fill out a Course Repeat form at the time of registration. If registering online, students need to complete a Course Repeat form prior to the course end date.
- Students may not take a class more than three (3) times per state regulation (this is defined as two repeats in addition to the original enrollment). Students must meet with an advisor to develop an educational plan when they repeat a class a third time. Some programs may have more stringent restrictions for repeating courses (e.g. nursing). Courses with letter grades AU, CR, I, NP, T, or W, are excluded because these grades do not affect the GPA calculation and will remain on the transcript.
- The Repeat Symbol (R) indicates the course has been repeated. Only the highest grade will compute in the cumulative GPA. An R will be placed next to the lowest grade on the transcript.
- Students receiving financial aid or veterans benefits should consult the respective office(s) prior to repeating a course, as benefits or eligibility may be reduced or canceled as a result of the repeat.

GRADUATE AND TRANSCRIPTS
Quarterly grades for all graded programs and courses are available in myBTC portal or at www.btc.edu/transcripts within three business days following the end of the quarter. Grades can be viewed on unofficial transcripts. An unofficial transcript is an unsigned and unsealed copy of the student’s academic record and is available online. There is no charge for unofficial transcripts. The official transcript is a sealed copy of the student’s academic record bearing the college’s seal and the signature of the Registrar. Requests for official transcripts require a student signature and must be accompanied by the appropriate transcript fee. Official transcripts are requested online through the National Student Clearinghouse at www.getmytranscript.com
GED transcripts are available at www.ged.com

GRADE POINT AVERAGE (GPA)
Quarterly grade point averages are calculated as follows: 1. The number of credits for a course multiplied by the numerical grade awarded to obtain the grade points for that course. 2. Add the grade points for all courses taken. 3. Divide the sum of the grade points earned by the total number of credits attempted in course awarding numerical grades to obtain the GPA for a particular quarter. AU, CR, I, P/NP, T, and W grades are not used in computing grade point average.

ACADEMIC ACHIEVEMENT

Dean’s List - Students who carry a 12-credit load or more in graded courses and who earn a quarterly grade point average of 3.75 or higher are placed on the Dean’s List for the quarter.

Honors Designation Awarded to each full-time student enrolled in a degree with a cumulative grade point average of 3.50 or higher at the completion of all degree requirements. Full-time is defined as being enrolled for a minimum of 12 credits per quarter.

- Cum Laude: with honor
  3.50-3.74 cumulative GPA
- Magna Cum Laude: with great honor
  3.75-3.89 cumulative GPA
- Summa Cum Laude: with highest honor
  3.90-4.00 cumulative GPA

Certificate of Merit - Full- or part-time degree/certificate program students who demonstrate academic and/or program excellence in their program may be awarded the Certificate of Merit by full-time program faculty upon program completion. The Certificate of Merit will be awarded one per full time faculty each academic year per cohort of graduates. Certificate of Merit recipients are announced at the June Commencement Ceremony.

Phi Theta Kappa - This is the international honor society for two year colleges. Its primary goal is to recognize and encourage scholarship among associate degree students. To be eligible, a student must:
- Be a full-time student without an advanced degree
- Completed at least 15 credits of coursework towards an associate degree
- Have a GPA of 3.5 at the time of membership application
- Pay a membership fee

ACADEMIC STANDARDS AND PROGRESS

ACADEMIC PROGRESS
The primary objective of Bellingham Technical College is to prepare an educated workforce. In educating students, BTC stresses equally the development of technical skills, communication and interpersonal skills, positive work habits, and attitudes that are
required for employment. In light of this, BTC expects that students demonstrate academic progress.

In 2003, the Legislature of the State of Washington established a law requiring colleges to develop policies to ensure that undergraduate students complete degree and certificate programs in a timely manner in order to make the most efficient use of instructional resources and provide capacity within the institution for additional students.

ACADEMIC STANDARDS/CREDIT COMPLETION POLICY

Students who wish to graduate and receive a degree or certificate must earn a quarterly grade point average of 2.0 or better in the program course requirements for the specific degree or certificate. In order to demonstrate satisfactory progress:

1. All students will maintain regular attendance for each enrollment period. See Attendance below.

2. All students will demonstrate satisfactory progress toward meeting program objectives. This standard is defined as maintaining a quarterly grade point average minimum of 2.0*.

* Individual programs may require higher-level grades in program or individual course requirements in defining satisfactory progress. These requirements will be published and made available to students upon enrollment in the program.

ACADEMIC ALERT/PROBATION/SUSPENSION/READMISSION

Students who do not demonstrate satisfactory progress as defined above will be placed on academic alert and notified of their status. Students who do not demonstrate satisfactory progress for the following quarter will be placed on academic probation, notified of their status and required to complete an Academic Improvement Plan to their assigned point of contact. Future enrollment will be blocked until the assigned point of contact approves the plan. Students will be suspended after three consecutive quarters of unsatisfactory progress, notified and their future enrollment blocked.

Students who have been suspended as a result of unsatisfactory academic progress may petition for readmission. The suspended student will be required to meet with the appropriate program Dean to complete a plan for academic re-admission by the 5th instructional day of the quarter. The Dean reviews appeals on a case by case basis and may grant an appeal allowing the student to continue under certain circumstances, or deny the appeal.

ATTENDANCE

Regular attendance is required to maintain satisfactory academic progress. This standard is reflected in the grading policy with each degree/certificate program or course syllabus. BTC believes that attendance is a critical workplace competency and is important to overall student success. It is important that students attend all scheduled classes or notify their instructor of any absences.

Students who fail to attend and there is no class participation in a course activity by the second day of class, may be dropped from class by the Instructor as a No Show.

It is the student’s responsibility to officially withdraw from a class and review their Student Schedule for accuracy.

STUDENT RECORDS

NOTIFICATION OF RIGHTS UNDER FERPA PRIVACY OF RECORDS/RELEASING OF INFORMATION

Bellingham Technical College policy on privacy of records and releasing of information follows the directives outlined in the Family Educational Rights and Privacy Act (FERPA), the federal law governing the protection of educational records. Registered students will be notified of this policy on an annual basis. Others can find the policy in the Bellingham Technical College catalog and website.

Personally identifiable information will not be released from an education record without the prior written consent of the student, unless an exception has been granted by FERPA (see Exceptions under FERPA section below).

RIGHTS UNDER FERPA

FERPA affords students certain rights with respect to their education records:

1. The right to inspect and review the student’s education records within forty-five (45) days of the day the college receives a request for access.

Students should present to the Director of Registration and Enrollment a signed, written request that identifies the record(s) they wish to inspect. The Director of Registration and Enrollment will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the Director of Registration and Enrollment, the director shall advise the student of the college official to whom the request should be addressed. At the time of viewing, the student shall present a form of picture identification, such as a valid driver’s license, before being allowed to view the record.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading.

Students may ask the college to amend a record they believe is inaccurate or misleading. Students should request forms for this purpose from the Director of Registration and Enrollment. Students should clearly identify the part of the record they want changed and specify why it is inaccurate or misleading. If the college decides not to amend the record as requested by the student, the college will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent (see Exceptions under FERPA below).

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures of the college to comply with the requirements of FERPA.

The office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue SW
Washington D.C. 20202-5920

www.btc.edu
EXCEPTIONS UNDER FERPA
Under certain conditions, as authorized by FERPA, information can be released without student consent:

DIRECTORY INFORMATION
The term directory information is a legal term applying to that information the college can release, without student consent, to any third party, with the exception of GED candidates or graduates, and subject to college staff approval. The use of the term directory information does not imply that the college actually has documents containing student directory information or that the college has any obligation to produce such a document. It is the college’s practice not to provide student contact lists to third parties.

BTC has defined directory information as the following:

- Student name
- Student e-mail addresses
- Program of enrollment
- Full-time or part-time status
- Period of enrollment
- Date of completion
- Degree/certificate awarded
- Photos/videos of student for use in college press releases, publications, and websites

The fact that a person has or has not taken a GED test will be treated as confidential information. This information will be released only with written permission by the GED candidate or graduate.

Students have the right to restrict the disclosure of directory information at any time. To restrict the disclosure of directory information, a student may file a signed written request with the Director of Registration and Enrollment. This request to restrict disclosure of directory information will be honored until such time as the student presents signed written notification to the Director of Registration and Enrollment to remove the restriction. A student name will not appear in the Commencement program or any press releases, no degree or enrollment verifications will be processed for a third party and the ability to register online will need to be arranged.

U.S. MILITARY
According to federal law, the college must release to the U.S. Armed Forces student name, address, phone number, date of birth, and field of study. To restrict the disclosure of this information, a student may file a signed written request with the Director of Registration and Enrollment.

AUTHORIZED FEDERAL, STATE, AND LOCAL AUTHORITIES
Student authorization is not required for disclosure to an authorized representative of the following individuals or entities:

- The Comptroller General of the United States
- The Secretary of the U.S. Department of Education
- State educational authorities
- Any party legitimately connected with the student’s application for or receipt of financial aid
- Accrediting organizations
- Agencies involving an audit or evaluation of compliance with education programs
- Organizations conducting studies for or on behalf of educational institutions

OTHER INSTITUTIONS
Information can be released to other schools to which a student seeks or intends to enroll.

EMERGENCY SITUATIONS
In an emergency, information can be released to law enforcement personnel, emergency personnel, and college officials in order to protect the health or safety of students or other persons.

LEGITIMATE EDUCATIONAL INTEREST
Officials of the college who are determined by the college to have a legitimate educational interest may have access to student records without obtaining consent from the student. Officials of the college is defined as:

- Persons employed by the college in an administrative, supervisory, academic, research, or support staff position
- Persons serving on college governing bodies
- Persons employed by or under contract to the college to perform a specific task, such as an attorney
- Auditors
- Persons or companies with whom the college has contracted, such as attorneys, third party services (such as National Student Clearinghouse or BankMobile, auditors, or collection agencies)
- Persons serving on the Board of Trustees
- Students serving on official committees (such as a disciplinary or grievance committee) or who are assisting other school officials in performing their tasks

Officials of the college have a legitimate educational interest if they need to:

- Perform duties specified in their job description or under terms of contractual agreement
- Provide campus services related to a student, such as advising, financial aid, and counseling
- Conduct tasks related to a student’s education or campus discipline

JUDICIAL ORDER
Information must be released to comply with a judicial order or lawfully issued subpoena. The college will make a reasonable effort to notify the student of the order or subpoena in advance of compliance, so that the student may seek protective action. However, if the court (or other issuing agency) has ordered that the existence or the contents of the subpoena or judicial order not be disclosed, the college will comply, and notification to the student will be withheld.

Grievance hearing information about a student or students involved in a grievance investigation or grievance hearing may be released to members of the Grievance Committee, including any students assigned to that committee, if such information is germane to the investigation or hearing.
DISCIPLINARY HEARING
The results of a disciplinary hearing may be released to an alleged victim of a crime of violence without the permission of the accused.

BELLINGHAM TECHNICAL COLLEGE FOUNDATION
Student names and addresses may be released to the Bellingham Technical College Foundation for foundation-related activities. The Foundation is considered part of the college and will hold confidential such information, using the information only in specific activities intended to aid and support the college. Release of such information to the Foundation will be made only with the approval of the college president or his/her designee.

U.S. PATRIOT ACT
The college must release, without consent or knowledge of the student, personally identifiable information from a student’s education record to the Attorney General of the United States or his/her designee in connection with the investigation or prosecution of terrorism crimes specified in sections 233b (g)(5)(B) and 2331 of Title 18, U.S. Code.

WRITTEN RELEASE
Personnel employed by the college who have consent in the form of a written release of information signed by the student may disclose student information to appropriate outside agencies or persons.

STUDENT RIGHTS & RESPONSIBILITIES

DISCRIMINATION AND HARASSMENT
Bellingham Technical College is committed to providing a learning and working environment characterized by mutual respect and fair treatment among all its constituents. An essential component of this environment is a strong ethic and practice of equality, acceptance, and nondiscriminatory interactions. Harassment or discrimination on the basis of race, color, sex, gender, gender identity or manifestation, sexual orientation, religion, age, marital status, national origin, disability, veteran’s status, or any other basis prohibited by college policy or by state or federal laws is unacceptable and will be addressed through this policy.

According to federal law, “No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any educational program or activity receiving Federal financial assistance.”

Furthermore, Bellingham Technical College strives to provide a safe environment in which students and employees can pursue their education and/or employment free from the detrimental effects of sexual misconduct, which includes, but is not limited to, sexual harassment, domestic violence, intimate partner violence, stalking, sexual assault, and other forms of non-consensual sexual behavior.

Sex- and gender-based harassment, discrimination or violence will be addressed through the College’s Grievance Rules- Discrimination and Harassment available online (Grievance Rules- Discrimination and Harassment).

STUDENT CONDUCT CODE

DEFINITION OF GRIEVANCE
A grievance is a complaint by a student against a policy or practice of the college or college staff that is considered improper or unfair or where there has been deviation from or misinterpretation or misapplication of a practice or policy.

GRIEVANCE PROCEDURE

A. A student wishing to pursue a grievance must take the following steps to try to resolve the grievance prior to filling out an official complaint form.

1. The student will first try to resolve the matter with the appropriate BTC staff member.

2. If resolution is not achieved between the student and the BTC staff member, the student will ask the staff member’s immediate supervisor to resolve the grievance.

3. If resolution is not achieved at the supervisory level, the student will ask the supervisor’s vice president to resolve the grievance.

4. If resolution is not achieved at this point, the student may file a complaint using the appropriate complaint forms. An appointment must be made with the Vice President of Student Services or a designee to obtain the necessary forms and information.

B. Complaints must be filed with the Vice President of Student Services or a designee to obtain the necessary forms and information.

Office of the Title IX Coordinator for BTC: 360.752.8440 or titleIX@btc.edu

Office of the Equal Employment Opportunity/Affirmative Action Officer for BTC: 360.752.8549 or hr@btc.edu

STUDENT CONDUCT CODE

All students are subject to the Bellingham Technical College Student Conduct Code published in Chapter 495B-121 of the Washington Administrative Code and as defined in this catalog.

Copies of the entire Student Conduct Code are published and available to students and the campus community in the Admissions and Student Resource Center and the Office of the Vice President of Student Services and are available on the BTC website Student Resources page.

Enrollment in the college carries with it the requirement that the student will conduct himself or herself as a responsible member of the community. This includes an expectation that the student will obey appropriate laws, will comply with the rules of the college and its departments, and will maintain a high standard of integrity and honesty. Sanctions for violations of college rules or for conduct that interferes with the operation of college affairs will be dealt with by the college, and the college may impose sanctions independently of any action taken by civil or criminal authorities. In the case of minors, misconduct may be referred to parents or legal guardians.

Disciplinary action may be taken for a violation of any provision of the student code or violation of other college rules.
Services or a designee.

C. Complaints must be filed within twenty (20) school days of the date of the action causing the complaint.

D. The student will receive acknowledgment of the filing of a formal, written complaint. The student may withdraw the complaint at any point during the formal procedure. The Vice President of Student Services or a designee will notify the person(s) against whom the complaint has been filed (hereafter referred to as the staff member). The staff member will also receive a copy of the complaint.

E. A Grievance Committee will be appointed bi-annually by the college President and will consist of five individuals representing the various college constituencies. The committee will be made up of one administrator, two faculty members, and two support staff members. The complainant may request student representation on the committee. If requested, the President may select two students to substitute for a like number of existing members of the committee. Members of the Grievance Committee will remove themselves from the process if they deem themselves biased or personally interested in the outcome of grievance.

F. The Vice President of Student Services or a designee will serve as the investigating officer in the complaint.

G. The investigating officer will:
   1. Meet with the student and the staff member.
   2. Examine documentation and interview witnesses.
   3. Consult with the appropriate vice president, or equivalent unit head and/or other appropriate administrator.
   4. Prepare a written investigative report.

H. The investigating officer may meet individually with the student and the staff member to discuss the report in the hope that a resolution can be reached. If a resolution is not achieved, copies of the investigative report will be forwarded to the Grievance Committee, the student, the staff member, and the appropriate administrator(s).

I. The Grievance Committee will review the complaint and the findings of the investigating officer and determine whether or not the facts warrant a hearing. The committee’s decision will be limited to one of the following statements:
   1. Based on the evidence presented to us, we find probable cause for believing that an improper or unfair practice or act has been committed.
   2. Based on the evidence presented, we find no probable cause for believing that an improper or unfair practice or act has been committed.

The committee will make its report in writing to the Vice President of Student Services or a designee after receipt of the report by the investigating officer. The deliberations of the committee will not be disclosed to anyone except the Vice President of Student Services or a designee who will hold them confidential.

J. If no probable cause is found, the matter will be considered concluded. However, the student may submit a written appeal to the President within ten (10) working days from the date the decision is made. The appeal must specify in detail what findings, recommendations, or other aspects of the report or decision were not acceptable. The appeal should also include what corrective action the student desires after consideration of the appeal by the President. The President may uphold the decision of the committee; at that point no further appeals within the college will be considered. Or, the President may instruct the committee to go forward with the grievance hearing process.

K. If probable cause is found, a hearing will be held.
   1. The committee will select a chair. The chair of the committee will establish a date for the hearing. A notice establishing the date, time, and place of the hearing will be provided to all involved parties.
   2. The hearing will be held within thirty (30) working days from the date of the hearing notice.
   3. The student and the staff member will each have the privilege to challenge one member of the committee without cause (stated reason). Unlimited challenges may be issued if it is felt that a member of the committee is biased. In the case of a challenge for bias, a majority of the Grievance Committee members must be satisfied that a challenged member cannot hear the case impartially before the member can be disqualified. In the case of removal of a member through the challenge process, the President will restore the committee to full membership.
   4. The hearing will be conducted as expeditiously as possible and on successive days, if possible.
   5. The student and the staff member and any others the committee deems necessary to the proceedings will make themselves available to appear at the proceedings unless they can verify to the committee that their absence is unavoidable.
   6. The student and the staff member will be permitted to have with him/her a party of his/her own choosing to act as advisor and counsel. The hearing may be monitored by the Assistant Attorney General assigned to the college.
   7. The hearing will be closed to all except those persons directly involved in the case as determined by the Grievance Committee. Statements, testimony, and all other evidence given at the hearing will be confidential and will not be released to anyone and may be used by the committee only for the purpose of making its findings and recommendations to the President.
   8. The chair of the Grievance Committee will convene and regulate the proceedings. The student, the staff member, and the members of the hearing panel must be present during the proceedings, unless excused by the chair for good cause. Repeated failure, without reasonable explanation, of either the student or the staff member to appear will be grounds for defaulting that party’s case. The student will have the burden of presenting the case and the staff member will have the burden of challenging the evidence presented.
      a. All parties will have the opportunity to present evidence, respond to evidence presented, and examine and cross-examine witnesses.
      b. The hearing panel will be empowered to examine witnesses and receive evidence; exclude any person(s) felt to be unreasonably disruptive of the proceedings; hold conferences for the settlement of the issues involved; make decisions or proposals for decisions; and take any other actions authorized by the rule consistent with this procedure.
c. No individual will be compelled to divulge information in any form that he/she could not be compelled to divulge in or in connection with court proceedings.

d. Any legal opinion or interpretation given to the Grievance Committee by the parties may be shared with all parties to the case.

e. The Grievance Committee will file its findings and recommendations with the President, the Vice President of Student Services, the student, and the staff member after the conclusion of the hearing. If the findings and recommendations of the Grievance Committee are acceptable to the student and the staff member, the President may direct implementation of the recommendations.

f. If the student or staff member objects to the findings, a written appeal may be submitted to the President within ten (10) working days from the date the finding is issued. The appeal should also include what corrective action the student or staff member desires after consideration of the appeal by the President.

g. After considering an appeal, the President will issue a decision to the parties involved. The decision of the President will be final and no further appeals within the college will be considered.

ABSENCES DUE TO FAITH OR CONSCIENCE

According to RCW 288.10.039 Bellingham Technical College will grant reasonable accommodation so that grades are not impacted for students who are absent for reasons of faith or conscience, or for organized activities conducted under the auspices of a religious denomination, church, or religious organization. Such absences must be requested in writing to instructors within the first two weeks of the quarter and may not incur additional fees for students. Faculty must include the approved language referencing this policy in their syllabi.

If the student has concerns about approval or grade impact they may utilize the student complaint/grievance process, as outlined in BTC Student Grievance or Complaint Procedure (419.0).

See BTC’s website for the college’s full updated Religious Observance Policy.

CHILDREN ON CAMPUS

No employee, student, or visitor to the College should leave a child unattended at the College including in campus buildings, on campus grounds or in a vehicle. Children are not permitted in classrooms, the library, or other learning environments except with the specific approval of the appropriate instructional Dean, or the Vice President of Instruction on an emergency basis, and for a specified and limited period of time. Children are not allowed in areas where dangerous equipment is operated and/or where chemicals, cleaning products, solvents or hazardous products are stored or used.

SERVICE ANIMALS

POLICY

In compliance with state and federal laws, service animals are permitted on Bellingham Technical College’s premises or in facilities. This affords individuals with disabilities who require the assistance of a service animal equal opportunity for access to the college facilities, courses, programs, and activities.

Individuals whose animals do not meet the criteria of service animal by state and federal laws are encouraged to consult with the Accessibility Resources Office.

DEFINITIONS

Service Animal

- A dog or miniature horse trained to do work or perform tasks for an individual with a disability. The trained tasks directly mitigate the effects of the disability. Disabilities may be physical, sensory, psychological, intellectual, or other mental disabilities.

Handler

- The person with a disability who has control, custody, or possession of the Service Animal that has been trained to perform tasks for that individual.

Physical Control

- Control by means of a leash or other restraining device held by the handler. Service Animals must be under control of the Handler at all times.

Emotional Support Animal (ESA)

- An animal that provides emotional or passive comfort alleviating one or more of the identified symptoms or effects of a disability. An Emotional Support Animal is not a service animal under this policy.

STUDENT IDENTIFICATION NUMBERS

In accordance with Washington State Law SB5509, BTC uses randomly assigned Student Identification (SID) numbers as the primary identifier for students’ academic records. This law is intended to add additional protection to students’ identity, records, and privacy.

In response to Senate Bill 5463 the 34 Washington State Community and Technical Colleges modified how SIDs are assigned to new students. The purpose of this change is to move toward a common SID across the system, where students eventually will have one single SID regardless of which and how many colleges in the system they attend.

Students may have the same student ID assigned that was assigned at a previously attended college when they provide a correct social security number. This common SID process only affects students who apply to colleges as of 12/16/2011. It does not apply to previously applied or attended colleges within the Washington State Community and Technical college system.

Although a student’s social security number (SSN) will not be listed as the primary student identifier, the college will still need to record it for a number of uses including financial aid, tax credits, employment verification, workforce or unemployment data, assessment/ accountability research projects authorized by the college and/or the state of Washington, transcripts, and other legitimate uses authorized under state law and/or federal law.

STUDENT BODY CARDS

BTC student body cards are available in the Student Center, Campus Center 300. The picture identification card includes the student identification (SID) number, which may be needed for registration, library usage, and other campus functions. It may also entitle the student to some community/retail discounts.
STUDENT RIGHTS

All students at Bellingham Technical College shall have the right to pursue professional technical education in the area of their choice within the established college standards and policies.

STUDENT RIGHT TO KNOW AND CAMPUS SECURITY ACTS

In compliance with Public Law 101-542, the Student Right To Know Act and Campus Security Act, as amended by Public Law 102-26 (Higher Education Technical Amendments Act of 1991), Bellingham Technical College provides students with information about the student completion rates for the institution, as well as substance abuse prevention information, campus crimes, and security. All of this information is provided to students by e-mail and is also available on the college’s website: www.btc.edu.

The college is not responsible for lost or stolen articles. Students use campus lockers at their own risk.

The Lost and Found is located at the Library in the Campus Center Building.

TRANSFERRING & EARNING CREDITS

CREDIT ACCEPTANCE POLICY

Transfer credit is granted for coursework that matches in content a course required for a BTC program. Only courses completed at a regionally accredited college or university with an earned grade of C (2.0) or higher will be considered for transfer credit. Recency of coursework may be considered in acceptance of transfer credit. Transfer credit may not exceed fifty percent (50%) of the total credits required for the degree or certificate.

BTC does not release or certify copies of transcripts from other institutions. Transcripts reflecting a student’s previous secondary and college education, which have been submitted to BTC as part of the official file, will not be returned to the student. Students who need transcripts of course work completed elsewhere must order transcripts directly from the institution where the work was completed.

CREDIT EVALUATION PROCEDURES

Students seeking transfer credit must submit official, sealed transcripts from the sending institution to the Admissions and Student Resource Center. The form and the official transcript will be reviewed by the college-designated transcript evaluator. Processing typically takes 10-15 business days and may take longer during peak registration periods. It is recommended that students plan ahead and send records in advance of the quarter they plan to attend. For some courses, course syllabi or other descriptive information may be required in addition to an official transcript.

TECHNICAL COURSE REQUIREMENTS

Students seeking transfer credit for technical courses must submit an official transcript or equivalent documentation to the Admissions and Student Resource Center. Program faculty will be consulted to evaluate and determine credit granted for equivalent technical content.

GENERAL EDUCATION COURSES

Students must submit official, sealed transcripts to the Admissions and Student Resource Center for evaluation and approval of credit granted for equivalent general education content. The form and the official transcript will be reviewed by the college-designated transcript evaluator.

ACADEMIC CREDIT FOR PRIOR LEARNING

Washington State is committed to fostering an educated and skilled workforce, which is essential for economic prosperity and meaningful work for its citizens. Increased enrollment in – and successful completion of – postsecondary learning programs is critical to achieving that goal. Academic Credit for Prior Learning, or ACPL, can help more students complete their training and degree programs sooner by evaluating an individual’s existing knowledge and competencies for college credit, including knowledge that may have been acquired through documented military training.

ACPL credits have the following limitations:

- Prior experiential learning (Portfolio) credits can comprise no more than 25% of the credits used to complete a degree or certificate
- ACPL credits are not eligible for Financial Aid and do not count towards full or part time enrollment
- ACPL credits are not eligible for payment through Running Start
- ACPL credits do not count toward residence requirements
- Only students who have completed the BTC admission process will be eligible to earn ACPL credits

CREDIT BY EVALUATION (STANDARDIZED TESTING)

Advanced Placement (AP) Credit

Students who have completed college-level Advanced Placement courses in high school and have taken the Advanced Placement (AP) exams administered by the College Board may receive college credit in selected courses at BTC. A note will appear on the transcript. To request credit based on AP scores, students must submit either official AP test scores from the College Board or official high school transcripts containing AP scores to the Admissions and Student Resource Center. Credit will be awarded according to the Advanced Placement Credit Chart which outlines the minimum required scores and corresponding courses located online at www.btc.edu

International Baccalaureate (IB) Credit

Students who have completed International Baccalaureate courses in high school may receive college credit for selected courses at BTC. A note will appear on the transcript.

To request credit based on IB scores, students must submit official scores from the International Baccalaureate to the Admissions and Student Resource Center. See the college website for additional information at www.btc.edu

College Level Examination Program (CLEP) Credit

Students who have taken College Level Examination Program (CLEP) exams may receive credit. By obtaining a particular score, recommended by the American Council of Education (ACE), students can obtain college credit. To request credit for CLEP scores, students must submit official CLEP scores to the Admissions and Student Resource Center. A note will appear on the transcript. Credit will not be granted for scores below the ACE recommended score. See the
college website for additional information at www.btc.edu
Other commonly accepted documented exams such as Dantes Subject Standardized Tests (DSST) may also be accepted. Contact the ACPL coordinator for more information.

CREDIT BY EXAMINATION (COURSE CHALLENGE)
The course challenge is a process permitting students to receive credit in courses in which the student demonstrates the knowledge and expertise of that course. Not all courses have a challenge procedure. Contact the ACPL coordinator to discuss the process for challenging a specific course. Course challenges require a per credit fee be paid to the Cashier prior to completing the challenge. Programs will determine the grade required to pass the course challenge.

ASSESSMENT OF PRIOR EXPERIENTIAL LEARNING (PORTFOLIO)
Credit for Prior Experiential Learning allows students to receive credit for program course requirements in which the student demonstrates knowledge and expertise that meets the outcomes of each course. Credit for prior experiences can be shown through various means of assessment; however, these experiences must be equivalent to learning gained through formal collegiate instruction. This experience may include industry certifications, work experiences, and similar out-of-classroom learning.

Prior learning credit is only available for some degree or certificate programs. Credit for prior experiential learning cannot duplicate credit granted by transfer or previously graded work. Contact the ACPL coordinator to discuss the process.

EXTRA-INSTITUTIONAL LEARNING
BTC accepts certain credentials from institutions other than regionally accredited colleges for credit. Students should provide documentation to the ACPL Coordinator for evaluation. Program faculty and the ACPL Coordinator may approve credit awards for additional credentials as appropriate.

AWARDING CREDIT FOR MILITARY TRAINING
BTC enrolled students who are veterans of any branch of the United States armed services must request transfer credit for military training by submitting a Transcript Evaluation Request form to the Transcript Evaluator. The student must provide official Joint Services Transcript (JST), from the Community College of the Air Force transcript or any other college/university attended.

Per the Veteran's Administration, all veteran student transfer credit must be evaluated within two quarters of program start. After the third quarter, if the student does not submit all transcripts, the students must be decertified and the use of VA education benefits.

Veteran students using education benefits are not permitted to opt out of prior credit evaluation.

DEGREE AND CERTIFICATE PROGRAM CHANGE
For students who want to change program, add a program, or transfer to a different program, the first step is to discuss the possibility of a program change with a BTC Advisor. Staff will assist with requirements needed for the new program, discuss a revised educational plan, and provide the steps for a program change. A Program Change & Dual Enrollment Request form must be completed and submitted to the Admissions & Student Resource Center.

Those receiving financial aid or other funding should determine the effect of the change on funding status prior to initiating the change. If you change your class schedule, you will be responsible to pay any additional tuition and fees.

The maximum number of programs you may work on simultaneously is two (2) programs.

TRANSFERABILITY OF BTC CREDITS
To determine transferability of credits earned at Bellingham Technical College, students must request that an official BTC transcript be forwarded to the college where they want to have credits evaluated. The receiving college will determine the value of coursework completed at BTC. Contact the receiving college for evaluation information and instructions. Official BTC transcripts are ordered online through the National Student Clearinghouse at www.getmytranscript.com. The "&" in a BTC course prefix designates Washington State Community and Technical College Common Course Numbering (CCN). Common Course Numbering identifies those courses common within the 34 community and technical colleges in Washington State and to make course transfer between those institutions and to four-year colleges and universities as easy as possible for students, advisors, and receiving institutions.

Credits, qualifications, or requirements waived by one college may not necessarily be waived by another college. Those decisions are made at each institution.

Upon student application, each college evaluates and, if appropriate, transfers recognized or accepted credits that apply to the area of study for which the student has applied. The enrolling college determines transfer of credits earned elsewhere. When applicable, students may be accepted for advanced placement or receive a waiver of coursework.

TRANSFER RIGHTS AND RESPONSIBILITIES

STUDENT RIGHTS AND RESPONSIBILITIES
1. Students have the right to clear, accurate, and current information about their transfer admission requirements, transfer admission deadlines, degree requirements, and transfer policies that include course equivalencies.
2. Transfer and freshman-entry students have the right to expect comparable standards for regular admission to programs and comparable program requirements.
3. Students have the right to seek clarification regarding their transfer evaluation and may request the reconsideration of any aspect of that evaluation. In response, the college will follow established practices and processes for reviewing its transfer credit decisions.
4. Students who encounter other transfer difficulties have the right to seek resolution. Each institution will have a defined process for resolution that is published and readily available to students.
5. Students have the responsibility to complete all materials required for admission and to submit the application on or before the published deadlines.
6. Students have the responsibility to plan their courses of study
by referring to the specific published degree requirements of the college or academic program in which they intend to earn a bachelor’s degree.

7. When a student changes a major or degree program, the student assumes full responsibility for meeting the new requirements.

8. Students who complete the general education requirements at any public four-year institution will have met the lower division general education requirements of the institution to which they transfer.

COLLEGE AND UNIVERSITY RIGHTS AND RESPONSIBILITIES

1. Colleges and universities have the right and authority to determine program requirements and course offerings in accordance with their institutional missions.

2. Colleges and universities have the responsibility to communicate and publish their requirements and course offerings to students and the public, including information about student transfer rights and responsibilities.

3. Colleges and universities have the responsibility to communicate their admission and transfer-related decisions to students in writing (electronic or paper).

ARTICULATION AGREEMENTS

Through county-wide agreements with school district superintendents and BTC, students may enroll in classes to receive high school and college credit at the same time. These articulation agreements are managed through the Whatcom County CTE Dual Credit Consortium and provide opportunities for high school students under five career pathways: science and natural resources, arts and communications, business and marketing, engineering and technology, and health and human services.

Participating schools and colleges must assure compliance with all applicable state regulations and the federal requirements of Title VI of the Civil Rights Act of 1964; Title IX of the Education Amendments of 1972; the American Disabilities Act of 1991, Section 504 of the Vocational Rehabilitation Act of 1973; and the Age Discrimination Act of 1975.

COPYRIGHT POLICY:

It is the intent of Bellingham Technical College that all members of the College community adhere to the provisions of the United States Copyright Law (Title 17, United States Code, Sect. 101 et seq.). Bellingham Technical College recognizes the Copyright Act of 1976 and subsequent amendments including Guidelines for Off-the-Air Recording of Broadcast Programming for Education Purposes, The Digital Millennium Copyright Act of 1998, and The TEACH Act, which grants authors, publishers, and creators control over the copying, distribution, and performance of their original works. Bellingham Technical College recognizes the importance of the Fair Use doctrine (Section 107 of the Copyright Act of 1976); all staff and faculty shall be responsible for acquainting themselves with its provisions so that the guidelines are followed when copying is done.
COLLEGE READINESS AND SUCCESS

TRANSITIONAL STUDIES

Building A
Email: ts@btc.edu
Phone: 360.752.8494

The mission of the Transitional Studies program is to prepare students for lifelong success by facilitating basic academic learning, college preparation, and workplace behaviors and attitudes. The Transitional Studies program offers:

• Adult Basic Education (ABE) including reading, writing, and math
• High School Equivalency preparation (GED or High School diploma)
• Youth Re-engagement Program (IMPACT!)
• High School Completion (HS21+)
• English as a Second Language (ESL) for immigrants and Limited English Proficient (LEP) clients
• Career Pathway planning
• Integrated Basic Education and Skills Training (I-BEST)

The Transitional Studies program is open to adults who meet the following requirements:

• Complete a basic academic skills assessment (CASAS)
• Participate in orientation sessions
• Commit to regular attendance
• Have ability to participate positively in an adult learning environment
• 16 years or older and not enrolled in a K-12 school

DEVELOPMENTAL EDUCATION AND SUCCESS

Developmental education classes are courses often required as prerequisite to college-level (100 and higher) courses, but are not college-level.

• Math-Pre-Algebra, Beginning Algebra, Intermediate Algebra
• English-Reading Skills, Fundamentals of English
• College Success

ACCOUNTING

OVERVIEW

Choose Bellingham Technical College’s Accounting program to prepare to get top accounting jobs. Employment choices are extensive in the high-demand field of accounting and financial jobs with this associate degree; you could work in a variety of office and business settings doing full-service bookkeeping, accounts receivable/payable, general ledgers, or payroll. If you’re good with numbers and have a high attention to detail, BTC’s associate degree Accounting Program will provide you a wide range of skills to use with top employers. Our graduates find bookkeeper and accountant jobs at wholesale firms and retail businesses; in local, state, and federal government; with service providers; and with health and education organizations.

PROGRAM OUTCOMES

After successfully completing this program, students will be able to:

• Use Generally Accepted Accounting Principles for sole proprietorships to analyze and record business transactions and prepare financial statements for both a service and a merchandising business.
• Competently use an integrated accounting software program to record transactions and create financial reports and statements.
• Demonstrate the ability to apply payroll laws, compute payroll, record payroll entries and prepare federal and state forms that pertain to payroll.
• Use Generally Accepted Accounting Principles for partnerships and corporations to analyze and record business transactions; prepare and evaluate financial statements.
• Interpret and apply managerial accounting information in various business decision-making roles.
• Use a spreadsheet program to solve business problems using formulas, functions, lists, and charts.
• Apply communication and interpersonal skills in a business environment while providing effective accounting support to an employer.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE

PLACEMENT REQUIREMENTS

Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS

Accounting Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and a minimum grade of C/2.0 in all courses.

ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.

ADMINISTRATIVE ASSISTANT

OVERVIEW
Train for a career as an administrative assistant, administrative secretary, office administrator, or office manager and work in your choice of business and office settings. BTC’s Administrative Assistant program will prepare you for success in today’s business world, as you use your math, communication, and technical reading skills—and discover your personal strengths. The Administrative Assistant program will give you the hands-on and classroom instruction that all kinds of employers need. You could work in service firms like education and health, legal and finance, insurance or real estate. Manufacturing, construction, and transportation companies also hire skilled administrative assistants.

PROGRAM OUTCOMES
After successfully completing this program, students will be able to:
- Type 35 words per minute with no more than four errors on a three-minute timed writing.
- Produce accurate business documents in a variety of formats using computer technology and applying editing and language skills.
- Use a spreadsheet program to solve business problems using formulas, functions, lists, and charts.
- Apply techniques for managing time, records, and meetings in an office environment.
- Organize records according to ARMA rules and procedures.
- Use Microsoft Outlook to create electronic messages and contacts, manage multiple calendars, and track tasks.
- Design and create a relational database that includes tables, multiple form types, simple and action queries, and reports
- Integrate Microsoft Access and Word to prepare a mail merge for form letters, mailing labels, and envelopes.
- Apply communication and interpersonal skills while providing effective administrative support in an office environment.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Administrative Assistant Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and a minimum grade of C/2.0 in all courses.

ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.

OVERVIEW
Love cars and want to make fixing them your career? Bellingham Technical College’s Automotive Collision Repair Technology program will give you training for a career as an automotive collision repair technician, automotive glass specialist, painter, or auto body repair shop manager. BTC’s automotive classes will train you for all aspects of automotive repair, using the latest technological processes and equipment in our full-service shop. Your training will include trade-specific skills, such as how to repair and refinish damaged vehicles.

BTC’s Auto Collision Repair program will train you with hands-on instruction that will earn you top jobs with employers such as independent automotive repair shops, car detailing shops, automotive manufacturers, automotive recyclers, and more.

The Auto Collision Repair Technology program is an I-CAR Industry Training Alliance member.

PROGRAM OUTCOMES
Graduates of the Automotive Collision Repair Technology AAS and AAS-T Degree Program will be able to:

- Use basic industry tools, equipment and hazardous materials safely;
- Diagnose and repair basic non-structural auto body damage to I-CAR standards;
- Assess damaged vehicles and perform structural auto body repairs to I-CAR standards;
- Diagnose and repair various types of plastic and composites used in the automotive industry;
- Refinish various substrates to pre-accident condition;
- Obtain I-CAR aluminum welding certification;
- Obtain I-CAR steel welding certification.

Graduates of the Automotive Collision Repair Technology Non-Structural Repair Certificate Program will be able to:

- Use basic industry tools, equipment and hazardous materials safely;
- Diagnose and repair basic non-structural auto body damage to I-CAR standards;
- Diagnose and repair various types of plastic and composites used in the automotive industry;
- Apply basic refinishing concepts to industry standards.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

ADDITIONAL REQUIREMENTS
A driver’s license is not required to enroll in the program.

Driving citations will not restrict, or prevent students from enrolling in the Automotive Collision Repair Technology Program; however, citations may prevent some internship and/or employment opportunities.

DEGREE AND CERTIFICATE REQUIREMENTS
Automotive Collision Repair Technology Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C-/1.7 for CRT courses and a minimum grade of C/2.0 for all General Education courses.

AUTOMOTIVE TECHNOLOGY

OVERVIEW
If you're interested in how cars and trucks run and how you can service and repair them, choose BTC's automotive technician training program, which will help prepare you for top jobs in the automotive field.

Career choices are extensive in the field of automotive technology; you'll be well-qualified for automotive technician or service technician jobs. Or you can work as a specialist in automatic transmission, brake, engine performance, or electrical systems. If you're looking for an Automotive Technology associate degree program or certificate program that provides a wide range of high-demand skills sought by top employers (including automotive dealerships, auto rental companies, federal and local government repair shops, and fleet maintenance businesses), then check out the program at Bellingham Technical College.

PROGRAM OUTCOMES
After successfully completing this program, students will be able to:

- Comply with personal and environmental safety practices specific to the automotive industry.
- Evaluate and use technical information and testing procedures from a variety of sources to diagnose and repair various automotive system failures.
- Perform maintenance and light repair common to the automotive industry.
- Diagnose and repair common electrical and electronic system failures.
- Perform diagnostics and repairs consistent with an entry-level automotive technician.
- Communicate and document work performed using trade specific language.
- Demonstrate positive work traits and excellent customer service skills as a member of a technical team.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

ADDITIONAL REQUIREMENTS
Prior to registering for program classes, students are required to submit the following documentation to the Admissions Office:

- Copy of your valid Driver's License (with no restrictions due to driving offenses);
- Current complete 3-year driving record from Washington State DOL. This copy of your driving record will be kept on file for advising purposes only;
- Signed Industry Expectations form indicating that you understand program admission requirements and industry hiring standards.

www.btc.edu
## IMPORTANT PROGRAM NOTES:

1. You are required to maintain a valid driver's license as long as you are enrolled in this program;
2. Many employers, in this field, will only hire applicants who have a clean driving record;
3. Driving records (abstracts) can be obtained for a fee. It is the responsibility of the applicant to pay for and order his/her driving records. You may obtain a copy of your current "Abstract of Driving Record" at your local Department of Licensing or by accessing the Washington State Department of Licensing on the web at www.dol.wa.gov
4. A renewed copy of your valid driver's license (with no restrictions due to driving offenses) will again be required at the start of your second year in the program;
5. All General Education courses must be completed prior to the beginning of the 2nd year.

## DEGREE AND CERTIFICATE REQUIREMENTS

Automotive Technology AAS Degree and Certificate completion requires a cumulative GPA of 2.0 or higher. AAS-T Degree require a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all General Education courses.

BUSINESS

OVERVIEW
Bellingham Technical College offers your first step toward a successful career in business and finance. Earn your associate degree and a solid foundation at BTC in two years, and be ready to transfer to a four-year college or university to earn your bachelor's degree in business management to build a career in a field that is experiencing strong growth in Washington and nationwide.

BTC's Associate in Business transfer degree is designed for students who want to transfer to major in business at a Washington State college or university. After completing the 90-credit-hour associate degree program at BTC, you may transfer as a junior into a Bachelor of Arts (BA) or Bachelor of Science (BS) program in business administration, accounting, management information systems, and more.

At BTC you'll begin building your core of business knowledge with academic coursework in English, economics, business law, and accounting. You will also develop top interpersonal and communication skills that will prepare you for today's global, diverse, and competitive business environment.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Business DTA/MRP Degree completion requires a cumulative GPA of 2.0 or greater and minimum grade of C/2.0 for required courses.

PROGRAM APPLICATION/FORMS
- Admissions Application
- Associate in Business (DTA/MRP) Planning Guide

PLANNING GUIDE
- ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.
DIRECT TRANSFER AGREEMENT/
MAJOR RELATED PROGRAM

Associate in Business, Direct Transfer Agreement/
Major Related Program

ADVISING NOTES
• Students must complete at least 90 quarter hours of transferable credit to receive a DTA degree.
• Students must complete a minimum of 60 credits of general education course work to receive a DTA degree.
• Any specific course may be credited toward no more than one distribution or skill area requirement.
• Students should make early contact with their potential transfer institution(s) regarding specific course choices within distribution areas.
• Students should check with their potential transfer institution(s) about requirements for overall minimum GPA, or higher GPA on a subset of courses.
• No more than 10 credits per discipline area, five credits maximum in world languages or ASL, and no more than five credits in performance/skills classes are allowed.
• Classes may only be applied to one distribution area.
• Some universities require specific classes. Please check with intended bachelor’s institution.

COMMUNICATION SKILLS: 10 CREDITS
Both English classes listed below are required.
ENGL& 101  English Composition I    5 CR
ENGL& 102  English Composition II   5 CR

NOTE 1: To meet current EWU requirements, the second English Composition course must be equivalent to EWU’s English 201- College Composition: Analysis, Research, and Documentation.

QUANTITATIVE/SYMBOLIC REASONING SKILLS: 10 CREDITS
The class below is required.
MATH& 151  Calculus I     5 CR
Choose an additional class from the following options:
MATH& 107  Math in Society    5 CR
MATH& 141  Precalculus I     5 CR
MATH& 142  Precalculus II    5 CR
MATH& 152  Calculus II       5 CR
MATH& 163  Calculus 3        5 CR

HUMANITIES: 15 CREDITS
Choose three classes from at least two subject areas. No more than 5 credits in world language at the 100-level.
CMST& 210  Interpersonal Communication  5 CR
CMST& 220  Public Speaking        5 CR
HIST& 146  United States History I 5 CR
HIST& 147  United States History II 5 CR
HIST& 148  United States History III 5 CR
HUM& 101  Introduction to Humanities 5 CR
SPAN& 121  Spanish I             5 CR
SPAN& 122  Spanish II            5 CR

NOTE 2 AND 3: Students intending the international business major should consult their potential transfer institution(s) regarding the level of world language required for admission to the major. Five (5) credits in world languages may apply to the Humanities requirement. Students are encouraged to include a speech or oral communication course (not small group communication).

SOCIAL SCIENCES: 15 CREDITS
ECON& 201 Microeconomics and ECON& 202 Macroeconomics are required; choose one additional class from options provided.
BUS& 101  Introduction to Business  5 CR
POLS& 202  American Government    5 CR
PSYC& 100  General Psychology     5 CR
PSYC& 200  Lifespan Psychology    5 CR
SOC& 101  Introduction to Sociology 5 CR

NATURAL SCIENCES: 15 CREDITS
The class below is required.
MATH& 146  Introduction to Statistics  5 CR
Choose two additional classes in Physical, Biological and/or Earth Sciences, including at least one lab science course from the following options:
BIOL& 160  General Biology with Lab    5 CR
BIOL& 260  Microbiology                  5 CR
CHEM& 110  Chemical Concepts w/Lab    5 CR
CHEM& 121  Intro to Chemistry          5 CR
CHEM& 131  Introduction to Organic/Bio-Chemistry 5 CR
NUTR& 101  Nutrition                         5 CR
PHYS& 110  Physics for Non-Science Majors w/Lab 5 CR
PHYS& 221  Engineering Physics I w/Lab    5 CR
PHYS& 222  Engineering Physics II w/Lab   5 CR
PHYS& 223  Engineering Physics III w/Lab   5 CR

NOTE 4: Students considering the manufacturing management major at WWU should consult WWU regarding the selection of natural science courses required for admission to the major.

BUSINESS: 20 CREDITS
All Business courses listed below are required.
ACCT& 201  Principles of Accounting I  5 CR
ACCT& 202  Principles of Accounting II 5 CR
ACCT& 203  Principles of Accounting III 5 CR
BUS& 201  Business Law           5 CR

NOTE 5: International students who completed a business law course specific to their home country must take a business law course at a U.S. institution in order to demonstrate proficiency in U.S. business law.

ELECTIVES: 5 CREDITS
5 credits of non-business electives except as noted below.

NOTE 6: Four institutions have requirements for admission to the major that go beyond those specified above. Students can meet these requirements by careful selection of the elective University Course Equivalent to:
• WSU (all campuses): Management Information Systems MIS 250
• Gonzaga: Management Information Systems MIS 235
• PLU: Computer applications CSCE 120, either an equivalent course or skills test
• WWU: Introduction to Business Computer Systems MIS 220

TOTAL PROGRAM CREDITS: 90

BUSINESS MANAGEMENT

OVERVIEW
Choose Bellingham Technical College’s two-year Associate in Applied Science-Transfer degree in Business Management as a pathway to BTC’s Bachelor of Applied Science – Operations Management degree or choose the two-year Associate in Applied Science degree and go right to work after graduation.

Graduates are prepared for entry-level positions in industry, government, and non-profit organizations. Students will acquire a background in basic business including accounting, business law, marketing, and economics as well as practical supervisory skills.

In addition to the required core classes, students choose from one of three specialty tracks (Social Media Marketing, Human Resources Specialist, and Operations Management) each comprising three specialty classes.

PROGRAM OUTCOMES
Students will learn core business practices, principles, and theories allowing them to make immediate and significant contributions in the workplace. Students will gain the knowledge, skills, and abilities necessary to coordinate human, financial and material resources to achieve organizational objectives while adhering to government guidelines.

Upon completing the Business Management AAS or AAS-T degree, students will be able to:

• Effectively communicate in the context of business and in a business environment;
• Use data to engage in effective decision-making;
• Apply ethical and legal principles to the business environment;
• Demonstrate mastery of the core functional areas of business including accounting, economics/finance, marketing, management, and planning & strategy.

Students completing the Social Media Marketing track will also be able to:

• Describe SMART social media goals to achieve successful online campaigns;
• Evaluate a company’s current situation, isolate social media issues and provide solutions by identifying appropriate social media marketing portals to influence consumer and improve the company’s reputation;
• Create a social media marketing plan and track progress in achieving goals with a variety of measurement tools, ser-

Students completing the Human Resources Specialist track will also be able to:

• Describe the unique roles of Human Resources professionals and their impact on the organization;
• Explain the primary processes of workforce planning, job analysis and design, training and development, compensa-
tion and benefits, and performance appraisal;
• Identify the key federal and Washington state employment laws, regulations, and terminology;
• Develop a written strategic compensation plan.

Students completing the Operations Management track will also be able to:

• Analyze individual and group behavior, and understand the implications of organizational behavior on the process of management;
• Demonstrate an optimized approach to planning, executing, monitoring and controlling projects;
• Describe and discuss the mechanics of operating a small business (pricing, human relations, purchasing, inventory, financial controls;
• Analyze and apply strategies to maintain quality and stability within operations.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Business Management Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and a minimum grade of C/2.0 in all courses.

**COMPUTER NETWORKING**

**OVERVIEW**

The rapid expansion of the computer industry has generated a growing need for highly skilled workers to repair, network, and support these complex computer systems. Employment of computer networking engineers is expected to increase much faster than average as information technology becomes more sophisticated and organizations continue to adopt and integrate these technologies. The computer networking field requires specialists who continually learn new skills to keep pace with the rapidly changing IT industry.

BTC's degrees and certificates in the Computer Networking Program are ideal for students with skillsets and interests in information technology, working with and troubleshooting computers, assisting the public, customer service, and more. Your computer networking career training will help you learn in-demand skills for a rewarding career in the fast-paced world of modern business.

**PROGRAM OUTCOMES**

After successfully completing this program, students will be able to:

- Install, configure, and administer an advanced application server.
- Install, configure, and administer a Microsoft Windows Network.
- Design, develop, implement, and document a complex project.
- Demonstrate the ability to apply technical and interpersonal knowledge and skills in professional setting.
- Design and implement a group project.
- Demonstrate industry competency in fundamental concepts used by computer networking professionals.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

# COMPUTER SCIENCE

## OVERVIEW
Bellingham Technical College offers your first step toward a successful career in Computer Science. Earn your associate degree and a solid foundation at BTC in two years, and be ready to transfer to a four-year college or university to earn your bachelor’s degree in computer science to build a career in a field that is experiencing strong growth in Washington and nationwide. BTC’s Associate in Computer Science transfer degree is designed for students who want to transfer and major in computer science at a Washington State college or university. After completing the 90-credit-hour associate degree program at BTC, you may transfer as a junior into a Bachelor of Science (BS) program in computer science.

## PROGRAM OUTCOMES
- Apply quantitative analysis to solve problems
- Apply appropriate logic, tools and processes to write software programs that solve given problems.
- Critically evaluate computer technical reports, updates and information
- Effectively communicate technical processes

## PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

## DEGREE AND CERTIFICATE REQUIREMENTS
Computer Science DTA/MRP Degree completion requires a cumulative GPA of 2.0 or greater and minimum grade of C/2.0 for required courses.

## PROGRAM APPLICATION/FORMS
- Admissions Application

## PLANNING GUIDE
- Associate in Technology (DTA/MRP) Planning Guide

DIRECT TRANSFER AGREEMENT/MAJOR RELATED PROGRAM

Associate in Computer Science, Direct Transfer Agreement/Major Related Program

ADVISING NOTES
- Students must complete at least 90 quarter hours of transferable credit to receive a DTA degree.
- Students must complete a minimum of 60 credits of general education course work to receive a DTA degree.
- Any specific course may be credited toward no more than one distribution or skill area requirement.
- Students should make early contact with their potential transfer institution(s) regarding specific course choices within distribution areas.
- Students should check with their potential transfer institution(s) about requirements for overall minimum GPA, or higher GPA on a subset of courses.
- No more than 10 credits per discipline area, five credits maximum in world languages or ASL, and no more than five credits in performance/skills classes are allowed.
- Some universities require specific classes. Please check with intended bachelor’s institution.
- Classes may only be applied to one distribution area.

COMMUNICATION SKILLS: 10 CREDITS

COMPUTER SOFTWARE SUPPORT

OVERVIEW
In a world where everyday items are increasingly dependent upon computers—from phones to televisions to medical equipment—the need for skilled workers who can troubleshoot computer software issues is growing. If you enjoy combining technical and customer service skills in a variety of business and office settings, Bellingham Technical College’s Computer Software Support Technology associate degree could be a good fit to get your tech career started. BTC’s Computer Software Support Technology program will train you for top jobs in computer support, software, help desk support, PC support, and training and software support coordination.

BTC’s classes will train you in valuable software and computer support skills needed by companies big and small, including hospitals, financial institutions, large corporations, school districts, and universities. Computer hardware and software manufacturers also hire BTC’s program graduates to work as customer service representatives and help desk personnel.

Students in the Computer Software Support associate degree program at Bellingham Technical College will receive training in word processing, spreadsheets and databases; teaching others how to use computers and software; basic computer programming and website building; operating system installation and configuration; and more.
PROGRAM OUTCOMES
After successfully completing this program, students will be able to:
• Apply industry standard IT networking solutions to understand and troubleshoot networking issues.
• Design and develop an IT Helpdesk disaster recovery plan.
• Troubleshoot operating systems or software problems.
• Design and develop a hardware-based user needs assessment.
• Use a variety of scripting tools or languages to automate routine tasks.
• Provide satisfactory helpdesk solutions to problems or scenarios with Word, Excel, Access, or PowerPoint using industry standard helpdesk procedures.
• Provide efficient and effective IT technical support to clients in a manner that promotes safe computing practices and encourages effective working relationships.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Computer Software Support Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all courses.

TOTAL PROGRAM CREDITS:  58

COSMETOLOGY

OVERVIEW
Cosmetology classes give students experience in such customer services as shampooing, skin care, nail care, modern hair cutting and styling, tinting and bleaching, permanent waving, chemical relaxing, wig care, artificial hair, blow drying and iron curling. Also included in the instruction are safety measures in the handling and use of chemicals, sterilization of equipment, various disorders/diseases of the hair, skin, and nails and their proper treatment, salon management, retail selling, cosmetic chemistry, electricity, and anatomy and physiology. The curriculum meets requirements established by the State of Washington for cosmetology for both theory and practical applications.

Classes are taught in a laboratory setting at the College's School of Cosmetology located 1411 Railroad Ave, Bellingham, WA. During Fall, Winter, Spring and Summer Quarters, hours of operation are 8am – 5pm, Monday-Friday. Hours and days may be adjusted as necessary. Summer session is required. This program is designed to be completed full-time in five academic quarters including summer instruction. Altered academic plans that include some part-time instruction may be approved in collaboration with academic advising and program faculty.

DEGREE OPTIONS
Bellingham Technical College (BTC) offers an Associate of Applied Science (AAS) degree. The cosmetology degree may be earned through a sequence of courses over five quarters, covering at least 2,000 clock hours of instruction. A sixth quarter may be needed to complete any missing clock hours. The degree program prepares students to take the Washington State licensing exams.

BTC does not offer programs in Barbering, Nail Technology or Esthetics at this time.

GENERAL INFORMATION
Bellingham Technical College Cosmetology School is located at:
1411 Railroad AVE
Bellingham, WA 98225
360.752.8789
cosmetology@btc.edu

This school is licensed under chapter 18.16 RCW. Inquiries, concerns, or complaints regarding this school can be made to the Washington State Department of Licensing:

MAILING ADDRESS:

STREET ADDRESS:
Department of Licensing Business and Occupations
405 Blake Lake BLVD Building 2
Olympia, WA 98502

Please Note:
RCW 18.16.200 Disciplinary Action-Grounds: Any applicant or licensee under this chapter may be subject to disciplinary action by the director if the licensee or applicant: Has engaged in the commercial practice of cosmetology, barbering, manicuring, esthetics, or instructed in or operated a school without first obtaining the license required by this chapter.

PROGRAM OUTCOMES
The BTC Cosmetology graduate will be able to:
• Perform hair care services for all types of hair including hair analysis, hair cutting, hairstyling, hair coloring and lightening, permanent waving, and chemical relaxing.
• Perform natural nail services including manicuring and pedicuring.
• Perform basic skin care services including skin analysis, facials, makeup application, and superfluous hair removal.
• Demonstrate customer service skills, self-growth, and personal development.
• Perform salon business such as front desk operations, dispensary inventory and loss prevention, resume building and interviewing skills, self-marketing, and the basic knowledge of starting one’s own salon business.
• Demonstrate knowledge of decontamination control, public hygiene, and special sanitation procedures used for the
If you love cooking, have a passion for food and have always dreamed of being a chef, then Bellingham Technical College’s Culinary Arts associate degree program is for you. BTC’s programs and certificates in Culinary Arts and Pastry Arts are ideal for students with cooking skills and an interest in the fast-growing food service industry. You’ll receive training from an award-winning faculty in state-of-the-art kitchens and get the skills and experience you’ll need to get top jobs in the fast-paced culinary field. Hone your culinary arts skills and gain training in every aspect of food service – from chef to restaurant manager to hostess – at BTC’s Café Culinaria, where students run the International Buffet in winter quarter and a full-service a la carte restaurant in spring. To expand on your cooking skills, you can also take classes for your pastry arts certificate and get training for the best pastry chef jobs.

**PROGRAM OUTCOMES**

After successfully completing the Culinary Arts program, students will be able to:

- Conform and comply with health standards based on US Food and Drug Administration, Washington State, and local health department sanitation and hygiene codes and laws.
- Apply fundamentals and advanced skills in sustainable design and purchasing, butchery, Garde Manger, classical sauce, soups and stocks, farinaceous foods, classical cookery techniques in international cuisine, American regional cuisines, define product specifications, and food and beverage service.
- Plan, prepare, and cook foods a la carte and buffet style consistently in a visually appealing manner while maintaining taste, nutritive value, flavor, and texture in classical and contemporary cooking methods.
- Correctly prepare a variety of classical breads, artisan breads, classical pastry items, and desserts with the ability to correctly evaluate finished products for proper texture, color, palatability, shape, and doneness.
- Plan, develop and analyze the dining room layout, facility design, menu design, cost analysis, marketing plan, and projected profit and loss statements.

After successfully completing the Pastry Arts program, students will be able to:

- Conform and comply with health standards based on US Food & Drug Administration, Washington State, and local health department sanitation and hygiene codes and laws.
- Demonstrate proficiency in the use of baking and pastry industry-specific equipment.
- Apply basic cuisine foundational skills.
- Demonstrate basic measuring, conversion, food costing, and yield management practices.
- Analyze the functions of ingredients used in producing baked goods and pastries.
- Produce a variety of classical and contemporary breads, pastry items, and desserts, with the ability to correctly evaluate finished products for texture, color, palatability, shape and doneness.
- Demonstrate advanced skills with sour dough breads and bread art, chocolate and sugar art, and specialty cakes.
- Utilize fundamental techniques creatively to modify standard recipes and formulate new recipes.

### DATA ENTRY SPECIALIST

**OVERVIEW**

Choose this program to train as a data entry specialist, clerk typist, note reader, or word processor. With BTC’s Data Entry Specialist program, you’ll have valuable skills needed by employers in nearly every sector. Many data specialists telecommute, working from their homes on computers linked to their employer’s main office.

**PROGRAM OUTCOMES**

Graduates will be able to enter data into spreadsheets and databases in a timely and accurate manner. Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

**PLACEMENT REQUIREMENTS**

Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

**DEGREE AND CERTIFICATE REQUIREMENTS**

Data Entry Specialist Degree and Certificate completion requires a cumulative GPA of 2.0 or greater and minimum grade of C/2.0 for required courses.

DENTAL: ASSISTING

OVERVIEW
Choose BTC’s Dental Assisting program to train for a position as a dental assistant. Learn how to provide patient care, perform office duties and lab work, while working alongside dentists as they examine and treat their patients. Graduates will find employment opportunities with dental, orthodontic, and periodontal offices, as well as hospitals, public health departments, or in clinics.

PROGRAM OUTCOMES
- Apply academic, technical, and professional skills to effectively contribute to the dental health team
- Apply cognitive retention of dental terminology, theory, and science
- Expose and evaluate intraoral and extraoral radiographs implementing radiation safety and processing skills
- Verify critical thinking, problem solving, and positive work ethics as they directly relate to the Dental Assistant profession
- Validate the importance of National Certification and participation in professional activities and education opportunities.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PROGRAM ENTRY INFORMATION
This program typically starts in Spring and Fall Quarters on a space available basis.

PROGRAM START
- To be eligible for admission to the program, applicants must meet college admission requirements.
- To be eligible for the program ready list, all general education courses must be successfully completed with a 2.0 or above. General education courses/prerequisites (excluding DEN 100 and DEN 105) are offered every quarter.
- Students are required to submit official transcripts (BTC can be unofficial), additional application materials, and the Application Completion Form for program ready list placement.
- After acceptance and Prior to Registration for Quarter 1 of the Dental Assisting Program, students must submit proof of the following: 1) Be 18 years of age 2) Demonstrate satisfactory oral health by dental examination 3) Demonstrate satisfactory health status by physical examination and current immunization status 4) Provide evidence of negative test for tuberculosis from physician or health department 5) Complete hepatitis B immunization series (students should note that the cost of this immunization is estimated to be approximately $150.00) 6) Possess and maintain a current CPR card. Minimum First Aid/CPR required is HLTH 154-Healthcare Provider (8-hour). 7) Students will be required to create an online account with Certified Background and pay a fee of approximately $119.00 for the background check, Drug Screen and tracking of required health documents.

PLACEMENT REQUIREMENTS
These requirements are for the AAS degree and are lower than those for the AAS-T degree. Please see the AAS-T Entry Page for AAS-T requirements.

- ACCUPLACER Reading Comprehension score of 71 or a C grade in RDG 085, and ACCUPLACER Sentence Skills score of 71 or a C grade in ENGL 092.
- ACCUPLACER Arithmetic score of 50 or a C grade in MATH 090 or ABE 050.

DEGREE AND CERTIFICATE REQUIREMENTS
Dental Assisting Degree and Certificate completion requires a cumulative GPA of 2.0 or greater and minimum grade of B/3.0 for all clinical courses, and minimum grade of C/2.0 for all other required courses.

PREREQUISITE COURSE REQUIREMENTS
- AENGL 100 Applied English or ENGL& 101 English Composition I.
- AMATH 100 Applied Occupational Math (or higher).
- BIO 105 Essentials of Anatomy Physiology (this MUST be no older than 5-years at the time you are eligible for placement on the Dental Assisting Program ready list).
- CMST& 210 Interpersonal Communication
- DEN 100 Introduction to Dental Assisting
- The Test of Essential Academic Skills (TEAS V). (Given in the DEN 100 course).
- Test Of Essential Academic Skills (TEAS V)
- DEN 105 Head and Neck Anatomy
- HLTH 133 HIV/AIDS: For Healthcare Professional
- HLTH 154 Healthcare Provider First Aid and CPR
- PSYC& 100 General Psychology

ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.
DENTAL: EXPANDED FUNCTION DENTAL AUXILIARY CERTIFICATE

OVERVIEW
This 18-credit certificate program is designed to prepare certified Dental Assistants and licensed Dental Hygienists to become licensed in Washington State as an Expanded Functions Dental Auxiliary (EFDA). Course content is designed to prepare students for the Washington Restorative Exam (WARE) and the restorative portion of the Western Regional Examining Board (WREB). The program combines didactic, laboratory, and clinical instruction to prepare EFDA’s for such duties as placing and contouring restorations, final impressions, and performing certain dental assisting procedures under general supervision.

PROGRAM OUTCOMES
- Recognize the role and laws of the EFDA in expanding access to care;
- Take final impressions on a typodont;
- Recall procedures for coronal polish, radiographs, fluoride treatment, sealants, oral hygiene instruction, and infection control;
- Place amalgam restorations on a typodont and on a patient, restoring function and anatomy to harmonious form;
- Place composite restorations on a typodont and on a patient, restoring function and anatomy to harmonious form.

PROGRAM ENTRY INFORMATION
The program only starts in Fall Quarter.

PROGRAM START
- Completed BTC admissions application;
- Evidence of high school graduation or equivalent; acceptable documents include a copy of your high school diploma, high school transcript, or GED certificate;
- Evidence of completion of a Dental Assisting Education Program accredited by the ADA Council on Dental Accreditation (CODA) or Dental Assisting National Board (DANB) certified Dental Assistant or Dental Hygienist with limited license;
- Provide evidence that you have completed seven hours of HIV/AIDS training;
- Possess and maintain a current CPR card. Minimum CPR required is HO 127 Healthcare Provider CPR (6-hr);
- Evidence of experience working as a Dental Assistant or Dental Hygienist within the last 5 years for at least 3500 hours. A letter on company letterhead, signed by a supervisor or HR staff verifying the above details including dates of employment is sufficient evidence;
- Provide evidence that you have a Dentist willing to sponsor you as a mentor and provide clinical experience;
- Upon acceptance into the program, students are required to provide evidence of negative test for tuberculosis from physician or health department;
- Upon acceptance into the program, students are required to complete Hepatitis B immunization series (students should note that the cost of this immunization is estimated to be approximately $225.00).

PLACEMENT REQUIREMENTS
ACCUPLACER sentence skills of 86 and reading comprehension score of 85 or completion of AENGL 100 Applied English or ENGL& 101 English Composition I with a C or better.

DEGREE AND CERTIFICATE REQUIREMENTS
Dental: Expanded Function Dental Auxiliary Certificate completion requires a cumulative GPA of 2.0 or greater and minimum grade of C/2.0 for required courses.

DENTAL: HYGIENE

OVERVIEW
If you are interested in pursuing a career in the health care industry as a dental hygienist, then look into BTC’s Dental Hygiene program. You’ll learn the clinical skills and core professional values needed to launch a rewarding career in private and public settings, such as dental offices and public health clinics. Dental hygiene students learn under the supervision of licensed dentists and dental hygienists on state-of-the-art equipment in BTC’s on-campus dental clinic. Program graduates are well-positioned for employment, with the hands-on clinical experience employers need today.

PROGRAM OUTCOMES
- Demonstrate positive work ethics, team skills and professional values integral the profession of Dental Hygiene.
• Utilize wellness, health determinants, & characteristics of various patient populations to promote oral health and reduce health risks in a variety of settings.

• Apply current dental hygiene techniques, instruments, and materials to provide preventive and therapeutic services in accordance with all safety and health standards.

• Assess, plan, implement & evaluate community based health promotion and prevention programs and activities to benefit the general population.

• Demonstrate cognitive retention of dental terminology, theory, and science.

• Identify and access opportunities for professional growth and development.

• Apply the principles of evidence-based research and decision making in the planning and implementation of dental hygiene care.

• Qualify for all national and regional examinations required to practice as a Registered Dental Hygienist in the State of Washington.

• Manage medical emergencies and provide appropriate life support measures using professional judgment.

PROGRAM ENTRY INFORMATION
This program usually admits students again in the fall quarter. This program has a selective admissions process.

Students are typically offered enrollment in Dental Hygiene once every other year.

PROGRAM START
• Admissions Information
• Financial Aid Notice
• Prerequisite Course Equivalency Chart

PLACEMENT REQUIREMENTS
These requirements are for the AAS-T degree.

• ACCUPLACER Reading Comprehension score of 85 or B grade in RDG 085, and ACCUPLACER Sentence Skills score of 86 or B grade in ENGL 092 or C grade in COM 170.

• BTC College Level Math score of 75 or a C grade in MATH 099.

DEGREE AND CERTIFICATE REQUIREMENTS
Dental Hygiene Degree completion requires a cumulative GPA of 2.0 or greater and minimum grade of C/2.0 for required courses.

PREREQUISITE COURSE REQUIREMENTS
Prospective students must complete the following prerequisites with a 2.7 GPA or better in each course prior to applying to the program:

• BIOL& 241 Human A & P I
• BIOL& 242 Human A & P II
• BIOL& 260 Microbiology
• CHEM& 121 Intro to Chemistry
• CHEM& 131 Introduction to Organic/Bio-Chemistry
• CMST& 210 Interpersonal Communication or CMST& 220 Public Speaking

• ENGL& 101 English Composition I
• ENGL& 102 English Composition II
• MATH& 141 Precalculus I or MATH& 107 Math in Society or MATH& 146 Introduction to Statistics
• NUTR& 101 Nutrition
• PSYC& 100 General Psychology
• SOC& 101 Introduction to Sociology

PROGRAM APPLICATION/FORMS

DIESEL TECHNOLOGY

OVERVIEW
If you’d like a high-paying career upon graduating from BTC, then you should consider Diesel. You’ll be prepared to work right away as a diesel technician, repairing and maintaining heavy trucks, buses, and road equipment like bulldozers and graders. Other positions you’d qualify for are diesel engine specialist, truck technician, marine technician, and construction and industrial machinery repair technician.

You will learn how to use leading-edge diesel technology, and work hands-on in an actual shop. Employers who hire graduates from the Diesel program include diesel automotive and trucking companies, rental companies, marine dealers, highway contractors, and farm and heavy equipment companies.

PROGRAM OUTCOMES
After successfully completing this program, students will be able to:

• Comply with personal and environmental safety practices specific to the diesel industry.
• Evaluate and apply technical information and testing procedures from a variety of sources to troubleshoot diesel equipment.
• Maintain and repair the following systems: engine, electrical, hydraulic, drive train, brakes, and steering/suspension.
• Communicate and document work performed using trade specific language and digital images.
• Act responsibly and ethically as an employee by being punctual, adhering to company policies and interacting positively and appropriately with co-workers, supervisors and customers.
• Apply research techniques to identify emerging heavy equipment technologies.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

ADDITIONAL REQUIREMENTS
Prior to registering for program classes, students are required to submit the following documentation to the Admissions Office:

1. Copy of your valid Driver’s License (with no restrictions due to driving offenses);
2. Current complete 3-year driving record from Washington State DOL This copy of your driving record will be kept on file for advising purposes only;
3. Signed Industry Expectations form indicating that you understand program admissions requirements and industry hiring standards.

Important Program Notes:
1. You are required to maintain a valid driver’s license as long as you are enrolled in this program;
2. Many employers, in this field, will only hire applicants who have a clean driving record;
3. Driving records (abstracts) can be obtained for a fee. It is the responsibility of the applicant to pay for and order his/her driving records. You may obtain a copy of your current “Abstract of Driving Record” at your local Department of Licensing or by accessing the Washington State Department of Licensing on the web at www.dol.wa.gov
4. A renewed copy of your valid driver’s license (with no restrictions due to driving offenses) will again be required at the start of your second year in the program;
5. All General Education courses must be completed prior to the beginning of the 2nd year.

DEGREE AND CERTIFICATE REQUIREMENTS
Diesel Technology Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for required courses.

EARLY LEARNING

OVERVIEW
The Early Learning certificate is designed to educate and support individuals in their role as nurturers and caregivers for young children. The program incorporates positive parenting/teaching skills with a child development knowledge base that promotes developmentally appropriate practices with children & families. The various early learning/parenting courses offered provide the knowledge and skills that are relevant to people working in early learning settings including home or group settings.

PROGRAM OUTCOMES
- Plan safe, healthy environments to invite learning
- Facilitate steps to advance children’s physical and intellectual development
- Create positive ways to support children’s social and emotional development
- Develop strategies to establish productive relationships with children and families
- Observe and record children’s behavior
- Apply principles of child growth and development

PROGRAM ENTRY INFORMATION
A variety of Adult/Child and Adult-Only Parenting Discussion courses are offered each quarter. Participants can register for their course of interest. Half scholarships are generally available.

Students are encouraged to take as many different parenting courses as they wish as their child grows and changes. Some parenting discussion courses are now offered partially or fully online.

DEGREE AND CERTIFICATE REQUIREMENTS
Certificate completion requires a cumulative GPA of 2.0 or higher.

PROGRAM APPLICATION/FORMS
Students who complete a combination of 12 credits of early learning/parenting courses can apply for the Early Learning certificate. Students need to complete a minimum of 2 credits in Early Learning discussion courses with a maximum of 10 credits in Adult/Child courses with a study of at least two different age groups. It is anticipated that it will take two-three years for students to complete this certificate.

ELECTIVES
* Take 8-10 credits from the following coursework towards the certificate:
ECED 130  Adult/Infant: The Developing Infant  2 CR
ECED 131  Adult/Infant: Approaching Toddlerhood  2 CR
ECED 134  Adult/Child: One Year Old Development - Summer  1 CR
ECED 135  Adult/Child: One Year Old Development - Fall  2 CR
ECED 136  Adult/Child: One Year Old Development - Winter  2 CR
ECED 137  Adult/Child: One Year Old Development - Spring  2 CR
ECED 139  Adult/Child: Two Year Old Development - Summer  1 CR
ECED 140  Adult/Child: Two Year Old Development - Fall  2 CR
ECED 141  Adult/Child: Two Year Old Development - Winter  2 CR
ECED 142  Adult/Child: Two Year Old Development - Spring  2 CR
ECED 154  Adult/Child: Toddler & Preschooler Development - Summer  1 CR
ECED 155  Adult/Child: Toddler & Preschooler Development - Fall  2 CR
ECED 156  Adult/Child: Toddler & Preschooler Development - Winter  2 CR
ECED 157  Adult/Child: Toddler & Preschooler Development - Spring  2 CR

* 2-4 credits of the following can be used towards the certificate:
ECED 160  Positive Discipline  1 CR
ECED 161  Raising Toddlers and Preschoolers  1 CR
ECED 163  Raising School Age Children  1 CR
ECED 167  Raising Teens  1 CR
ECED 170  Love & Logic for Successful Parenting  2 CR

TOTAL PROGRAM CREDITS:  12
industry, while others work in manufacturing or maintenance. In BTC’s Electrician program, you’ll learn how to install, maintain, and repair residential, commercial, industrial and renewable electrical systems. You will also learn how to read blueprints and schematics, bend and install conduits, program VFDs and PLCs, and troubleshoot circuits.

PROGRAM OUTCOMES
After successfully completing this program, students will be able to:

- Ensure safe work practices and installations through compliance with national, state and local regulations and industry standards including the National Electrical Code and WAC/RCW.
- Design, analyze, and diagnose basic electrical systems through the application of electrical theory fundamentals.
- Utilize proper tools, materials, and test equipment to construct a variety of code compliant service and branch circuits found in a typical residential setting.
- Utilize proper tools, materials, and test equipment to construct a variety of code compliant branch and lighting circuits found in a typical commercial setting.
- Utilize proper tools, materials, and test equipment to construct a variety of code compliant branch, signal, and control circuits found in a typical industrial setting.
- Summarize the financial and regulatory scope of the electrical industry including government fees, jobsite overhead, business operating expenses, time management, and cost of materials.
- Communicate clearly and effectively with team members, supervisors, and others in the workplace, using trade terminology, drawings, blueprints, and other documents.
- Demonstrate professional conduct conducive to the work environment including punctuality, safety, reliability and customer service.
- Inspect electrical systems, equipment, or components to identify hazards, defects, or the need for adjustment, repair, or updating and to ensure compliance with codes.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

ADDITIONAL REQUIREMENTS
Graduates can be credited with up to 1,472 supervised work experience hours per RCW 19.28.191 and WAC 296-46b-940. In order to receive the approved experience hours students must have an electrical trainee card from L&I prior to enrolling in the program.

PHYSICAL REQUIREMENTS
Electricians deal with color coded wires on a daily basis, making it vital for all electricians to be able to see color.

DEGREE AND CERTIFICATE REQUIREMENTS
Electrician AAS Degree and Certificate completion requires a cumulative GPA of 2.0 or higher. AAS-T Degree requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all General Education courses.

EMERGENCY MEDICAL TECHNICIAN

OVERVIEW
This intensive 3-course program includes lectures, hands-on practice and techniques for: introduction to emergency care, bleeding and shock, soft tissue injuries, environmental emergencies, lifting and moving patients, emergency childbirth, and much, much more.

At the end of the training, successful participants are qualified for the National Registry of EMT's examination.

PROGRAM OUTCOMES
• Apply knowledge of the EMS system, safety/well-being of the EMT, and medical/legal and ethical issues to the provision of emergency care, apply fundamental knowledge of the anatomy and function of all human systems to the practice of EMS.
• Use foundational anatomical and medical terms and abbreviations in written and oral communication with colleagues and other health care professionals.
• Apply knowledge of the pathophysiology of respiration and life span development to patient assessment and management.
• Apply knowledge of the medications that the EMT may administer.
• Apply knowledge (fundamental depth, foundational breadth) of anatomy and physiology to patient assessment and management in order to assure a patent airway, adequate mechanical ventilation, and respiration for patients of all ages, and apply scene information and patient assessment findings (scene size-up, primary and secondary assessment, patient history, reassessment) to guide emergency management.
• Apply knowledge to provide basic emergency care and transportation based on assessment findings for an acutely ill patient.

PROGRAM ENTRY INFORMATION
Applications for program entry are typically due 6 weeks prior to the start of the quarter. Candidates from sponsored agencies are given priority consideration for program admission.

Applications may be mailed or hand delivered to:
Bellingham Technical College
Attn: Billie Baker, H1 3028
Lindbergh Avenue
Bellingham, WA 98225
PROGRAM START
A Bellingham Technical College Admission Application is required before a student can register for the Emergency Medical Technician certificate (After approval by EMS council).

Students are typically admitted for fall and spring quarters.

Students must possess the aptitude and ability to perform critical thinking in the field. Students with poor reading comprehension may need to improve their abilities before taking the EMT Program.

PREREQUISITE COURSE REQUIREMENTS
- Must be 17 years of age prior to the first day of the course. Students must be 18 by the end of the program.
- High school diploma or GED certificate.
- Current American Heart Association BLS CPR for Healthcare Providers or American Red Cross CPR for the Professional Rescuer Card. (We require infant, child, adult CPR and training on an AED).
- Current First Aid card.
- 4-hour Infectious Disease Prevention for EMS Providers class, or 7 hours HIV/AIDS education.

PROGRAM APPLICATION/FORMS
- Proof of immunization or positive titer for the following: (SJH Contractual Requirement for all students) Rubella (two immunizations or positive titer), Mumps (two immunizations or positive titer), Rubella (one immunization or positive titer), Varicella (two immunizations or positive titer), One TDAP immunization, Annual Influenza immunization – (to include location and date immunization was done). Record of Hepatitis B vaccine series (or declination form available at BTC)
- Emergency Medical Technician Application
- Successfully pass a national criminal background check.
- Must have a current Driver’s License.
- Verification of health insurance, either personal or through an employer.
- Basic Urine Drug Test
- Two-part Tuberculin PPD test within last 12 months.
- If affiliated/sponsored: Application with attachments and signature from affiliated organization.
- If non-affiliated/sponsored: Application with attachments and signature for non-affiliated applicants. NOTE: Non-affiliated students have one year from the completion of the course to meet the affiliation requirement to be certified by the State of Washington. Affiliated status with a fire department or ambulance service must be attained before participants are eligible for State EMT Certification. Students must also submit BTC placement test results.

ADDITIONAL REQUIREMENTS
- Physical strength adequate to perform the normal functions of an EMT, including the ability to lift and move objects weighing up to 125 lbs.
- Students must have access to a computer with high-speed internet as many program components and testing are done online.
- Students, either prior to entering the program, or before course three (EMS 123), are encouraged to have taken a Hazardous Materials Awareness course. It is also recommended only that students complete the IS 100.a and IS 700.a courses, available from the FEMA website (http://training.fema.gov/IS/) as the NREMT exam will address these areas in more depth than is covered in the EMT Program.

DEGREE AND CERTIFICATE REQUIREMENTS
Emergency medical technician certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for required courses.

CERTIFICATE
Emergency Medical Technician Certificate

ENGINEERING TECHNOLOGY:
BACHELOR OF APPLIED SCIENCE

OVERVIEW
The Bachelor of Applied Science in Engineering Technology (BASET) program at Bellingham Technical College prepares undergraduates by fostering the development of extensive problem-solving skills, design skills, and engineering judgment as well as fundamental industry knowledge and research experience through the combination of a rigorous curriculum and hands-on learning.

Our Engineering Technology program focuses on real-world application of engineering principles. Engineering technologists play a critical role in the fields of advanced manufacturing, electrical and mechanical systems, and chemical processing by serving as a nexus between engineers and technicians. From conception to design, development, testing and production of equipment, components, and processes, Engineering technologists make an essential contribution to the engineering field.

PROGRAM OUTCOMES
- An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline.
- An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline.
- An ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical en-
viontions; and an ability to identify and use appropriate technical literature.

- An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes.
- An ability to function effectively as a member or leader on a technical team.

PROGRAM PREREQUISITES
Students must complete an accredited associate degree or higher, and if necessary take these additional courses before applying to the program:

- ENGL& 101
- Any 5 credits designated as humanities
- MATH& 141 or MATH& 142 or MATH& 151
- ENGR 180 or ENGR& 114 or Program Lead approval

Bridge Courses — up to 15 credits — are required for entry into the Core Courses. Students must complete these courses before being admitted to the 300-level Core courses.

- MATH& 142 or MATH& 151
- PHYS& 114 or PHYS& 221
- CHEM& 161

PROGRAM APPLICATION/FORMS
NOTE: Earning an Associate degree does not mean that you will be automatically accepted into the BASET program. You will still need to go through a competitive application process.

For more information please contact our Program Office Assistant, Andrea Schuman at 360.752.8580 or baset@btc.edu.

DEGREE REQUIREMENTS
Engineering Technology: Bachelor of Applied Science Degree completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all General Education, Core, and Elective courses.

MACH 193 CNC Machining for non-Majors 5 CR

TOTAL PROGRAM CREDITS: 93

ENGINEERING TECHNOLOGY:
CIVIL SPECIALIZATION

OVERVIEW
This program will prepare you for a career as a civil engineering technician, computer aided drafter, construction manager, transportation technician, or GIS technician. You’ll learn valuable skills like civil drawing, design, geographic information systems (GIS) and field engineering.

If you’re looking for a program that will put you on a solid career track with employers such as high-tech industries, civil engineering and surveying firms, the Department of Transportation, or civil construction companies, then look into Civil Engineering at BTC.

PROGRAM OUTCOMES
- Produce a wide variety of design quality plan sets using computer aided drafting methods.
- Inspect and track project revisions to produce As-Built record drawings using appropriate design standards.
- Import, export, and create several types of GIS data for the production of specialized planning and demonstration maps.
- Calculate quantities and assign costs for the production of detailed cost estimates and schedules for a variety of construction projects.
- Assess and approve specifications for construction materials.
- Communicate, solve, and present engineering problems using Microsoft Office programs.
- Solve engineering problems using a variety of mathematical processes and quantitative reasoning.

**PLACEMENT REQUIREMENTS**
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

**DEGREE AND CERTIFICATE REQUIREMENTS**
Engineering Technology: Civil Specialization AAS-T degree, AAS degree and Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all General Education courses.

**ENGINEERING TECHNOLOGY:**

**CLEAN ENERGY SPECIALIZATION**

**OVERVIEW**
According to the US Energy Information Administration, global energy consumption has significantly increased and is expected to continue rising through 2035 (Energy Outlook, 2012). The energy industry is working to increase energy efficiency and looking toward innovative technologies to meet the growing demand. Prominent energy companies like BP and Phillips 66 are starting new departments focused on alternative energy and investing in technology development and production.
New energy technology career categories are emerging at an unprecedented pace, and skill sets associated with energy technology cut across both traditional and emerging industries. The number of green jobs in Washington rose 32% in the last few years, and these trends are expected to continue as the demand for energy increases and resources decrease. In Whatcom County alone, there are over 3,600 green jobs (Source: WA Employment Security Department, 2010). Many emerging green energy jobs will be technical jobs that require more than a high school diploma but less than a bachelor’s degree.

This two-year degree prepares graduates to enter into the industry for wide variety of job titles including, but not limited to, the following:

- Engineering Technician
- Electronics Technician
- Electronics Engineering Technician
- Solar Installer
- Wind Energy Technician
- Wind Turbine Service Technician

Graduates of this program can also choose to transfer into the Western Washington University Institute for Energy Studies program.

**PROGRAM OUTCOMES**

- Describe and evaluate the impact of renewable energy within the context of sustainability, economics, policy, and society.
- Describe and apply a working knowledge of energy resources and their technological systems.
- Service/repair renewable energy systems and assist engineers with the design of renewable systems by applying basic knowledge of electrical, electronics, heat/power, and basic engineering concepts.
- Apply basic principles of math, science, and design theory to solve engineering problems.
- Utilize equipment, instruments, software and technical reference materials currently used in industry.
- Function effectively as a member of a technical team.
- Engage in, and recognize the need for, self-directed continuing professional development.
- Demonstrate critical thinking as well as technical and information literacy skills.
- Communicate effectively using writing, speaking, and graphics skills.
- Qualify for employment in the renewable energy field as an engineering technician or related job title.
- Apply ethical and professional practice within the field of renewable energy and engineering technology.

**PLACEMENT REQUIREMENTS**

Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

ENGINEERING TECHNOLOGY: COMPOSITES SPECIALIZATION

OVERVIEW
The field of engineering technology develops, processes, and tests the efficiency, production quality, and safety of nearly every product available on the market. In particular, composites technicians work with innovative, lightweight composite materials that are in demand by the aerospace and high-tech industries. These associate degree programs provide excellent job and career training for students who are mechanically inclined, good at math, or interested in how the products we use every day are designed and developed.

BTC’s Engineering Technology: Composites Specialization associate degree programs teach top skills that are in-demand for such positions as assembler, fabricator, machine operator, production worker, or supervisor in leading American industries.

PROGRAM OUTCOMES
- Create fully dimensioned orthographic and isometric CAD drawings that adhere to national standards (i.e. ANSI) and industry conventions.
- Interpret rough sketches/drawings/actual parts and transform into 2D CAD drawings according to ANSI and industry standards for the purpose of manufacture, fabrication, and/or assembly.
- Utilize parametric solid modeling software to generate 3D part models, 3D assembly models, and 2D detail/assembly drawings.
- Apply statics principles to evaluate forces in structural elements that comprise trusses, machines, and frames.
- Evaluate the stress, strain, and deflection levels of engineering components subjected to deformation, axial loads, and shear loads.
- Utilize MS Office products such as Word, Excel, and PowerPoint to generate engineering documents, reports, tables, charts, spread sheets, and presentations.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Engineering Technology: Composites Specialization AAS-T Degree, AAS Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all General Education courses.

ENGINEERING TECHNOLOGY:
ELECTRONICS SPECIALIZATION

OVERVIEW
Electronics technicians are in high demand as engineering assistants, field service technicians, electronic equipment technicians, service technicians, and broadcast technicians.

In this program you’ll learn the latest electronics processes and systems, AC/DC, semi-conductors, operational amplifiers, and digital and electronics communication. You can put your valuable skills to work in manufacturing companies, processing plants, computer service firms, telephone and wireless communications companies, or in the biomedical equipment field.

PROGRAM OUTCOMES
• Assess and analyze a variety of active and passive electronic devices to determine operational efficiency and effectiveness.
• Implement design for serviceability, packaging, wiring, and technical reports.
• Utilize critical and logical thinking procedures/processes in troubleshooting and problem solving.
• Analyze and troubleshoot components at the system level.
• Calibrate, align, and adjust electronic devices.
• National certification through Electronics Technicians Association International (ETA-I).

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/ge.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Engineering Technology: Electronics Specialization Certificate completion requires a cumulative GPA of 2.0 or higher.

CERTIFICATE
Electronics Engineering Technician Certificate

PROGRAM REQUIREMENTS
ENET 100  Direct Current                                    5 CR

ENET 282  Certified Electronics Technician Test Prep        3 CR

TOTAL PROGRAM CREDITS: 33

ENGINEERING TECHNOLOGY:
GEOMATICS SPECIALIZATION

OVERVIEW
If you’d like to prepare for a career in a growing field that won’t confine you to an office, then check out the Geomatic Engineering Technology associate degree program at Bellingham Technical College. You can put your math and computer skills to work as a surveying and mapping technician or land surveyor in a construction firm; a surveying and engineering firm; a mining, oil or gas company; a public utility; or a government agency, such as U.S. Geological Survey, Department of Natural Resources, the Bureau of Land Management, or the U.S. Forestry Service.
BTC’s associate degree in Geomatics includes training in GIS, AutoCAD and GPS skills, as well as gain a working knowledge of Washington laws and standards related to surveying, boundaries and map preparation.

**PROGRAM OUTCOMES**

- Graduates will demonstrate competency in basic GIS and surveying and mapping skills;
- Graduates will prepare for the Level I Survey Technical Exam given by the Career Development Committee of LSAW;
- Graduates will possess the ability to prepare a topographic map of a parcel of property that is evaluated by WAC 332-130 standards;
- Graduates will demonstrate entry level competency in using CAD skills;
- Graduates will demonstrate a working knowledge of the Global Positioning System (GPS) as well as demonstrate a working knowledge of Washington Law related to surveying and boundaries;
- Graduates will receive, interpret, and convey written, verbal, and graphic information.

**PLACEMENT REQUIREMENTS**

Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

**DEGREE AND CERTIFICATE REQUIREMENTS**

Engineering Technology: Geomatic Specialization AAS Degree completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all General Education courses.

**SPECIALTY COURSES: 65 CREDITS**

**ENGINEERING TECHNOLOGY:**

**MECHANICAL DESIGN SPECIALIZATION**

**OVERVIEW**

Prepare for your engineering and design career through this program. Then, work in an engineering office environment at structural engineering companies, manufacturing firms, architectural firms, refineries, construction companies.

Learn drawing and design skills to use as a mechanical engineering technician, mechanical drafter, computer aided drafter, engineering technician, or production planner.

**PROGRAM OUTCOMES**

- Create fully dimensioned orthographic and isometric CAD drawings that adhere to national standards (i.e. ANSI) and industry conventions.
- Interpret rough sketches/drawings/actual parts and transform into 2D CAD drawings according to ANSI and industry standards for the purpose of manufacture, fabrication, and/or assembly.
- Utilize parametric solid modeling software to generate 3D part models, 3D assembly models, and 2D detail/assembly drawings.
- Apply statics principles to evaluate forces in structural elements that comprise trusses, machines, and frames.
- Evaluate the stress, strain, and deflection levels of engineering components subjected to deformation, axial loads, and shear loads.
- Utilize MS Office products such as Word, Excel, and PowerPoint to generate engineering documents, reports, tables, charts, spreadsheets, and presentations.

TOTAL PROGRAM CREDITS: 20
After successfully completing this program, students will be able to:

- Demonstrate competency in hatchery methods and apply appropriate techniques to spawn, incubate, rear and release fish.
- Utilize proper tools, equipment and protective devices to safeguard against injury to self, others and workplace facilities.
- Act responsibly and ethically as an employee by being punctual, adhering to company policies and interacting positively and appropriately with co-workers and supervisors.
- Receive, interpret, and convey written, verbal, and graphic information to communicate effectively with co-workers, management and the general public.
- Compute, calculate, and convert standard and metric measurements for purposes of disease treatment and prevention, and the rearing of fish.
- Observe and comply with environmental laws and regulations related to the rearing of fish and the use and disposal of chemicals and drugs.
- Use current and emerging computerized systems or software to operate equipment, calculate results, keep records, and enter data on proper forms and records.

FISHERIES & AQUACULTURE SCIENCES

OVERVIEW
If you have a love for the great outdoors and an interest in biology and wildlife, consider earning a certificate or an associate degree in Fisheries & Aquaculture Science at Bellingham Technical College. You can prepare for a rewarding career as a fish hatchery specialist, fish culturist, fisheries technician, shellfish hatchery worker, scientific aide, water quality technician, or habitat restoration specialist. In BTC’s Fisheries and Aquaculture Science programs, you’ll learn top skills such as fish culture, aquaculture, and fish spawning that will position you for the best aquatic science jobs in the fisheries industry. The Fisheries & Aquaculture hands-on classes take place in the classroom as well as at the Whatcom Creek Hatchery at the Maritime Heritage Park in Bellingham, which is operated by Bellingham Technical College’s Fisheries & Aquaculture Science program. If you are interested in a tour of the Perry Center, please sign up at www.btc.edu/fisheriestour. If you are unable to attend any of the scheduled tours, please contact the Admissions department at admissions@btc.edu to schedule a separate tour.

PROGRAM OUTCOMES
After successfully completing this program, students will be able to:

- Demonstrate competency in hatchery methods and apply appropriate techniques to spawn, incubate, rear and release fish.
- Utilize proper tools, equipment and protective devices to safeguard against injury to self, others and workplace facilities.
- Act responsibly and ethically as an employee by being punctual, adhering to company policies and interacting positively and appropriately with co-workers and supervisors.
- Receive, interpret, and convey written, verbal, and graphic information to communicate effectively with co-workers, management and the general public.

ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.
HEATING, VENTILATION, AIR CONDITIONING & REFRIGERATION TECHNOLOGY (HVAC)

OVERVIEW
BTC’s Heating, Ventilation, Air Conditioning and Refrigeration program will prepare you for a career as an HVAC & Refrigeration Technician. You’ll learn new, higher-efficiency technologies and practices, with the valuable hands-on training that employers are looking for. In two years, you can be well-positioned for high-wage employment with heating and air conditioning contractors, refrigeration contractors, hotels, school systems, or industrial processing plants.

PROGRAM OUTCOMES
After successfully completing this program, students will be able to:

- Safely and properly install and service systems adhering to environmental laws and regulations as they apply to the HVAC/R industry.
- Demonstrate positive work traits and good customer service skills as a member of a technical team.
- Diagnose and repair common electrical and mechanical problems in HVAC/R residential, commercial and industrial systems.
- Communicate effectively in writing and verbally with customers, managers, and co-workers.
- Identify and use appropriate technical literature to install, maintain and service HVAC/R systems.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Heating, Ventilation, Air Conditioning & Refrigeration AAS Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and a minimum grade of C-/1.7 for HVACR classes. AAS-T Degree requires a cumulative GPA of 2.0 or higher, a minimum grade of C-/1.7 in all HVACR classes and a minimum grade of C/2.0 for all General Education courses.

HYPNOTHERAPY

OVERVIEW
Here’s a program to consider if you enjoy helping people and like variety in your career. BTC’s Hypnotherapy program will lead you to a rewarding career as a hypnotherapist, using hypnosis techniques to support clients with pain management, behavior modification, and other concerns.

You’ll learn valuable skills to use in your own private practice, or in a variety of healthcare settings, working with doctors, dentists, nurses, psychologists, and psychiatrists.

PROGRAM OUTCOMES
• Program graduates will apply legal and ethical issues of healthcare workers and use hypnosis techniques in a professional setting for the purpose of pain management, behavior modification, and many other psychological and social concerns clients may have.
• Upon successful completion of the program, students are eligible to apply to become a registered Hypnotherapist with Washington State through the Department of Health (DOH).

PROGRAM START
A Bellingham Technical College Admission Application is required before a student can register for Hypnotherapy courses. This program starts in Winter Quarter. Courses must be taken in sequence.

PREREQUISITE COURSE REQUIREMENTS
It is recommended that students have good basic academic skills.

DEGREE AND CERTIFICATE REQUIREMENTS
Hypnotherapy Certificate completion requires a cumulative GPA of 2.0 or greater and minimum grade of C/2.0 for Hypnotherapy courses and P/Pass HLTH 103 and HLTH 133.

PROGRAM APPLICATION/FORMS
Students are encouraged to submit an admissions application but may enroll Winter Quarter without program application or admission. Courses are held one evening per week plus one Saturday per quarter.

CERTIFICATE
Hypnotherapy Certificate

PROGRAM REQUIREMENTS

QUARTER 1
HYPN 101  Basic Hypnosis - Learning for Healthcare Field  5 CR
HLTH 133  HIV/AIDS: For Healthcare Professional  1 CR
HLTH 103  CPR: Adult Heartsaver  0.5 CR

QUARTER 2
HYPN 102  Intermediate Hypnotherapy for Healthcare Field  5 CR

QUARTER 3
HYPN 103  Advanced Hypnotherapy Techniques  5 CR

TOTAL PROGRAM CREDITS:  16.5

The following course is optional and open to program graduates:
HYPN 104  Preparing for a Hypnotherapy Practice  2 CR

INDUSTRIAL MAINTENANCE & MECHATRONICS

OVERVIEW
BTC’s Industrial Maintenance & Mechatronics program places graduates in solid careers as industrial electricians, millwrights or instrument technicians. Demand for skilled workers is strong in high-growth industries such as refining, water treatment, petrochemical, pharmaceutical, and power generation.

As an Industrial Maintenance & Mechatronics graduate, you’ll possess a broad range of highly-sought skills and knowledge. BTC’s program will teach you to troubleshoot, maintain, repair, and analyze sophisticated equipment in advanced manufacturing operations. Industrial Maintenance & Mechatronics is a great program choice if you want a high-wage career with local employers.

PROGRAM OUTCOMES
• Design, analyze, and diagnose basic electrical systems through the application of electrical theory fundamentals.
• Design, analyze, and diagnose basic industrial mechanical systems through the application of hydraulic, pneumatic, lever and pulley theory fundamentals.
• Ensure safe work practices and installations through compliance with federal, state, and local regulations and industry standards including the National Electrical Code, WAC Chapter 296 and related RCW.
• Use proper tools and test equipment to construct and maintain power, lighting, signaling, and control systems in industrial settings.
• Use proper tools and test equipment to construct and maintain mechanical systems in industrial settings.
2019-2020 Programs of Study

- Install new and modify existing process systems and components utilizing appropriate electrical and millwright/mechanical skills and materials
- Communicate clearly with team members, supervisor, and others in the workplace, effectively using oral communication as well as drawings, blueprints, and other documents.
- Exhibit professional personal conduct and appearance appropriate to the workplace.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Industrial Maintenance & Mechatronics AAS Degree and Certificate completion requires a cumulative GPA of 2.0 or greater and minimum grade of C/2.0 for all General Education courses and minimum grade of C-/1.7 for program courses.

INSTRUMENTATION & CONTROL TECHNOLOGY

OVERVIEW
Instrumentation and process control technicians install, maintain, repair, and adjust the measuring and controlling instruments that make plants run safely. Bellingham Technical College’s Instrumentation & Control program will give you training for a career as an instrumentation technician for high-tech industries such as power generation plants, water treatment facilities, chemical manufacturing plants, canneries, aerospace plants, bio-pharmaceutical plants, semiconductor manufacturing plants, and pulp and paper mills.

BTC’s classes in the Instrumentation & Control program will train you to maintain, repair, and troubleshoot instruments and control systems in industries that increasingly rely on automation. Instrumentation & Control is a great program choice if you’re looking for a high-wage career with employment potential across the nation and beyond.

PROGRAM OUTCOMES
- Communication: Communicates and expresses thoughts across a variety of mediums (verbal, written, visually) to effectively persuade, inform, and clarify ideas with colleagues.
- Time Management: Arrives on time and prepared to work; budgets time an meets deadlines when performing technical tasks and projects.
- Safety: Complies with national, state, and local safety regulations when repairing, calibrating, and installing instruments.
- Diagnose and Repair Existing Instruments: Assesses, diagnoses, and repairs faulty instruments in measurement and control systems using logical procedures and appropriate test equipment.
- Install and Configure New Instruments: Builds, configures, and installs new instrument systems according to plans, applying industry construction standards, and ensuring cor-
rect system operation when complete.

- Process Control Optimization: Improve system functions by evaluating control system performance; implements strategies to tune and stabilize control systems.

- Instrument Calibration: Assesses instrument accuracy and correct inaccuracies using appropriate calibration procedures and test equipment.

- Documents Instrument Systems: Interprets and creates technical documents (electronic schematics, loop diagrams, and P&IDs) according to industry (EIA, ISA) standards.

- Self-Directing Learning: Selects and researches relevant information sources to learn new principles, technologies, and techniques.

- Career Development: Researches and seeks opportunities for promotion and job advancements in work and career settings.

**PLACEMENT REQUIREMENTS**

Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

**ADDITIONAL REQUIREMENTS**

Completion of Intermediate Algebra (MATH 099) or placement into Pre-Calculus (MATH& 141 Precalculus I) is a required prerequisite for enrollment in this program.

**DEGREE AND CERTIFICATE REQUIREMENTS**

Instrumentation & Control Technology AAS Degree and Certificate completion requires a cumulative GPA of 2.0 or higher, a minimum grade of C/2.0 for MATH& 141 Precalculus I, and a minimum grade of C-/1.7 for all other required courses. AAS-T Degree requires a cumulative GPA of 2.0 or higher and minimum grade of C-/1.7 for all required program courses and minimum grade of C/2.0 for all General Education courses.

LEGAL ADMINISTRATIVE ASSISTANT

OVERVIEW
If you have a high attention to detail, and are looking for a solid career in the legal field, choose this program to prepare to be a legal administrative assistant, legal receptionist, or legal secretary. Employment choices are many for highly-skilled workers in this field. BTC's Legal Administrative Assistant Program will provide you a wide range of skills to use with employers such as law firms, government offices, real estate firms, and corporate offices.

PROGRAM OUTCOMES
• After successfully completing this program, students will be able to:
  • Type 35 words per minute with no more than four errors on a three-minute timed writing.
  • Apply legal terminology and knowledge of legal resources to produce and analyze legal documents.
  • Produce accurate business documents in a variety of formats using computer technology and applying editing and language skills.
  • Use a spreadsheet program to solve business problems using formulas, functions, lists, and charts.
  • Analyze, calculate, and interpret financial data.
  • Apply techniques for managing time, records, and meetings in an office environment.
  • Use Microsoft Outlook to create electronic messages and contacts, manage multiple calendars, and track tasks.
  • Apply communication and interpersonal skills while providing effective administrative support in a legal office environment.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. MACHINING

OVERVIEW
If you're interested in working with your hands to turn designs into the parts and products that make the world work, then a career in machining could be for you. Bellingham Technical College's Machining program will give you training for top jobs in aerospace, manufacturing, fabricating, and CNC custom shops. You'll be prepared to work right away as a machinist; with experience you can advance to journey-level machining, tool programming, CNC operating, or engineering.

Bellingham Technical College's labs will train you for your career with high-tech machining equipment. In your classes, you'll learn how to use machine tools such as lathes, drill presses, and milling machines, in addition to blueprint reading, basic CNC programming and machine processes. Employers who hire graduates from BTC’s Machining program include aircraft, boat, and automobile manufacturers, industrial machinery firms, and machine shops.

PROGRAM OUTCOMES
• Demonstrate competency in their ability to operate machine shop equipment: lathes, mills, grinders, and drills
• Demonstrate competency in their ability to read and interpret blueprints per industry standards
• Successfully demonstrate their ability to process and plan a piece part through the lab until completion
• Demonstrate competency in CNC machine tool operation and programming
• Demonstrate competency in CAM design and manufacturing

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. ### MEDICAL CODING & BILLING GENERALIST

**OVERVIEW**
Train for a career as a medical records and health information technician, or a billing and posting clerk, through BTC’s Medical Coding & Billing Generalist program. Students will gain a broad base of knowledge in general office skills, along with the required background in medical insurance billing and coding procedures. Program graduates typically work for hospitals, physician offices, insurance companies, extended care facilities and home healthcare firms.

**PROGRAM OUTCOMES**
- Graduates will have the skills and knowledge to organize, analyze, and technically evaluate health records for accuracy and completeness.
- Graduates will be able to assign code numbers to diagnoses and procedures for indexing health data and processing claims and complex billing procedures based on various requirements of health plans and insurance companies.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

**PROGRAM ENTRY INFORMATION**
Students may begin this program in any quarter on a space-available basis. Some required courses are only offered once a year; students should consult with their program advisor for correct course sequencing.

**PLACEMENT REQUIREMENTS**
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

**DEGREE AND CERTIFICATE REQUIREMENTS**
Medical Coding & Billing Generalist certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all courses.

**Nursing**

**Overview**
The Bellingham Technical College (BTC) Registered Nursing Program is nationally accredited through the Accreditation Commission for Education in Nursing (ACEN) and is a concept-based Associate Degree in Nursing Direct Transfer Agreement/Major Related Program (DTA/MRP). This degree was collaboratively developed by Washington State community colleges, technical colleges, and four-year universities to create a streamlined pathway to the Bachelor of Science in Nursing (BSN) degree. Graduates of the BTC Nursing Program are eligible to sit for the Registered Nurse National Council Licensure Examination (NCLEX-RN) and can apply for admission to RN-BSN programs at Washington State colleges and universities.

There is one Nursing Program at BTC which has two program options. For students new to the field of nursing there is the two-year, full-time Associate in Nursing DTA/MRP. The second program option is for Licensed Practical Nurses (LPNs) who want to complete their associate degree in registered nursing. LPNs holding an active, unencumbered WA license may apply for advanced placement into the part-time, evening LPN-RN cohort. Both program options graduate students with the Associate Degree in Nursing DTA/MRP.

**Program Outcomes**
The BTC Associate Degree Nursing graduate will:

- Nursing Care: Integrate the nursing process to deliver individualized culturally competent care.
- Self-Care Promotion: Formulate strategies to promote the health of self and others.
- Professionalism: Model integrity through professional boundaries, ethical behaviors, and respectful communication.
- Collaborative Leadership: Maximize positive health outcomes through the promotion of evidence-based clinical care within the interdisciplinary team.
- Clinical Judgment: Model safe nursing care by integrating critical thinking, evidence-based practice, and prioritization.

**Prerequisite Courses**
All prerequisite courses must be a minimum of 5 quarter credits, or 3 semester credits. The following courses must be completed with a B (3.0) or higher in each course:

- MATH& 146 Introduction to Statistics
- BIOL& 241 Human A & P 1
- BIOL& 242 Human A & P 2
- BIOL& 260 Microbiology
- CHEM& 121 Introduction to Chemistry
- ENGL& 101 English Composition I
- PSYC& 200 Lifespan Psychology

The following courses must be completed with a C (2.0) or higher in each course:

- PSYC& 100 General Psychology
- BIOL& 160 General Biology w/Lab
- 5 credits of Communications electives
- 10 credits of Humanities electives

**Placement Requirements**
ATI Test of Essential Academic Skills version 6 (ATI TEAS v. 6) assessment. Applicants must score at the “PROFICIENT” level or higher in each of the four areas; see the ATI TEAS Handout on the Nursing website for details.

Healthcare Experience. Two-year applicants must submit a Healthcare Experience Verification Form for prior approval. Experience in healthcare may be demonstrated by certification or training in an allied healthcare field. Other experience will be evaluated on a case-by-case basis by program staff. LPN-RN applicants must have an active, unencumbered Washington State LPN license and submit the Verification of Work Experience Form documenting 1,000 hours of work as an LPN within the last five years. These two forms are located on the Nursing website.

**Clinical Placement Requirements**
After acceptance into the Nursing Program but prior to beginning clinical rotations, students must complete the clinical placement process and be at least 18 years of age. Clinical requirements include:

- Criminal background check
- 10-Panel urine drug screen
- Physical examination
- Tuberculotic screening
- Required immunizations
- Current American Heart Association BLS for Provider CPR certification
- 7-hours of HIV/AIDS education for healthcare providers (waived for LPNs)
- Medical Insurance Coverage

**Degree Requirements**
Nursing DTA/MRP degree completion requires a cumulative GPA of 2.0 or higher, a minimum grade of B- (2.7) for all Program Core courses, and minimum grades for all Prerequisite Courses as described above. Students must also complete the minimum required clinical hours.
### Direct Transfer Agreement/Major Related Program

**Program Outcomes**

- Demonstrate clinical competencies as defined in WAC 246-841.
- Identify and apply nursing knowledge necessary in the Nursing Assistant role.

### Nursing Assistant

**Overview**

Nursing Assistants are in high demand by employers in Whatcom County! Choose BTC’s Nursing Assistant program to train for nursing assistant jobs in a wide variety of medical settings. The knowledge and skills you’ll gain are highly valued by healthcare industry employers such as hospitals, assisted living facilities, nursing homes, and home health agencies.

Nursing Assistant training meets the Healthcare Experience requirement for entry into the BTC Registered Nursing Program.

The Nursing Assistant Program at Bellingham Technical College is approved by the State of Washington, Department of Health, Nursing Care Quality Assurance Commission.

Students who complete the Nursing Assistant program will be eligible to take their state certification exams.

**Total Program Credits:** **47**
PLACEMENT REQUIREMENTS
ACCUPLACER Classic (valid for 5 years from testing date):
- Reading Comprehension score of 50 or ABE 054 with a grade of C or higher.
- Arithmetic score of 38 or MATH 090 or ABE 050 with a grade of C or higher.

ACCUPLACER Next-Generation (starting January 23, 2019):
- Reading score of 232 or ABE 054 with a grade of C or higher.
- Arithmetic score of 230 or MATH 090 or ABE 050 with a grade of C or higher.
- There are no pre-program course requirements. Healthcare Provider CPR (HO 127) and 7 hour HIV/AIDS Education (HLTH 133) may be taken before the program starts but this is not required.

ADDITIONAL REQUIREMENTS
After registering for Nursing Assistant program classes but prior to beginning clinical rotations, students must complete the clinical placement process. Clinical requirements include:
- Criminal background check
- Tuberculous screening
- Medical Insurance Coverage

Additionally, the 7-hour HIV/AIDS Education and AHA BLS Provider CPR certification must be completed before a student is cleared to attend clinical rotations. More information is available on the Nursing Assistant website.

CERTIFICATE REQUIREMENTS
Certificate completion requires a cumulative GPA of 2.0 or higher, a minimum grade of C (2.0) for required courses, and minimum required attendance in classroom, lab, and clinical rotations. HO 127 and HLTH 133 must be passed with a P.

CERTIFICATE

PRE-NURSING

OVERVIEW
Have you always wanted to be a nurse? Are you currently employed in healthcare and want to advance your education and expand your career opportunities? Then BTC’s Associate in Pre-Nursing (Transfer) program is for you!

The Associate in Pre-Nursing Direct Transfer Agreement/Major Related Program (DTA/MRP) degree is intended for students looking to directly transfer to WA State universities to complete their Bachelor of Science in Nursing (BSN) degree. Students enrolled in this 90-credit degree program receive instruction in English, psychology, mathematics, and science to prepare them to enter select Washington State four-year pre-licensure Nursing programs as a junior.

Upon completion of BTC’s Associate in Pre-Nursing DTA/MRP degree, students are eligible to transfer to a number of Washington State institutions including University of Washington, Washington State University, Northwest University, Pacific Lutheran University, Seattle University, and Walla Walla University. Completing this degree does not guarantee admission to any baccalaureate university. Students should meet with a transfer advisor at the institution to which they intend to transfer. Please note that this degree alone will not make the BTC graduate eligible to sit for the Registered Nurse National Council Licensure Examination (NCLEX-RN). Graduates will need to complete their BSN degree at a university before they can become a Registered Nurse.

All students interested in the Associate in Pre-Nursing DTA/MRP Degree should meet with the Nursing Student Navigator, to schedule an appointment contact the Admissions and Student Resource Center at 360.752.8345. The Washington Student Achievement Council is currently updating this degree therefor course requirements may change. Students apply for the Associate in Pre-Nursing DTA/MRP by applying online to BTC and indicating Pre-Nursing DTA/MRP as their area of study.

PLACEMENT REQUIREMENTS
Please note: The Washington State Achievement Council is currently updating this degree; therefore course requirements may change.

Students seeking credit for completed coursework from other colleges or universities should submit sealed Official Transcript(s) from the prior institution(s) to the BTC Admissions Office for evaluation.

Placement testing in Reading, Math and Writing may also be required. Test scores or transcripts from another college may also be accepted. For more information on transferring classes, please see the Transfer Student page.

DEGREE REQUIREMENTS
A cumulative GPA of 2.0 or higher must be earned in all BTC coursework, and in all coursework applied to the degree. A minimum of 50% of degree credits, including the last quarter, must be completed at BTC. A course may be credited toward only one distribution area. Participating institutions only accept fully completed BTC DTA/MRP programs in their entirety (completed BTC classes are not viewed individually). Students must complete a graduation application form the first week of the quarter in which they plan to complete their degree.
DIRECT TRANSFER AGREEMENT/
MAJOR RELATED PROGRAM

Associate in Pre-Nursing, Direct Transfer Agreement/Major Related Program

ADVISING NOTES AND RECOMMENDATIONS

- Students should meet with a transfer advisor at the institution to which they intend to transfer. This advisor can provide assistance in developing an educational plan, course selections, and entrance requirements such as minimum GPA, a higher GPA in a selected group of courses or a specific minimum grade in one or more courses and specific course choices where options are available.
- No more than 10 credits per discipline area, five credits maximum in world languages or ASL, and no more than five credits in performance/skills classes are accepted.
- For admission to Nursing as a major, it is critical to note that grade point average requirements vary and admission is often competitive.
- Certain schools may have additional “university-specific” requirements of admission and/or graduation that are not prerequisites specifically identified in the DTA requirements.

ASSOCIATE DEGREES DEVELOPED UNDER THIS AGREEMENT SHALL

- Meet the requirements of the statewide Direct Transfer Agreement as it applies to both for the institutions party to the agreement and other institutions party to the statewide DTA agreement. If admitted to the baccalaureate institution, students will have junior status. Student seeking admission to public institutions will be given priority in the admission decision for admission to the institution over similarly qualified transfer applicants without a Direct Transfer Associate degree. Admission to an institution does not guarantee admission to a specific program or major.
- Be issued only to students who have earned a cumulative grade point average of at least 2.00, as calculated by the degree awarding institution. Specific grade requirements vary from course to course and among transfer institutions. Students must check with the transfer institution. Note that admission to the BSN upper division nursing programs is very competitive; therefore, no particular GPA can guarantee admission to any specific nursing program.

PROGRAM REQUIREMENTS

COMMUNICATION SKILLS: 10 CREDITS
ENGL& 101  English Composition I  5 CR
ENGL& 102  English Composition II  5 CR

HUMANITIES: 15 CREDITS
A curriculum that provides students with an understanding of and sensitivity to human diversity is encouraged (required by WSU). Credits in the humanities distribution area provide one opportunity for such a curriculum. See the humanities choices in the WSU “Diversity Course Identification Guidelines” for possible selection or choose courses that include minority, non-western, ethnic or other area studies.
CMST& 220  Public Speaking  5 CR

Elective  5 CR

TOTAL PROGRAM CREDITS: 90

OFFICE ASSISTANT

OVERVIEW
Choose this program to train for a career as a receptionist or office assistant. Employers such as physician’s offices, law firms, temporary help agencies, and consulting firms are in need of skilled office staff. You could also work for manufacturing and industrial firms, telecommunications companies, and retail and wholesale organizations, plus many other businesses that need office clerical support.

PROGRAM OUTCOMES
Graduates will be able to demonstrate competency in touch keyboarding at 40 wpm on a three minute timing with a three error limit.
Graduates will be able to demonstrate 73 percent competency in word processing, written business communication, business math, effective oral communication skills, office skills and procedures, and MS Windows.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all courses.
CERTIFICATE
Office Assistant Certificate

ELECTIVES COURSES: 5 CREDITS
Office Assistant students may choose elective credits from any 100-level or higher courses with the following prefixes: ACCT, BUS, CAP, CIS, ECON, HRM, LGL, IT and MGMT. Field-Based Experience courses may not be used as elective. Courses taken to meet the general education or program core requirements may not be used for electives.

GENERAL EDUCATION COURSES: 15 CREDITS
BUS 150  Math for Business  5 CR
BUS 171  Technical Communications  5 CR
CMST& 210  Interpersonal Communication  5 CR

TOTAL PROGRAM CREDITS: 57

OPERATIONS MANAGEMENT

OVERVIEW
BTC's Bachelor of Applied Science degree in Operations Management (BASOPS) is designed to meet the needs of students who want to advance their careers into supervisory and management roles in industries such as manufacturing, IT, transportation, and retail/wholesale. During the BASOPS degree, students will learn about operations management tools and techniques, develop their business skills, and apply them to solve practical problems in their chosen industry.

The delivery model for this degree has been designed to meet the educational needs of the working adults who are expected to be the largest group of students. It is based on a combination of asynchronous and synchronous web-based instruction with face-to-face meetings at times convenient to students. Mentored “focused study” courses and individual and group capstones will be used to develop students’ independent thought and critical thinking skills to the level expected in a baccalaureate degree and as required for a successful career in an operations management role.

PROGRAM OUTCOMES
Graduates of the BASOPS program will be able to:
• Demonstrate a mastery of the mathematical tools required for operations management.
• Apply qualitative and quantitative forecasting techniques to the selection of processes and facility layouts that will optimize production and/or service delivery.
• Plan a comprehensive quality management program for use within an organization.
• Apply mathematical approaches to solve typical make/buy and outsourcing problems.
• Assess the value of Lean concepts, including Value Stream Mapping, Workplace Organization and Standardization, 5-S and Cellular Flow, Kan Ban and Total Production Maintenance to operations management.
• Demonstrate the application of project management techniques to develop realistic and comprehensive project plans; identify risk areas; monitor the plans; and deal with problems.
• Develop clear and coherent technical reports, proposals, memoranda, and e-mails; and deliver presentations to groups.
• Analyze projects, compare alternatives, and make business decisions based on economic principles such as time value of money, internal rate of return, and cost-benefit ratios.
• Demonstrate the ability to identify and then develop acceptable resolution of ethical dilemmas that might occur in the workplace.
• Analyze how leadership skills, recruitment and retention practices, motivation and team building, the management of change, and conflict resolution affect the behavior and interaction of people at work.
• Demonstrate a level of critical thinking, teamwork, communication, and technical and information literacy commensurate with an operations management position.

PROGRAM PREREQUISITES
Students must complete an accredited associate degree or higher, and if necessary take these additional courses before applying to the BASOPS program:
• ENGL & 101 English Composition I
• MATH 099 Intermediate Algebra
• Humanities or Social Science

Bridge Courses — up to 15 credits — are required for entry into the Core Courses. Students must complete these courses before being admitted to the 300-level Core Courses:
• MATH & 146
• Natural Science with Lab
• Humanities
• Social Science
• Additional General Education Course
PROGRAM APPLICATION/FORMS
NOTE: Earning an Associate degree does not mean that you will be automatically accepted into the BASOPS program. You will still need to go through a competitive application process.

For more information please contact our Program Office Assistant, Andrea Schuman at 360.752.8580 or baset@btc.edu.

DEGREE REQUIREMENTS
Operations Management BAS degree completion requires a minimum grade of C/2.0 for all General Education, Core, and Elective courses.

PERSONAL FITNESS TRAINER

OVERVIEW
If you have an interest in the health and fitness industry and would like to prepare for a career as a Personal Fitness Trainer, this program is for you!

This program is designed for people currently employed or seeking employment in the fitness industry, or individuals wanting a better understanding of health & fitness.

Completion of the program will prepare students for jobs working in the fitness industry, both in a fitness facility and as a private trainers.

Students will be introduced to the American Council on Exercise (ACE), a certifying agency that offers a career and employment placement program, with a nationwide network to assist successful candidates with job placement in the Fitness industry.

PROGRAM OUTCOMES
- Demonstrate proficient methods of developing and leading group exercise programs and complete personal guided training programs.
- Effectively manage gym operations or a training facility.
- Provide the tools needed to develop healthy lifestyle habits professionally and personally.
- Successfully pass the ACE Personal Fitness Trainer Certification test.

PROGRAM START
This hybrid program starts in Fall Quarter and courses must be taken in sequential order. Program classes meet two evenings per week (Tuesday and Thursdays) and the rest of the time instruction and study is done online. A Bellingham Technical College Admission Application is required before a student can register for the Personal Fitness Trainer certificate.

PREREQUISITE COURSE REQUIREMENTS
It is recommended that students have good basic academic skills.

Before taking the hybrid courses, students should be confident about computer and study skills. Students will need access to a computer and the internet several days a week, for a total of 3-5 hours a week for each six-credit class.

DEGREE AND CERTIFICATE REQUIREMENTS
Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for required courses.

PROGRAM APPLICATION/FORMS
This state funded program charges tuition based on residency. To establish residency, apply to BTC at www.btc.ctc.edu/apply. State “Personal Fitness Trainer” as your intended program of study.

PHLEBOTOMY

OVERVIEW

A certificate in Phlebotomy will provide the student a background in basic anatomy/physiology, medical terminology, medical office procedures, and phlebotomy skills. This program also includes an externship experience at a clinical facility where students must perform successful venipuncture and blood draws on at least 100 patients. Once completed, students are eligible to apply for State licensure as a Health Care Assistant, Level A.

PROGRAM OUTCOMES

- Perform venous and capillary invasive procedures for blood withdrawal. Demonstrate the knowledge and skills for entry level competency as a Category “A” Health Care Assistant, per guidelines outlined in WAC 246-826-130.
- Properly administer appropriate approved drugs per topical, rectal, otic, ophthalmic, and inhaled routes.
- Interpret the Washington State Health Care Assistant Law and, how it applies to the phlebotomist with 80% accuracy.
- Describe the phlebotomist's role in a medical lab setting with 80% accuracy.
- State eight rules for safety within the laboratory with 100% accuracy.
- Explain the disease cycle of infectious pathogens with 80% accuracy.
- Select appropriate PPE (Personal Protection Equipment), demonstrate proper hand washing technique and safe removal of contaminated gloves with 100% accuracy.
- Explain the purpose and mission of OSHA/WSAH and Universal Precautions, define “CLIA 88” as it applies to phlebotomists, and explain Material Safety Data Sheets (MSDS) with 80% accuracy.
- Define quality control and state the principle of quality assurance with 80% accuracy.
- Define the difference between arteries, veins and capillaries; describe the different cells and components of blood and their functions, with at least 80% accuracy.
- Define the difference between serum and plasma with 100% accuracy.
- Identify the different supplies and equipment used in venipuncture and capillary collection with at least 80% accuracy.
- Demonstrate proper, safe, and successful venipuncture with at least 80% accuracy.
- List the most frequently encountered medical/physiological complications of venipuncture, and explain preventative measures and appropriate treatment for each with at least 80% accuracy.
- Explain the most common causes, and remedies, of a “short” draw or no blood collected during venipuncture, list the four most common reasons for specimen rejection by the laboratory, and discuss preventative measures with at least 80% accuracy.

PLACEMENT REQUIREMENTS

- ACCUPLACER Reading Comprehension and Sentence Skills score of 71 or higher.
- Computerized Touch Keyboarding (CAP 105) can be satisfied by passing the Office Proficiency Assessment & Certification (OPAC) test with a score of 35 WPM.

PREREQUISITE COURSE REQUIREMENTS

- Essentials of Anatomy & Physiology (BIO 105) or Human A & P 1 (BIOL& 241) and Human A & P 2 (BIOL& 242)
- Diseases of the Human Body (BIO 127) or General Biology with Lab (BIOL& 160)
- Fundamentals of Medical Terminology (HT 126) or Comprehensive Medical Terminology (HT 129) or Human A & P I (BIOL& 241) and Human A & P II (BIOL& 242)
- Medical Office Procedures (BUS 230)
- Computerized Touch Keyboarding (CAP 105)
- HIV/AIDS: Healthcare Professional- 7 Hour (HLTH 133)
- First Aid Fundamentals (HLTH 155)

DEGREE AND CERTIFICATE REQUIREMENTS

Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for required courses.

ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.
ADDITIONAL REQUIREMENTS AND APPLICATION/FORMS

• Phlebotomy Application Completion Form
• Essential Skills and Functional Abilities Form
• Criminal History Background Check Notification Form
• Official transcripts documenting prerequisite completion, including unofficial BTC transcripts.
• OPAC Test Score (if applicable)
• Students who have successfully completed General Biology w/Lab (BIOL& 160), Human A&P 1 (BIOL& 241) and Human A&P 2 (BIOL& 242) will have satisfied BIO 105, HT 126 and BIO 127.

Prior to registration for HO 157 Introduction to Phlebotomy Skills, admitted students must complete and submit evidence of the following requirements:

• Criminal background check.
• 11-panel drug screen.
• Students will be required to create an online account with Certified Background and pay a fee of $89.00 for the background check and drug screen.
• Students may be required to travel to Skagit County for clinical placement.

AND
BIOL& 242  Human A & P 2  5 CR

TOTAL PROGRAM CREDITS:  30

PROCESS TECHNOLOGY

OVERVIEW
At Bellingham Technical College, the Process Technology Program will prepare you for a position as a process technician or operator for employers in power generation, refining, manufacturing, and many other industries. Process technicians work to ensure the safety standards of production and assembly lines, and oversee quality for an employer’s processes. Currently, our primary employers in Washington State are the four refineries in Whatcom and Skagit counties. Graduates have also gone to work in other water treatment, power generation, and manufacturing facilities in our region, across Washington State, and beyond.

PROGRAM OUTCOMES

• Appraise the typical hazards found in process plants, basic PPE, and know the requirements of regulating bodies regarding safety, health, and environmental issues (OSHA, DOT, EPA).
• Combine mathematics, chemistry and physics theory to apply to process applications such as fluid flow, the nature of heat, chemical reaction, boiling points, vapor pressure and electrical currents.
• Recognize typical organizational structures, economics, and quality control systems of the process industry.
• Apprise fundamentals of refining and power generation processes; know core functions and principles of operation of typical process equipment such as pumps, compressors, filters and dryers, lubrication systems, valves, piping systems, and draw from memory Process Flow Diagrams.
• Integrate the principles of process automatic control and Data Control Systems (DCS) to manage simulated DCS scenarios.
• Graduates will have the ability to compare actual process plant experience versus preconceived notions.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Process Technology AAS Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for AMATH 111 course. AAS-T Degree requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all General Education courses.

RADIOLOGIC TECHNOLOGY

OVERVIEW
If you enjoy working with people in a medical setting, you should check out the Radiologic Technology program at BTC! BTC’s programs in Allied Health are geared for students with an interest in health, wellness, and medical fields.

Choose this program to prepare for a rewarding career as a radiologic technologist. You’ll learn the latest technologies used in the field and gain skills that are in demand by hospitals, imaging centers, and clinics.

PLACEMENT REQUIREMENTS

ACCUPLACER Classic (valid for 5 years from testing date):
- Reading comprehension score of 85 & Sentence Skill score of 86
  - Or RDG 085 & ENGL 092 with a grade of B or higher
  - Or AENGL 100 with a grade of C or higher
- College Level Math score of 75 or MATH 099 with a C or higher

ACCUPLACER Next-Generation (starting January 23, 2019):
- Reading score of 256 & Writing Score of 255
  - Or RDG 085 & ENGL 092 with a grade of B or higher
  - Or AENGL 100 with a grade of C or higher
- Advanced Algebra & Functions score of 240 or MATH 099 with a C or higher
- Passing scores in the Internet and Computing Core Certification (IC3) test battery or successful completion of Digital Tools or Tech Connections completed at Whatcom County high schools. (Not required for students who complete CAP 101 or equivalent course.)
- (Beginning in Fall 2019) Clinical Shadowing Experience 8 hours: This experience will be required as an entry requirement in a block of 4 hours in the hospital setting and another block of 4 hours in an office or clinic environment. No grade or credit is awarded. A list of names and facilities serving as contact points will be provided.

PREREQUISITE COURSES
- Human A & P 1 (BIOL& 241) Must be taken within 3 years of being placed on the wait list. Note: Requires a 2.7 GPA (B-grade) or higher.
- Human A & P 2 (BIOL& 242) Must be taken within 3 years of being placed on the wait list. Note: Requires a 2.7 GPA (B-grade) or higher.
- Public Speaking (CMST& 220)
- English Composition 1 (ENGL& 101)*
- HIV/AIDS Education (HLTH 133)
- Current Healthcare Provider CPR Card (HO 127). Please note that Healthcare provider CPR certification must remain current throughout program. Students should obtain certification in July, August or September prior to program acceptance. More details to be provided at Radiologic Technology program orientation.
  - Fundamentals of Medical Terminology (HT 126)*
  - Math in Society (MATH& 107) preferred, will accept higher.*
  - General Psychology (PSYC& 100)*

*requires minimum 2.0 GPA or higher.

ADDITIONAL REQUIREMENTS
- Radiologic Technology Application Completion Form
- Criminal History Background Check Notification Form
- Official transcripts documenting prerequisite completion, including BTC unofficial records.

The program is planned with a regional focus in collaboration with Edmonds Community College, Everett Community College, North Seattle Community College, Peninsula College, Skagit Valley College, and Whatcom Community College. As part of the admissions process, you will be asked to select and rank your preference for placement at the Bellingham or Everett cohort sites.

Bellingham cohort students attend classes at Bellingham Technical College.

Everett cohort students attend classes at the Everett Community College. Students will be assigned regional clinical experience, on a variety of shifts, in hospitals and clinics in Whatcom, Skagit, Island, Snohomish, and King Counties.

Prior to registration for Radiologic Technology program classes, admitted students must be eighteen (18) years of age and submit evidence of the following requirements:
- Physical exam and specified immunizations
- Criminal background check
- 11-panel drug screen
- Current American Heart Association BLS for Healthcare Provider CPR
- Medical insurance coverage

NOTE: Students will be charged a fee of approximately $119.00 for the background check, drug screen, and tracking of required health documents.

Prior to registration for Quarter 5, second-year students must com-
2019-2020 Programs of Study

Radiologic Technology AAS-T Degree and Certificate completion requires a cumulative GPA of 2.0 or higher, and minimum grade of C (2.0) for required courses.

RECEPTIONIST

OVERVIEW
Choose this program to train for a career as a receptionist or office assistant. Employers such as physician’s offices, law firms, temporary help agencies, and consulting firms are in need of skilled office staff. You could also work for manufacturing and industrial firms, telecommunications companies, and retail and wholesale organizations, plus many other businesses that need office clerical support.

PROGRAM OUTCOMES
- Graduates will be able to demonstrate competency in touch keyboarding at 40 wpm on a three minute timing with a three error limit.
- Graduates will be able to demonstrate 73 percent competency in word processing, written business communication, business math, effective oral communication skills, office skills and procedures, and MS Windows.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: www.btc.edu/GE.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

RESIDENTIAL HOME INSPECTION

OVERVIEW
If you’d like a fast-track option to setting up your own professional home inspection business—or a career with a home inspection company—then you should consider this course.

As of September 1, 2009, Washington State requires all home inspectors in the state to be licensed. BTC’s Fundamentals of Home Inspection Course was the first to receive approval from the Department of Licensing. This intensive, full-time course combines classroom instruction with hands-on lab and inspection work, including training on the topic of identifying wood destroying organisms.

Home inspectors examine and report on a home’s systems and structure—from the roof to the substructure crawl space, basement or slab foundation. Typically, inspectors set up their own inspection business and work for real-estate purchasers or are hired by home inspection companies or firms specializing in architectural, engineering, and related services.

If you enjoy the challenge of working with homes of all ages, sizes, and conditions, this is the program for you!

This four-week course is offered several times during the year.

PROGRAM OUTCOMES
The goal of this program is to prepare entry-level home inspectors who are able to pass the state licensing exam and successfully work in the field of residential home inspection. Adhering to the core curriculum for residential home inspection, the student will gain expertise in the theory and application of professional methods of performing building inspections.

- RHI 111: Students will be able to describe the systems and components found in homes and be prepared to carry out noninvasive home inspections per WA State laws at residential properties while employing special training and education.
- RHI 112: Students will complete five thorough home inspection reports that meet state standards.

ADDITIONAL REQUIREMENTS
A personal laptop that is Windows compatible with Wi-Fi and Word processing capability is required for participants.

It is recommended that students have good basic academic skills.

For field training (RHI 112), students must have flashlight(s), protective coveralls and basic respirators or face masks.

For questions, contact lead Instructor Steve Smith at ss smith@btc.edu or 360.752.8796.

DEGREE AND CERTIFICATE REQUIREMENTS
Certificate completion requires a cumulative GPA of 2.0 or greater and minimum grade of C/2.0 for required courses.

PROGRAM APPLICATION/FORMS
A Bellingham Technical College Admission Application is required before a student can register for the Residential Home Inspection certificate. Keyboard, typing and computer skills are necessary to complete program requirements.

PHYSICAL REQUIREMENTS
Anyone interested in becoming a home inspector should be aware that it is a very “physical” job that requires some amount of dexterity and strength, as well as a willingness/ability to get in tight spaces such as crawl spaces and attics, within industry standards. Traversing roofs is expected of home inspectors when it is safe to do so and this sometimes requires moving cumbersome ladders around the home. Home inspectors must be able and willing to work in all kinds of weather conditions and be prepared to do so.

SOCIAL MEDIA MARKETING

OVERVIEW
According to the 2015 Social Media Marketing Industry Report by Social Media Examiner, marketers place a very high value on social media for growing and promoting their businesses. 96% of marketers surveyed indicate that social media is important for their business, while more than 91% want to know the most effective social tactics, and the best ways to engage with social media. From Facebook to LinkedIn, Twitter to YouTube companies and individuals embrace social media platforms to attract and retain customers. The program addresses the many benefits and challenges of social media usage, and provides a roadmap to help individuals and companies navigate social media for competitive advantage. Our program addresses the top social media subjects marketers want to learn about including tactics, engagement, measurement, tools and audience, helping in-
individuals and their companies navigate the social media landscape, and gain a competitive edge.

PROGRAM OUTCOMES
• Describe SMART social media goals to achieve successful online campaigns.
• Evaluate a company’s current situation, isolate social media issues and provide solutions by identifying appropriate social media marketing portals to influence consumer and improve the company’s reputation.
• Create a social media marketing plan and track progress in achieving goals with a variety of measurement tools, services, and metrics.
• Use analytics to monitor and evaluate progress.

PLACEMENT REQUIREMENTS
There are no formal prerequisites or entry requirements to complete the Social Media Marketing Certificate. Students are expected to have a basic understanding of web technologies and marketing concepts prior to registering for the Social Media Marketing classes. Students who wish to complete the Business Management AAS or AAS-T degree will need to complete assessment testing in Reading, Math, and Sentence Skills. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for all courses.

SURGERY TECHNOLOGY

OVERVIEW
If you are interested in being a valuable part of surgery teams, working beside surgeons, nurses, and other medical professionals, you can train for an exciting career as a Surgery Technologist.

With BTC’s high quality education and hands-on training, you’ll gain the valuable skills needed now by hospitals, outpatient surgery centers, and dental surgery offices.

This surgery technology education program is approved by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The CAAHEP may be reached at 1361 Park Street Clearwater, FL 33756. Phone 727-210-2350. Http://www.caahep.org/.

PROGRAM OUTCOMES
The goal of this program is to prepare competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

Adhering to the Core Curriculum for Surgical Technologists, 6th ed. and employer and instructor’s expectations, upon completion of the Surgery Technology program, the student will:
• Demonstrate proficiency in the care of the operative environment preoperatively, intraoperatively, and postoperatively.
• Provide safe patient care with strict adherence to sterile technique and asepsis.
• Demonstrate critical thinking relating to prioritization, anticipation, problem analysis and evaluation of solutions.
• Apply the principles of effective verbal, non-verbal, and written communication.
• Compile completed Clinical Case Experience Log of surgical procedure assistance in accordance with the Core Curriculum for Surgery Technology, 6th ed.
• Demonstrate knowledge and experience by successful completion of the National Certification Examination for Surgical Technologists.

PLACEMENT REQUIREMENTS
Applicants to the Surgery Technology Program must complete the ATI TEAS (Test of Essential Academic Skills) exam with a score of “proficiency” or higher in each of the four areas (reading, mathematics, science and English language and usage) prior to program application.

PREREQUISITE COURSES
The following courses must be completed with a 3.0 (B) grade or better:
• Intro to Surgery Technology (SURG 100)
• Human A&P 1 (BIOL& 241) ** (Must be no older than 5 years at the time you are eligible for placement on the program ready list)
- Human A&P 2 (BIOL& 242)** (Must be no older than 5 years at the time you are eligible for placement on the program ready list)
- Microbiology (BIOL& 260)
- Intro to Chemistry (CHEM& 121)
- English Composition I (ENGL& 101)
- Math in Society (MATH& 107) or any MATH& course from the AAS-T alternate course list will be accepted.

The following courses must be completed with a 2.0 (C) grade or better:
- General Biology with Lab (BIOL& 160)
- Interpersonal Communications (CMST& 210) or General Psychology (PSYC& 100)
- HIV/AIDS: Healthcare Professional (HLTH 133)
- Fundamentals of Medical Terminology (HT 126)

ADDITIONAL REQUIREMENTS
After acceptance into the Surgery Technology program but prior to beginning clinical rotations, admitted students must be eighteen (18) years of age and submit proof of the following requirements:
- Criminal History Background Check Notification Form
- Physical exam and specified immunizations
- 11-panel drug screen
- Current American Heart Association BLS for Healthcare Provider CPR
- Medical insurance coverage

NOTE: Students will be charged a fee of approximately $119.00 for the background check, drug screen, and tracking of required health documents.

DEGREE AND CERTIFICATE REQUIREMENTS
Surgery Technology AAS-T Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of B/3.0 for SURG 100 and minimum grade of C+/2.3 for all other Surgery courses and minimum grades as described above for all other required courses.

VETERINARY TECHNICIAN

OVERVIEW
Turn your love of animals into a satisfying career! BTC’s Veterinary Technician program is ideal if you have an aptitude for math and science, and are interested in being a valuable part of the veterinary care team. You’ll work with animals and people, in a job that is different every day.

With BTC’s high quality education and hands-on training, you’ll gain the valuable skills needed now by veterinary hospitals, surgery centers, specialty care providers, zoos, and wildlife facilities.

Students must be 18 years of age prior to the first day of class.

PROGRAM OUTCOMES
Graduates of this program will be prepared to:
- Care for animals in a manner that is safe for both animals and humans;
- Promote public health;
- Accept the responsibilities of his/her profession, to provide compassionate, competent, ethical care in a professional, conscientious manner;
- Pursue lifelong learning to advance his/her knowledge of veterinary care;
- Take the Veterinary Technician National Examination (VTNE);
- Take the state exam and fulfill requirements for licensure as a veterinary technician.

ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.
• Understand normal anatomy, physiology and behavior of health for the species studied;
• Understand and participate in the process of diagnosis, therapy and prevention of animal disease;
• Understand the profession of veterinary technician including: occupational safety, public health, client and colleague communication, ethics of animal welfare, and the human-animal bond;
• Provide critical thinking skills to reason through clinical situations and take appropriate action;
• Provide social interactive skills to facilitate excellent communication with clients and colleagues;
• Provide psychomotor skills to facilitate quality, efficient diagnostic and therapeutic interventions;
• Provide learning skills and tools to promote learning throughout career and lifetime.

PLACEMENT REQUIREMENTS
ACCUPLACER Classic (valid for 5 years from testing date):
• Reading comprehension score of 85 & Sentence Skill score of 86
  Or RDG 085 & ENGL 092 with a grade of B or higher
  Or AENGL 100 with a grade of C or higher
• College Level Math score of 75 or MATH 099 with a C or higher

ACCUPLACER Next-Generation (starting January 23, 2019):
• Reading score of 256 & Writing Score of 255
  Or RDG 085 & ENGL 092 with a grade of B or higher
  Or AENGL 100 with a grade of C or higher
• Advanced Algebra & Functions score of 240 or MATH 099 with a C or higher

PREREQUISITE COURSES
Students must complete each prerequisite course requirement with a C grade (2.0 GPA) or higher.
• English Composition (ENGL& 101)
• Math in Society (MATH& 107) preferred, will accept 107 or higher
• General Psychology (PSYC& 100) or Interpersonal Communications (CMST& 210)
• General Biology with Lab (BIOL& 160)
• Introduction to Chemistry (CHEM& 121) preferred, will accept other courses in the following fields: BIOL, CHEM, OCEA, ZOOL

Entering students are expected to have basic computer skills necessary to use word processing, email, and the internet. Students who need to acquire these basic skills should enroll in CAP 101 prior to starting the program.

ADDITIONAL REQUIREMENTS
• Veterinary Technician Observation Form
• Official transcripts documenting prerequisite completion (BTC transcripts can be unofficial)
• Evidence of high school graduation or equivalent (copy of high school diploma, high school transcript, GED certificate, or GED transcript)

After acceptance into the Vet Tech Program but prior to beginning clinical rotations, students must be eighteen (18) years of age and submit proof of the following requirements:
• Veterinary Technician Informed Acknowledgment and Consent to Hazards and Risks Form
• Physical exam
• 11-panel drug screen
• Criminal background check
• Medical insurance coverage

NOTE: Students will be charged a fee of approximately $119.00 for the background check, drug screen, and tracking of required health documents.

DEGREE AND CERTIFICATE REQUIREMENTS
Veterinary Technician AAS-T Degree completion requires a cumulative GPA of 2.0 or higher and minimum grade of C-/1.7 for Veterinary courses and minimum grade of C/2.0 for all General Education courses.

WATER AND WASTEWATER TREATMENT

OVERVIEW
Bellingham Technical College’s Water and Wastewater Treatment program will train you for top jobs at water and wastewater treatment plants, including positions as water and wastewater treatment operators. WWT operators work to ensure that the safety, environmental and water quality standards for an employer’s treatment system are met. Currently, our primary employers in Washington State are municipalities and private contractors who run fresh water and wastewater treatment plants.

The water and wastewater treatment sector of the U.S. economy has 114,770 jobs, with an average of 7,500 positions opening per year. All municipalities are required to meet rigorous fresh water and wastewater treatment standards, and these facilities require highly skilled employees who are trained in advanced treatment methods. BTC’s Water and Wastewater Treatment program gives you training in technical skills and interpersonal skills to get you ready for top jobs in the field of water treatment.

PROGRAM OUTCOMES
- Appraise the typical hazards found in water and wastewater treatment plants, basic PPE, and know the requirements of regulating bodies regarding safety, health, and environmental issues (OSHA, DOT, EPA).
- Combine mathematics, chemistry and physics theory to apply to process applications such as fluid flow, the nature of heat, chemical reaction, boiling points, vapor pressure and electrical currents.
- Recognize typical organizational structures, economics, and quality control systems of the water and wastewater treatment industry.
- Appraise fundamentals of water and wastewater treatment processes; know core functions and principles of operation of typical process equipment such as pumps, compressors, filters and dryers, lubrication systems, valves, piping systems, and draw from memory Process Flow Diagrams.
- Integrate the principles of process automatic control and Data Control Systems (DCS) to manage simulated DCS scenarios.
- Graduates will have the ability to compare actual water and wastewater plant experience versus preconceived notions.

PLACEMENT REQUIREMENTS
Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

DEGREE AND CERTIFICATE REQUIREMENTS
Water and Wastewater Treatment AAS Degree and Certificate completion requires a cumulative GPA of 2.0 or higher and minimum grade of C/2.0 for AMATH 111 course.

### WELDING & FABRICATING TECHNOLOGY

**OVERVIEW**

Any industry that creates goods and structures from metal will rely on skilled welders to create strong products, whether in aerospace, automotive, or construction fields. Turning ideas and materials into valuable products takes highly skilled employees who are trained in such specialized areas as welding technology. BTC’s degrees and certificates in the Welding Technology Program are ideal for students with mechanical aptitude or a strong foundation in math, science, and technology. Prepare for your welding career through BTC’s Welding Technology program. You will get premier job training for skills in high demand by the metal and construction trades for work as a welder, cutter, or welding machine operator. Students choose to specialize in one of two areas: structural steel fabrication or pipe welding.

In our state-of-the-art welding and fabrication facility, you’ll learn valuable skills that high-wage employers are looking for. From safety practices and blueprint reading to technical skills like metallurgy, MIG, and TIG welding, BTC’s hands-on job training will prepare you for a career in boat manufacturing, steel manufacturing, refining, and transportation, or with federal, state, or local governments.

**PROGRAM OUTCOMES**

When you successfully complete BTC’s Welding Technology program, you will be fully prepared to:

- Exhibit & maintain essential employability behaviors.
- Observe and practice industry safety guidelines.
- Analyze and interpret prints, drawings, and symbols for welding and fabrication of parts and structures.
- Achieve competency in a variety of major manual and semi-automatic welding processes in all positions.
- Demonstrate proper set-up and use of welding and fabricating equipment.
- Troubleshoot and solve basic welding, fabricating and equipment problems.
- Pass at least one WABO certification or industry-accepted certification welding test (ASME, AWS, ABS, etc.).
- Exhibit knowledge of occupational environments, metallurgy, materials, tools, fabrication, layout, and mechanical and thermal cutting processes and techniques.
- Demonstrate appropriate oral and written communication with customers, co-workers, and supervisors.
- Analyze and interpret prints and drawings for welding and fabricating.
- Employ efficient organizational skills.
- Stay current with new and emerging technologies.

Find important information about the educational debt, earnings, and completion rates of students who attended this program: [www.btc.edu/GE](http://www.btc.edu/GE).

**PLACEMENT REQUIREMENTS**

Admissions application and assessment testing in Reading, Math, and Sentence Skills are required. Your score on the test and/or your previous transcripts will determine where you begin your course sequence. Contact Admissions at 360.752.8345 or at admissions@btc.edu for assistance with academic planning.

**CERTIFICATE REQUIREMENTS**

Basic Welding Skills Certificate completion requires a cumulative GPA of 2.0 or greater, and a minimum grade of C-/1.7 for all required core courses.

**DEGREE REQUIREMENTS FOR WELDING & FABRICATING TECHNOLOGY:**

**Pipe Specialization Welding Technology** - Pipe Welding & Fabricating AAS Degree completion requires a cumulative GPA of 2.0 or higher, and a minimum grade of C-/1.7 for all required core courses. AAS-T Degree requires a cumulative GPA of 2.0 or higher and min-
imum grade of C-/1.7 for all required core courses and minimum grade of C/2.0 for all General Education courses.

**General Welding Technology - Welding & Fabricating AAS Degree**

Completion requires a cumulative GPA of 2.0 or higher, and a minimum grade of C-/1.7 for all required core courses. AAS-T Degree requires a cumulative GPA of 2.0 or higher and minimum grade of C-/1.7 for all required core courses and minimum grade of C/2.0 for all General Education courses.

- **WLD 120**  GMAW I  4 CR

##### QUARTER 2
- **AENGL 100**  Applied English*  5 CR
- **WLD 106**  Print Reading I  2 CR
- **WLD 130**  FCAW I  4 CR
- **WLD 140**  GTAW I  4 CR
- **WLD 150**  Introduction to Metal Fabricating  4 CR

##### QUARTER 3
- **CMST& 210**  Interpersonal Communication*  5 CR
- **WLD 121**  GMAW Aluminum I  4 CR
- **WLD 141**  GTAW Aluminum I  4 CR
- **WLD 116**  SMAW Practice  2 CR
- **WLD 131**  FCAW Practice  2 CR

#### TOTAL PROGRAM CREDITS: 55
ACCT 141
PRACTICAL ACCOUNTING I 5 CR
This course covers the accounting cycle through a study of sole proprietorship and the use of accounts, the general journal, and the general ledger.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better, or ACCUPLACER Reading score of 71 or RDG 085 with a C or better, or Instructor permission.

ACCT 201
PRINCIPLES OF ACCOUNTING I 5 CR
This course is the first of a series of three accounting courses in the Business DTA sequence. It provides an introduction to financial accounting as an essential part of business decision making. It includes the vocabulary and fundamental concepts of accounting as well as analysis of common business activities and interpretation of primary financial statements.
Prerequisite(s): Accuplacer Score: 75 in Algebra or a grade of C or higher in MATH 098; or Instructor permission.

ACCT 202
PRINCIPLES OF ACCOUNTING II 5 CR
This course is the second of a series of three accounting courses in the Business DTA sequence and is a continuation of ACCT 201. The emphasis of this class is on fixed assets, intangibles, investments and financing, stockholder's equity, cash flow analysis and financial statement analysis.
Prerequisite(s): ACCT 201 with a C or better; or Instructor permission.

ACCT 203
PRINCIPLES OF ACCOUNTING III 5 CR
This course is the third of the series of three accounting courses in the Business DTA sequence and is also a required course for the Accounting AAS and AAS-T degree students. This course introduces students to information needed by managers to carry out three essential functions in an organization: (1) planning operations, (2) controlling activities, and (3) making decisions. This course will show what kind of information is needed, where this information can be obtained, and how this information can be used by managers as they carry out their planning, control, and decision-making responsibilities.
Prerequisite(s): ACCT 202 or ACCT 243 with a C or better or Instructor permission.

ACCT 242
PRACTICAL ACCOUNTING II 5 CR
This course is the second in the series of three accounting courses. Course work focuses on learning bookkeeping procedures for a merchandising business as well as accounting for valuation of receivables, inventory, and plant and equipment.
Prerequisite(s): ACCT 141 with a C or better or Instructor permission.

ACCT 243
PRACTICAL ACCOUNTING III 5 CR
This course is the third in a series of three accounting courses. Course work focuses on learning bookkeeping procedures for partnerships, corporations, and how to prepare the statement of cash flows and financial statement analysis.
Prerequisite(s): ACCT 242 with a C or better or Instructor permission.

ACCT 245
PAYROLL PROCEDURES 5 CR
Covers payroll records and procedures. Students complete assignments about federal and state laws that affect compensation of employees.
Prerequisite(s): ACCT 141 or Instructor permission.

ACCT 246
COMPUTERIZED ACCOUNTING 5 CR
A comprehensive study of computerized accounting systems in both service and merchandising environments. Uses the commercially popular QuickBooks software to demonstrate the use of fully integrated accounting systems. Topics include creating a chart of accounts, recording customer and vendor transactions, processing payroll, and printing reports. In addition, establishing a new company is covered as well as the advanced topic of exporting to Excel software.
Prerequisite(s): ACCT 141 or Instructor permission. It is highly recommended that ACCT 242 - Practical Accounting II be taken either prior to taking ACCT 246 or taken concurrently with ACCT 246.

ACCT 275
FIELD-BASED EXPERIENCE 5 CR
Students will arrange to work in a college approved professional setting where they will apply business and accounting knowledge and skills in a variety of accounting related activities.
Prerequisite(s): Instructor permission.

AUTO COLLISION REPAIR

CRT 101
INTRODUCTION TO SHOP SAFETY 3 CR
Students will learn the essentials of shop safety and how to perform tasks in an auto collision repair facility safely without endangering themselves or others.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: CRT 101 with a C- or better and CRT 103 with a C- or better, or concurrent enrollment in CRT 102 and CRT 103, or Instructor permission.

Note: This class must be taken concurrently with CRT 102 and CRT 103.

CRT 102
AUTOMOTIVE REFINISHING BASICS 10 CR
Learn the essentials of prepping, masking and refinishing with HVLP or compliant refinishing equipment to return a surface to pre-accident appearance. Surfaces refinished consist of all materials used to build modern day vehicles including, and not limited to, ferrous and non-ferrous metals, as well as most types of composites and plastics. A strong emphasis on refinishing equipment maintenance will also be covered in this course. Students will study the proper procedures of mixing undercoats and top coats to achieve the correct perceived color match.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: CRT 101 with a C- or better and CRT 103 with a C- or better, or concurrent enrollment in CRT 101 and CRT 103, or Instructor permission.

Note: This class must be taken concurrently with CRT 101 and CRT 103.

CRT 103
NEW TECHNOLOGY AND EXTERIOR TRIM 3 CR
This course will provide instruction on how to properly remove and install various interior and exterior trim to industry standards, using specialty tools specifically designed for that task. Students will also be introduced to the use of computer-based programs to look-up procedures for removing and installing interior and exterior trim without causing damage to the surrounding area or part. This course will also introduce new technology used in the newly released vehicles from a variety of manufacturers.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: CRT 101 with a C- or better and CRT 102 with a C- or better, or concurrent enrollment in CRT 101 and CRT 102, or Instructor permission.

Note: This class must be taken concurrently with CRT 101 and CRT 102.
CRT 121
REMOVABLE PANELS & GLASS 3 CR
In this course, students will learn how to remove and install various types of automotive exterior bolt on panels and glass to industry standards. This course has a high emphasis on matching panel gaps and fitment to duplicate the appearance of pre-accident condition to complete a quality, undetectable repair.
Prerequisite(s): CRT 101 with a C- or better or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 122 with a C- or better or concurrent enrollment in CRT 122, and CRT 123 with a C- or better or concurrent enrollment in CRT 123, or Instructor permission.

CRT 122
NON-STRUCTURAL BODY REPAIR 8 CR
In this course students will learn how to asses and repair various types of non-structural damage to ferrous and non-ferrous vehicle exterior panels using a multitude of tools and techniques best suited for the repair needing to be performed.
Prerequisite(s): CRT 101 with a C- or better or Instructor permission.
Corequisite(s): CRT 121 with a C- or better or concurrent enrollment in CRT 121, and CRT 123 with a C- or better or concurrent enrollment in CRT 123, or Instructor permission.

CRT 123
AUTO COLLISION EXTERIOR LIGHTING AND PLASTICS 4 CR
This course covers the repairs of plastics and compounds used in the collision repair field. Part of this course will also focus on the diagnosis and repair of lighting systems commonly damaged in a collision.
Prerequisite(s): CRT 101 with a C- or better or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 121 with a C- or better or concurrent enrollment in CRT 121, and CRT 122 with a C- or better or concurrent enrollment in CRT 122, or Instructor permission.

CRT 131
FERROUS AUTO COLLISION WELDING 4 CR
This course covers Metal Inert Gas (MIG) welding of ferrous 10g to 22g metals for the auto collision industry, including assembly and disassembly of the major components of a GTA welder. Students will also learn how to troubleshoot welder malfunctions and welding defects to produce a quality weld.
Prerequisite(s): CRT 101 with a C- or better or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 132 and CRT 133 with a C- or better.

CRT 132
NON-FERROUS AUTO COLLISION WELDING 5 CR
This course covers Metal Inert gas (MIG) welding of non-ferrous 1mm to 2.5mm aluminum for the auto collision industry, including assembly and disassembly of the major components of a GMAW welder. Students will also learn how to troubleshoot welder malfunctions and welding defects to produce a quality weld.
Prerequisite(s): CRT 101 with a C- or better or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 131 and CRT 133 with a C- or better.

CRT 133
ALTERNATIVE EXTERIOR PANEL REPLACEMENT 4 CR
This course introduces the various types of exterior panel materials used in the automotive industry to improve vehicle strength while reducing weight. Students will learn multiple repair and attachment methods to maintain the integrity of the vehicle without compromising strength or increasing weight.
Prerequisite(s): CRT 101 with a C- or better or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 131 and CRT 132 with a C- or better.

CRT 201
ADVANCED COLLISION CONCEPTS I 5 CR
This course introduces the inspection and diagnosis process of the auto collision industry. Students will learn how to identify hidden damages to structural components of a vehicle involved in a major collision, identify prior damage and repairs, diagnose body control modules and repair the associated circuits.
Prerequisite(s): CRT 101, CRT 102, CRT 103, CRT 121, CRT 122, CRT 123, CRT 131, CRT 132 and CRT 133 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 202 and CRT 203 with a C- or better.

CRT 202
ADMIN INDUSTRY SIMULATION 6 CR
This course will focus on the administrative workflow of the auto collision repair industry. Students will learn how to create accurate estimates, estimate supplements, parts lists, and develop customer service and communication skills.
Prerequisite(s): CRT 101, CRT 102, CRT 103, CRT 121, CRT 122, CRT 123, CRT 131, CRT 132 and CRT 133 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 201 and CRT 203 with a C- or better.

CRT 203
NON-STRUCTURAL INDUSTRY SIMULATION 6 CR
This course simulates an auto collision shop environment. Students will apply the knowledge, skills and abilities acquired during the first year of the program to make structural adjustments to a vehicle that is not within its factory build tolerances. Students will repair the damaged components in the time allotted by an estimating program.
Prerequisite(s): CRT 101, CRT 102, CRT 103, CRT 121, CRT 122, CRT 123, CRT 131, CRT 132 and CRT 133 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 201 and CRT 202 with a C- or better.

CRT 221
ADVANCED COLLISION CONCEPTS II 5 CR
This course focuses on advanced safety related components ranging from the vehicle structure to the safety restraint system.
Prerequisite(s): CRT 101, CRT 102, CRT 103, CRT 121, CRT 122, CRT 123, CRT 131, CRT 132, and CRT 133 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 222 with a C- or better or concurrent enrollment in CRT 222, and CRT 223 with a C- or better or concurrent enrollment in CRT 223, or Instructor permission.

CRT 222
STRUCTURAL INDUSTRY SIMULATION 6 CR
This course simulates an auto collision shop environment. Students will apply the knowledge, skills and abilities acquired during the first year of the program to make structural adjustments to a vehicle in the time allotted by an estimating program.
Prerequisite(s): CRT 101, CRT 102, CRT 103, CRT 121, CRT 122, CRT 123, CRT 131, CRT 132, and CRT 133 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 221 with a C- or better or concurrent enrollment in CRT 221, and CRT 223 with a C- or better or concurrent enrollment in CRT 223, or Instructor permission.

CRT 223
REFINISH INDUSTRY SIMULATION 6 CR
This course focuses on advanced refinishing techniques including color tinting, color blends and increasing productivity in the refinishing process.
Prerequisite(s): CRT 101, CRT 102, CRT 103, CRT 121, CRT 122, CRT 123, CRT 131, CRT 132, and CRT 133 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 221 with a C- or better or concurrent enrollment in CRT 221, and CRT 223 with a C- or better or concurrent enrollment in CRT 223, or Instructor permission.
CRT 231
FINAL INDUSTRY CERTIFICATION  2 CR
This course is a final review of non-structural body and refinishing core program content. Students will achieve I-CAR Level One certification in non-structural body and refinishing roles.
Prerequisite(s): All first year program classes with a C- or better and CRT 201, CRT 202, CRT 203, CRT 221, CRT 222, and CRT 223 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 232, CRT 233 and CRT 234 all with a C- or higher, or concurrent enrollment in CRT 232, CRT 233 and CRT 234, or Instructor permission.

CRT 232
WELD CERTIFICATION ALUMINUM  3 CR
This course prepares students to obtain the I-CAR aluminum welding certification; this is a pass or fail course.
Prerequisite(s): All first year program classes with a C- or better and CRT 201, CRT 202, CRT 203, CRT 221, CRT 222, and CRT 223 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 231, CRT 232 and CRT 234 all with a C- or higher, or concurrent enrollment in CRT 231, CRT 232 and CRT 234, or Instructor permission.

CRT 233
WELD CERTIFICATION STEEL  3 CR
This course prepares students to obtain the I-CAR steel welding certification; this is a pass or fail course.
Prerequisite(s): All first year program classes with a C- or better and CRT 201, CRT 202, CRT 203, CRT 221, CRT 222, and CRT 223 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 231, CRT 232 and CRT 234 all with a C- or higher, or concurrent enrollment in CRT 231, CRT 232 and CRT 234, or Instructor permission.

CRT 234
FIELD-BASED EXPERIENCE  7 CR
This course provides industry training at a functioning repair facility approved by the instructor. Students will apply the skills learned in the program to a specific area of the industry.
Prerequisite(s): Instructor permission.
Completion Of or Concurrent Enrollment In: CRT 231, CRT 232 and CRT 233 all with a C- or higher, or concurrent enrollment in CRT 231, CRT 232 and CRT 233, or Instructor permission.

AUTOMOTIVE

AUTO 104
ENGINES LIGHT MECHANICAL  7 CR
An introductory look at the 4 stroke gasoline engine followed by in-depth study and practice of industry standard minor engine service procedures including gasketing and sealing. This course will also cover theory, diagnosis and repairs to the cooling and lubrication systems.
Prerequisite(s): TRAN 103.

AUTO 105
ENGINES MAJOR MECHANICAL  5 CR
An in depth practice of diagnostic methods relating to mechanical component failures within the engine such as power balance testing, compression and leak down testing. This course will center on a thorough exploration of internal engine components, measurements and major repairs to those components.
Prerequisite(s): TRAN 103.

AUTO 106
APPLIED ENGINES TECHNOLOGY  6 CR
This lab-based course will cover diagnosis and repairs to the cooling system, lubrication system and all major mechanical systems relating to the engine. This course will serve to apply theories learned in other engine related coursework.
Prerequisite(s): TRAN 103.

AUTO 107
BRAKES  6 CR
Students will be introduced to the theory and operation of vehicle braking systems. Students will demonstrate the understanding of these systems. Students will then diagnose and perform the needed repairs to the brake and anti-lock brake system on customer vehicles.
Prerequisite(s): TRAN 103.

AUTO 113
HVAC  4 CR
Students will be introduced to the operation of a heating, circulation and air conditioning systems. Students will demonstrate the understanding of these systems. Students will then diagnose and perform the needed repairs to the vehicle HVAC systems on customer vehicles.
Prerequisite(s): TRAN 103.

AUTO 122
BASIC DRIVE TRAIN  4 CR
Students will be introduced to the operation of vehicle drive train systems. Students will demonstrate the understanding of these systems. Students will then diagnose and perform the needed repairs to the drive train system on customer vehicles.
Prerequisite(s): TRAN 103.

AUTO 151
ELECTRICITY/ELECTRONICS  2 CR
A comprehensive and thorough introduction to electrical theory as applied to the automobile. This course will focus on electrical behavior in automotive circuits, understanding and using wiring schematics and basic trouble shooting procedures on simple automotive circuits.
Prerequisite(s): TRAN 103.

AUTO 161
STEERING AND SUSPENSION  6 CR
Students will be introduced to the operation of a vehicles steering and suspension system. Students will demonstrate the understanding of these systems. Students will then diagnose and perform the needed repairs to the steering and suspension system on customer vehicles.
Prerequisite(s): TRAN 103.

AUTO 219
FIELD-BASED EXPERIENCE I  12 CR
This is the first in a series of four internships for the program. Students interview for, obtain and maintain an internship experience at an automotive repair (or related industry) business. The student is normally working under the direct supervision of an experienced, journeyman-level technician. The student will report weekly via a blog post that includes personal reflection. The internship site is a real-world extension of the classroom and the student will be able to apply knowledge gained previously in the program to an actual workplace environment. Student work will be monitored by an instructor from BTC who will visit the work site periodically.
Prerequisite(s): All General Education (Related Instruction) courses required by degree and Instructor permission.

AUTO 229
FIELD-BASED EXPERIENCE II  5 CR
This is the second in a series of internships required by the program and builds on the industry skills and experiences acquired in the first internship (AUTO 219). Students interview for, obtain and maintain an internship experience at an automotive repair (or related industry) business. The student is normally working under the direct supervision of an experienced, journeyman-level technician. The student will report weekly via a blog post that includes personal reflection. The internship site is a real-world extension of the classroom and the student will be able to apply knowledge gained previously in the program to an actual workplace environment. Student work will be monitored by an instructor from BTC who will visit the work site periodically.
Prerequisite(s): Instructor permission.

AUTO 250
AUTOMATIC TRANSMISSIONS/TRANSAXLES  7 CR
This course will focus on theory, description and operation of automatic drive systems. This will include diagnosis and trouble shooting hydraulic,
electrical/electronic controls and mechanical systems and practicing proper R&R techniques.

Prerequisite(s): AUTO 122, AUTO 265, AENGL 100, CMST& 210, and AMATH 100.

AUTO 255
ELECTRICITY/ELECTRONICS 2  7 CR
An introduction to a variety of electronic systems found on a modern vehicle. AUTO 255 provides an in-depth study of starting & charging systems. This course will also cover body and chassis control systems such as ABS, body computers, low tire pressure warning and airbags. Extensive troubleshooting practice by the application of industry standard troubleshooting techniques will be provided in AUTO 255.
Prerequisite(s): AUTO 255, AENGL 100, CMST& 210, and AMATH 100.

AUTO 259
FIELD-BASED EXPERIENCE III  5 CR
This is the third in a series of internships required by the program and builds on the industry skills and experience acquired in the first two internships. Students also continue to expand their classroom experience by applying skills learned in previous quarters to this internship. Students interview for, obtain and maintain an internship experience at an automotive repair (or related industry) business. The student is normally working under the direct supervision of an experienced, journeyman-level technician. The student will report weekly via a blog post that includes personal reflection. The internship site is a real-world extension of the classroom and the student will be able to apply knowledge gained previously in the program to an actual workplace environment. Student work will be monitored by an instructor from BTC who will visit the work site periodically.
Prerequisite(s): Instructor permission.

AUTO 260
MANUAL TRANSMISSION/ TRANSAXLE  3 CR
This course will focus on theory, description and operation of manual drive train systems. This course will include clutches, transfer cases and differentials.
Prerequisite(s): AUTO 122, AENGL 100, CMST& 210, and AMATH 100.

AUTO 265
ENGINE PERFORMANCE 2  3 CR
AUTO 265 will cover computerized engine management systems including OBD2 and diagnostic trouble code interpretation. This course will also cover vehicle computer networks including typical topologies and troubleshooting techniques.
Prerequisite(s): AENGL 100, CMST& 210, and AMATH 100.
Corequisite(s): AUTO 255.

AUTO 275
ENGINE PERFORMANCE 3  11 CR
This course will offer instruction in the operation, diagnosis and repair of fuel systems, ignition systems and emission control systems. In addition there will be more in-depth study of the OBD2 system and how it relates to other systems on the vehicle. This course also includes an introduction to alternative fuel vehicles.
Prerequisite(s): AENGL 100, CMST 210, and AMATH 100, all with a D or better.

AUTO 279
FIELD-BASED EXPERIENCE IV  5 CR
This is the fourth in a series of internships required by the program and builds on the industry skills and experience acquired in the other three internships. Students also continue to expand their classroom experience by applying skills learned in previous quarters to this internship. Students interview for, obtain and maintain an internship experience at an automotive repair (or related industry) business. The student is normally working under the direct supervision of an experienced, journeyman-level technician. The student will report weekly via a blog post that includes personal reflection. The internship site is a real-world extension of the classroom and the student will be able to apply knowledge gained previously in the program to an actual workplace environment. Student work will be monitored by an instructor from BTC who will visit the work site periodically.
Prerequisite(s): Instructor permission.

AUTO 291
SHOP PRACTICUM 1  8 CR
Students will work in the automotive lab on various projects as assigned, under the direct instruction of the instructor and shop manager. This is a self-paced course, allowing students to apply the fundamental principles and competencies in the coursework up to and including the current quarter of enrollment. The lab will attempt to duplicate a working shop environment including all aspects of industry employability. This course is taken in lieu of an off-campus internship.
Prerequisite(s): CASAS Math score of 204 or higher, or by permission.

AUTO 292
SHOP PRACTICUM 2  8 CR
Students will work in the automotive lab on various projects as assigned, under the direct instruction of the instructor and shop manager. This is a self-paced course, allowing students to apply the fundamental principles and competencies in the coursework up to and including the current quarter of enrollment. The lab will attempt to duplicate a working shop environment including all aspects of industry employability. This course is taken in lieu of an off-campus internship.
Prerequisite(s): CASAS Reading score of 228 or higher, or by permission.

AUTO 293
SHOP PRACTICUM 3  8 CR
Students will work in the automotive lab on various projects as assigned, under the direct instruction of the instructor and shop manager. This is a self-paced course, allowing students to apply the fundamental principles and competencies in the coursework up to and including the current quarter of enrollment. The lab will attempt to duplicate a working shop environment including all aspects of industry employability. This course is taken in lieu of an off-campus internship.
Prerequisite(s): AENGL 100, CMST& 210, and AMATH 100.

COLLEGE READINESS AND SUCCESS

ABE 050
ESSENTIAL MATH  5 CR
A math course designed for students who need better math skills to pass the GED math test or Accuplacer arithmetic test or to progress to Pre-Algebra. This course is intended to reinforce and extend students’ knowledge of basic mathematics and to build the foundation for success in beginning algebra. Topics covered include basic operations with whole numbers, decimals and fractions; understanding and application of ratio, proportion and percent; elements of geometry, problem solving, and signed numbers; and solving simple equations. The course is designed to use interactive software and a variety of classroom strategies.
Prerequisite(s): CASAS Math score of 204 or higher, or by permission.

ABE 052
ESSENTIAL WRITING  5 CR
This course helps students develop basic English writing skills such as organization of ideas, conventions of English language usage (grammar, spelling, sentence structure, and punctuation), and feedback and revision. Students will apply critical thinking skills such as analyzing and synthesizing ideas from authentic readings. Basic computer use is required. This course prepares students for entry into ENGL 092.
Prerequisite(s): CASAS Reading score of 228 or higher, or by permission.

ABE 054
ESSENTIAL READING  5 CR
In this course, students will explore, identify and apply reading strategies to various technical and literary text. Students will practice monitoring and articulating reading comprehension and critical thinking. Weekly routines include practice in establishing the main idea and supporting ideas; identifying facts, opinions and inferences; as well as defining new vocabulary. Reading themes in this class are within the broad areas of career exploration and contemporary world issues. Basic

www.btc.edu
This course prepares students for entry into Reading 85.

**Prerequisite:** CASAS Reading score of 228 or higher or by permission.

**ABE 055 ESSENTIAL RDG/WR 5 CR**
This intensive course helps students develop English reading and writing skills including comprehension, vocabulary, study skills, organization of ideas and conventions of English language usage (grammar, spelling, sentence structure, and punctuation). Students will apply critical thinking skills such as analyzing and synthesizing ideas from authentic reading, as well as the development of central themes and main ideas in writing. Basic computer use is required.

**Prerequisite(s):** CASAS Reading score of 221 or higher.

**CDEV 100 COLLEGE FOUNDATIONS I 3 CR**
This course introduces students to academic culture. We explore and use the 3 R's for college success: Relationships, Resources, and Routines. Learning develops reflective thinking, study habits, and problem solving skills. Diverse instructional approaches include hands-on practice, technology navigation, as well as individual and team projects. This course is mandatory for students who test into ENGL 092, MATH 090 or RDG 085.

**ELA 030 ENGLISH LANGUAGE ACQUISITION: BEGINNING 18 CR**
This course is designed to improve the communication skills for the Limited English Proficient adult who functions with difficulty in situations related to immediate needs such as providing personal information on simple forms. Emphasis is on reading simple material on familiar subjects; interpreting simple directions, schedules, signs, and maps; and conveying ideas in simple notes and messages using present tense “be” verb tenses and present continuous verb tenses. In oral communication, students learn to convey immediate needs in limited social situations using simple learned and often repeated phrases. Emphasis is on listening actively to understand and respond to verbal and non-verbal communication, expressing basic survival needs, and participating in some routine social conversations.

**ELA 040 ENGLISH LANGUAGE ACQUISITION: INTERMEDIATE 18 CR**
This course is designed to improve the English skills of adults who can meet basic survival and social needs, follow simple oral and written instructions and have some ability to write related to basic needs. Emphasis in reading is on understanding descriptive narratives and learning basic reading strategies, such as rereading, restating, rephrasing, word decoding, and identifying main ideas. In writing, the emphasis is on creating paragraphs using prewriting and revision strategies. This includes learning appropriate grammar and vocabulary in order to write and edit. In speaking and listening, the emphasis is on understanding and responding to familiar topics, requesting and clarifying, following oral directions, and speaking so others can understand. Critical thinking and basic math is embedded and contextualized for everyday life and work purposes.

**ELA 050 ENGLISH LANGUAGE ACQUISITION: ADVANCED 18 CR**
This course is designed to improve the reading, writing, listening and speaking skills of adults who have a goal to improve their English language skills for college and career purposes. Emphasis is on reading real-life, academic, and workplace materials; using meaning-making strategies with unfamiliar reading materials; and writing and editing multi-paragraph documents for college and workplace. In oral communication, emphasis is on communicating effectively for various purposes while applying critical thinking skills and making effective choices for those settings. Students will use a range of conventions in speaking for distinct audiences and contexts. Basic math is contextualized for everyday life and work purposes, and progress in appropriate technology is expected.

**GED 050 GED PREPARATION: IMPACT 18 CR**
This GED preparation course includes instruction in reading, writing and math as well as the content areas of social studies, science, arts and literature. Emphasis is placed on GED test-taking skills, reasoning skills and critical thinking skills.

**GED 056 GED PREP 15 CR**
This GED® preparation course includes instruction in reading, writing and math as well as the content areas of social studies, science, arts, and literature. Emphasis is placed on GED® test-taking skills, reasoning skills, and critical thinking skills.

**HSC 024 WASHINGTON STATE HISTORY 3 CR**
This course will explore Washington State History including the Washington State Constitution, its people (including the Native American peoples), governments, geography, and industries. It will also develop reading strategies for improved comprehension and writing skills for standard academic English in preparation for career and college readiness.

**Prerequisite(s):** CASAS Reading score 236 or higher, or by permission.

**HSC 029 ENVIRONMENTAL SCIENCE, CONTEMPORARY WORLD PROBLEMS & ENGLISH 6 CR**
This course integrates reading, writing, listening, speaking, and critical thinking skills around learning that focuses on Environmental Science and Contemporary World Problems. Topics include population, ecology, climate change, pollution, food systems, environmental racism and sustainability. Students will specifically focus on environmental issues related to the Pacific Northwest. Laboratories and field trips are included.

**Prerequisite(s):** CASAS Reading score of 239 or higher or by permission.

**HSC 035 LIFE SCIENCE & ENGLISH 6 CR**
This course is composed of multiple modules designed to introduce students to life science. The class begins with scientific thinking and the scientific method and then moves to define characteristics of life and an in-depth look at cell structures and functions. Next, diversity within the living world is analyzed and genetics are explored. Finally, large-scale biological processes are introduced by looking at how energy and matter enter and move through the living world. Helpful videos, pictures, lab, models, and other visual strategies are used as learning tools with an expanded emphasis on writing and math to bring meaning to the content being addressed.

**Prerequisite:** CASAS Reading score 228 or higher or by permission.
HSC 036  
**SCIENCE LAB**  
5 CR  
This course is designed to refine students’ understanding of the nature of scientific inquiry and develop the ability to formulate questions, propose hypotheses, and design, conduct, and report on investigations. Additionally, this course will increase their understanding of the kinds of questions that scientists ask and how the results reflect the research methods and the criteria by which scientific arguments are judged.  
Prerequisite(s): CASAS Reading 236 or higher, or by permission.

HSC 060  
**HS 21+ PORTFOLIO**  
10 CR  
HSC 060 is designed to teach students how to demonstrate high school competencies in fulfillment of HS 21+ diploma requirements through completion of individual portfolio assignments. It guides adult high school students through the process of developing a plan for completing the requirements for their adult high school diploma.  
Prerequisite(s): CASAS Reading Score of 236 or higher or permission.

HSC 066  
**HEALTH & FITNESS**  
10 CR  
This course introduces the emotional, physical, and mental components of health. Topics covered include goal setting, stress management, nutrition principles, relationships, substance use and abuse, and fitness which incorporates various forms of physical activity. Techniques are presented to help the student incorporate a total health and fitness program into their lifestyle.

Prerequisite: CASAS Reading score of 239 or higher or permission.

HSC 070  
**APPLIED MATHEMATICS I**  
3 CR  
This course presents the first part of mathematics used in the professional/technical occupations. This course is intended to reinforce and extend students’ knowledge of basic mathematics skills in operations with whole numbers, decimals and fractions; understanding and application of ratio, proportion and percent; elements of geometry, problem solving; and solving simple equations.

Prerequisite(s): CASAS Math score of 204 or higher, or by permission.

HSC 073  
**MATHEMATICAL CONCEPTS**  
5 CR  
This course provides basic math foundations for all future mathematical studies in pre-college and college math courses and to pass standardized tests such as the GED math test and ACCUPLACER arithmetic test. This course is intended to reinforce and extend students’ knowledge of basic mathematics and to build the foundation for success in beginning algebra. Topics covered include basic operations with whole numbers, decimals and fractions; understanding and application of ratio, proportion and percent; elements of geometry, problem solving; and solving simple equations.

Prerequisite(s): CASAS Math score of 204 or higher, or by permission.

HSC 074  
**APPLIED MATHEMATICS I & II**  
5 CR  
This course presents the first part of mathematics used in the professional/technical occupations. This course is intended to reinforce and extend students’ knowledge of basic mathematics skills in operations with whole numbers, decimals and fractions; application of ratio, proportion and percent; U.S. Customary Units and metric measurement systems; basic geometry and elementary algebra.

Prerequisite(s): CASAS Math score of 211 or Accuplacer Arithmetic score of 38, or ABE 050, or HSC 073 with a C or better, or by permission.

HSC 075  
**PRE-ALGEBRA**  
5 CR  
A developmental math course to help students make the transition from Arithmetic to Algebra. Students will increase their math skills and gain the foundation for algebraic concepts and problem-solving. Students should have a working knowledge of Arithmetic. Included are topics on fractions, sets of numbers, applied problem solving, use of variables, simplifying expressions, and setting up equations to solve.

Prerequisite(s): CASAS Math score of 211 or Accuplacer Arithmetic score of 38, or ABE 050, or HSC 073 with a C or better, or by permission.

HSC 076  
**APPLIED MATHEMATICS II**  
3 CR  
This course presents the second part of mathematics used in the professional/technical occupations. This course is intended to reinforce and extend students’ knowledge of basic mathematics skills in U.S. Customary Units and metric measurement systems, basic geometry and elementary algebra.

Prerequisite(s): CASAS Math score of 211 or Accuplacer Arithmetic score of 38, or ABE 050, or HSC 070, with a C or better, or by permission.

HSC 078  
**GEOMETRY**  
5 CR  
In this class students will gain proficiency in basic geometric concepts; properties of triangles, circles, and polygons; transformations including translations, rotations, reflections, and dilations; and working with solids including surface area and volume.

Prerequisite(s): CASAS Math score of 221 or Accuplacer Arithmetic score of 50, or ABE 050, or HSC 073, or HSC 075, or MATH 090, with a C or better, or by permission.

HSC 079  
**RADIOLINE TECHNOLOGY INTRODUCTORY COURSE**  
5 CR  
This course introduces students to the field of Radiologic Technology. Emphasis is given to the history of imaging, equipment, radiation physics, medical radiation safety, and the patient. It is designed for students who are interested in pursuing a career in Radiologic Technology. This course is structured to provide students with the necessary knowledge and skills to make a smooth transition to the radiologic technology program.

Prerequisite(s): Accuplacer Reading Comprehension and Sentence Skills score of 71 or higher.

HSC 083  
**BIOLOGY 105 ESSENTIALS OF ANATOMY**  
5 CR  
This course provides an overview of the human body, which will serve as a foundation of general understanding for future study in health occupations. Integration of each system to other systems and the whole organism as well as application of key concepts to health and disease are emphasized.

Prerequisite(s): Accuplacer Reading Comprehension and Sentence Skills score of 71 or higher.

BIO 105  
**ESSENTIALS OF ANATOMY**  
5 CR  
The student will develop a basic knowledge of the structure and function of the various body systems. The course emphasizes the essential structure and function of the normal human body, which will serve as a foundation of general understanding for future study in health occupations. Integration of each system to other systems and the whole organism as well as application of key concepts to health and disease are emphasized.

Prerequisite(s): Accuplacer Reading Comprehension and Sentence Skills score of 71 or higher.

HSC 107  
**PHYSIOLOGY**  
5 CR  
This course introduces the principles of physics as they apply to the human body. It covers the science of the body, which includes the structure and function of the various body systems. The course emphasizes the essential structure and function of the normal human body, which will serve as a foundation of general understanding for future study in health occupations. Integration of each system to other systems and the whole organism as well as application of key concepts to health and disease are emphasized.

Prerequisite(s): Accuplacer Reading Comprehension and Sentence Skills score of 71 or higher.

HSC 108  
**BIOLOGY 127 DISEASES OF THE HUMAN BODY**  
4 CR  
Introduction to the effects of system diseases on the human body. Course includes discussions of selected diseases, including causes and treatments. Course also includes an overview of principles of pharmacology and description/purposes of selected laboratory tests.

Corequisite(s): BIO 105 (or BIOL& 241 and BIOL& 242) and HT 126.

HSC 109  
**BIOLOGY 130 SECTIONAL ANATOMY**  
4 CR  
Building on knowledge of anatomy and physiology, this course offers a unique perspective of anatomical relationships. This course promotes an understanding of the human body from sagittal, coronal and transverse cross sectional perspectives. With the extensive use of diagrams, MRI and CT images, this course will explore anatomical structure and physiology.

Prerequisite(s): RT 103 for BTC Radiologic Technology Program Students. ARRT Registered Radiographers may also take this class with permission from the Radiologic Technology Coordinator.

HSC 112  
**BIOL& 160 GENERAL BIOLOGY WITH LAB**  
5 CR  
This course provides introduction to basic concepts of biology, with an emphasis on the cells as the fundamental unit of life. Topics include cell structure, basic chemical and biochemical concepts, metabolism, cell division, principles of genetics, biological diversity, and methods of scientific inquiry and critical thinking. Course establishes foundation necessary for continued biology study, especially in human anatomy and physiology. Lab included.

Prerequisite(s): Accuplacer Reading Comprehension score of 85 or RDG 085 with a B or better, and Accuplacer Sentence Skills score of 86 or ENGL 092 with a B or better or AENGL 100 with a C or better, and Accuplacer Algebra score of 75 or MATH 098 with a C or better.
BIOL 180
TOPICS IN SCIENCE GENERAL BIOLOGY  1 CR
Through instructor consultation, as well as customized objectives and activities, students in this special topics course will complete an independent biology project. Project topics will include one or more of the following: cell structure, basic chemical and biochemical concepts, metabolism, cell division, principles of genetics, biological diversity, and methods of scientific inquiry and critical thinking.
Prerequisite(s): BIOL & 160 with a C or better.

BIOL& 241
HUMAN A & P 1  5 CR
This course emphasizes understanding of the normal human, which will serve as a foundation of general understanding as well as a foundation for future study in allied health fields. Lecture, group discussion, literature and internet research, and laboratory exercises are included. Acquisition of basic knowledge, application and integration of concepts is emphasized. BIOL & 241 includes anatomy survey; tissues; and integumentary, skeletal, muscular, nervous, and endocrine systems.
Prerequisite(s): BIOL & 160 and CHEM & 121 with a C or better.

BIOL& 242
HUMAN A & P 2  5 CR
This course emphasizes understanding of the normal human, which will serve as a foundation of general understanding as well as a foundation for future study in allied health fields. Lecture, group discussion, literature and internet research, and laboratory exercises are included. Acquisition of basic knowledge, application and integration of concepts is emphasized. BIOL & 242 includes circulatory, lymphatic, respiratory, digestive, urinary, and reproductive systems.
Prerequisite(s): BIOL & 241 with a C or better.

BIOL& 260
MICROBIOLOGY  5 CR
Exploration of microbial world with a focus on medical microbiology for students in the health field. Areas of study include classification of microbes, life cycle, metabolism, control, and common infectious diseases of the human body. Laboratory component will demonstrate procedures to identify and control microbes.
Prerequisite(s): BIOL & 160 and CHEM & 121 with a C or better.

BUS 100
ELECTRONIC MATH APPLICATIONS 3 CR
Focuses on the application of the electronic calculator to business transactions and accounting activities. Students will develop speed on the 10-key by touch method. Note: This course meets the computation general education requirements for the medical coding and billing program only.
Prerequisite(s): Accuplacer Arithmetic score of 50 or MATH 090 with a C or better; or Instructor permission.

BUS& 101
INTRODUCTION TO BUSINESS  5 CR
Students are introduced to the broad field of business and its organization, operation and management. Business opportunities, ownership, marketing, physical factors, human resource, finance, regulations and decision-making processes are emphasized. Other topics include problems of organization, strategic management and controls. Fulfills the social science requirements at Bellingham Technical College.
Prerequisite(s): Recommended experience in Word processing, spreadsheets, and presentation software.

BUS 120
PRINCIPLES OF MARKETING  5 CR
This course explores the basic principles of marketing and its role in business. Topics include marketing plans and strategies, marketing research, target market segments and promotional strategies.
Prerequisite(s): BUS 101 with a C or better or Instructor permission.

BUS 123
RECORDS MANAGEMENT  3 CR
Develops skills for indexing, coding, and cross-referencing documents in alphabetic, subject, chronologic, numeric and geographic filing systems. Includes requisitions and charge-outs, records transfer, various filing systems, and an overall view of the role of records management in business including electronic and image records.

BUS 127
SOCIAL MEDIA MARKETING  5 CR
This course provides an introduction to social media marketing (SMM). Special emphasis is placed on creating a social media marketing plan which uses social media platforms to positively influence consumers toward a brand, product, or service. Explore and practice managing social networks like Facebook, Twitter, LinkedIn, Tumblr as well as emerging platforms.
Prerequisite(s): Basic understanding of web technologies and marketing concepts is expected.

BUS 128
SEARCH ENGINE MARKETING  5 CR
Search Engine Marketing is the process of promoting a web site, product or company through both search engine optimization and search advertising. This course examines ways to improve traffic to the web site by improving the ranking in search engine results and paid advertising. Become familiar with different types of marketing data and learn to combine them to answer business questions. Develop a measurement plan for a marketing campaign, and learn to set up the plan so it generates actionable data.
Prerequisite(s): Basic understanding of web technologies and marketing concepts is expected.

BUS 129
SOCIAL MEDIA MARKETING CAMPAIGN  5 CR
Students will complete a social media marketing campaign for an organization. By identifying the organizations target market and the social media portals where the organization participates. Students will learn to set measurable goals; design innovative strategies and select appropriate social media portals, craft compelling content to attract and influence the intended audience, monitor and measure progress on a regular basis, and tune the social media marketing campaign to account for the ever-changing nature of consumer tastes and the social web.
Prerequisite(s): Basic understanding of web technologies and marketing concepts is expected.

BUS 137
INTRODUCTION TO HUMAN RESOURCES  5 CR
Students will be introduced to the field of Human Resources, the roles and impact of Human Resources in the organization, and the principles underlying effective Human Resources. The class will provide an overview of the major functions of the HR field, common acronyms, HR professional certifications and the competencies required of HR professionals to be successful.
Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or higher, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or higher.

BUS 138
INTRODUCTION TO COMPENSATION & BENEFITS  5 CR
This course provides an introduction to the total rewards system and describes common employment compensation practices. Students will explore the primary forms of cash and non-cash compensation, the development of compensation strategy and evaluate the use of compensation and benefits in supporting the organization’s goals and objectives.
Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or higher, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or higher.
INTRODUCTION TO EMPLOYMENT LAW & LABOR RELATIONS 5 CR
This course examines the major federal and Washington state employment laws. Students will learn the fundamentals of federal employment laws, including FMLA, FLSA, OSHA, WARN Act, and Title VII of the Civil Rights Act of 1964. This course will also provide an overview of Washington state employment laws and regulations, such as unlawful discrimination, wage and hour regulations, and workplace safety. This course will also provide an overview of employee and labor relations, including the rights and responsibilities of employees, employers, and the collective bargaining process.
Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or higher, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or higher.

BUS 150
MATH FOR BUSINESS 5 CR
Students will apply math concepts to business applications in the areas of banking, business statistics, markup/markdown, payroll, debt, credit, investment, and insurance. It is recommended that students have a calculator with the exponent function.
Prerequisite(s): ACCUPLACER Arithmetic score of 50 or MATH 090 with a C or higher, or Instructor permission.

INTRODUCTION TO OPERATIONS MANAGEMENT 5 CR
This course provides students with concepts, techniques, and tools to design, analyze, and improve core operational capabilities, and apply them to a broad range of application domains and industries. It emphasizes the effect of uncertainty in decision-making, as well as the interplay between high-level financial objectives and operational capabilities. Topics covered include production control, risk pooling, quality management, process design, and revenue management.
Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or higher, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or higher.

INTRODUCTION TO LEAN MANAGEMENT 5 CR
This course offers a practical introduction to lean management principles and techniques. Students will learn how to implement lean management techniques in a business environment to improve productivity, business resilience and to reduce waste.
Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or higher, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or higher.

TECHNICAL COMMUNICATIONS 5 CR
This course introduces students to effective written and oral business communication. Students will learn to compose effective business writings including letters, memos, technical descriptions and procedures, reports, and employment documents. Students will learn effective oral presentation and job interviewing skills. Students will use various forms of technology including email, online file sharing and live web conferencing. Students will need access to web cam and audio. It is recommended that BUS 188 (Business English) and CAP 106 (Formatting with MS Word) be taken before BUS 171 (Technical Communications).
Prerequisite(s): BUS 188; 71 Reading or a C or higher in RDG 085; 71 Sentence Skills or a C or higher in ENGL 092; CAP 101 with a C or higher and CAP 105 with a C or higher.

BUS 188
BUSINESS ENGLISH 5 CR
Business English focuses on the improvement of basic grammar and proofreading skills needed to effectively compose and edit written business documents. Specific tools include proofreading, parts of speech, sentence structure, capitalization, abbreviation, number usage, punctuation, and word choice. It is recommended that BUS 188 (Business English) be taken before BUS 171 Technical Communications.
Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085; 71 Sentence Skills or a C or higher in ENGL 092; or Instructor permission.

BUS 201
BUSINESS LAW 5 CR
This course introduces students to principles underlying the legal environment of business through lectures, classroom activities, and study of text. Students will be exposed to basic information relating business and personal aspects of law as set forth in the course outline.
Prerequisite(s): 71 Reading ACCUPLACER score.

MEDICAL OFFICE PROCEDURES 5 CR
Medical Office Procedures is an introduction to healthcare administration. This course gives students transferable skills that will aid them in attaining employment within healthcare, as well as a global understanding of the differences within the various healthcare systems. A strong emphasis will be placed on interpersonal skills, appropriate communication and customer service skills when working in a diverse office team environment. The student will learn the duties in the medical office, computerized medical office procedures as well as exercises in judgment, independent action, and coping with interruptions. In addition to computerized appointment scheduling and billing, students learn about the major insurances with ICD and CPT coding. This course is designed to give an overview of the various areas within healthcare administration that most healthcare professionals will be expected to understand and know when seeking a job. Although healthcare operations may vary, a basic level of understanding in administration is vital for all healthcare professionals. (Note: this course meets the communications general education requirement for the Medical Coding and Billing Generalist program only).
Prerequisite(s): ACCUPLACER Reading Comprehension and Sentence Skills score of 71 or higher.

BUS 232
OFFICE PROCEDURES 5 CR
Prepares the student for the role of an office or administrative assistant and the broader role as a professional member of the management team. The class exposes the student to the growing influence of information technology, the expanding global marketplace, and the changes in the organizational structure of modern business.
Prerequisite(s): CAP 106.

BUS 276
FIELD-BASED EXPERIENCE 5 CR
Students will arrange to work in a college approved professional office setting where they will apply business skills and knowledge in an administrative support capacity.
Prerequisite(s): Instructor permission.

BUS 285
ORGANIZATIONAL BEHAVIOR 5 CR
This course integrates the study of management principles and practices with the study of human behavior within organizations. The course will examine the contemporary principles, techniques and research findings in management and organizational behavior that are driving high performance and continuous improvement in business today.
Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or higher, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or higher.

BUS 310
PROJECT MANAGEMENT 5 CR
Coordination of projects involving multiple tasks and resources, and the resolution of the conflicts that arise is a critical skill in business. This course teaches some of the techniques necessary to develop realistic and comprehensive project plans; identify risk areas; monitor the plans; and deal with problems. The course will also cover management of the procurement process, and communication with project stakeholders. The course includes the use of Microsoft Project to develop and manage project plans.
Prerequisite(s): Admission to the BASOPS program.
CHEMISTRY

CHEM& 110
CHEMICAL CONCEPTS W/LAB 5 CR
This course is a broad overview of chemistry concepts useful to technical program education. Topics include basic atomic theory, chemical bonding, solutions, organic chemistry, hydrocarbon reactions, analytical separations, gasses, thermodynamics, and intermolecular forces.
Prerequisite(s): Accuplacer College Level Math score of 75, or MATH 099 or AMATH 111 with a C or better.

CHEM& 121
INTRO TO CHEMISTRY 5 CR
Introductory course for non-science majors, nursing, and environmental science students. Includes basic concepts of inorganic and organic chemistry, the nature of atoms, molecules and chemical bonds, chemical notation, chemistry of solutions, scientific reasoning, and problem-solving in the study of the theory and application of chemistry. Lab work is included.
Prerequisite(s): Accuplacer Reading Comprehension score of 85 or RDG 085 with a B or better, and Accuplacer Sentence Skills score of 86 or ENGL 092 with a B or better or a AENGL 100 with a C or better, and Accuplacer College Math score of 75 or MATH 099 with a C or better.

CHEM& 131
INTRODUCTION TO ORGANIC/ BIO-CHEMISTRY 5 CR
This course is a continuation of CHEM& 121 and uses those concepts learned to understand the molecular nature of organic molecules. Topics to be covered include the structure, nomenclature, properties and reactions of hydrocarbons, alcohol, ethers, aldehydes, ketones, carboxylic acids, amines and amides with significant emphasis on the biochemical context of these organic molecules. The structure and function of carbohydrates, lipids, proteins, and nucleic acids including the major catabolic and anabolic pathways of carbohydrate, lipid, and protein metabolism is also covered. Lab activities complement theoretical concepts.
Prerequisite(s): CHEM& 121 with a C or better.

CHEM& 162
GENERAL CHEMISTRY W/LAB II 5 CR
Second of a two quarter course sequence designed for students in programs needing a second quarter of general chemistry. Covers gases, thermochromy, states of matter, solution chemistry, kinetics, and chemical equilibrium. Lab work included.
Prerequisite(s): CHEM& 161 with a C or better.

COLLEGE SUCCESS

CDEV 100
COLLEGE FOUNDATIONS I 3 CR
This course introduces students to academic culture. We explore and use the 3 R’s for college success: Relationships, Resources, and Routines. Learning develops reflective thinking, study habits, and problem solving skills. Diverse instructional approaches include hands-on practice, technology navigation, as well as individual and team projects. This course is mandatory for students who test into ENGL 092, MATH 090 or RDG 085.

COMPUTER SCIENCES

CS& 131
COMPUTER SCIENCE I C++ 5 CR
This course equips students with fundamental programming skills such as effective use of data types, variables, assignment statements, control structures, modular design using procedures, pointers and array data structures in the construction of C++ programs. This course also introduces students to Object Oriented Programming concepts and prepares students for the C++ Institute Certified Associate Programmer exam.
Prerequisite(s): MATH 099 or IT 121 with a C or better, or Instructor permission.

COMUNICACIONES

CMST& 210
INTERPERSONAL COMMUNICATION 5 CR
Designed to introduce students to the application of basic interpersonal communication theory, with a focus on achieving success in the workplace. Topics explored include self-awareness, self-disclosure, conversation skills, relationship development and maintenance, assertiveness, teamwork and group dynamics, conflict management strategies, and communicating in a diverse world.
Prerequisite(s): Accuplacer Reading Comprehension score of 71 or RDG 085 with a C or better, and Accuplacer Sentence Skills score of 71 or ENGL 092 with a C or better.

CMST& 220
PUBLIC SPEAKING 5 CR
Introduction to communication theory and public speaking emphasizing organization, audience analysis, oral styles, and use of visual aids. Includes presentation of various types of public speeches and analyses of contemporary speeches.
Prerequisite(s): Accuplacer Reading Comprehension score of 71 or RDG 085 with a C or better, and Accuplacer Sentence Skills score of 71 or ENGL 092 with a C or better.

CAP 101
INTRODUCTION TO COMPUTER APPLICATIONS 5 CR
Students will use a personal computer to demonstrate basic skills in Windows, Word, Excel, Access and PowerPoint. Students will also identify hardware components, demonstrate effective internet usage, and use the tools within the BTC learning management system. For off-campus, a Windows-based computer is required.
Prerequisite(s): Accuplacer score: 71 Reading.
CAP 103
COMPUTERIZED KEYBOARDING 2 CR
A touch typing course for beginners as well as those needing to brush up on their keyboarding skills. Course covers learning to type alphabetic, figure, and symbol keys by touch. This course does not satisfy the Business Computer Information Systems requirement CAP 105.

CAP 105
COMPUTERIZED TOUCH KEYBOARDING 2 CR
A touch typing course for beginners as well as those needing to brush up on their keyboarding skills. Course covers learning to type alphabetic keys by touch using proper technique. For off-campus work, a Windows-based computer is required.

Prerequisite(s): Accuplacer Reading Comprehension score of 50 or higher or RDG 085 with a C or better.

CAP 106
FORMATTING WITH MSWORD 4 CR
Provides skillbuilding, production typing, and Microsoft Word fundamentals at the beginning or review level. Students use MS Word to format letters, memos, reports, and tables. For off-campus work, a Windows-based computer is required.

Prerequisite(s): CAP 105; or Instructor permission.

CAP 107
COMPUTERIZED KEYBOARD SKILLBUILDING I 3 CR
Designed to help students improve their speed and accuracy at the computer. Computerized lessons analyze areas of weakness and provide appropriate drills for improvement. For off-campus work, a Windows-based computer is required.

Prerequisite(s): CAP 106; or Instructor permission.

CAP 109
COMPUTERIZED KEYBOARD SKILLBUILDING II 3 CR
Designed to help students further improve their speed and accuracy at the computer. Computerized lessons analyze areas of weakness and provide appropriate drills for improvement. Time will also be spent on data entry fundamentals. For off-campus work, a Windows-based computer is required.

Prerequisite(s): CAP 107; or Instructor permission.

CAP 114
MS OUTLOOK 2 CR
Students will use Microsoft Outlook to learn how to effectively manage settings, incoming and outgoing messages, schedules, and contacts. Students will use various views, create rules for processing emails, create auto-replies, and use search features. Students will create, format, and manage messages including BCC, signature lines, and processing junk emails. Students will share calendars, set appointments, create meetings, and manage a task list. Students will create and use contacts and distribution lists. Students will research email etiquette and corporate email policies, and apply email writing techniques to business scenarios.

CAP 138
MS WORD 5 CR
Students receive hands-on instruction using the commands and features of Word to create simple to complex business documents. For off-campus work, a Windows-based computer is required.

Prerequisite(s): CAP 101 and CAP 105 with a C or better, or Instructor permission.

CAP 142
MS EXCEL 5 CR
This course provides a practical hands-on approach to developing the skills to use the powerful spreadsheet application, Excel. Students will use Excel to organize and analyze data, perform numerical calculations, and illustrate relationships in numerical data by displaying charts. For off-campus work, a Windows-based computer is required.

Prerequisite(s): BUS 100 or BUS 150 or AMATH 100 or MATH 107 or higher; and CAP 101 with a C or higher.

CAP 143
ADobe ACRoBAT & ELECTRONIC FILE MANAGEMENT 5 CR
Adobe Acrobat software enables business professionals to easily convert any electronic or paper document into a PDF file that can be reviewed by colleagues, clients and customers. This class covers transferring business documents such as policies, training materials, regulations, or other types of material into a secured PDF format that allows review but protects the material from alteration or deletion. In this class, you will learn the basics of creating a PDF document; add headers and footers; render text searchable and able to edit; utilizing security functions to protect documents; creating and editing forms; and utilizing legal tools available. You will also develop expertise in electronic file management while creating folders and subfolders. Included in the file management portion will be how to find, view, open, copy, move, delete and rename files. Some basic computer and keyboarding skills are recommended.

CAP 146
MS ACCESS 5 CR
This course introduces students to using Microsoft Access to manage data. Students learn and apply rules for table design, establish meaningful relationships between tables, create queries to analyze data, create forms for data entry and data search, and create reports that presents information in professional format.

Prerequisite(s): CAP 101 with a C or better, or Instructor permission.

CAP 148
MS POWERPOINT 3 CR
Presents an overview of a presentation graphics program. Students will create and present a slide show projected from their computer. For off-campus work, a Windows-based computer is required.

Prerequisite(s): CAP 101 with a C or better; or Instructor permission.

CAP 200
INTEGRATED COMPUTER APPLICATIONS 5 CR
Students will apply their skills learned in the previous courses to produce professional-looking documents by integrating word processing, spreadsheet, database, and presentation graphics programs. Students will prepare a professional portfolio for use in future job search opportunities. For off-campus work, a Windows-based computer is required.

Prerequisite(s): CAP 138, CAP 142, CAP 146, and CAP 148 all with a C or better; or Instructor permission.

CIS 160
COMPUTER USER SUPPORT I 5 CR
Provides an overview of topics relevant to working at a help desk. Student will learn computer user support skills and strategies, including problem solving, customer service, and call tracking.

Prerequisite(s): CAP 101 with a C or better, or Instructor permission.

CIS 276
FIELD-BASED EXPERIENCE 5 CR
Students will arrange to work in an office, solving computer software, hardware or operating system problems for users. The field-based experience may be paid or unpaid at 165 hours on site.

Prerequisite(s): Instructor permission.

IT 105
USING NETWORKED COMPUTER SYSTEMS 3 CR
This course provides an introduction to the use of networked computer systems. Topics include the implementation and use of campus and departmental learning resources, basic operating system use including file system navigation and command line interfaces, basic keyboarding skills, network authentication and networked resource access.

Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C better, and ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better.

IT 106
IT SUPPORT SKILLS 3 CR
This course provides an introduction to the Information Technology career field and the basic support skills necessary for success in industry. Topics include a survey of IT career paths, face-to-
A+ OPERATING SYSTEMS 5 CR
This course provides an introduction to PC Software in coordination with the CompTIA A+ Soft-
ware high-level exam objectives. Topics include computer operating systems, basic networking
utilities, computer security and application troub-
leshooting.
Completion Of or Concurrent Enrollment In: IT 105
with a D or better or concurrent enrollment in IT 105,
or CAP 101 with a C or better or concurrent enroll-
ment in CAP 101, or Instructor permission.

IT 107
USING CLOUD SERVICES 3 CR
This course provides an introduction to Cloud Services. Topics include cloud based storage, vir-
tualization, security, mobile device management, and software as service applications. Students
will use cloud services to design documents, forms, and spreadsheets.
Completion Of or Concurrent Enrollment In: IT 105
with a D or better or concurrent enrollment in IT 105,
or CAP 101 with a C or better or concurrent enroll-
ment in CAP 101, or Instructor permission.

IT 112
A+ HARDWARE 5 CR
This course provides an introduction to PC Hardware in coordination with the CompTIA A+ Hard-
ware high-level exam objectives. Topics include computer hardware systems, basic networking,
mobile devices and troubleshooting.
Completion Of or Concurrent Enrollment In: IT 105
with a D or better or concurrent enrollment in IT 105,
or CAP 101 with a C or better or concurrent enroll-
ment in CAP 101, or Instructor permission.

IT 120
COMMAND LINE INTERFACE & SCRIPTING 5 CR
This course introduces students to scripting using command line interfaces. Industry standard scripting languages in Linux and Microsoft oper-
ating systems will provide the platforms on which to learn syntax, flow control, variables, arrays,
basic parsing and text manipulation.
Completion Of or Concurrent Enrollment In: IT 105
with a D or better or concurrent enrollment in IT 105,
or CAP 101 with a C or better or concurrent enroll-
ment in CAP 101, or Instructor permission.

IT 121
INTRODUCTION TO PROGRAMMING 5 CR
This course introduces students to the fundamen-
tals of good program design, coding, testing, and
documentation. Students will learn to employ
good user interface design, standardization and
variable naming, decision operators, looping
mechanisms, subroutines and error handling as
they build their own programs.

IT 141
LINUX SERVER ADMINISTRATION 5 CR
This course introduces students to the admin-
istration fundamentals of Linux Servers. Using
Linux, students will configure SSH, configure net-
working, administer user accounts and permis-
sions, secure Linux systems, and monitor system
resources, processes and usage.
Prerequisite(s): IT 120 with a D or better and IT 141
with a D or better and IT 160 with a D or better.

IT 142
WINDOWS DESKTOP I 5 CR
An introduction to the Windows desktop oper-
system that includes operating system configura-
tion, installation, device and application manage-
ment, maintenance, and file and folder controls.
Prerequisite(s): IT 120 with a D or better and IT 141
with a D or better and completion of or concurrent enrollment in IT 160.

IT 160
NETWORK TECHNOLOGY I 5 CR
This course provides an introduction to the con-
figuration, management and troubleshooting of
common wired and wireless network devices.
Topics include TCP/IP, DNS, DHCP, OSI Reference
Model, cabling fundamentals, network topolo-
gies, and network diagramming.
Prerequisite(s): IT 112 with a D or better or IT 141
with a D or better.

IT 161
NETWORK TECHNOLOGY II 5 CR
This course builds upon the content knowledge
 gained in IT 160 regarding the configuration,
management, and troubleshooting of common wired and wireless network devices. Topics in-
clude, switching, VLANs, wireless networking,
firewalls, and basic routing.
Prerequisite(s): IT 160 with a D or better and IT 120
with a D or better.

IT 210
INFORMATION SECURITY 5 CR
This course provides an overview of network
security. Topics covered include general secu-
ritv concepts, threat analysis, types of attacks,
vulnerabilities, risk management, cryptography,
PKI, and legal and ethical issues associated with
information security.
Prerequisite(s): IT 141 with a D or better and IT 160
with a D or better.

IT 240
MICROSOFT CLOUD 5 CR
This class covers design, implementation, and
use of AWS cloud services. Topics include Simple
Storage Service(S3), Elastic Compute Cloud(EC2),
Virtual Private Cloud, Relational Database Ser-
vice, and Identity and Access Management.
Prerequisite(s): IT 250 with a D or better and IT 240
with a D or better; or IT 250 with a D or better and IT
242 with a D or better; or Instructor permission.

IT 241
WINDOWS DESKTOP II 5 CR
This course facilitates an in-depth study of the
Windows desktop operating system found com-
monly in the business environment. Areas of
study include enterprise deployment, centralized
configuration, and advanced management and
support tools.
Prerequisite(s): IT 120 with a D or better and IT 142
with a D or better.

IT 242
WINDOWS SERVER I 5 CR
This course focuses on the identity functionality
in Windows Server. Topics include installation
and configuration of Active Directory Domain
Services, Group Policy, Active Directory Certificate
Services, Active Directory Federation Services,
and Web Application proxy implementations.
Prerequisite(s): IT 120 with a D or better and IT 141
with a D or better and IT 160 with a D or better.

IT 243
WINDOWS SERVER II 5 CR
In this course, students will learn to install, con-
figure, and perform system administration tasks in
Windows Server. Topics include configuring
disks, volumes, file sharing and NTFS permissions,
storage solutions, maintenance, server monitor-
ing and optimization, failover clustering, virtual
machine settings, and Powershell.
Prerequisite(s): IT 242 with a D or better.

IT 250
CLOUD & IOT FUNDAMENTALS 5 CR
An introduction to cloud models, virtualization,
infrastructure, security, resource management and
business continuity. Students will also gain
experience deploying Internet and cloud con-
ected sensors and effectors.
Prerequisite(s): IT 142 with a D or better and IT 161
with a D or better.

IT 252
AMAZON CLOUD 5 CR
This class covers design, implementation, and
use of AWS cloud services. Topics include Simple
Storage Service(S3), Elastic Compute Cloud(EC2),
Virtual Private Cloud, Relational Database Ser-
vice, and Identity and Access Management.
Prerequisite(s): IT 250 with a D or better and IT 240
with a D or better; or IT 250 with a D or better and IT
242 with a D or better; or Instructor permission.

IT 253
MICROSOFT CLOUD 5 CR
This class covers design, implementation and
use of Azure cloud services. Topics include Azure
Storage, Azure Virtual Machines, Virtual Network,
Azure DNS, and Azure Active Directory.
Prerequisite(s): IT 250 with a D or better and IT 240
with a D or better; or IT 250 with a D or better and IT
242 with a D or better; or Instructor permission.
Care and treatment of hair, skin, and nail diseases and their function, structure and characteristics.

COSMT 110
SALON MANAGEMENT 5 CR
Basic overview of salon business operations, including marketing strategies, financial control, factors affecting salon culture, insurance, business law and health regulations. Special emphasis is placed on finding a mentor in a salon to observe, record and report on salon business practices.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 112
SALON SAFETY, CHEMISTRY, AND ELECTRICITY 5 CR
Includes methods of decontamination, universal precautions and responsibilities of a salon professional. Types and classifications of bacteria, safety measures in the use and storage of chemicals. Basic background in chemistry theories, processes and product ingredients as they relate to the cosmetology industry. Special emphasis on OSHA chemical hazard information. Basic anatomy, physiology and types of electricity will also be covered. Training in First Aid and CPR is included.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 201
HAIRCUTTING AND STYLING LAB AND SALON PRACTICE I 8 CR
This is the first course in a two-course sequence. Students will practice salon services on the salon floor under the supervision of a licensed cosmetology instructor. During this class, students will learn about and practice the most current and advanced haircuts, styles and beard designs. Students will learn how to use appropriate barbering tools to achieve the look. To gain salon experience, students practice on models, mannequins, clients and each other. Emphasis placed on safety and quality of work while meeting industry target time.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 202
HAIRCUTTING AND STYLING LAB AND SALON PRACTICE II 8 CR
This is the second course in a two-course sequence. Students will continue to practice salon services on the salon floor under the supervision of a licensed cosmetology instructor. During this class, students will learn about and practice the most current and advanced haircuts, styles and beard designs. Students will learn how to use appropriate barbering tools to achieve the look. To gain salon experience, students practice on models, mannequins, clients and each other. Emphasis placed on safety and quality of work while meeting industry target time.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 203
HAIRCUTTING AND BEARD DESIGN LAB AND SALON PRACTICE I 8 CR
This is the first course in a two-course sequence. Students will practice salon services on the salon floor under the supervision of a licensed cosmetology instructor. During this class, students will learn about and practice the most current and advanced haircuts, styles and beard designs. Students will learn how to use appropriate barbering tools to achieve the look. To gain salon experience, students practice on models, mannequins, clients and each other. Emphasis placed on safety and quality of work while meeting industry target time.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 204
HAIRCUTTING AND BEARD DESIGN LAB AND SALON PRACTICE II 8 CR
This is the second course in a two-course sequence. Students will continue to practice salon services on the salon floor under the supervision of a licensed cosmetology instructor. During this class, students will learn about and practice the most current and advanced haircuts, styles and beard designs. Students will learn how to use appropriate barbering tools to achieve the look. To gain salon experience, students practice on models, mannequins, clients and each other. Emphasis placed on safety and quality of work while meeting industry target time.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 205
COLOR LAB AND SALON PRACTICE I 8 CR
This is the first course in a two-course sequence. Students will practice salon services on the salon floor under the supervision of a licensed cosmetology instructor. During this class, students will learn about and practice the most current and advanced color techniques in the industry including foiling, bleach and tone, balayage and corrective color. To gain salon experience, students practice on models, mannequins, clients and each other. Emphasis placed on safety and quality of work while meeting industry target time.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 206
COLOR LAB AND SALON PRACTICE II 8 CR
This is the first course in a two-course sequence. Students will practice salon services on the salon floor under the supervision of a licensed cosmetology instructor. During this class, students will learn about and practice the most current and advanced color techniques in the industry including foiling, bleach and tone, balayage and corrective color. To gain salon experience, students practice on models, mannequins, clients and each other. Emphasis placed on safety and quality of work while meeting industry target time.
Prerequisite(s): COSMT 101 with a C or better.
COSMT 207
TEXTURED HAIR SERVICES LAB AND SALON PRACTICE I 8 CR
This is the first course in a two-course sequence. Students will practice salon services on the salon floor under the supervision of a licensed cosmetology instructor. During this class students will learn about and practice the most current and advanced textured hair services requested in the salon. The class will also review how to select the appropriate product used for natural hair styling and as a follow up to chemical textured services. To gain salon experience, students practice on models, mannequins, clients and each other. Emphasis is placed on safety and quality of work, while meeting industry target time.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 208
TEXTURED HAIR SERVICES LAB AND SALON PRACTICE II 8 CR
This is the second course in a two-course sequence. Students will practice salon services on the salon floor under the supervision of a licensed cosmetology instructor. During this class students will learn about and practice the most current and advanced textured hair services requested in the salon. The class will also review how to select the appropriate product used for natural hair styling and as a follow up to chemical textured services. To gain salon experience, students practice on models, mannequins, clients and each other. Emphasis is placed on safety and quality of work, while meeting industry target time.
Prerequisite(s): COSMT 101 with a C or better.

COSMT 210
COSMETOLOGY LAB & SHOP PRACTICE 2-18 CR
This course is used to complete curriculum, for special interest projects, and/or to complete required program clock hours. COSMT 210 is an additional quarter and is optional.
Prerequisite(s): Instructor permission.

COSMT 220
COSMETOLOGY CAPSTONE 2 CR
Designed for fifth-quarter students preparing for the Washington State Written Licensure Exam. Provides theoretical review of facts from previous Cosmetology courses in preparation for in-house computerized exams before applying for WA State Board examination.
Prerequisite(s): Instructor permission.

CULINARY ARTS

CUL 110
SANITATION & SAFETY 3 CR
This course provides students with an understanding of the principles and practices of sanitation in order to maintain a safe and healthy environment for the consumer in the food service industry. Laws and regulations related to current FDA food code and adherence to them in the food service operation are addressed. Successful completion of online Managerial Certification testing is required for this program. Students will use the internet to research, use Microsoft Word to create assignments and are required to submit work electronically.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CUL 110, CUL 112, CUL 116 and CUL 118 all with a C- or better; or concurrent enrollment in CUL 112, CUL 114, CUL 116 and CUL 118, or Instructor permission.
Note: This class must be taken concurrently with CUL 112, CUL 114, CUL 116 and CUL 118.

CUL 112
INTRODUCTION TO HOSPITALITY 2 CR
This course provides a background and history of the hospitality industry and introduces students to the broad spectrum of hospitality/food service organizations. The course will also explore the wide variety of career opportunities and job requirements needed for the professional chef in today’s job market. Students will be introduced to weights and measures; ingredient yield analysis; recipe reading and writing; and various menu forms used in restaurants. Recipe conversions and pre-costing are covered as well.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CUL 112, CUL 114, CUL 116 and CUL 118 all with a C- or better; or concurrent enrollment in CUL 112, CUL 114, CUL 116 and CUL 118, or Instructor permission.
Note: This class must be taken concurrently with CUL 112, CUL 114, CUL 116 and CUL 118.

CUL 114
CULINARY SKILL DEVELOPMENT I 6 CR
This course focuses on the foundational cooking techniques utilized in the culinary industry. Topics of study include basic mise en place skill development, foundational cooking methods, related terminology and additional foundational cooking preparations. Theory and lab topics include focus on meat cookery; the preparation of stocks, classical and contemporary mother sauces and derivative sauces; and the application of herbs, spices and flavorings used in the professional kitchen today. Weekly labs provide students time to practice these foundational skills.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CUL 110, CUL 112, CUL 116 and CUL 118 all with a C- or better; or concurrent enrollment in CUL 110, CUL 112, CUL 114, CUL 116 and CUL 118, or Instructor permission.
Note: This class must be taken concurrently with CUL 110, CUL 112, CUL 114 and CUL 116.

CUL 116
MEAT IDENTIFICATION AND FABRICATION 4 CR
This course provides an introduction to basic identification and use of hand tools and equipment in meat and fish fabrication. Activities include composition, skeletal structures, muscle types and fabrication of meats, poultry and seafood. Students will apply basic yield analysis, portion cost calculations, purchasing and receiving, basic cooking methods, inspection and USDA regulations, sanitation and hygiene.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CUL 110, CUL 112, CUL 114 and CUL 118 all with a C- or better; or concurrent enrollment in CUL 110, CUL 112, CUL 114 and CUL 118, or Instructor permission.
Note: This class must be taken concurrently with CUL 110, CUL 112, CUL 114 and CUL 118.

CUL 118
COMMERCIAL KITCHEN EQUIPMENT 2 CR
This course provides comprehensive information about common kitchen equipment used in hotels, restaurants, resorts, and other food service establishments. Emphasis is placed on safety measures used in commercial kitchen, identification of a wide variety of commercial kitchen equipment, the common use in professional kitchens and the correct operation, safety, breakdown and cleaning procedures.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: CUL 110, CUL 112, CUL 114 and CUL 118 all with a C- or better; or concurrent enrollment in CUL 110, CUL 112, CUL 114 and CUL 118, or Instructor permission.
Note: This class must be taken concurrently with CUL 110, CUL 112, CUL 114 and CUL 116.

CUL 121
PASTRY BASICS I 3 CR
This course covers mixing and production methods for Cookies, Quick Breads, Short Doughs, Tart doughs, Eclair Paste, Strudel and Phyllo Doughs and Baked Meringues. Students will study ingredients and their functions, learn correct baking methods, exercise accurate assessment
of products, and practice safety and sanitation procedures. Students will use the internet to conduct research, use Microsoft Word to create assignments and are required to submit work electronically.

Prerequisite(s): CUL 110 with a C- or better.
Completion Of or Concurrent Enrollment In: CUL 125 with a C- or better or concurrent enrollment in CUL 125, or Instructor permission.

CUL 122
CULINARY SKILL DEVELOPMENT II 6 CR
This course is a continuation of Culinary Skill Development I, with study and practice focused on soups, salads, salad dressings, nuts, fruits, potatoes, grains, dry legumes and pasta preparations, sandwiches, cheese and dairy products, vegetables and vegetarian cookery. Theory topics include common market forms, yield study and costing analysis, purchasing, receiving, handling and storage of these foundational food products. Through weekly labs, students will practice applying foundational cooking methods to these food products.

Prerequisite(s): CUL 110, CUL 112, CUL 114, CUL 116, CUL 118 with a C- or better.

CUL 125
PASTRY BASICS II 3 CR
This course provides the students with the principles and preparation of pies, custards, puddings, mousses, soufflés, frozen and fruit desserts, and an introduction of baking for special diets. Students will use the internet to conduct research, use Microsoft Word to create assignments and are required to submit work electronically.

Prerequisite(s): CUL 110 with a C- or better.
Completion Of or Concurrent Enrollment In: CUL 121 with a C- or better or concurrent enrollment in CUL 121, or Instructor permission.

CUL 141
INTRODUCTION TO ARTISAN BREADS & LAMINATED DOUGH 3 CR
This course covers beginning and intermediate bread baking. Students will be introduced to the terms and techniques of bread production by making direct and indirect bread dough. Proper mixing, fermentation, shaping, proofing and baking of assorted breads will be the focus of this course. Basic bread production, laminated and rich yeast dough will be studied and prepared. Students will study bread ingredients and their function; learn correct baking methods and laminating procedures; exercise accurate assessment of dough; and practice safety and sanitation procedures.

Prerequisite(s): CUL 110, CUL 121, and CUL 125 all with a C- or better.
Completion Of or Concurrent Enrollment In: CUL 145 with a C- or better or concurrent enrollment in CUL 145, or Instructor permission.

CUL 142
NUTRITION 3 CR
This course provides students with an introduction to nutrition, cultural food pyramids including nutritive value of foods, factors influencing body food requirements, their importance in promoting health and preventing disease, and the body processes and their relation to total nutrition. We will examine nutritional requirements throughout the human life cycle with attention to retaining nutritive values through the cooking process.

CUL 144
AMERICAN REGIONAL À LA CARTE COOKERY 6 CR
This course is an introduction to regional American cuisine. Students will identify 15 distinct regional American cuisines. The history, techniques, indigenous foods and recipes from the regions will be explored and prepared in lecture and labs. Students will study the cuisine of Chesapeake Bay, Louisiana; Mid-Atlantic states; Appalachian South, Western Ranchlands, Plantation South; South Florida and the Caribbean; the Central Plains, Rocky Mountains and Great Basin, Mexican Border, California, Hawaii, the Pacific Northwest. Lab practice topics include station set-up and organization, food preparation, planning sheets, portion control, timing, temperature control, teamwork, communication, productivity skills, and sanitation/safety production skills. Weekly participation in a à la carte production provides students with opportunity to refine fundamental culinary skills and develop à la minute production skills. Upon completion of this course, the student should be able to effectively set-up and operate an à la carte station.

Prerequisite(s): CUL 110, CUL 112, CUL 114, CUL 116, CUL 118, CUL 122 all with a C- or better.

CUL 145
INTRODUCTION TO CAKES, DESSERTS, CHOCOLATE & SUGAR DECORATIONS 4 CR
This course provides a study in the elements of mixing, baking, assembling and decorating simple cakes; introduction to specialty cakes; simple to complex dessert presentation; introduction to chocolate and sugar techniques; and classic and molded chocolate truffles.

Prerequisite(s): CUL 110, CUL 121, and CUL 125 all with a C- or better.
Completion Of or Concurrent Enrollment In: CUL 141 with a C- or better or concurrent enrollment in CUL 141, or Instructor permission.

CUL 150
FIELD-BASED EXPERIENCE 7 CR
This course provides students with industry job experience in a college approved professional kitchen, allowing students to apply first year curriculum cooking skills and culinary knowledge to professional restaurants, hotels, clubs, caterers and other hospitality organizations.

Prerequisite(s): Instructor permission.

CUL 152
CULINARY COMPETITION FUNDAMENTALS 7 CR
Students will train using American Culinary Federation student team competition guidelines culminating in participate in the Washington State Student Team Competition (time and date to be determined). Students will exhibit teamwork, professionalism, the ability to analyze and evaluate food quality; develop outstanding knife skills, organization, hot and cold food cooking skills while maintaining strict adherence to sanitation and time lines.

Prerequisite(s): Instructor permission, student membership in the American Culinary Federation and successful tryout for competition team.

CUL 218
GARDE MANGER 5 CR
This course introduces students to the proper techniques, procedures and implementation of the Garde Manger chef. Students will create and prepare various cold foods, hors d’oeuvres, pates and galantines. Sausage making, cold and hot smoking, curing techniques, preparation of pates, terrines, galantines and canapés are included in the course. Also covered are cold food decoration techniques, cold platter and appetizer buffet design and presentation, and developing skills in centerpieces and show pieces.

Prerequisite(s): CUL 110, CUL 112, CUL 114, CUL 116, CUL 118, and CUL 122 all with a C- or better.

CUL 220
RESTAURANT MANAGEMENT 5 CR
In this course, students apply advanced concepts related to business and operations management in the culinary industry. Students will plan and develop menus, create a kitchen design and dining room lay out, analyze point of sale operations and create business projections.

Prerequisite(s): AMATH 100, AENGL 100, CMST 210, all first year program classes, CUL 142, CUL 218, and CUL 222 all with a C- or better.

CUL 222
SUPERVISOR DEVELOPMENT 3 CR
In this course students gain an overview of specific concepts necessary to successfully utilize human resources in a food service environment. Lectures on selected topics, student projects and assignments related to workplace activities form the majority of the material presented.

Prerequisite(s): AENGL 100, CUL 110, CUL 112, CUL 114, CUL 116, CUL 118, CUL 121, CUL 122, CUL 125, CUL 141, CUL 144, and CUL 145 all with a C- or higher, or Instructor permission.

CUL 224
FOOD AND BEVERAGE SERVICE 2 CR
This course assists students in developing food and beverage service skills based on dining room operations in a wide variety of service styles. The students are instructed in principles of front of the house operations, point of sale systems and guest relations. Students will learn the funda-
mental of non-alcoholic and alcoholic beverages, appropriate beverage laws, and service for a variety of food and beverage establishments.

Prerequisite(s): CUL 120 with a C- or better and CUL 124 with a C- or better.

CUL 226 INTERNATIONAL CUISINE 6 CR
This course provides students with practical experience in the preparation and service of foods from international countries. Emphasis is placed on eating habits, ethnic influences, indigenous foods and customs, cooking methods used, traditional equipment and each regions overall influence on today’s restaurant market. Weekly participation in theme buffet productions enhances student’s technical skills.

Prerequisite(s): All first year Culinary Arts program classes and CUL 218 with a C- or better.
Corequisite(s): CUL 228.

CUL 228 BANQUET AND CATERING MANAGEMENT 3 CR
In Banquet and Catering Management, students will learn the fundamental skills and knowledge needed to set-up and run banquet and catering events. Theory subjects include plated and buffet banquet menus, buffet layout and design, catering contracts, event planning, organization, staffing, home meal replacement, private and personal chef industry, optional services, and pricing formats. Weekly buffets provide hands-on experience in setting up and managing a full service buffet event.

Prerequisite(s): All first year Culinary Arts program classes and CUL 218 with a C- or better.
Corequisite(s): CUL 226.

CUL 230 NORTHWEST À LA CARTE COOKERY 7 CR
This course provides students with an opportunity to apply the vast majority of the Culinary Arts curriculum as students rotate through several stations creating Northwest cuisine in the à la carte restaurant kitchen. Students are expected to manage the responsibilities in setting up and running an à la carte restaurant station including food preparation, planning sheets, organization, portion control, timing, temperature control, teamwork, communication, productivity and sanitary production skills. In addition, students will practice expediter skills including coordinating and controlling the flow of finished menu items from the station chefs and working closely with student service staff and maître d’ positions. Students will study a variety of modern food sourcing topics including buying local, sustainability topics, organic food production, GMOs, irradiation and other staple food production methods.

Prerequisite(s): Successful completion of the first six quarters of the Culinary Arts curriculum with a C- or better in each course or Instructor permission.

CUL 232 FOOD AND BEVERAGE SERVICE LAB 2 CR
In this course students apply service skills, knowledge, guest relations, tableside cookery, point-of-sale operations, cash handling, reservations, seating, and greeting, in Café Culinaire. The students are responsible for excellent customer service under all conditions. Students work in various dining room positions at Bellingham Technical College’s Café Culinaire such as: maître d’, front server and back server.

Prerequisite(s): Successful competition of the first six quarters of the Culinary Arts curriculum with a C- or better in each course or Instructor permission.

CUL 234 CAPSTONE PROJECT & PRACTICAL EXAM 1 CR
This course is designed to assess the student’s overall knowledge and skill level at the completion of all curriculum requirements. Students will research, plan, and supervise two commis in the preparation of a five course gastronomique menu (prix fixe) for guests using diverse techniques, ingredients and flavors. The menu should show a common theme throughout the course work. Students will prepare a formal menu using assigned proteins and common market list of food products, while employing yield analysis, planning and leadership throughout the examination process.

Prerequisite(s): Successful completion of the first six quarters of the Culinary Arts curriculum with a C- or better in each course or Instructor permission.

CUL 236 WINE APPRECIATION 2 CR
This course provides comprehensive information about wine from all the major wine producing countries in the world. Emphasis is placed on the history of wine, production characteristics and laws, food and wine pairing, cooking with wine, wine menus, purchasing, formal wine service and storage requirements. Upon completion, students should be able to determine what wines compliment various cuisines and particular tastes.

Prerequisite(s): Successful completion of first six quarters of the Culinary Arts curriculum with a C- or better in each course or Instructor permission.

PST 100 BASIC CUISINE FOUNDATION 4 CR
This course focuses on basic foundation cooking techniques utilized in the culinary industry. Study topics include basic mise en place skills; vegetable cutting and preparation techniques; basic stocks, sauces, and starches; fabrication of chicken, and classic cooking methods. Students will create healthy, organic thirty minute meals utilizing local products. Students will use the internet to conduct research, use Microsoft Word and PowerPoint to create assignments/presentations and are required to submit work electronically.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or better or MATH 090 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or better or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or better or ENGL 092 with a C or better or Instructor permission.

Completion Of or Concurrent Enrollment In: PST 101, PST 110, and PST 130, all with a C- or better, or concurrent enrollment in PST 101, PST 110 and PST 130, or Instructor permission.

PST 101 PASTRY & BAKING ORIENTATION 3 CR
This course provides students with a history of the baking and pastry profession, and introduces the student to the broad spectrum of hospitality/foodservice organizations and career opportunities. Topics include: the baking profession, basic professional skills, bakeshop math, baking and pastry equipment, ingredients, mise en place, plan writing, baking principles, kitchen orientation, and observing bakery or retail baking establishments. Students will conduct informational interviews and explore career opportunities in the pastry industry. Students will use the internet to research, use Microsoft Word and PowerPoint to create assignments/presentations and are required to submit work electronically.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; or Instructor permission.

Completion Of or Concurrent Enrollment In: PST 100, PST 110, and PST 130, all with a C- or better; or concurrent enrollment in PST 100, PST 110, and PST 130; or Instructor permission.

Note: This class must be taken concurrently with PST 100, PST 110, and PST 130.

PST 110 SANITATION & SAFETY 3 CR
This course provides students with an understanding of the principles and practices of sanitation in order to maintain a safe and healthy environment for the consumer in the food service industry. Laws and regulations related to current FDA food code and adherence to them in the food service operation are addressed. Successful completion of online Managerial Certification testing is required for this program. Students will use the internet to research, use Microsoft Word to create assignments, and are required to submit work electronically.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or a C or better in MATH 090 or ABE 050; and ACCUPLACER Reading Comprehension score of 71 or better or RDG 085; and ACCUPLACER Sentence Skills score of 71 or better or ENGL 092 or Instructor permission.

Completion Of or Concurrent Enrollment In: PST 100, PST 101 and PST 130, all with a C- or better; or concurrent enrollment in PST 100, PST 101, and PST 130; or Instructor permission.

Note: This class must be taken concurrently with PST 100, PST 101, and PST 130.
PST 100
INTRODUCTION TO COMMERCIAL BAKING 5 CR
This course provides an introduction to baking and pastry techniques for use in a commercial kitchen. Students will gain an understanding of pastry ingredients and their functions; learn correct baking and frying methods; create a variety of baked goods; exercise accurate assessment of finishing decorations and practice safety and sanitation procedures. Students will use the Internet to conduct research, use Microsoft Word and PowerPoint to create assignments/presentations and are required to submit work electronically.
Prerequisite(s): ACCUPLACER Arithmetic score of 38 or better or MATH 090 with a C or better or ABE 050 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or better or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or better or ENGL 092 with a C or better; or Instructor permission.
Completion Of or Concurrent Enrollment In: PST 100, PST 101, and PST 110, all with a C- or better; or Instructor permission.

PST 208
INTRODUCTION TO CAKES, DESSERTS, CHOCOLATE & SUGAR DECORATIONS 4 CR
This course provides a study in the elements of mixing, baking, assembling and decorating simple cakes; introduction to specialty cakes; simple to complex dessert presentation; introduction to chocolate and sugar techniques; and classic and molded chocolate truffles.
Prerequisite(s): PST 202, PST 204, PST 206, and PST 220; all with a C- or higher; or Instructor permission.
Completion Of or Concurrent Enrollment In: PST 202, PST 204, and PST 220, all with a C- or higher; or concurrent enrollment in PST 202, PST 204, and PST 220; or Instructor permission.

PST 220
ADVANCED ARTISAN & DECORATIVE BREADS 3 CR
This course provides an advanced study in the art and craft of bread making. Topics include pertinent formulas and techniques associated with naturally leavened loaves, sponge and straight dough methods, hearth breads, bagels, flatbreads, decorative breads, and other breads utilizing a variety of grains. Upon completion students should be able to prepare artisan and decorative breads that meet or exceed the expectations of restaurant end retail publics. Students will use the Internet to conduct research, use Microsoft Word to create assignments and are required to submit work electronically.
Prerequisite(s): PST 100, PST 101, PST 110, and PST 130, all with a C- or higher; or Instructor permission.
Completion Of or Concurrent Enrollment In: PST 202, PST 204, and PST 206, all with a C- or higher; or concurrent enrollment in PST 202, PST 204, and PST 206; or Instructor permission.

PST 222
CHOCOLATE/SUGAR CONFECTIONS & INTRODUCTION TO BASIC SHOWPIECES 3 CR
Students learn about chocolate and sugar and its use in the pastry world. This course will cover an assortment of chocolate and sugar confections, pastillage as a medium for showpieces, provide an introduction to chocolate showpieces, modeling chocolate, and sugar showpieces using pouring, pulling, and blowing techniques. Students will use the Internet to conduct research, use Microsoft Word to create assignments and are required to submit work electronically.
Prerequisite(s): PST 202, PST 204, PST 206, and PST 220, all with a C- or higher; or Instructor permission.
Completion Of or Concurrent Enrollment In: PST 208 and PST 224 with a C- or higher; or concurrent enrollment in PST 208 and PST 224; or Instructor permission.

PST 224
SPECIALTY CAKES I 5 CR
This course covers an introduction in the design and decoration of wedding cakes and other specialty cakes. Topics include baking, filling and assembling cakes; cake design; finishing techniques utilizing gum paste, fondant, and royal icing; and advanced piping skills.
Prerequisite(s): PST 202, PST 204, PST 206, and PST 220, all with a C- or higher; or Instructor permission.
Completion Of or Concurrent Enrollment In: PST 208 and PST 222 with a C- or higher; or concurrent enrollment in PST 208 and PST 222; or Instructor permission.

DEN 100
INTRODUCTION TO DENTAL ASSISTING 1 CR
This course provides information relating to the role of the Dental Assistant within the dental team. The history of dental assisting, progress of dentistry, and concepts of dental health are included. In addition, college/program policies and strategies for successful learning are incorporated.
Prerequisite(s): BIO 105 or BIOL& 160 with a minimum C grade.

DEN 105
HEAD AND NECK ANATOMY 2 CR
Introduction to structure of head and neck region. Emphasis on anatomical structures of the skeletal, muscular, nervous, cardiovascular, and digestive systems as pertains to the head and neck. Also includes an overview of microbiology and disease.
Prerequisite(s): BIO 105 or BIOL& 160 with a minimum C grade.
DEN 110  
DENTAL FOUNDATIONS  5 CR  
This course provides the student with the foundation necessary to enter into the Bellingham Technical College Dental Clinic. The student will gain the knowledge and skills required to maintain a safe dental environment. Also included are federal and state regulations regarding chemical use, infection control, and medical emergencies in the dental office. This course introduces basic concepts of radiography. Students learn how to correctly and safely evaluate need for x-rays including: expose, process, and mount intraoral radiographs utilizing the bitewing technique.  
Prerequisite(s): Dental Assisting Program Admission.

DEN 112  
CHAIRSIDE ASSISTING I  7 CR  
This course provides the student with the knowledge and skills needed to operate and maintain typical equipment found in a dental operatory. The student will gain an understanding of the design, function, and maintenance of handpieces, dental instruments and the dental unit water/vacuum line. This course will also focus on the theory and delivery of basic dental assisting skills such as: dental ergonomics, principles of team positioning, instrument transfer and oral evacuation.  
Prerequisite(s): Dental Assisting Program Admission.

DEN 114  
DENTAL SCIENCES  4 CR  
This course focuses on related biomedical sciences that are the foundation of the Dental Assistant curriculum. Course content includes basic oral embryology, histology and tooth morphology. Concepts of oral pathology and oral inspection will be introduced. The course covers the impact of blood borne pathogens and how they relate to the field of dentistry.  
Prerequisite(s): Dental Assisting Program Admission.

DEN 115  
DENTAL CLINIC PRACTICUM I  6 CR  
This course provides a clinical introduction for the student. Students will be assigned to a variety of weekly clinical responsibilities. They will begin their duties with a mentor and eventually move to independent competencies. Students will gain hands-on experience in front office, clinical coordination, x-ray processing, patient intake, and sterilization. Toward the end of clinical practice phase I, they will begin assisting and documenting dental exams and dental hygiene appointments.  
Prerequisite(s): Dental Assisting Program Admission.

DEN 120  
PATIENT ASSESSMENT  8 CR  
This course provides the student with the level of knowledge and skills required for the dental assistant to accurately collect and assess patient data. The student will have the opportunity to learn and practice the skills associated with collecting a health history, obtaining vital signs, assisting with medical emergencies, and assisting the dentist in the diagnostic stages of dental treatment. Pharmacology and anesthesia will be presented as it relates to dentistry and oral health. This course also includes instruction on dental office administration, concentrating on specific job duties in the Bellingham Technical College Dental Clinic.  
Prerequisite(s): DEN 110, DEN 112, DEN 114, & DEN 115 with a minimum grade of C in each course.

DEN 122  
CHAIRSIDE ASSISTING II  6 CR  
Provides the student with appropriate skills required to perform routine dental procedures. Instruction will include the use and manipulation of dental instrument setups, restorative materials, isolation techniques and how to effectively transfer instruments when assisting in a dental procedure.  
Prerequisite(s): DEN 110, DEN 112, DEN 114, & DEN 115 with a minimum grade of C in each course.

DEN 124  
RADIOGRAPHY  3 CR  
The student will learn to accurately and safely expose, process and mount full mouth periapicals, maxillary and mandibular occlusal films. Also including panoramic radiographs utilizing a variety of techniques. This course will provide the skills necessary to produce films with optimal diagnostic quality on a variety of patient situations including: pedodontics, edentulous and extra oral.  
Prerequisite(s): DEN 110, DEN 112, DEN 114, & DEN 115 with a minimum grade of C in each course.

DEN 125  
DENTAL CLINIC PRACTICUM II  4 CR  
Orients the student and identifies the clinic competencies that must be successfully demonstrated in order for the student to advance to DEN 135. This course provides the hands-on experience required for front office, clinic coordination, and assistive functions with the clinic dentist and dental hygienist.  
Prerequisite(s): DEN 110, DEN 112, DEN 114, & DEN 115 with a minimum grade of C in each course.

DEN 130  
PREVENTATIVE DENTISTRY  3 CR  
This course provides the student with a working knowledge of preventative dentistry, good oral hygiene and nutrition. Students will learn how to promote preventative dentistry in the office and the procedures available to curb oral diseases including: dental caries and periodontal disease.  
Prerequisite(s): DEN 120, DEN 122, DEN 124, & DEN 125 with a minimum grade of C in each course.

DEN 132  
DENTAL SPECIALTIES  1 CR  
Provides the knowledge and skills necessary to assist in dental specialties including: prosthodontics, oral surgery, pediatrics and orthodontics.  
Prerequisite(s): DEN 120, DEN 122, DEN 124, & DEN 125 with a minimum grade of C in each course.

DEN 134  
LABORATORY PROCEDURES  2 CR  
Enables students to develop skills in the use and manipulation of dental materials and lab equipment. Taking, pouring, separating, trimming, and finishing study modules and preparing custom trays will be included in this course.  
Completion Of or Concurrent Enrollment In: DEN 132 with a minimum grade of C, pre or corequisite.

DEN 135  
DENTAL CLINIC PRACTICUM III  4 CR  
This course is a continuation of DEN 125. It provides the hands-on experience required for front office, clinic coordination, and assistive functions with the clinic dentist and dental hygienist. The student must successfully demonstrate the required clinic competencies in order to be eligible to participate in the extramural experience.  
Prerequisite(s): DEN 120, DEN 122, DEN 124, & DEN 125 with a minimum grade of C in each course.

DEN 137  
EXTRAMURAL PRACTICUM  8 CR  
Allows students to apply knowledge, skills, and attitudes gained in the Dental Assistant Program. Expected behaviors regarding office policies, record keeping, and evaluation procedures, as an employee and team member, are explored. Ethical and legal concerns are also addressed. Students are then placed in a variety of local dental offices where they apply skills related to basic chairside, oral hygiene and operative dentistry.  
Prerequisite(s): DEN 120, DEN 122, DEN 124, & DEN 125 with a minimum grade of C in each course.

DHYG 112  
DENTAL HYGIENE CLINICAL PRACTICE I  5 CR  
First of six (6) sequential courses designed to provide clinical skills essential for the practice of dental hygiene. Skill development of patient appraisal, basic instrumentation, infection control and individualized preventive care is emphasized.  
Prerequisite(s): Dental Hygiene Program Admission.

DHYG 113  
DENTAL MATERIALS  4 CR  
A study of materials used in dentistry including practical applications and chairside assisting. Study includes general properties, composition, and manipulation of common dental materials. Ethical situations pertaining to treatment planning and the use of dental materials by dental hygienists.  
Prerequisite(s): Dental Hygiene Program Admission.
DHYG 114
PRINCIPLES OF DENTAL HYGIENE I 3 CR
First of seven (7) sequential courses providing theoretical background and skill development for the clinical practice of dental hygiene. Problem solving and critical thinking related to patient assessment and management. Communication skills and professionalism are emphasized. 
Prerequisite(s): Dental Hygiene Program Admission.

DHYG 115
ORAL & DENTAL ANATOMY 2 CR
Integrated anatomy, histology, and physiology of the head and neck region. Crown anatomy, root morphology and tooth development as applied to clinical situations.
Prerequisite(s): Dental Hygiene Program Admission.

DHYG 116
ORAL RADIOLOGY I 4 CR
Theoretical background and practical application of dental radiography. Exposure techniques, processing, mounting, and evaluation of dental radiographs; principles of production, use of X-ray, radiation safety procedures and patient education.
Prerequisite(s): Dental Hygiene Program Admission.

DHYG 118
HISTOLOGY & EMBRYOLOGY 2 CR
The study of oral histology including developmental origins and microscopic organization of selected oral and facial structures. The embryonic development of the face and palate will be described and correlated with more common craniofacial malformations. The formation, eruption and histological organization of the teeth and their supporting tissues will be examined in considerable detail, as well as the oral mucosa and salivary glands.
Prerequisite(s): Dental Hygiene Program Admission.

DHYG 122
DENTAL HYGIENE CLINICAL PRACTICE II 5 CR
Theoretical background and practical application of dental radiography. Exposure techniques, processing, mounting, and evaluation of dental radiographs; principles of production, use of X-ray, radiation safety procedure and patient education.
Prerequisite(s): DHYG 112 with a minimum grade of C.

DHYG 124
PRINCIPLES OF DENTAL HYGIENE II 3 CR
Sequential course providing theoretical background for the practice of dental hygiene. Problem solving and critical thinking related to patient assessment and management.
Prerequisite(s): Dental Hygiene Program Admission.

DHYG 125
MEDICAL EMERGENCIES 3 CR
Equipment, drugs, signs and symptoms of medical emergencies that may occur in dental offices. Individual and team practice in carrying out emergency procedures in timed simulations: pulse, respiration, blood pressure, emergency drug setup, and oxygen.
Prerequisite(s): Dental Hygiene Program Admission.

DHYG 126
ORAL RADIOLOGY II 2 CR
Prerequisite(s): DHYG 116 with a C or better.

DHYG 128
GENERAL PATHOLOGY 4 CR
Reaction of the human body to injury from physical, chemical, and biological agents. Inflammation, necrosis, cellular degeneration, disturbances of growth, circulation, and neoplasia. Selected diseases manifesting typical symptomology.
Prerequisite(s): Dental Hygiene Program Admission.

DHYG 131
RESTORATIVE DENTISTRY I 4 CR
Prerequisite(s): DHYG 113 with a minimum grade of C.

DHYG 132
DENTAL HYGIENE CLINICAL PRACTICE III 5 CR
Sequential course providing practice of dental hygiene skills. Problem solving and critical thinking related to patient assessment and management. Demonstration of professional growth and self assessment.
Prerequisite(s): DHYG 122 with a C or better.

DHYG 134
PRINCIPLES OF DENTAL HYGIENE III 3 CR
Sequential course providing theoretical background for the clinical practice of dental hygiene. Emphasis on patient education and treatment planning related to patients’ age and stage. Nutrition and relationship to oral diseases.
Prerequisite(s): DHYG 124 with a minimum grade of C.

DHYG 137
PHARMACOLOGY 3 CR
The action of selected pharmaceutical agents. Emphasis on drug interactions, routes of administration, and effects on body systems. Recognition of potential impact on dental hygiene practice.
Prerequisite(s): DHYG 128 with a minimum grade of C.

DHYG 138
PERIODONTAL DISEASES II 1 CR
Study of the periodontium emphasizing periodontal diseases, their classifications, and the etiological factors involved. Preventive measures within the scope and responsibility of the dental hygienist are correlated with basic sciences and clinical aspects of periodontal diseases.
Prerequisite(s): DHYG 128 with a minimum grade of C.

DHYG 141
REACTIVE DENTISTRY II 1 CR
Laboratory experience with direct restorative dental materials. Placement, carving, finishing, and polishing of amalgam, glass ionomer and composite restorations on dentoforms.
Prerequisite(s): DHYG 131 with a C or better.

DHYG 142
HYGIENE CLINICAL PRACTICE IV 5 CR
Sequential course providing practice of dental hygiene skills. Problem solving and critical thinking related to patient assessment and management. Demonstration of professional growth and self assessment.
Prerequisite(s): DHYG 132 with a C or better.

DHYG 144
PRINCIPLES OF DENTAL HYGIENE IV 3 CR
Sequential course providing theoretical background of dental hygiene skills. Literature review and research reports, oral cancer and tobacco cessation emphasized.
Prerequisite(s): DHYG 134 with a minimum grade of C.

DHYG 149
PAIN MANAGEMENT 4 CR
Exploration of pain control methods including local anesthesia and nitrous oxygen analgesia. Health history evaluation, local and systemic complications, anesthetic solutions, vasoconstrictors and drug interactions. Techniques of local anesthesia, including block and infiltration techniques are practiced. Administration of nitrous oxide is also practiced.
Prerequisite(s): DHYG 137 with a minimum grade of C.

DHYG 211
RESTORATIVE DENTISTRY III 2 CR
Laboratory experience with direct restorative dental materials. Placement, carving, finishing, and polishing of amalgam and composite restorations on dentoforms.
Prerequisite(s): DHYG 141 with a C or better.
DHYG 212
DENTAL HYGIENE CLINICAL PRACTICE V  8 CR
Sequential course providing practice of dental hygiene skills. Problem solving and critical thinking related to patient assessment and management. Demonstration of professional growth and self assessment.
Prerequisite(s): DHYG 211 with a minimum grade of C.

DHYG 214
PRINCIPLES OF DENTAL HYGIENE V  3 CR
Sequential course providing theoretical background of dental hygiene skills. Quality assurance, advanced instrumentation theory, periodontal files, planning dental hygiene treatment for special needs patients. Research paper, case studies.
Prerequisite(s): DHYG 144 with a minimum grade of C.

DHYG 216
COMMUNITY ORAL HEALTH I  4 CR
Prerequisite(s): DHYG 144 with a minimum grade of C.

DHYG 219
ORAL PATHOLOGY  3 CR
A study of oral diseases and manifestations of systemic diseases. Utilizes independent learning and internet resources.
Prerequisite(s): DHYG 128 with a minimum grade of C.

DHYG 221
RESTORATIVE DENTISTRY IV  2 CR
Laboratory experience with direct restorative dental materials. Placement, carving, finishing, and polishing of amalgam and composite restorations on dentoforms.
Prerequisite(s): DHYG 211 with a minimum grade of C.

DHYG 222
DENTAL HYGIENE CLINICAL PRACTICE VI  8 CR
Sequential course providing practice of dental hygiene skills. Problem solving and critical thinking related to patient assessment and management. Demonstration of professional growth and self assessment.
Prerequisite(s): DHYG 212 with a minimum grade of C.

DHYG 224
PRINCIPLES OF DENTAL HYGIENE VI 3 CR
Sequential course providing theoretical background of dental hygiene skills. Ethics and jurisprudence, current therapeutic trends, insurance coding, scheduling and patient recall, hygiene assisting and record keeping.
Prerequisite(s): DHYG 214 with a minimum grade of C.

DHYG 226
COMMUNITY ORAL HEALTH II  4 CR
Prerequisite(s): DHYG 216 with a minimum grade of C.

DHYG 228
ORAL THERAPY  3 CR
Prerequisite(s): DHYG 219 with a minimum grade of C.

DHYG 229
DENTAL HYGIENE SEMINAR  1 CR
Review and practice for the National Dental Hygiene Board Examination.
Corequisite(s): DHYG 221, DHYG 222, DHYG 224, DHYG 226 & DHYG 228.

DHYG 231
RESTORATIVE DENTISTRY V  1 CR
Case studies and special project designed to enhance student understanding of clinical restorative practice. Application of research in dental materials.
Prerequisite(s): DHYG 221 with a minimum grade of C.

DHYG 232
DENTAL HYGIENE CLINICAL PRACTICE VII  8 CR
Sequential course providing practice of dental hygiene skills. Problem solving and critical thinking related to patient assessment and management. Demonstration of professional growth and self assessment.
Prerequisite(s): DHYG 222 with a minimum grade of C.

DHYG 234
PRINCIPLES OF DENTAL HYGIENE VII  3 CR
Sequential course providing theoretical background of dental hygiene skills. Focus is to meet needs of graduating dental hygiene students: current therapeutic trends, research, career opportunities and job search strategies. Financial planning, guest speakers. Dental practice act and licensure requirements. Application for board examinations. Specialized clinical skills.
Prerequisite(s): DHYG 224 with a minimum grade of C.

DHYG 236
COMMUNITY ORAL HEALTH III  2 CR
Careers in Public Health, table clinics or poster presentations. Involvement in local projects; community health program completion and evaluation. Leadership for community projects. Research.
Prerequisite(s): DHYG 226 with a minimum grade of C.

EFDA 100
DENTAL ANATOMY  1 CR
This course will provide students with terminology and features of the dentition and oral cavity. Emphasis will be on detailed study of each permanent and primary tooth in order to prepare students for restoring harmonious function and form.
Prerequisite(s): Admission to EFDA program.

EFDA 101
RESTITORATIVE DENTISTRY I  3 CR
This course covers foundational knowledge in dental materials science. These principles will be specifically applied to amalgam and composite restorations. This course will be intense to allow us to begin placing restorations in the companion lab course EFDA 102 as soon as possible.
Prerequisite(s): Admission to the EFDA program.

EFDA 102
RESTITORATIVE LAB I  2 CR
This course will introduce students to the manipulation and placement of restorative materials. Students will apply concepts from dental anatomy and materials science to restorative procedures.
Prerequisite(s): Admission to the EFDA program.

EFDA 110
PRINCIPLES OF DENTAL ASSISTING  2 CR
This course will provide students with the knowledge and skills to perform certain EFDA procedures under general supervision. Students will be familiar with legal and ethical aspects of dental practice and be versed in common medical conditions and pharmacology.
Prerequisite(s): EFDA 100.

EFDA 111
RESTITORATIVE DENTISTRY II  2 CR
This course is a continuation of EFDA 101. Materials and procedures associated with restorative dentistry including adhesion, liners and bases, and occlusion.
Prerequisite(s): EFDA 101.

EFDA 112
RESTITORATIVE LAB II  2 CR
This course is a continuation of EFDA 102. Student will continue to practice skills placing amalgam and composite restorations on typodonts. Students will also practice skills discussed in the concurrent lecture EFDA 110.
Prerequisite(s): EFDA 102.
EFDA 120
FINAL IMPRESSIONS  1 CR
Theory and practice of preliminary and final impressions as well as bite registration. Computer assisted design will be included.
Prerequisite(s): EFDA 110.

EFDA 122
RESTORATIVE LAB III  2 CR
This course will focus on preparing students for the Restorative WREB exam. Class II composites and amalgams will be emphasized. Students will participate in a mock exam. Students will also place final impressions on a typodont concurrent with EFDA 120.
Prerequisite(s): EFDA 111.

EFDA 123
RESTORATIVE CLINICAL PRACTICE  3 CR
This clinical course provides practice in EFDA skills. Emphasis will be on the placement of amalgam and composite restorations on patients. Patient care will be provided in both on-campus clinics and off-campus extern sites.
Prerequisite(s): EFDA 112.

DIESEL TECHNOLOGY

DET 104
HYDRAULIC BRAKES  2 CR
This course will address the basic operation of mobile hydraulic braking systems, with the emphasis on preventive maintenance and logical troubleshooting.
Prerequisite(s): TRANS 101, TRANS 102, TRANS 103 all with a grade of C or better; or Instructor permission.

DET 105
ELECTRICAL/ELECTRONICS I  6 CR
This course will address the basic operation of electrical/electronic systems, with the emphasis on preventive maintenance and logical troubleshooting.
Prerequisite(s): TRANS 101, TRANS 102, TRANS 103 all with a grade of C or better; or Instructor permission.

DET 116
ELECTRICAL/ELECTRONICS II  6 CR
This course will address specific components and operational theory of batteries, including starting and charging, as utilized in modern medium/heavy duty vehicles. It will also address comprehension and use of wiring schematics and diagrams for the previously mentioned components, as well as removal and installation of maintenance items for starters and alternators.
Prerequisite(s): TRANS 101, TRANS 102, TRANS 103 all with a grade of C or better; or Instructor permission.

DET 126
ELECTRICAL/ELECTRONICS III  6 CR
This course will address lighting and instrumentation on systems used on medium/heavy duty vehicles including wiring diagrams and schematics. Component location, testing and diagnostic procedures will be practiced and implemented.
Prerequisite(s): TRANS 101, TRANS 102, TRANS 103 all with a grade of C or better; or Instructor permission.

DET 129
SHOP SIMULATION  15 CR
This course simulates a diesel technology maintenance/repair shop environment under the supervision of the instructor. Students will learn: safety, rigging, drilling, threading, thread repair, strengths of materials, materials identification, metalworking, cutting and welding and the documentation of these skills with a student created learning portfolio, documenting their work experience with narratives and photos and providing an in depth self-reflection. Students from TRANS 101, TRANS 102, TRANS 103 must meet with the instructor to discuss DET 129 requirements.
Prerequisite(s): TRANS 101, TRANS 102, and TRANS 103 all with a C or better; or Instructor permission.

DET 139
FIELD-BASED EXPERIENCE I  12 CR
The student will complete an unpaid or paid internship or job shadow at a maintenance/repair facility in the industry. This is the first of two internships the student will complete in the program. It is recommended that the student’s experience focus on the subject areas completed in the previous three quarters on campus, if practical or possible, thereby making the internship site a real world extension of the classroom. Student work will be monitored by an instructor from BTC who will visit the work site periodically. Students will create and maintain a field-based learning portfolio, documenting their work experience with narratives and photos and providing an in depth self-reflection.
Prerequisite(s): TRANS 101, TRANS 102, and TRANS 103 all with a C or better and all General Education (Related Instruction) courses required by degree; or Instructor permission.

DET 201
HYDRAULICS  9 CR
This course will address the basic operation of hydraulic/pneumatic systems, with the emphasis on preventive maintenance and logical troubleshooting.
Prerequisite(s): TRANS 101, TRANS 102, and TRANS 103 all with a grade of C or better; or Instructor permission.

DET 202
DIESEL ENGINES  13 CR
This course will address the basic operation of diesel engines and their systems, with the emphasis on preventive maintenance and logical troubleshooting.
Prerequisite(s): TRANS 101, TRANS 102, and TRANS 103 all with a grade of C or better; or Instructor permission.

DET 203
DRIVE TRAIN  5 CR
This course will address the basic operation of drive train systems, with the emphasis on preventive maintenance and logical troubleshooting.
Prerequisite(s): TRANS 101, TRANS 102, and TRANS 103 all with a grade of C or better; or Instructor permission.

DET 204
AIR BRAKES  5 CR
This course will address the basic operation of mobile air braking systems, with the emphasis on preventive maintenance and logical troubleshooting.
Prerequisite(s): TRANS 101, TRANS 102, and TRANS 103 all with a grade of C or better; or Instructor permission.

DET 205
SUSPENSION/STEERING  5 CR
This course will address the basic operation of suspension and steering systems, with the emphasis on preventive maintenance and logical troubleshooting.
Prerequisite(s): TRANS 101, TRANS 102, and TRANS 103 all with a grade of C or better; or Instructor permission.

DET 208
PREVENTIVE MAINTENANCE  6 CR
This course covers how to set up a PM program, arrange PM scheduling, keep vital records, and winterize heavy duty vehicles. It also discusses when to place a vehicle out of service or deadline it.
Prerequisite(s): TRANS 101, TRANS 102, and TRANS 103 all with a grade of C or better; or Instructor permission.

DET 239
FIELD-BASED EXPERIENCE II  12 CR
The student will complete an unpaid or paid internship or job shadow at a maintenance/repair facility in the industry. This is the second in a series of two internships within the program. It is recommended that the student’s experience focus on the subject areas completed in the most recent quarters on campus. The maintenance/repair facility becomes a real world extension of the classroom. Student work will be monitored by an instructor from BTC who will visit the work site periodically. Students will create and maintain a field-based learning portfolio, documenting their work experience with narratives and photos and providing an in-depth self-reflection.
Prerequisite(s): TRANS 101, TRANS 102, TRANS 103, and DET 139 all with a C or better and all General Education (Related Instruction) courses required by degree; or Instructor permission.
DET 240
CURRENT DIESEL INDUSTRY
TOPICS I
7 CR
The student is required to volunteer to work at improving their skills related to the diesel industry. This may include, but not be limited to, a museum of marine, agricultural equipment, logging equipment, restoration projects of heavy equipment or trucks/busses, participation in heavy construction projects involving the operation of heavy equipment, etc. It is recommended that the student’s experience focus on the subject areas that interest the student to better further their career choice. The volunteer experience then becomes a real world extension of the classroom. An instructor from BTC, who will visit the volunteer site periodically, will monitor student work.
Prerequisite(s): TRANS 101, TRANS 102, TRANS 103, AENGL 100, AMATH 100, CMST& 210, and DET 129 all with a grade of C or better; or Instructor permission.

DET 242
CURRENT DIESEL INDUSTRY
TOPICS II
8 CR
The student is required to volunteer to work at improving their skills related to the diesel industry. This may include, but not be limited to, a museum of marine, agricultural equipment, logging equipment, restoration projects of heavy equipment or trucks/busses, participation in heavy construction projects involving the operation of heavy equipment, etc. It is recommended that the student’s experience focus on the subject areas that interest the student to better further their career choice. The volunteer experience then becomes a real world extension of the classroom. An instructor from BTC, who will visit the volunteer site periodically, will monitor student work.
Prerequisite(s): TRANS 101, TRANS 102, TRANS 103, AENGL 100, AMATH 100, CMST& 210, and DET 129 all with a grade of C or better; or Instructor permission.

EARLY CHILDHOOD EDUCATION

ECED 130
ADULT/INFANT: THE DEVELOPING INFANT
2 CR
Adults and young infants attend this course together in an instructional program that focuses on infant development. Adults and young infants interact together in class. Topics include infant development, play, sleep, nutrition, and health and illness and safety.

ECED 131
ADULT/INFANT: APPROACHING TODDLERHOOD
2 CR
Adults and older infants attend this course together in an instructional program that focuses on children’s development. Developmentally appropriate activities are planned for the adult and older infants to interact together in class. Topics include child development, play, sleep, weaning, discipline, emerging language, health and illness, and safety.

ECED 134
ADULT/CHILD: ONE YEAR OLD DEVELOPMENT – SUMMER
1 CR
Adults and children attend this course together in an instructional program that focuses on the development of a one-year old child. Developmentally appropriate activities are planned for adults and toddlers to do together in class. This course also incorporates a weekly adult discussion, in which the instructor teaches a variety of topics selected by the students and instructor. Topics may include sleep patterns, language and literacy, play, guidance and discipline, nutrition, and health and safety. In order to receive credit, students will complete an independent project/assignment appropriate to this course.

ECED 135
ADULT/CHILD: ONE YEAR OLD DEVELOPMENT – FALL
2 CR
Adults and children attend this course together in an instructional program that focuses on one year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 136
ADULT/CHILD: ONE YEAR OLD DEVELOPMENT – WINTER
2 CR
Adults and children attend this course together in an instructional program that focuses on one year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 137
ADULT/CHILD: ONE YEAR OLD DEVELOPMENT – SPRING
2 CR
Adults and children attend this course together in an instructional program that focuses on one year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 139
ADULT/CHILD: TWO YEAR OLD DEVELOPMENT – SUMMER
1 CR
Adults and children attend this course together in an instructional program that focuses on the development of a two-year old child. Developmentally appropriate activities are planned for adults and toddlers to do together in class. This course also incorporates a weekly adult discussion, in which the instructor teaches a variety of topics selected by the students and instructor. Topics may include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety. In order to receive credit, students will complete an independent project/assignment appropriate to this course.

ECED 140
ADULT/CHILD: TWO YEAR OLD DEVELOPMENT – FALL
2 CR
Adults and children attend this course together in an instructional program that focuses on two year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 141
ADULT/CHILD: TWO YEAR OLD DEVELOPMENT – WINTER
2 CR
Adults and children attend this course together in an instructional program that focuses on two year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 142
ADULT/CHILD: TWO YEAR OLD DEVELOPMENT – SPRING
2 CR
Adults and children attend this course together in an instructional program that focuses on two year old children’s development. Developmentally appropriate activities are planned for adults and toddlers to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 154
ADULT/CHILD: TODDLER & PRESCHOOLER DEVELOPMENT – SUMMER
1 CR
Adults and children attend this course together in an instructional program that focuses on early child development and caring for and teaching more than one child. Developmentally appropriate activities are planned for adults and children from birth to age five to do together in class. This course also incorporates a weekly adult discussion, in which the instructor teaches a variety of topics selected by the students and instructor. Topics may include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety. In order to receive credit, students will complete an independent project/assignment appropriate to this course.
ECED 155
ADULT/CHILD: TODDLER & PRESCHOOLER DEVELOPMENT – FALL 2 CR
Adults and children attend this course together in an instructional program that focuses on caring for and teaching more than one and children’s development. Developmentally appropriate activities are planned for adults and children from birth to age five to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 156
ADULT/CHILD: TODDLER & PRESCHOOLER DEVELOPMENT – WINTER 2 CR
Adults and children attend this course together in an instructional program that focuses on caring for and teaching more than one and children’s development. Developmentally appropriate activities are planned for adults and children from birth to age five to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 157
ADULT/CHILD: TODDLER & PRESCHOOLER DEVELOPMENT – SPRING 2 CR
Adults and children attend this course together in an instructional program that focuses on caring for and teaching more than one and children’s development. Developmentally appropriate activities are planned for adults and children from birth to age five to do together in class. Topics include child development, language and literacy, play, guidance and discipline, nutrition, and health and safety.

ECED 160
POSITIVE DISCIPLINE 1 CR
Positive Discipline is an interactive class for parents and teachers who want more cooperative, respectful, and joyful relationships with their children and students. Topics include ways to discipline (teach) with kindness and firmness at the same time, to help children achieve self-discipline and problem solving skills, to create an atmosphere of cooperation, and mutual respect in your home and classroom and to reduce power struggles.

ECED 161
RAISING TODDLERS AND PRESCHOOLERS 1 CR
Raising Toddlers and Preschoolers is an interactive class for parents & teachers to help develop skills to guide and encourage children as they grow. Topics include information on understanding young children and their behavior, building self-esteem, effective communication, cooperation, discipline techniques, and emotional and social development.

ECED 163
RAISING SCHOOL AGE CHILDREN 1 CR
Being an effective parent is one of the most challenging tasks in life—as well as one of the most rewarding. This course will provide a practical approach to improving parent-child relations for parents of children ages 6-11 years. Participants will learn more effective ways to relate to their child, methods of discipline that develop responsibility in the child, how not to reinforce their child’s unacceptable behaviors, and how to encourage cooperative behaviors.

ECED 167
RAISING TEENS 1 CR
The teen years are full of changes for both the adolescent and the parents. This class will explore the brain changes that are occurring that explain some teen behaviors and give strategies to create and maintain a mutually respectful, loving relationship between parents and their teen. Topics discussed will be decided by the group, but may include communication, respectful listening, sexuality, drug use, suicide prevention, bullying, rebellious behaviors, and positive relationships with peers. This class is also appropriate for teachers or other professionals working with teens.

ECED 170
LOVE & LOGIC FOR SUCCESSFUL PARENTING 2 CR
Based on the highly acclaimed Love and Logic philosophy developed by Jim Fay and Foster Cline, this class unlocks the secrets of successful parenting. Participants in this class will learn the specific “how-tos” of successful parenting, not just theoretical concepts. The online discussions and readings will provide parents with specific, tangible skills to use and a mind-set that allows parents to develop a loving relationship while setting limits and boundaries. Love and Logic is empowering to both parents and kids. In this class, you will learn to parent with empathy and logical consequences. Your children will learn to accept responsibility for their actions and come to understand the quality of their lives depends upon the quality of their thinking and their decision-making. Love and Logic principles can be applied for all ages of children. The class will share examples from toddlers to teens.

ECON& 201
MICRO ECONOMICS 5 CR
Introduction to microeconomics. Presents supply and demand models, consumers and producers choice in the competitive and non-competitive market. Examines the various economic decisions made by firms relating to price, demand, factors or production, and cost.
Prerequisite(s): Accuplacer College Level Math score of 75 or MATH 099 or AMATH 111 with a C or better.

ECON& 202
MACRO ECONOMICS 5 CR
Introduction to macroeconomics; elementary analysis of the determination of income through national income accounting. Covers macroeconomic issues including inflation, unemployment, economic growth, recessions, monetary/fiscal policy, and international trade and finance.
Prerequisite(s): ECON& 201 with a C or better.

ECON 310
MANAGERIAL ECONOMICS 5 CR
This course focuses on forecasting and estimating techniques; and on tools used to analyze projects, compare alternatives, and make sound business decisions based on economic principles such as time value of money, internal rate of return, and cost-benefit ratios. The course includes the use of Excel as a tool for analysis and decision making.
Prerequisite(s): Admission to BASOPS program or Admission to the BASET program or Instructor permission.

ACCUPLACER and CASAS tests for Reading, Writing, and Math have recently changed and scores are recorded differently. Please check with an Academic Advisor or with Transitional Studies staff for the correct placement in courses that have a prerequisite test score.

ELCN 100
TRADE SAFETY 2 CR
Course topics will include health and safety core rules, personal protective equipment, material safety data sheets, confined spaces, lock-out tag-out requirements, ladder safety, and portable power tools. Navigating the Washington State
Labor and Industries website will also be covered in the course. Students will identify and demonstrate essential safety habits as they relate to the electrical industry.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: ELCN 101, ELCN 103, ELCN 125, ELCN 131 and AMATH 100 all with a D or better, or concurrent enrollment in ELCN 101, ELCN 103, ELCN 125, ELCN 131 and AMATH 100, or Instructor permission.

Note: This class must be taken concurrently with ELCN 101, ELCN 103, ELCN 125, ELCN 131 and AMATH 100.

ELCN 101
DC CIRCUITS 4 CR
Will prepare the student with the knowledge and skills to diagnose and repair electrical circuits. Instruction emphasizes DC electrical theory, structure of matter, electron theory and Ohm’s law using interactive software, dynamic lecture and discussion. Students will apply basic algebra skills during this course.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; or Instructor permission.

Completion Of or Concurrent Enrollment In: ELCN 100, ELCN 103, ELCN 125, ELCN 131 and AMATH 100 all with a D or better, or concurrent enrollment in ELCN 100, ELCN 103, ELCN 125, ELCN 131 and AMATH 100; or Instructor permission.

Note: This class must be taken concurrently with ELCN 100, ELCN 103, ELCN 125, ELCN 131 and AMATH 100.

ELCN 102
AC CIRCUITS 3 CR
Prepares the electrician to diagnose and repair AC electrical circuits. Instruction emphasizes AC electrical theory, phase relationships with inductance, capacitance and resistance.

Prerequisite(s): ELCN 101 and AMATH 100.

ELCN 103
ELECTRICAL DRAWINGS & BLUEPRINTS 2 CR
This course will introduce students to the various types of electrical drawings including wiring, schematic, line, and specifications. A general overview of the construction sequence as it relates to other applicable trades, documents and schedules is also included in the course. Students will use computer based tutorial programs to generate scaled drawings and diagrams.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better, and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: ELCN 100, ELCN 101, ELCN 125, ELCN 131 and AMATH 100 all with a D or better, or concurrent enrollment in ELCN 100, ELCN 101, ELCN 125, ELCN 131 and AMATH 100, or Instructor permission.

Note: This class must be taken concurrently with ELCN 100, ELCN 101, ELCN 125, ELCN 131 and AMATH 100.

ELCN 104
GROUNDING & BONDING 2 CR
Standards, theory and application of grounding and bonding applied to electrical systems.

Prerequisite(s): ELCN 102 and ELCN 112.

Completion Of or Concurrent Enrollment In: ELCN 105 with a D or better or concurrent enrollment in ELCN 105, or Instructor permission.

Note: This class must be taken concurrently with ELCN 105.

ELCN 105
TRANSFORMERS, MOTORS & GENERATORS 4 CR
Theory and operation of rotating electrical machines and transformers.

Prerequisite(s): ELCN 102.

Completion Of or Concurrent Enrollment In: ELCN 104 with a D or better or concurrent enrollment in ELCN 104, or Instructor permission.

Note: This class must be taken concurrently with ELCN 104.

ELCN 112
INTRODUCTION TO NATIONAL ELECTRICAL CODE 4 CR
Wire, conduit, and box size requirements of the National Electrical Code. Beginning branch circuit calculations.

Prerequisite(s): ELCN 101.

ELCN 113
ADVANCED NEC CALCULATIONS 3 CR
National Electrical Code required calculations for occupancy loads, transformer and motor circuits, services, feeders and equipment rooms.

Prerequisite(s): ELCN 112.

ELCN 125
ELECTRICAL APPLIED MECHANICS 4 CR
This course introduces students to a variety of hand and power tools, fasteners, and other essential components an Electrician uses in the field on a daily basis. Students will utilize practical math skills to calculate the mechanical advantage when using simple and complex machines. Students will also utilize geometry and trigonometry to solve construction related scenarios.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; or Instructor permission.

Completion Of or Concurrent Enrollment In: ELCN 100, ELCN 101, ELCN 103, ELCN 131 and AMATH 100 all with a D or better, or concurrent enrollment in ELCN 100, ELCN 101, ELCN 103, ELCN 131 and AMATH 100; or Instructor permission.

Note: This class must be taken concurrently with ELCN 100, ELCN 101, ELCN 103, ELCN 131 and AMATH 100.

ELCN 131
DC CIRCUIT LAB 4 CR
Emphasizing DC Electrical theory and Ohm’s law, series and parallel circuits are analyzed with hands-on experiments and commonly used test equipment.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; or Instructor permission.

Completion Of or Concurrent Enrollment In: ELCN 100, ELCN 101, ELCN 103, ELCN 125 and AMATH 100 all with a D or better, or concurrent enrollment in ELCN 100, ELCN 101, ELCN 103, ELCN 125 and AMATH 100; or Instructor permission.

Note: This class must be taken concurrently with ELCN 100, ELCN 101, ELCN 103, ELCN 125 and AMATH 100.

ELCN 132
AC CIRCUIT LAB 3 CR
AC electrical theory is examined and verified with hands-on experiments utilizing standard test equipment.

Prerequisite(s): ELCN 102 and ELCN 131 or concurrent.

ELCN 142
RESIDENTIAL WIRING PROJECTS 6 CR
Project based lab. Student crews complete electrical construction projects including a model house wiring installation.

Prerequisite(s): ELCN 101, ELCN 103, ELCN 125 or concurrent.

ELCN 143
ELECTRICAL DISTRIBUTION 3 CR
Electrical lab installation of services, panelboards, switches, and feeders.

Prerequisite(s): ELCN 104, ELCN 105, ELCN 113 or concurrent.
ELCN 151  
COMMERCIAL WIRING METHODS & MATERIALS  5 CR  
Installation of basic commercial electrical components and systems to meet recognized industry standards utilizing appropriate tools, wiring methods and materials.  
Prerequisite(s): ELCN 103 & ELCN 142.

ELCN 201  
ELECTRONICS FOR ELECTRICIANS  2 CR  
Diagnose and repair of industrial control devices emphasizing electronic theory and industrial solid state devices.  
Prerequisite(s): ELCN 102 & ELCN 103.

ELCN 202  
MACHINE CONTROL FUNDAMENTALS  5 CR  
Preparing for fabrication, diagnose and repair of industrial control devices emphasizing motor control theory, system wiring and diagrams.  
Prerequisite(s): ELCN 104 & ELCN 105.

ELCN 203  
PLCS & VFDS  5 CR  
This course is an in depth study of programmable logic controllers including configuring hardware and software for controlling devices that drive industrial machinery.  
Prerequisite(s): ELCN 201, ELCN 202.

ELCN 214  
SPECIAL OCCUPANCIES, EQUIPMENT & CONDITIONS  3 CR  
Examine and locate the National Electrical Code requirements and limitations for specialized circumstances such as hazardous areas, health care, industrial locations, assembly areas, alternate energy sources, elevators and commercial specialty equipment.  
Prerequisite(s): ELCN 112.

ELCN 251  
COMMERCIAL & RENEWABLE ENERGY PROJECTS  5 CR  
Students will build projects utilizing a variety of standard commercial and institutional techniques.  

ELCN 261  
INDUSTRIAL CONTROL WIRING METHODS & MATERIALS  6 CR  
This course is a hand’s on lab exploring the design and build point of view with emphasis on the NEC requirements.  
Prerequisite(s): ELCN 103.

ELCN 262  
SPECIALTY INDUSTRIAL WIRING PROJECTS  5 CR  
This is an electrical construction lab class. Students will build projects utilizing a variety of standard industrial techniques.  
Prerequisite(s): ELCN 261.

ELCN 263  
AUTOMATED CONTROL PROJECTS  6 CR  
This is a hand’s on lab, integrating motor controls, programmable logic controllers, variable frequency drives and industrial wiring distribution.  
Prerequisite(s): ELCN 203 & ELCN 261 or concurrent.

ELCN 268  
RENEWABLE ELECTRICAL SOURCES  4 CR  
Explores new alternative electrical power sources from a design and build point of view with an emphasis on the NEC requirements.  

ELCN 281  
ELECTRICAL ESTIMATING & DESIGN  3 CR  
Designing and estimating material and labor costs for a variety of electrical projects using catalogs, the internet and estimating software.  
Prerequisite(s): ELCN 103.

EMERGENCY MEDICAL SERVICES

EMS 121  
EMT I: FUNDAMENTALS OF EMERGENCY CARE  4 CR  
This course, first in a 3-course series, covers the basic structure of EMS, and the fundamentals of emergency patient care. Topics include: EMS systems, workplace safety and wellness, anatomy and physiology, medical terminology, vital signs, airway management and patient assessment.  
Prerequisite(s): Special Permission.

EMS 122  
EMT II: MEDICAL DISORDERS AND EMERGENCIES  4 CR  
This is the second course in the EMT series, and covers the common medical conditions, emergencies, and field treatment for acutely ill patients by EMS responders. Topics include: cardiovascular, respiratory, neurologic, psychiatric, endocrine and other non-traumatic medical emergencies.  
Prerequisite(s): EMS 121.

EMS 123  
EMT III: TRAUMATIC EMERGENCIES AND SPECIAL CIRCUMSTANCES  4 CR  
In the third and final course in the EMT series, the student will learn how to deal with injuries caused in traumatic accidents, emergencies in special patient populations, such as pregnancy, neonates and pediatrics, and geriatrics. Students will also learn about other specialized EMS Operations, to include: emergency vehicle safe driving practices, incident management, interfacing with Advanced Life Support, and disaster response. A cumulative capstone written and practical skills exam will be given at course/series completion.  
Prerequisite(s): EMS 122.

ENGINEERING TECHNOLOGY

AMAT 312  
APPLIED LINEAR ALGEBRA  3-5 CR  
This course presents the fundamental concepts and applications of linear algebra with emphasis on developing structured algorithms and numerical solutions to problems in engineering and science. Topics include systems of linear equations, linear transformations, matrix operations, vector spaces, eigenvalues and eigenvectors, and determinants. Examples may be drawn from areas such as electrical engineering, process optimization, and statistics.  
Prerequisite(s): MATH& 142 with a C+ or higher and BASET Program Admission or Instructor permission.

AMAT 313  
TECHNICAL CALCULUS  3-5 CR  
This course is designed to develop the topics of differential and integral calculus with the aim of improving student intuition and skill sets associated with advanced engineering problem solving. Emphasis is placed on limits, continuity, derivatives, and integrals of algebraic and transcendental functions of one variable. Additional topics include multivariable functions, vector calculus, and evaluation methods. Examples may be drawn from areas such as structural engineering, mechanics of materials, and electrical engineering.  
Prerequisite(s): MATH& 142 with a C+ or higher and BASET Program Admission or Instructor permission.

AMAT 314  
APPLIED DIFFERENTIAL EQUATIONS  3-5 CR  
This course is a survey of important applications and solution methods for differential equations, both linear and non-linear, related to engineering technology. Topics include the study of systems of ordinary differential equations using eigenvectors and eigenvalues, numerical solutions of first- and second-order equations and systems of equations, initial value problems, Laplace Transformations, separation of variables, and the solution of elementary partial differential equations using Fourier series. Emphasis will be placed on examples including structural analysis, material properties, vibrations, and fluid dynamics.  
Prerequisite(s): MATH& 152 with a C or higher and AMAT 313 with a C or higher, and BASET Program Admission or Instructor permission.
AMAT 316
NUMERICAL METHODS FOR TECHNOLOGISTS 3-5 CR
A study and analysis of important numerical and computational methods for solving engineering and scientific problems. This course will include methods for solving linear and nonlinear equations, polynomial interpolation and extrapolation, evaluating integrals, solving ordinary differential equations, and determining eigenvalues and eigenvectors of matrices. The student will be required to write and run computer programs using contemporary languages. Examples will be drawn from a variety of engineering fields and disciplines, including an emphasis on mass and energy balance, fluid mechanics, and heat transfer.
Prerequisite(s): MATH& 152 with a C or higher or AMAT 313 with a C or higher, and BASET Program Admission or Instructor permission.

AMAT 490
STATISTICAL METHODS FOR TECHNOLOGISTS 3-5 CR
This course covers the role of statistics in engineering and emphasizes the application of statistical techniques and concepts to maximize the amount and quality of information resulting from analysis of process data. Course topics include descriptive statistics, probability theory, probability distributions, confidence intervals, hypothesis testing, linear regression, ANOVA, design of experiments, and collection and handling of data. The student will be required to write and run computer programs using contemporary languages.
Prerequisite(s): MATH& 142 with a C+ or higher and BASET Program Admission or Instructor permission.

CENG 101
ENERGY & SOCIETY 3 CR
Modern society is completely dependent on vast amounts of cheap energy, but the costs are high. Will we have enough usable energy for a planet of nine billion people? How do our choices in energy production impact the global and local environment? We will address these and other questions concerning human energy use and work to understand the science, technology, and policy of energy use in the 21st century.

CENG 201
ENERGY POLITICS AND POLICY 5 CR
This course will allow students to understand the history of energy policy within the US; gain an understanding of the major actors in energy policy; and explore the implications for energy policy from local to global levels. A specific focus will be placed on energy issues as they pertain to the Pacific Northwest.
Prerequisite(s): CENG 101 with a C or better.

CENG 220
ENERGY GENERATION AND CONSERVATION 5 CR
This course introduces the engineering and technical aspects of renewable energy systems. It emphasizes basic generation and conservation technologies of renewable energy generation systems. Topics include heat transfer, power, thermodynamics, energy storage, energy conversion.
Prerequisite(s): CENG 101 with a C or better.

CET 102
FUNDAMENTALS OF SURVEYING I 5 CR
Emphasis is placed on familiarization with the different types of surveys and their purpose and teaches the student to be able to differentiate between “accuracy” and “precision.” It teaches the student to measure distances in a vertical direction and relate these measurements to a datum plane or elevation from sea level. Course also teaches the student how to calculate directions from known points to find or establish other points and will enable the student to gain necessary skills in operating surveying instruments.
Prerequisite(s): MATH 098 with a C or higher or Instructor permission.
Completion Of or Concurrent Enrollment In: CET 102 with a C or higher or concurrent enrollment in CET 104, or Instructor permission.

CET 103
FUNDAMENTALS OF SURVEYING II 5 CR
Emphasis on field work with the Total Station and Digital Level. A traverse will be run and adjusted and a topo made of the enclosed ground. Students will learn stakeout procedures for a variety of construction projects. In addition, the students will develop techniques to help the student learn to use horizontal and vertical curves in the field and office to join tangent lines.
Prerequisite(s): CET 102 and ENGT 134, both with a C or higher, or Instructor permission.

CET 110
CONSTRUCTION AND HIGHWAY SURVEYS 5 CR
Calculations for horizontal and vertical alignments will be emphasized. Determining cut and fill values for establishing final elevations for construction projects, as well as marking of survey stakes to communicate location and elevation information to construction workers will be covered. Students will learn stakeout procedures for a variety of construction projects. In addition, the students will develop techniques to help the student learn to use horizontal and vertical curves in the field and office to join tangent lines.
Prerequisite(s): ENGT 134 and CET 102, both with a C or higher, or Instructor permission.

CET 141
FUNDAMENTALS OF GIS & GPS 5 CR
Students will be introduced to the Global Navigation Satellite System (GNSS) for navigation and surveying purposes. The course will begin to cover desktop mapping, focusing on the use of ArcView software in Geographic Information Systems applications. The basics of map creation and presentation will be covered.
Prerequisite(s): MATH 098 with a C or higher or Instructor permission.
Completion Of or Concurrent Enrollment In: CET 102 with a C or higher or concurrent enrollment in CET 102, or Instructor permission.

CET 142
INTERMEDIATE GIS 5 CR
Students will continue working with ArcGIS software, focusing on map creation, data display, data editing, and use of attribute information contained within the data to symbolize and extract specific information from a data set. Data analysis will be covered, with emphasis on using spatial relationships between different data sets, as well as performing overlay functions to analyze data interactions.
Prerequisite(s): ENGT 134 and CET 141, both with a C or higher.

CET 143
ADVANCED GIS APPLICATIONS 5 CR
An advanced course in desktop mapping focusing on the use of the extensions in Geographic Information Systems applications. Data analysis will be emphasized in this course.
Prerequisite(s): CET 142 with a C or higher.

CET 205
SURVEY OF PUBLIC LANDS 5 CR
This course will cover the basics of the Public Land Survey System (PLSS), when to use different reconstruction methods, and the correct techniques to determine information described on original survey data for the Public Lands.
Prerequisite(s): CET 102 with a C or better.

CET 210
BOUNDARY LAW & LAND DESCRIPTION 5 CR
Explores the importance of various laws dealing with the survey of land boundaries, and the State and Federal laws about ownership and title.
Prerequisite(s): CET 103 with a C or better.

CET 215
ENVIRONMENTAL MAPPING 5 CR
Coursework includes current industry mapping techniques and equipment as it relates to environmental issues such as wetlands mapping and habitat restoration.
Prerequisite(s): ENGT 134 and CET 102 with a C or better.

CET 220
GPS SYSTEMS 5 CR
Students will collect static GPS data with the available GPS receivers, and process those data using the National Geodetic Survey’s Online Positioning Users’ Service. Students will collect, download, and create maps using available GPS receivers and data collectors.
Prerequisite(s): CET 215 with a C or higher.
ADVANCED SURVEY SEMINAR  5 CR
Offers opportunities for the second year student to study advanced techniques in GPS, GIS, Data Collection, Research, and Surveying/Mapping Software. The structure is self-motivated and supports transition from college structure to jobs in the Surveying and Mapping profession.
Prerequisite(s): CET 215 with a C or higher.

ESTIMATING AND SCHEDULING  5 CR
An introduction to the construction process, project scheduling, and estimation of concrete, rebar, and earthwork quantities.
Prerequisite(s): AMATH 111 with a C or higher.

CONSTRUCTION MATERIALS  5 CR
An introduction to the practices and procedures for the testing and placement of construction materials. This course covers basic steel stress, strain and thermal expansion. In depth coverage for testing and placing: soil, aggregate, asphalt and concrete. Also, included are standard inspection practices and construction documentation during and after the construction of sewers, water, storm, and roadway civil improvements.
Prerequisite(s): AMATH 111 with a C or higher.

EARTHMoving FUNDAMENTALS  5 CR
An introduction to earthmoving production fundamentals of construction equipment. The production of heavy equipment, including excavators, scrapers, trucks, bulldozers, and front end loaders is examined from a production perspective. In addition, earthwork conversions to and from loose cubic yards, bank cubic yards, and compacted cubic yards is introduced.
Prerequisite(s): AMATH 111 with a C or higher.

AUTOCAD CIVIL 3D I  5 CR
Study and use of the Civil Engineering and Survey industry-specific CAD software for computer-aided drafting. Focuses on land development and survey applications with AutoCAD on Civil/Survey specific software applications.
Prerequisite(s): ENGT 134 with a C or better or Instructor permission.

AUTOCAD CIVIL 3D II  5 CR
Study and use of the Civil Engineering and Survey industry specific CAD software for computer-aided drafting. Focuses on roadway and infrastructure design with AutoCAD on Civil/Survey specific software applications.
Prerequisite(s): CET 251 with a C or better.

SURVEY OF COMPOSITES  2 CR
This course provides an introduction to the field of Composites Technologies, and provides an overview of workplace readiness skills.

COMPOSITES DESIGN & FABRICATION I  5 CR
Students are introduced to composite design and fabrication using clean-room and post-cure fabrication tools. The purpose of this course is to provide an introduction to hands-on composite fabrication. Within this course, students will gain experience designing and fabricating composite parts utilizing vacuum infusion, closed cavity pressure forming, and pre-preg technologies.
Prerequisite(s): COMP 101 with a C or better; and Accuplacer Algebra score of 75 or MATH 098 with a C or better; and Accuplacer Reading Comprehension score of 71 or RDG 085 with a C or better; and Accuplacer Sentence Skills score of 71 or ENGL 092 with a C or better; and completion of or concurrent enrollment in ENGR 115; or Instructor permission.

COMPOSITES DESIGN & FABRICATION II  5 CR
Students will combine knowledge of advanced composite materials, fabrication methods, design intent, and material testing methods. Students will gain experience in CAD/CAM stress analysis, then perform destructive strength tests and analyze deformation mechanics. Students will build composite parts per Detailed Engineering Drawings as well as design and fabricate original composite product.
Prerequisite(s): COMP 121 with a C or better; and completion of or co-enrollment in ENGR 180 or ENGT 233 with a C or better.

INSPECT, TEST & REPAIR  5 CR
Students will expand on their knowledge of advanced composite materials to include non-destructive inspection (NDI), destructive testing, repair methods, and metrology inspection. Students will also gain experience with 6-Sigma statistical analysis and other lean manufacturing and quality assurance methodology.
Prerequisite(s): COMP 222 with a C or better.

TOOL DESIGN  5 CR
Students apply composite tool design theory. Students will gain experience with design and fabrication composite tools including bladder molds and splash molds. In addition, students will expand on their experience in CNC programming and CNC machining.
Prerequisite(s): COMP 235 with a C or better.

DIRECT CURRENT  5 CR
An introduction to the fundamental properties and applications of electricity. This course covers the basic principles of DC electronics such as; voltage, current and resistance, Ohm's law, Joule's law, Kirchhoff's voltage and current laws, passive devices included resistors, capacitors, and inductors, circuit applications included maximum power transfer, superposition, Thevenin and Norton theorems. An introduction to magnetism which covers; magnetic fields, flux, density, permeability, retentivity, reluctance, and hysteresis. Students also learn how solder and understand the lab safety protocol.
Completion Of or Concurrent Enrollment in: MATH & 141 with a C or better.

ALTERNATING CURRENT  5 CR
An introduction and examination of the principles and applications of alternating current. Topics include period, frequency, phase angle, reactance, impedance, resonance, peak and rms values, resistive, apparent, reactance power, and power factor. Students continue their exploration of AC with transformers and filter circuits (low-pass, high-pass, band-stop and band-pass). Practical labs and project help the students understand circuit constructions and troubleshooting techniques.
Prerequisite(s): ENET 100 with C or better.

SEMI-CONDUCTORS  5 CR
This course introduces semiconductor discrete components such as; diodes, bipolar transistors, FETS, MOSFET, SCR, diacs, triacs, and UJT. Circuit applications include; switching, amplifiers, oscillators, and power supply circuits. Practical labs and project help the students understand circuit constructions and troubleshooting techniques.
Prerequisite(s): ENET 120 with a C or better.

OPERATIONAL AMPLIFIER  5 CR
This course introduces the basic concepts of an operational amplifiers. Topics include; different configurations such as; comparator, differential amplifier, open and close loop feedback, CMR and CMRR, inverting and non-inverting, voltage/current converter, summer circuit, instrumentation amplifier, precision rectifier, and active filters. Practical labs and project help the students understand circuit constructions and troubleshooting techniques.
Prerequisite(s): ENET 130 with a C or better.
ENET 160
ELECTRONIC COMMUNICATION  5 CR
This course introduces the fundamentals and applications of AM/FM modulation and transmitters/Receiver circuits. Digital communication techniques, transmission of binary data, and transmission lines. Also introduce Networking and Local-Area networks, and internet technologies. Practical labs and project help the students understand communication circuits and troubleshooting techniques.
Prerequisite(s): ENET 150 and MATH& 141 with a C or better; or Instructor permission.

ENET 264
EMERGING TECHNOLOGY  5 CR
This course is designed to keep students current with technology. Currently this course is an introduction to solar technology, nano-technology, and fuel cell (PEM) technologies. Students will learn the characteristics and the efficiency of the solar and PEM fuel cell. Emphasis on clean energies and application. This course will change as new emerging technologies move to the forefront. Practical labs and project help the students put theories into action and learn troubleshooting techniques.
Prerequisite(s): ENET 150 and MATH& 142 with a C or better; or Instructor permission.

ENET 282
CERTIFIED ELECTRONICS TECHNICIAN TEST PREP  3 CR
This course prepares students for the nationally recognized Certified Electronics Technician (CET) test.

ENGR 100
ENGINEERING ORIENTATION  2 CR
This course explores engineering and technology through class discussion, hands-on activities, and presentations by guest speakers. Topics include engineering disciplines, degree and transfer options, career opportunities, academic success strategies, and planning your program of study.

ENGR& 114
FUNDAMENTALS OF ENGINEERING GRAPHICS & CAD  5 CR
Methods of depicting three-dimensional objects and communicating design information. Emphasis is on using parametric solid modeling software as a design tool and using freehand sketching to develop visualization skills.
Prerequisite(s): ACCUPLACER Arithmetic score of 50 or MATH 090 or ABE 050 with a C or better; and ACCUPLACER Reading Comp score of 71 or RDG 085 with C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with C or better.

ENGR 115
GRAPHICS  5 CR
This course is an introduction to the use of graphical techniques and standard practices used to communicate engineering design information. Students will learn graphics techniques, visualization skills, standards for object views and drawing sizes, orthographic projection, section views, proper dimensioning techniques, and tolerances. Freehand sketching is used to develop visualization skills and as an instrument for design conceptualization and communication.
Prerequisite(s): Accuplacer Arithmetic score of 50 or a C grade or better in MATH 090 or ABE 050 with a C or better; and Accuplacer Reading Comprehension score of 71 or RDG 085 with C or better; and Accuplacer Sentence Skills score of 71 or ENGL 092 with C or better.

ENGR 171
INNOVATION LAB I  2 CR
This is the first course in a year-long Innovation Lab sequence. In this course, students engage as members of an interdisciplinary project team exploring a novel problem for which an innovation in science, technology, design, business, artistic expression, etc., could be significant for working toward a resolution of the problem. Problems may be proposed by students or by faculty mentors, or derived from external sources.
Prerequisite(s): Instructor permission.

ENGR 172
INNOVATION LAB II  2 CR
This is the second course in a year-long Innovation Lab sequence. In this course, students engage as members of an interdisciplinary project team exploring a novel problem for which an innovation in science, technology, design, business, artistic expression, etc., could be significant for working toward a resolution of the problem. Problems may be proposed by students or by faculty mentors, or derived from external sources.
Prerequisite(s): Instructor permission.

ENGR 173
INNOVATION LAB III  2 CR
This is the third course in a year-long Innovation Lab sequence. In this course, students engage as members of an interdisciplinary project team exploring a novel problem for which an innovation in science, technology, design, business, artistic expression, etc., could be significant for working toward a resolution of the problem. Problems may be proposed by students or by faculty mentors, or derived from external sources.
Prerequisite(s): ENGR 115 with a C or better; and completion of or concurrent enrollment in ENGT 135 with a C or better.

ENGR 180
PARAMETRIC MODELING  5 CR
This course is an introduction to 3D CAD (computer-aided design) with an emphasis on parametric solid modeling applications and usage. Topics include methods for creating solid model components, joining components to form assemblies, and generation of 2D manufacturing drawings from 3D solid models.
Prerequisite(s): ENGR 115 with a C or better; or MACH 102 with a C or better.

ENGR& 214
ENGINEERING STATICS  5 CR
Engineering Statics introduces students to the mechanics of rigid bodies in static equilibrium. Students will solve practical engineering problems involving the loads carried by structural components using vector analysis (both 2D and 3D) applied to rigid body systems and sub-systems. Content includes static equilibrium, force and moment resultants, free body diagrams, distributed loads, trusses, frames and machines, internal forces, shear and moment diagrams, and friction.
Prerequisite(s): MATH& 151 and PHYS& 221 with a C or better.

ENGR 270
INTRODUCTION TO MATERIALS SCIENCE  5 CR
An introduction to Materials Science that includes the atomic, molecular, and crystalline structures of materials and their relationship to electrical, mechanical, thermal, and chemical properties, as well as an introduction to materials processing and fabrication techniques.
Prerequisite(s): MATH& 151 and CHEM& 161 with a C or better.

ENGT 134
ENGINEERING ORIENTATION  2 CR
This is the first course in a year-long Innovation Lab sequence. In this course, students engage as members of an interdisciplinary project team exploring a novel problem for which an innovation in science, technology, design, business, artistic expression, etc., could be significant for working toward a resolution of the problem. Problems may be proposed by students or by faculty mentors, or derived from external sources.
Prerequisite(s): Instructor permission.

ENGT 135
INNOVATION LAB I  2 CR
This is the first course in a year-long Innovation Lab sequence. In this course, students engage as members of an interdisciplinary project team exploring a novel problem for which an innovation in science, technology, design, business, artistic expression, etc., could be significant for working toward a resolution of the problem. Problems may be proposed by students or by faculty mentors, or derived from external sources.
Prerequisite(s): Instructor permission.

ENGT 136
INNOVATION LAB II  2 CR
This is the second course in a year-long Innovation Lab sequence. In this course, students engage as members of an interdisciplinary project team exploring a novel problem for which an innovation in science, technology, design, business, artistic expression, etc., could be significant for working toward a resolution of the problem. Problems may be proposed by students or by faculty mentors, or derived from external sources.
Prerequisite(s): Instructor permission.

ENGT 137
INNOVATION LAB III  2 CR
This is the third course in a year-long Innovation Lab sequence. In this course, students engage as members of an interdisciplinary project team exploring a novel problem for which an innovation in science, technology, design, business, artistic expression, etc., could be significant for working toward a resolution of the problem. Problems may be proposed by students or by faculty mentors, or derived from external sources.
Prerequisite(s): ENGT 135 with a C or better; and completion of or concurrent enrollment in ENGT 135 with a C or better.
ENGT 132
ENGINEERING APPLICATIONS USING MS OFFICE 5 CR
The course focuses on applied projects to exercise higher-level spreadsheet and word processing skills. Projects include utilization of mathematical and logical functions on multiple linked sheets, document formatting and headers/footers, charting and drawing tools, and toolbar customization and custom button macros. A basic understanding of computer use is recommended.
Prerequisite(s): AMATH 111 with a C or higher.

ENGT 134
AUTOCAD I 5 CR
This course is an introduction to CAD (Computer Aided Drafting), utilizing a "cookbook" approach to instruction. Students have immediate hands-on computer usage while applying basic command concepts and terminology. Basic drawing and editing techniques are reinforced with exercises designed to help the student reach an in-depth understanding.

ENGT 135
AUTOCAD II 5 CR
This course is a continuation of AutoCAD I and utilizes intermediate drawing and editing tools. Coursework includes generating and editing dimensions and tolerances in CAD, methods for creating isometric drawings, and techniques for creating attributed blocks, creation of table, and the applications and procedures for using external references.
Prerequisite(s): ENGR 115 and ENGT 134 with a C or better.

ENGT 208
CAD PROJECT 3D 5 CR
This is a project oriented design course in which students create a 3D solid model of an existing assembly or one of their own design. Each student will generate a complete working drawing set for their assembly including engineering details and assembly drawings in accordance with industry standards. A portfolio including preliminary sketches, detail drawings, and assembly drawings will be submitted.
Prerequisite(s): ENGR 180 with a C or better; and completion of or concurrent enrollment in ENGT 116 with a C or better.

ENGT 215
APPLIED STATICS 5 CR
This course is an introduction to engineering mechanics, focusing on the analysis of "static" (non-moving) structures. Students will use statics concepts to determine the external reaction loads and internal member forces for trusses, frames, and machines.
Prerequisite(s): MATH& 142 with a C or better (Acceptable substitute: AMATH 111 with a C or better and CET 102 with a C or better).

ENGT 216
APPLIED MECHANICS OF MATERIALS 5 CR
This course explores the effect of forces on engineering structures and the resulting internal stresses and deformations that develop. Students will apply statics and strength of materials concepts to determine size, shape, and material requirements for engineering components. Topics include an introduction to stress and strain, physical characteristics of components (size and shape), mechanical properties of engineering materials (strength, stiffness, etc.), and materials testing and composition.
Prerequisite(s): ENGT 215 with a C or better.

ENGT 222
ADVANCED PARAMETRIC MODELING 5 CR
This course is a continuation of Parametric Modeling. Topics include more advanced methods for the creation of parts, assemblies, and 2D manufacturing drawings.
Prerequisite(s): ENGR 180 with a C or better.

ENGT 224
PROCESS PIPING DESIGN 5 CR
This course provides an introductory overview of process pipe drafting and design. It covers various topics including: piping concepts/terminology, pipe and fitting specifications, piping symbol representation, valves and instrumentation, process piping equipment. Students will utilize AutoCAD Plant 3D software to create flow diagrams and 3D design models from piping specifications according to industry standards. The 3D design models will be used to generate a variety of standard pipe drawings including plans/elevations, isometrics, spool drawings.
Prerequisite(s): ENGT 116 and ENGT 135 with a C or better.

ENGT 233
INTRO TO CATIA 5 CR
This course is an introduction to solid modeling using CATIA V5 CAD (computer aided design) software. Topics include methods for creating solid model components, joining components to form assemblies, and generating 2D manufacturing drawings from 3D solid models.
Prerequisite(s): ENGR 115 with a C or better.

ENGT 250
CAPSTONE PROJECT 5 CR
This is a project oriented design course in which students draw on skills developed throughout the program to complete an instructor selected project. Topics are chosen based on real world significance, relevance and breadth of the skill set required, and available on-campus project opportunities. Projects may be individual or group based and typically involve several or all of the following completion tasks; 2D CAD drafting, 3D solid modeling, statics analysis of structural loads, sizing of members based on strength of materials, geometric and trigonometric calculations, data exchange, etc.
Prerequisite(s): ENGR 180 and ENGT 116 and ENGT 135 with a C or better.

ENGT 295
FIELD-BASED EXPERIENCE 3-6 CR
This course provides students with industry job experience in a college approved professional setting, allowing students to apply first year curriculum skills and engineering knowledge to engineering and design activities in a variety of organizations. May be repeated for credit.
Prerequisite(s): Instructor permission.

ENGT 301
INTERDISCIPLINARY LAB I 3 CR
This year-long course sequence introduces engineering technology students to the tools needed for advanced project development courses through experiential learning and hands-on opportunities to conduct experiments, take relevant measurements, analyze real-world data, design systems, and to make and test prototypes of their designs. An introduction to engineering disciplines, problem solving, design, teamwork, and communication will be emphasized.
Prerequisite(s): ENGL& 101, MATH& 142, and PHYS& 114 all with a C+ or higher; and ENGR& 114 or ENGR 180 or Instructor permission with a C+ or higher; and BASET Program Admission or Instructor permission.

ENGT 302
INTERDISCIPLINARY LAB II 3 CR
This year-long course sequence introduces engineering technology students to the tools needed for advanced project development courses through experiential learning and hands-on opportunities to conduct experiments, take relevant measurements, analyze real-world data, design systems, and to make and test prototypes of their designs. An introduction to the engineering design process, teamwork development, ethics, professionalism, and reporting will be emphasized.
Prerequisite(s): ENGT 301, ENGT 311, both with a C or higher.

ENGT 303
INTERDISCIPLINARY LAB III 3 CR
This year-long course sequence introduces engineering technology students to the tools needed for advanced project development courses through experiential learning and hands-on opportunities to conduct experiments, take relevant measurements, analyze real-world data, design systems, and to make and test prototypes of their designs. An introduction to management aspects of the engineering profession, project management, prioritization of resources, organization, and management of technical design projects will be emphasized.
Prerequisite(s): ENGT 302, ENGT 321, both with a C or higher.
ENGT 311  
 **FUNDAMENTAL PRINCIPLES OF MANUFACTURING PROCESSES**  3 CR  
 This course is designed to provide a survey of modern manufacturing equipment and processes used for converting raw materials to finished products, including various methods of machining, casting and forming. An introduction to composite manufacturing and other innovative processes is included. Lean and agile manufacturing techniques are emphasized.  
 Prerequisite(s): ENGL& 101, MATH& 142, PHYS& 114, all with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 312  
 **APPLIED ELECTRICITY AND ELECTRONICS**  5 CR  
 This course covers the fundamental principles of electricity and electronics including electric circuit theory, the nature of electricity, electronic instrumentation and measurement systems, signals, sensors, and transformations. Topics include alternating current (AC) and direct current (DC) components, circuit analysis techniques, semiconductors, electromagnetism, sources, energy conversion, microcontrollers, and electrical instruments.  
 Prerequisite(s): MATH& 152 with a C or higher, and PHYS& 114 with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 313  
 **APPLIED STATICS**  5 CR  
 This course examines the principle forces, moments, resultant & static equilibrium of force systems, center of gravity, friction, and free body diagram analysis. Problem disentanglement, setup, and development of solution paths are emphasized. Additional topics may also cover the concepts of stress and strain, shear, bending moments, torsion, bending stresses in beams and stress resolution and shear.  
 Prerequisite(s): MATH& 142, PHYS& 114, both with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 314  
 **APPLIED STATICS AND STRENGTH OF MATERIALS**  5 CR  
 The first section of this course develops the fundamental concepts of mechanics, forces, vectors and resultants, moments and couples, equilibrium, structures and members, friction, centroids and center of gravity and moments of inertia, utilizing calculus. The second section of this course develops materials specific concepts related to stress and strain, shear and moment diagrams, stresses and deformations of beams, torsion, combined loading and principal stresses, elastic curves, superposition, and design of beams and columns.  
 Prerequisite(s): MATH& 152 with a C or higher and PHYS& 114 with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 316  
 **APPLIED FLUID MECHANICS AND HEAT TRANSFER**  5 CR  
 This course explores the fundamental concepts of fluid mechanics and heat transfer and their applications in engineering. Fluid mechanics and heat transfer are key to the understanding and improvement of mechanical systems. Topics include analysis of static fluid bodies, fluid dynamics, the effects of viscous and thermal boundary layers, fluid conservation equations, fluid flow through piping systems and external flow analysis, the concept of boundary layer behavior to heat transfer, conduction and convection, the design of heat exchangers, and introduction to process thermodynamics.  
 Prerequisite(s): MATH& 152 with a C or higher and PHYS& 114, both with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 319  
 **PROGRAMMING FOR TECHNOLOGISTS**  3 CR  
 This course introduces concepts and techniques for creating computational solutions to problems in engineering and science. The essentials of computer programming are developed using contemporary languages, with the goal of enabling the student to use the computer effectively in subsequent courses. Programming topics include problem decomposition, control structures, recursion, arrays and other data structures, file I/O, graphics, and code libraries. Examples will be drawn from relevant engineering fields and may include, root finding, matrix operations, searching and sorting, simulation, and data analysis. “Best practices” programming style and computational efficiency are emphasized.  
 Prerequisite(s): MATH& 142, PHYS& 114, both with a C+ or higher, and BASET program admission or Instructor permission.

ENGT 321  
 **APPLIED SYSTEMS ENGINEERING**  3 CR  
 This course provides a general introduction to systems engineering. Topics include stakeholder analysis, requirements definition, system architecture and concept generation, trade-space exploration and concept selection, design definition and optimization, system integration and interface management, system safety, verification and validation, and commissioning and operations. Additional topics include the trade-offs between performance, lifecycle cost and system operability.  
 Prerequisite(s): ENGL& 101, MATH& 142 and PHYS& 114, all with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 350  
 **INTRODUCTION TO PROCESS ENGINEERING**  3 CR  
 This course introduces process engineering and, predominately through example, some of the key basic principles that define the discipline. Three main areas of process engineering are introduced - material & energy balances, heat transfer, and fluid mechanics. The course is delivered through a combination of lectures, tutorials, self-directed learning and small group discovery.  
 Prerequisite(s): MATH& 152 with a C or higher, and PHYS& 114 and CHEM& 161, both with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 352  
 **PROCESS SAFETY**  5 CR  
 The main focus of this course is to cover the broad scope of process safety engineering. An emphasis is placed on how process safety engineering fits into the broader context of risk management and process safety management. Examples will be drawn from a variety of manufacturing industries and production facilities. Topics covered may include, risk analysis, inherently safer design, process hazards analysis, historical incident databases, equipment layout and spacing, monitoring and control, safety instrumented systems, and fire and explosion principles.  
 Prerequisite(s): ENGT 311 with a C or higher or Instructor permission.

ENGT 395  
 **FIELD-BASED EXPERIENCE/INTERNSHIP**  2-5 CR  
 Engineering internships are not required but serve as a critical experience for students to apply classroom learning to real world experiences and potentially help them to secure full-time positions upon graduation. The aim of this course is to enable students to gain skills needed to negotiate, plan, undertake and communicate the results of an engineering project while working in an industry placement. The project topic will be based on the needs of the industry. The project will be completed under the supervision of an industry professional (preferably with a degree in Engineering, Engineering Technology, or closely related field). The course requires placement of the student in an industry or research internship. Variable credit can be earned for periods of 3-12 weeks of full-time equivalence.  
 Prerequisite(s): ENGT 303, ENGT 321, both with a C or higher, or Instructor permission.

ENGT 399  
 **SPECIAL PROBLEMS**  2-5 CR  
 This course is designed as an individual research or design project directly related to engineering technology and carried out under the supervision of a member of the Bellingham Technical College faculty. Students enrolling this course will be required to carry out preliminary reading and complete a scope of work that includes deliverables during the first two weeks of the quarter. Students are expected to manage all aspects of their individual project from conceptualization through the planning phase and to the ultimate achievement of the deliverables. A written report and oral presentation will be required for completion of the project.  
 Prerequisite(s): ENGL& 101, MATH& 142, PHYS& 114, all with a C+ or higher, and BASET Program Admission or Instructor permission.
ENGT 441
APPLIED PROCESS CONTROL  5 CR
This course introduces instrumentation and control systems including analog, digital, and programmable controllers used in both open- and closed-loop control systems. Applications of the different types of control systems along with sensors, transducers, and final correcting devices are studied.
Prerequisite(s): ENGT 350 with a C or higher or Instructor permission.

ENGT 465
APPLIED ENVIRONMENTAL ENGINEERING  5 CR
This course develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems. Includes a laboratory component.
Prerequisite(s): ENGT 350 with a C or higher or Instructor permission.

ENGT 481
SPECIAL TOPICS IN ENGINEERING TECHNOLOGY I  2-5 CR
A special topics Engineering Technology course in lieu of or supplementary to a 300- or 400-level course as arranged by a Bellingham Technical College faculty member. The course must be approved by the BASET Program Lead in advance of the quarter in which it will be offered. No more than two such courses may be used in satisfaction of requirements of the program electives.
Prerequisite(s): ENGL & 101, MATH& 142, PHYS& 114, all with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 482
SPECIAL TOPICS IN ENGINEERING TECHNOLOGY II  2-5 CR
A special topics Engineering Technology course in lieu of or supplementary to a 300- or 400-level course as arranged by a Bellingham Technical College faculty member. The course must be approved by the BASET Program Lead in advance of the quarter in which it will be offered. No more than two such courses may be used in satisfaction of requirements of the program electives.
Prerequisite(s): ENGL & 101, MATH& 142, PHYS& 114, all with a C+ or higher, and BASET Program Admission or Instructor permission.

ENGT 490
ENGINEERING TECHNOLOGY CAPSTONE I  5 CR
This three-course sequence will provide students a team-based project experience to address a real-world design challenge. Student-teams will work in close collaboration with the project client to design a new system or process, or redesign an existing one, by integrating and applying appropriate engineering knowledge, methodologies and tools for problem definition and analysis; idea generation; solution development, evaluation and justification; and implementation planning and impact assessment. Project selection, timeline development, and systems management will be emphasized.
Prerequisite(s): ENGT 313, ENGT 314, both with a C or higher.

ENGT 491
ENGINEERING TECHNOLOGY CAPSTONE II  5 CR
This three-course sequence will provide students a team-based project experience to address a real-world design challenge. Student-teams will work in close collaboration with the project client to design a new system or process, or redesign an existing one, by integrating and applying appropriate engineering knowledge, methodologies and tools for problem definition and analysis; idea generation; solution development, evaluation and justification; and implementation planning and impact assessment. Designing and building a functional prototype will be emphasized.
Prerequisite(s): ENGT 303, ENGT 350, both with a C or higher.

ENGT 492
ENGINEERING TECHNOLOGY CAPSTONE III  5 CR
This three-course sequence will provide students a team-based project experience to address a real-world design challenge. Student-teams will work in close collaboration with the project client to design a new system or process, or redesign an existing one, by integrating and applying appropriate engineering knowledge, methodologies and tools for problem definition and analysis; idea generation; solution development, evaluation and justification; and implementation planning and impact assessment. Development of a technical report with a formal project presentation will be emphasized.
Prerequisite(s): ENGT 491 with a C or higher.

ENGT 495
FIELD-BASED EXPERIENCE/INTERNSHIP  2-5 CR
Engineering internships are not required but serve as a critical experience for students to apply classroom learning to real world experiences and potentially help them to secure full-time positions upon graduation. The aim of this course is to enable students to gain skills needed to negotiate, plan, undertake and communicate the results of an engineering project while working in an industry placement. The project topic will be based on the needs of the industry. The project will be completed under the supervision of an industry professional (preferably with a degree in Engineering, Engineering Technology, or closely related field). The course requires placement of an industry placement. Variable credit can be earned for periods of 3-12 weeks of full-time equivalence.
Prerequisite(s): ENGT 303, ENGT 350, and MATH& 146, all with a C or higher.

ENGT 499
SPECIAL PROBLEMS  2-5 CR
This course is designed as an individual research or design project directly related to engineering technology and carried out under the supervision of a member of the Bellingham Technical College faculty. Students electing this course will be required to carry out preliminary reading and complete a scope of work that includes deliverables during the preceding quarter. Students are expected to manage all aspects of their individual project from conceptualization through the planning phase and to the ultimate achievement of the deliverables. A major written report and oral presentation will be submitted for review at the completion of the project.
Prerequisite(s): ENGT 303, ENGT 350, both with a C or higher, or Instructor permission.

ENGLISH

AENGL 100
APPLIED ENGLISH  5 CR
This applied English course focuses on the workplace communication skills needed to send, receive, and process oral and written information. Along with a review of writing fundamentals, learners will use principles of clear communication, professionalism, and cultural awareness in occupational contexts. Learners will sharpen their reading, writing, and presentation skills.
Prerequisite(s): Accuplacer Reading Comprehension score of 71 or RDG 085 with a C or better, and Accuplacer Sentence Skills score of 71 or ENGL 092 with a C or better.

ENGL 092
FUNDAMENTALS OF STANDARD WRITTEN ENGLISH  5 CR
This course focuses on the fundamentals of college-level standard written English. Students...
are introduced to research skills. Course work includes a study of the conventional grammatical rules of English in the construction of effective sentences, paragraphs, and essays.

Prerequisite(s): Accuplacer Reading Comprehension score of 50 or ABE 054 or ABE 055 with a C or higher; and Accuplacer Sentence score of 50 or ABE 052 or ABE 055 with a C or higher.

ENGL 101
ENGLISH COMPOSITION I 5 CR
A composition course in which students read, analyze, and write essays using a variety of rhetorical strategies, as well as develop and verbally express ideas clearly and effectively. The critical reading of essays will provide a basis for the student’s own critical writing, which will reflect a command of college-level literacy standards. Attention to writing fundamentals and stylistic techniques will also be included. Word processing, email and internet knowledge required.

Prerequisite(s): Accuplacer Reading Comprehension score of 85 or RDG 085 with a B or higher; and Accuplacer Sentence Skills score of 86 or ENGL 092 with a B or higher or AENGL 100 with a C or higher.

ENGL 102
ENGLISH COMPOSITION II 5 CR
Intermediate academic essay writing. Emphasis on critical reading and writing, synthesis of cross-disciplinary texts, documentation of sources and argumentation.

Prerequisite(s): ENGL 101 with a C or higher.

ENGL 235
TECHNICAL WRITING 5 CR
This course is designed to help students report technical information clearly, completely, and persuasively. Technical writing shares many of the same concerns of other kinds of writing, such as attention to Purpose, Readability, and most significantly, Audience. This course is designed to provide instruction and practice in creating practical and effective documents for students in medical, scientific, technical, and other professional fields.

Prerequisite(s): ENGL 101 with a C or higher.

ENGL 310
BUSINESS COMMUNICATIONS 5 CR
This course focuses on audience-oriented communication in the business environment. Course content includes writing reports, proposals, memoranda, and e-mails; graphical presentation of data using Excel; and developing and delivering presentations using PowerPoint and other visual aids. Students will develop and demonstrate these communication skills individually, in smaller groups, and in presentations to larger audiences.

Prerequisite(s): Admission to BASOPS program or Admission to the BASET program or Instructor permission.
AQUA 135

PRACTICUM I  4 CR
This lab course provides hands on training to reinforce the learning objectives in AQUA 110, AQUA 120, and AQUA 130. Students will practice spawning techniques, including wet and dry fertilizations, proper gamete handling, and calculations of reproductive metrics. Students will also apply water quality theory to lab and field projects and taxonomic tools for site surveys, hatchery operations, and aquaculture husbandry.

Prerequisite(s): ACCUPLACER Arithmetic score of 75 or MATH 090 with a C or higher; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or higher; and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or higher; or Instructor permission.

Completion Of or Concurrent Enrollment In: AQUA 100, AQUA 110, AQUA 120, and AQUA 130; or Instructor permission.

Note: This class must be taken concurrently with AQUA 100, AQUA 110, AQUA 120, and AQUA 130.

AQUA 140

GROWTH AND NUTRITION  3 CR
This course will provide an overview on the nutrition and feeding of aquatic species to promote healthy and sustainable growth. There will be a focus on crustaceans, shellfish, and finfish from an aquaculture perspective.

Prerequisite(s): AQUA 100, AQUA 110, AQUA 120, AQUA 130, and AQUA 135, all with a C- or higher, or Instructor permission.

Completion Of or Concurrent Enrollment In: AMATH 111 with a C or higher; or concurrent enrollment in AMATH 111; or Instructor permission.

AQUA 150

FUNDAMENTALS OF AQUACULTURE  3 CR
An introduction to culturing aquatic biota for commercial production and fisheries stock enhancement, with an emphasis on commonly used culturing systems, shellfish and finfish husbandry, and hatchery operations.

Prerequisite(s): AQUA 100, AQUA 110, AQUA 120, AQUA 130, and AQUA 135, all with a C- or higher, or Instructor permission.

Completion Of or Concurrent Enrollment In: AMATH 111 with a C or higher; or concurrent enrollment in AMATH 111; or Instructor permission.

AQUA 160

FUNDAMENTALS OF FISHERIES BIOLOGY  3 CR
An introduction to the principles of fisheries biology and the population dynamics of crustacean, shellfish, and fish species, with an emphasis on Pacific Northwest stocks. The course will include an overview of fisheries gear, technology, sampling techniques, and data collection for stock assessments.

Prerequisite(s): AQUA 100, AQUA 110, AQUA 120, AQUA 130, and AQUA 135, all with a C- or higher, or Instructor permission.

Completion Of or Concurrent Enrollment In: AMATH 111 with a C or higher; or concurrent enrollment in AMATH 111; or Instructor permission.

AQUA 165

PRACTICUM II  3 CR
This lab course provides hands on training to reinforce the learning objectives in AQUA 140, AQUA 150, and AQUA 160. Students will practice culturing techniques for algae, shellfish, and finfish species, including: stocking systems based on condition factors, recording growth and mortality metrics, monitoring embryonic and juvenile development, and creating feeding schedules. Students will be introduced to aging techniques for shellfish and finfish, practice using common fishing knots to repair and maintain fisheries gear, and manage databases for hatchery operations.

Prerequisite(s): AQUA 100, AQUA 110, AQUA 120, AQUA 130, and AQUA 135, all with a C- or higher, or Instructor permission.

Completion Of or Concurrent Enrollment In: AMATH 111 with a C or higher; or concurrent enrollment in AMATH 111; or Instructor permission.

AQUA 170

FRESHWATER ECOLOGY  3 CR
An introduction to the ecology of rivers, lakes, and other freshwater systems with an emphasis on physical and chemical interactions with biotic communities. This course covers the effects of land use practices on freshwater habitats and techniques for mitigating habitat degradation. Students also will examine the habitat, ecology, and management of invertebrate and vertebrate species in freshwater environments.

Prerequisite(s): AQUA 140, AQUA 150, AQUA 160, and AQUA 165, all with a C- or higher; and AMATH 111 with a C or higher; or Instructor permission.

AQUA 180

OCEANOGRAPHY  3 CR
An introduction to the principles of oceanography, with an overview of the physical, geological, chemical, and biological components of marine environments. This course will cover plate tectonics, circulation and currents, weather events, and coastal and pelagic ecosystems. Students will also learn about issues affecting the Pacific Ocean, such as polar ice cap melting, offshore drilling, and ocean acidification.

Prerequisite(s): AQUA 140, AQUA 150, AQUA 160, and AQUA 165, all with a C- or higher; and AMATH 111 with a C or higher; or Instructor permission.

AQUA 190

TOXICOLOGY AND DISEASES  3 CR
An introduction to shellfish and finfish diseases and environmental toxicology. This course will cover the biology and ecology of pathogens, including bacteria, fungi, parasites, and viruses. Students will also learn the sources and exposure routes of pollutants and pathogens, lymphatic and behavioral responses, and commonly used diagnostics and treatments.

Prerequisite(s): AQUA 140, AQUA 150, AQUA 160, and AQUA 165, all with a C- or higher; and AMATH 111 with a C or higher; or Instructor permission.

AQUA 195

PRACTICUM III  4 CR
This lab course provides hands on training to reinforce the learning objectives in AQUA 170, AQUA 180, and AQUA 190. Students will practice techniques for habitat assessments and sampling methodology for aquatic invertebrate and vertebrate species in freshwater and marine environments. This course also covers disease monitoring and implementing treatment plans for sustainable aquaculture, along with advanced husbandry practices for rearing juveniles.

Prerequisite(s): AQUA 140, AQUA 150, AQUA 160, and AQUA 165, all with a C- or higher; and AMATH 111 with a C or higher; or Instructor permission.

AQUA 200

GENETICS IN FISHERIES AND AQUACULTURE  3 CR
An introduction to the basics of population genetics and the evolutionary principles that determine genetic variation in both natural and artificial environments. This course will highlight current aquaculture techniques in broodstock management, improvements in breeding practices, increasing genetic diversity and sustainability, and addressing environmental considerations.

Prerequisite(s): AQUA 170, AQUA 180, AQUA 190, and AQUA 195, all with a C- or better, or Instructor permission.

AQUA 210

PRACTICUM IV  3 CR
This lab course provides hands on training to reinforce the learning objectives in AQUA 200 and promote enhanced mastery of skills demonstrated in AQUA 135, AQUA 165, and AQUA 195. Students will implement broodstock management techniques, conduct fertilization and developmental studies, and practice project management skills during the spawning season.

Prerequisite(s): AQUA 170, AQUA 180, AQUA 190, and AQUA 195, all with a C- or higher, or Instructor permission.

AQUA 220

PROFESSIONAL DEVELOPMENT  2 CR
This course covers the fundamentals of planning and organizing job search strategies for the fisheries and aquaculture fields. Focus is placed on identifying career goals, assessing skills and accomplishments, the use of employment search tools, and creating effective application materials.

Prerequisite(s): AQUA 200 with a C- or higher and AQUA 210 with a C- or higher, or Instructor permission.
AQUA 230  
**CURRENT TOPICS  3 CR**
A seminar-based course that explores recent developments in technology, research, and management for the fisheries and aquaculture fields. Students will review prepared material, attend invited speaker seminars, engage in critical discussions, and prepare written evaluations of the topic. Topics will include presentations from government, tribal, non-profit, academic, and private industries for finfish and shellfish aquaculture, fisheries biology and management, and habitat restoration.

Prerequisite(s): AQUA 200 with a C- or higher and AQUA 210 with a C- or higher, or Instructor permission.

AQUA 240  
**INDEPENDENT PROJECT  2 CR**
Students will design and implement independent research and/or engineering projects in identified areas of interest. Projects may include developing new husbandry techniques, conducting lab and field experiments, or designing and building equipment and technology. There will be an emphasis on developing project management skills, including: writing project proposals, setting deadlines, and creating budgets.

Prerequisite(s): AQUA 200 with a C- or higher and AQUA 210 with a C- or higher, or Instructor permission.

AQUA 250  
**ADVANCED SAMPLING TECHNIQUES  4 CR**
This workshop-based course focuses on developing advanced sampling and analysis skills commonly used in fisheries and aquaculture sciences. Students will collect and analyze sampling data from field and lab projects, including fisheries surveys, hatchery operations, and habitat assessments. Topics may include: benthic macroinvertebrate assessments, aging techniques for shellfish and finfish, population dynamics calculations, and food web analysis for marine and freshwater ecosystems.

Prerequisite(s): AQUA 200 with a C- or higher and AQUA 210 with a C- or higher, or Instructor permission.

AQUA 260  
**NATURAL RESOURCE MANAGEMENT  4 CR**
In this course, students explore how to balance the ecology and economics of limited natural resources through the management of diverse stakeholder needs. These concepts will be applied to multiple case studies, including an examination of the four leading causes of wild salmon population decline in the Pacific Northwest (hatcheries, harvest, habitat, and hydropower).

Prerequisite(s): AQUA 200 with a C- or higher and AQUA 210 with a C- or higher, or Instructor permission.

AQUA 270  
**INTRODUCTION TO GIS FOR FISHERIES & AQUACULTURE  4 CR**
An introduction to geographic information sciences with a focus on spatial data management, manipulation, and display in geographic information systems (GIS). This course covers basic cartographic principles and map creation with a special emphasis on mapping aquatic habitats and fish population distributions.

Prerequisite(s): AQUA 220, AQUA 230, AQUA 240, AQUA 250, and AQUA 260, all with a C- or higher, or Instructor permission.

AQUA 280  
**FIELD-BASED EXPERIENCE  4 CR**
In this course, students will experience supervised work and hands-on training in a professional setting. Internships will focus on fisheries and/or aquaculture fields. Sponsoring organizations may include government, private industry, non-profit, or other relevant sectors.

Prerequisite(s): Instructor permission.

AQUA 290  
**ADVANCED HATCHERY TECHNIQUES  1-2 CR**
Students will build on skills acquired Practicum I, II, and III to learn hatchery operations from a management perspective. This course focuses on hatchery data collection and reporting as required under federal and state regulations, monitoring losses for early warning indicators, and creating innovative approaches for improving hatchery production and efficiency.

Prerequisite(s): All AQUA 100-level courses all with a C- or higher, or Instructor permission.

**HEALTH**

HLTH 103  
**CPR: ADULT HEARTSAVER  0.5 CR**
This course includes one person CPR, obstructed airway techniques, and risk factors of heart disease. Skills completion and written exam are required for card, which is good for two years.

Prerequisite(s): Program admission.

HLTH 133  
**HIV/AIDS: FOR HEALTHCARE PROFESSIONAL  1 CR**
This workshop is designed for the professional needing seven hours of HIV/AIDS education for licensure or professional update. The program utilizes a multi-media approach and meets Washington State certification requirements.

Prerequisite(s): HT 126 and BIO 105, and typing 50 wpm.

HLTH 154  
**HEALTHCARE PROVIDER FIRST AID AND CPR  1 CR**
This course will teach both professional level CPR and first aid. CPR will cover adult, child and infant skills, barrier devices and use of the AED (automated external defibrillator). The first aid component will cover all requirements per OSHA and WISHA and will discuss some advanced first aid skills. The CPR portion does require a written exam to be passed with 84% as well as skills evaluation prior to card issuance. Text required.

HLTH 155  
**FIRST AID FUNDAMENTALS  1 CR**
This eight-hour first aid course is in compliance with WAC 296-24 of the State of Washington and meets OSHA/WISHA requirements for first aid training. This course teaches the fundamentals of first aid in order to gain access to the EMS system, render emergency care in a low-risk occupational environment, and teaches adult CPR and obstructed airway techniques. Both CPR and first aid cards are good for two years. Attendance at all sessions and demonstration of competency is required for certification.

HO 127  
**HEALTHCARE PROVIDER CPR  0.5 CR**
This basic life-support course is designed for healthcare providers and includes adult one- and two-rescuer CPR, pediatric one-rescuer CPR, and barrier devices. Successful written and mannequin skill evaluation and attendance at all sessions is required to receive a card.

HO 157  
**INTRODUCTION TO PHLEBOTOMY SKILLS  4 CR**
This course introduces the principles of phlebotomy and covers basic anatomy and physiology, asepsis, disease processes, equipment and supplies, collection procedures and quality assurance, as well as medical and legal issues associated with phlebotomy practice. The course includes practice and performance of venipuncture and finger-stick methods. Students must have a high school education or equivalent, ability to apply college level reading and writing, and converse in the English language. Students must also demonstrate background in medical terminology and anatomy and physiology, either through previous schooling or work-related experience. Manual dexterity to perform skills is essential to the successful completion of the course. A supply kit and book must be purchased in the bookstore prior to the course.

Prerequisite(s): Program admission.

HT 108  
**MEDICAL TRANSCRIPTION I  3 CR**
This course is designed to assist the student in developing the basic medical language, grammar, and formatting necessary for medical typing and transcription.

Prerequisite(s): HT 126 and BIO 105, and typing 50 wpm.
relating to the various systems of the body. Emphasis on correct spelling and pronunciation of selected common eponyms.

Prerequisite(s): Accuplacer Reading Comprehension and Sentence Skills score of 71 or higher.

HT 130 MEDICAL OFFICE PROCEDURES 5 CR
Prepares the student for the role of an office or administrative assistant and the broader role as a professional member of the management team. Class exposes the student to the growing influence of information technology, the expanding global marketplace, and the changes in the organizational structure of modern business.

HT 135 PHARMACOLOGY FOR THE MEDICAL OFFICE 2 CR
This course will introduce students to the various forms of medications, drug classifications, administration routes and how they work. Students will also learn the terminology associated with each, for those medications commonly prescribed in the medical office setting.

Prerequisite(s): BIO 105 and HT 126 with a minimum C grade in each course.

HT 145 HEALTH CARE RECORDS SYSTEMS 5 CR
Functions of medical record departments and record systems will be addressed. Hands on process of hospital records, uses, content, and evaluation.

HT 160 MEDICAL CODING ICD-10 3 CR
Learn to assign codes in medical/health records to ensure accurate and complete reimbursement documentation. The focus will be on ICD-10 codes with some discussion of CPT codes.

Prerequisite(s): BIO 105, BIO 127, and HT 126 (or HT 129) with a minimum grade of C in each course.

HT 240 MEDICAL CODING – CPT 4 CR
Course trains students to assign physician’s Current Procedural Terminology (CPT) codes in medical/health records to ensure accurate and complete reimbursement documentation.

Prerequisite(s): BIO 105, BIO 127 & HT 126 with minimum C grade in each course.

HT 250 ADVANCED MEDICAL CODING 5 CR
Advanced Medical Coding is a continuation of the procedures and practices of ICD-9 and CPT coding and helps prepare the student for certification testing.

Prerequisite(s): HT 230 and HT 240.

HT 260 MEDICAL ETHICS 5 CR
Medical Ethics is a student centered course that is designed to help students understand the relevance of current ethical trends in health care. This course prepares students not only for healthcare ethics on a national level, but also an international level that relates to working with today’s diverse population. Through this students will gain an understanding of the challenges providers and healthcare workers face when treating patients who may be culturally diverse, have varying religious beliefs, or different in lifestyle choices, and the various psycho-social aspects of each as it relates to healthcare. Students will also attain an understanding of the complex business side of health care and how ethics plays a role in these daily transactions. Note: this course meets the human relations general education requirements for the medical coding and billing program generalist only.

HEATING, VENTILATION, AIR CONDITIONING AND REFRIGERATION

HVACR 101 FUNDAMENTALS OF REFRIGERATION 8 CR
This course presents safety in the workplace, the fundamentals of vapor compression refrigeration, HVAC/R tools, equipment and refrigerants. Students will build a working refrigeration system in the lab portion of this course. Instructors will have the students pressure test, evacuate, and charge their systems with industry standard equipment.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better; or ABE 050 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; or Instructor permission.

Completion Of or Concurrent Enrollment In: HVACR 102 with a C or better or concurrent enrollment in HVACR 102; or Instructor permission.

HVACR 102 BASIC ELECTRICITY FOR HVACR 8 CR
This course presents the fundamentals of electrical theory, controls, motors, and applications. Emphasis is placed on proper diagnostic and troubleshooting procedures. Lectures and assigned readings are supplemented by the student’s individual work on projects in the lab on an electrical circuitry trainer. Proper electrical safety and codes are observed in the coursework.

Prerequisite(s): ACCUPLACER Arithmetic score of 38
HVACR 121
COMMERCIAL SELF-CONTAINED SYSTEMS 7 CR
This course analyzes medium and low temperature refrigeration systems and components used in commercial applications. Emphasis is placed on safe troubleshooting techniques on live equipment as installed in industry.
Prerequisite(s): HVACR 101 with a C- or better and HVACR 102 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 122.

HVACR 122
COMMERCIAL ICE SYSTEMS 7 CR
This course introduces the various types and makes of commercial ice production systems used in restaurants, institutions, and process applications. Wiring diagrams and sequence of operations are emphasized. Proper installation, maintenance, cleaning, sanitizing and troubleshooting techniques are emphasized. The student will verify proper production, learn how to build a wiring schematic, identify faults inserted by instructor and repair the inserted faults. Students must test for EPA section 608 certification and pass with a minimum of Type 2 certification in order to pass this course.
Prerequisite(s): HVACR 101 with a C- or better and HVACR 102 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 121.

HVACR 131
FURNACE TECHNOLOGY 7 CR
This course introduces gas piping, venting and control systems for several different types of furnaces in residential and commercial applications. Emphasis is placed on electrical safety, BTU calculations, and airflow calculations, cost analysis, wiring diagrams, and troubleshooting techniques. Classroom discussion and hands on lab activities are designed to enable students to quickly identify system problems and propose solutions.
Prerequisite(s): HVACR 121 with a C- or better and HVACR 122 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 132.

HVACR 132
BOILERS AND HYDRONIC HEAT 7 CR
This course explores the use of boilers and hydronics to heat residential and commercial buildings. Students will apply proper tools and techniques to identify components, design, install, maintain and troubleshoot problems in hydronic heating systems. Systems used in the lab will use natural gas, propane, or fuel oil for residential and commercial boilers.
Prerequisite(s): HVACR 121 with a C- or better and HVACR 122 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 131.

HVACR 201
A/C & AIRFLOW 8 CR
This course prepares the student to install, start-up, troubleshoot and diagnose problems in comfort cooling and conditioning systems. Emphasis is given to wiring techniques, proper refrigeration piping, controls, start-up and maintenance.
Prerequisite(s): HVACR 131 and HVACR 132, both with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 202 with a C- or better or concurrent enrollment in HVACR 202, or Instructor permission.

HVACR 202
APPLIED HEAT PUMP SYSTEMS 5 CR
This course prepares the student to install, start-up, troubleshoot and diagnose problems in residential and commercial heat pump systems. Emphasis is given to wiring techniques, proper refrigeration piping, controls, start-up and maintenance. Integration of auxiliary heat components, balance point identification, cost analysis to other fuels, and geothermal systems are all introduced and applied in the lab. Students must pass the Light Commercial Air Conditioning and Heating Industry Competency Exam (ICE) in order to pass this course.
Prerequisite(s): HVACR 131 and HVACR 132, both with a C- or higher, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 201 with a C- or better or concurrent enrollment in HVACR 201, or Instructor permission.

HVACR 221
COMMERCIAL REFRIGERATION 8 CR
This course expands on commercial refrigeration systems presented in HVACR 121 and HVACR 122. Five different commercial systems will be utilized in the lab area in conjunction with the lecture portion of this course. Each ancillary component is analyzed for compatibility, proper selection, operation, need, energy savings and equipment reliability. Wiring diagrams are emphasized and diagnosis of failed components is also addressed. How the system operates as a whole is critical and students are encouraged to research new and innovative applications for these systems.
Prerequisite(s): HVACR 201 with a C- or better and HVACR 202 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 222.

HVACR 222
INDUSTRIAL REFRIGERATION 7 CR
This course will provide an in-depth study of industrial applications of chilled water-cooling systems. Classroom activities are supplemented by students individual and group work on five lab projects including screw compressors and a cooling tower. Analyzing various systems for cost benefits, installation, service and proper annual maintenance procedures are emphasized. Transcendental and ammonia systems and all the related safety implications are included in this course. Students must pass the Commercial Refrigeration Industry Competency Exam (ICE) in order to pass this course.
Prerequisite(s): HVACR 201 and HVACR 202, both with a C- or higher, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 221 with a C- or better or concurrent enrollment in HVACR 221, or Instructor permission.

HVACR 231
CONTROL THEORY FOR HVAC/R 8 CR
This course presents basic control theory for energy management and control systems. Systems covered in-depth include electric, electronic, distributed digital control, pneumatic, VAV and VVT.
Prerequisite(s): HVACR 221 and HVACR 222, both with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 232 with a C- or better or concurrent enrollment in HVACR 232, or Instructor permission.

HVACR 232
COMMERCIAL & INDUSTRIAL BOILERS 2 CR
This course presents commercial and industrial boilers and combustion controls, advanced flame safeguards, safety, code compliance and efficiency testing of gas and oil fired systems. Classroom activities are supplemented by the student’s individual and group work on mock-up and actual operating systems.
Prerequisite(s): HVACR 221 and HVACR 222, both with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment in: HVACR 231 with a C- or better or concurrent enrollment in HVACR 231, or Instructor permission.

HVACR 233
EMPLOYMENT PREPARATION 1 CR
This course prepares students with the necessary skills to research companies in the HVAC/R industry, successfully create a professional resume and cover letter, and practice articulating their HVAC/R skills and experience in mock interviews.
Prerequisite(s): HVACR 221 with a C- or better and HVACR 222 with a C- or better, or Instructor permission.
HISTORY

HIST& 146
UNITED STATES HISTORY I  5 CR
Survey of Native American societies, European explorers, and the lifestyles of the new continent, the independence movement, and the problems of a new nation.

HIST& 147
UNITED STATES HISTORY II  5 CR
Survey course covering the rise of nationalism, evolution of American lifestyles, Civil War, westward movement, and the American industrial revolution.

HIST& 148
UNITED STATES HISTORY III  5 CR
Survey course exploring the social, political, and economic history of the United States from 1900 to the present.

HUMANITIES

HUM&S 101
INTRODUCTION TO HUMANITIES  5 CR
Students explore the works in the literary, performing, and visual arts. Students identify common themes in the arts, analyze works representing diverse perspectives, and investigate the political, social, technological and historical contexts of works. A broader understanding is encouraged through the exploration and synthesis of outside sources using research methods.

Prerequisite(s): Accuplacer Reading Comprehension score of 71 or RDG 085 with a C or better, and Accuplacer Sentence Skills score of 71 or ENGL 092 with a C or better.

HYPNOTHERAPY

HYPN 101
BASIC HYPNOSIS - LEARNING FOR HEALTHCARE FIELD  5 CR
A course which teaches basic hypnosis/self-hypnosis, and is the first in a 3-part series. It may be learned for personal growth, as well as a prerequisite for the study of professional hypnotherapy. It is approved by the International Medical and Dental Hypnotherapy Association, the National Society of Clinical Hypnotherapists, as well as other professional hypnosis associations.

HYPN 102
INTERMEDIATE HYPNOSIS FOR HEALTHCARE FIELD  5 CR
This course is the second in a 3-part series that is designed to teach the serious student of hypnosis how to apply hypnotherapy techniques for motivation and goal achievement.

Prerequisite(s): HYPN 101.

HYPN 103
ADVANCED HYPNOTHERAPY TECHNIQUES  5 CR
This course is the third in a 3-part series for the serious student wishing to use hypnotherapy as a career, or to supplement an existing healthcare field and practice. Upon successful completion, the student is eligible to apply for Washington State Licensure through the Department of Health.

Prerequisite(s): Basic & Intermediate Hypnosis. HYPN 102.

HYPN 104
PREPARING FOR A HYPNOTHERAPY PRACTICE  2 CR
This course will provide additional hands on experience through supervised practices for students who have received the BTC Hypnotherapy program certificate and will assist the hypnotherapist in gaining confidence and preparing for their new practice. Topics include: how to schedule sessions so therapists benefit as well as their clients; how to employ multiple sessions and techniques with one client to ensure success; record keeping; and marketing techniques. Under supervision, students will work individually on clients with follow-up needs.

Prerequisite(s): HYPN 101, HYPN 102, and HYPN 103.

INDUSTRIAL MAINTENANCE AND MECHATRONICS

EMTEC 105
ENGINEERING GRAPHICS  4 CR
The topics will be presented. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

EMTEC 106
TRADE SAFETY  3 CR
The topics will be on health and safety core rules, material safety data sheets, fall protection, confined spaces, Lock out/Tag out requirements, ladder, scaffolding and portable power tools as well as navigating the Washington State Labor and Industries website. Utilizing dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry.

Prerequisite(s): ACCUPLACER Algebra score of 75 or Math 098 with a C or better; ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better.

EMTEC 110
DC CIRCUITS  6 CR
The purpose of this course is to give students a firm foundation in electrical theory. The course covers DC circuit theory with an emphasis on circuit analysis, practical application, and troubleshooting. The course requires an understanding of simple mathematics.

EMTEC 121
FUNDAMENTALS OF HYDRAULIC PNEUMATICS  5 CR
This is the first course in a series designed to prepare the industrial millwright, electrician and maintenance technician with the knowledge and skills necessary to maintain, diagnose, and repair hydraulic and pneumatic systems. Instructional material is computer “on-line” with selected modules emphasizing hydraulic pumps, safety, compressed air basics and types of gauges.

Prerequisite(s): EMTEC 105.

EMTEC 123
HYDRAULICS & PNEUMATICS CIRCUITS  5 CR
This course covers principles and operating characteristics of hydraulic and pneumatic systems, and components. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for the fluid power industry. Text and basic tools required.

Prerequisite(s): EMTEC 121.

EMTEC 125
APPLIED MECHANICS  5 CR
Studies introduce material strengths relating to forces such as tension, shear and torque. Students develop knowledge and skills through application of pulley ratios and levers. Instruction also covers properties of materials such as solids, liquids and gasses. Utilizing dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

Completion Of or Concurrent Enrollment In: EMTEC 105 with a C- or better and EMTEC 237 with a C- or better; or concurrent enrollment in EMTEC 105 and EMTEC 237; or Instructor permission.

EMTEC 126
ENGINEERING GRAPHICS  4 CR
The student will discover print reading format and dimension with types and symbols. A study of thread specifications and building drawings will be presented. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

Prerequisite(s): EMTEC 105.

EMTEC 131
RIGGING  4 CR
The student will study and apply industry standard principals to safely plan and facilitate controlled lifting of equipment. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.

Prerequisite(s): EMTEC 105.
EMTEC 133
**INTRODUCTION TO MACHINERY SKILLS 4 CR**
Studies introduce shop safety and guidelines, the use of measuring tools, basic shop equipment and a study of vertical milling machines and lathes. Supervised hands on project will be produced by the student. Utilizing dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.
Prerequisite(s): EMTEC 126 or ENGR 115.

EMTEC 180
**MANUFACTURING COMPUTER APPLICATIONS 4 CR**
In this course Students are introduced to Microsoft applications such as Access, PowerPoint, Word, and Excel. Students will learn how to use these programs in an industrial setting.

EMTEC 205
**PROGRAMMABLE LOGIC CONTROLLERS 5 CR**
This course is an introductory study of Programmable Logic Controllers, including configuring hardware and software, general construction and operation as well as programming.
Prerequisite(s): EMTEC 211 or Instructor permission.

EMTEC 210
**AC CIRCUITS 6 CR**
The AC Circuits class builds on the concepts that are covered in EMTEC 110. The course covers AC circuit theory with an emphasis on circuit analysis, practical application, and troubleshooting. The course requires an understanding of simple mathematics.
Prerequisite(s): EMTEC 110.

EMTEC 211
**ELECTRICAL CONTROLS I 5 CR**
This course introduces the student to the components used in today's control systems. Control schematics are introduced with hands-on use of various multi meters in troubleshooting relay logic circuits. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.
Prerequisite(s): EMTEC 210.

EMTEC 215
**PROGRAMMABLE LOGIC CONTROLLERS II 5 CR**
In this course, students build on the foundation set in EMTEC 205. This course addresses advanced PLC topics including math and logic functions.
Prerequisite(s): EMTEC 205.

EMTEC 217
**INSTRUMENTATION & CONTROLS 4 CR**
This course introduces the student to sensor indicators and transmitters. Measurement, gages, flow sensors and other industrial sensing devices will be studied in this class. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.
Prerequisite(s): EMTEC 215.

EMTEC 218
**INTRODUCTION TO NATIONAL ELECTRICAL CODE 2 CR**
The student is introduced to some of the common industrial applications of the National Electrical Codes such as grounding, bonding, wire sizing, conduit selection, junction box selection, motor overload protection and current protection selection. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.
Prerequisite(s): EMTEC 210.

EMTEC 220
**MICRO-CONTROLLERS 5 CR**
This course focuses on the application of microprocessors in industry, with emphasis on understanding basic operation, interfacing, and programming. Study includes basic architecture, memory structure, programming language, interfacing with peripheral devices, input/output devices, and diagnostics.
Prerequisite(s): EMTEC 210.

EMTEC 221
**SOLID STATE COMPONENTS 4 CR**
This course builds on EMTEC 110 and EMTEC 210; introducing the student to circuits involving diodes, transistors, SCRs, and other solid state devices.
Prerequisite(s): EMTEC 210.

EMTEC 225
**PROBLEM SOLVING FOR MANUFACTURING & THE TRADES 3 CR**
This class addresses technical problem solving skills including reading and interpreting technical documents and instructions
Prerequisite(s): EMTEC 210.

EMTEC 230
**BEARINGS & DRIVES 5 CR**
The student will learn the application and theory of bearing technology with emphasis on storing, installing, and maintenance. The course will include an examination of different drive types with emphasis on theory, maintenance and repair. Utilizing state-of-the-art computer interactive software, dynamic lecture and discussion, and hands-on practice, students develop knowledge and skills for careers in industry. Text and basic tools required.
Prerequisite(s): EMTEC 210 & EMTEC 220.
INSTRUMENTATION & CONTROL

INST 100
DIRECT CURRENT I 4 CR
A thorough introduction for the new student to the fundamental properties and applications of electricity. This course opens the doors to a wide array of career opportunities in computer servicing, biomedical equipment servicing, manufacturing technology, telecommunications, and home entertainment equipment servicing. In addition, safety procedures are emphasized. Students learn how to make good solder connections and recognize and repair bad solder connections. Students learn how to select and clean soldering tools. This course continues with the basics of current, voltage and resistance. The application of Ohm’s Law and the construction of circuits to verify electronic theory provide the knowledge necessary to build the foundation for a thorough understanding of electronics. This course teaches the student to use a logical course of correction to an electronic problem in a minimum amount of time. Student will learn generic troubleshooting techniques and tricks of the trade from analog to digital circuits.

Prerequisite(s): BTC College Level Math score of 75 or MATH 090 with a C or better; ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentences Skills score of 71 or ENGL 092 with a C or better; completion of Intermediate Algebra (MATH 099) or placement into Pre-Calculus (MATH & 141).

INST 106
DIRECT CURRENT II 4 CR
The development of a working knowledge of the basic principles of DC electronics. The purpose and operation of such devices as resistors, capacitors, inductors and meters are covered in labs and theory.

Completion Of or Concurrent Enrollment In: INST 100, INST 110 and INST 115, all with a C- or better; or concurrent enrollment in INST 100, INST 110, and INST 115; or Instructor permission.

INST 110
ALTERNATING CURRENT I 4 CR
An introduction and examination of the principles and applications of alternating current, including frequency, reactance, impedance, and resonance.

Completion Of or Concurrent Enrollment In: INST 100, INST 106, and INST 115, all with a C- or better; or concurrent enrollment in INST 100, INST 106, and INST 115; or Instructor permission.

INST 115
ALTERNATING CURRENT II 4 CR
Students continue their exploration of AC with transformers and filter circuits (low-pass, high-pass, band-stop and band-pass), with theory, lab work, and projects.

Completion Of or Concurrent Enrollment In: INST 100, INST 106, and INST 110, all with a C- or better; or concurrent enrollment in INST 100, INST 106, and INST 110; or Instructor permission.

INST 120
SEMICONDUCTORS I 5 CR
Students learn how discrete semiconductor devices are constructed, how to handle them, how diodes, bipolar transistors, FETS, and thyristors operate and how to use them in practical circuits. ACDC power supply circuits introduced as well.

Prerequisite(s): INST 115.

INST 125
SEMICONDUCTORS II 5 CR
This course introduces the student to various “building block” circuits including amplifiers, oscillators, and power supply circuits, through theory, lab work, and projects.

Prerequisite(s): INST 120.

INST 130
OP-AMPS I 3 CR
Explores the design and operation of basic operational amplifier circuits through theory and lab work to illustrate and confirm the design and operation of linear amplifiers, voltage and current converters, comparators and precision rectifiers.

Prerequisite(s): INST 125.

INST 135
OP-AMPS II 3 CR
Oscillators, active filters and single power-supply circuits and other applications of op-amps are covered in theory, practical labs and projects.

Prerequisite(s): INST 125.

INST 140
DIGITAL I 5 CR
A comprehensive focus on the concepts, terminology, components and circuits that combine to form basic digital systems with lab work and projects.

Prerequisite(s): INST 135.

INST 141
MOTOR CONTROLS 4 CR
In this course you will learn how to wire, configure, and use electromechanical relays to control electric motors and other discrete (on/off) control elements for real processes. You will also learn how to wire, configure, and use variable-frequency motor controls to use three-phase AC motors as final control elements.

Prerequisite(s): INST 140 with a C- or better.

INST 142 PLC PROGRAMMING 4 CR
In this course you will learn how to wire, program, and configure programmable logic controllers (PLCs) to perform discrete control functions including combinational logic, counters, and timers.

Prerequisite(s): INST 141 with a C- or better.

INST 143
PLC SYSTEMS 4 CR
In this course you will learn how to program data-handling functions in programmable logic controllers (PLCs) including comparison, arithmetic, and data transfer instructions. You will also learn to connect and program human-machine interface (HMI) panels to PLCs.

Prerequisite(s): INST 142 with a C- or better.

INST 145
DIGITAL II 5 CR
Flip-flops, Sequential Logic, Combination Logic, Semiconductor Memory, Data Conversion and Digital Troubleshooting theory and practical labs help the student understand digital circuits and techniques.

Prerequisite(s): INST 140.

INST 150
ELECTRONIC COMMUNICATIONS 6 CR
This course provides a comprehensive introduction to electronic communication fundamentals and applications including modulation, transmitters, receivers, antennas, RF, digital communication, multiplexing, cellular and PCS.

Prerequisite(s): INST 145.

INST 200
INTRODUCTION TO INSTRUMENTATION 2 CR
This course introduces you to the trade, terminology, and basic principles of instrumentation. It is a preparatory course for any one of three sections within the second year of Instrumentation: measurement, control, and systems, enabling you to begin your second year of Instrumentation at the start of Fall, Winter, or Spring quarter.

Prerequisite(s): MATH 141 with a C or better or Instructor permission.

INST 205
JOB PREPARATION I 1 CR
Preparation for employment including resume preparation, cover letter writing, job search engine use, and interviewing skills.

Prerequisite(s): INST 200 and MATH 141 with a C or better.

INST 206
JOB PREPARATION II 1 CR
This course teaches you how to get the jobs that are not listed in classified ads or job search engines. You will learn how to professionally network, research employers for job potential, conduct informational interviews, and otherwise take an active approach in securing employment within your professional field.

Prerequisite(s): INST 205 and MATH 141 with a C or better.
**INST 233**
PROTECTIVE RELAYS 4 CR
In this course you will learn how to commission, test, and analyze basic protective relays and instrument transformers used to protect equipment in electrical power systems. This course also reviews phasor mathematics for three-phase electrical circuits.
Prerequisite(s): MATH& 141 with a C or better and INST 141 with a C- or better.

**INST 240**
PRESSURE AND LEVEL MEASUREMENT 6 CR
In this course you will learn how to precisely measure both fluid pressure and fluid/solids level in a variety of applications, as well as accurately calibrate and efficiently troubleshoot pressure and level measurement systems.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 200.

**INST 241**
TEMPERATURE & FLOW MEASUREMENT 6 CR
In this course you will learn how to precisely measure both temperature and fluid flow in a variety of applications, as well as accurately calibrate and efficiently troubleshoot temperature and flow measurement systems.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 240.

**INST 242**
ANALYTICAL MEASUREMENT 5 CR
This course teaches the basic principles of process analysis including pH, electrical conductivity, turbidity, and chemical constituency.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 241.

**INST 250**
FINAL CONTROL ELEMENTS 5 CR
In this course you will learn how to precisely control energy in process systems using fluid valves and motors. You will also learn how fluid power systems work, and how to efficiently troubleshoot final control elements.
Prerequisite(s): MATH& 141 with a C grade and completion of or concurrent enrollment in INST 200.

**INST 251**
PID CONTROL 5 CR
This course teaches you how the most basic and widely-used control algorithm works: proportional-integral-derivative (PID). In this course you will see how the PID algorithm is implemented in pneumatic, analog electronic, and digital control systems.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 250.

**INST 252**
LOOP TUNING 4 CR
This course teaches the art and science of tuning PID controllers for robust loop control, including Ziegler-Nichols closed-loop and open-loop methods in addition to heuristic methods.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 251.

**INST 260**
DATA ACQUISITION SYSTEMS 4 CR
This course reviews digital theory learned in the first year (Core Electronics) courses, building upon that foundation to explore industrial data busses (including Ethernet) and indicating, data-logging, and SCADA systems.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 200.

**INST 262**
DIGITAL CONTROL SYSTEMS 5 CR
This course teaches the basic principles of distributed instrumentation, including distributed control systems (DCS), FOUNDATION Fieldbus instruments, and wireless field instruments.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 260.

**INST 263**
CONTROL STRATEGIES 5 CR
This course teaches the theory and practical application of process control strategies including cascade, feed forward, selector, and override controls. Safety instrumented systems (SIS) concepts are also covered in this course.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 262.

**INST 290**
INTERNSHIP 5 CR
An internship exists to give students opportunity to learn instrumentation in a real-world setting. In this course, you will work under the direction of a supervisor at a real job site, performing work directly related to instrumentation and control. Specific objectives will vary with the job and with the supervision.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 200.

**INST 292**
INTERNSHIP 10 CR
An internship exists to give students opportunity to learn instrumentation in a real-world setting. In this course, you will work under the direction of a supervisor at a real job site, performing work directly related to instrumentation and control. Specific objectives will vary with the job and with the supervision.
Prerequisite(s): MATH& 141 with a C or better and completion of or concurrent enrollment in INST 200.

**JOB SKILLS**

**CTE 108**
JOB SKILLS 1 CR
This course provides students with the foundation for job preparation and job searching. Students will identify their qualifications for their chosen career; identify what employers look for in strong candidates; build resumes and cover letters; gain tips on completing applications; job and informational interviewing; as well as job searching, professional networking, and tips for setting up a successful career. This is a hybrid course that includes a combination of face-to-face and online instruction. It is important that students should have skills in Microsoft Word before enrolling in this course.
Prerequisite(s): Students should have skills in Microsoft Office before enrolling in this course.

**CTE 109**
JOB SKILLS II 1 CR
This course teaches the students how to find employment that are not listed in classified advertisements or job search engines. Students will apply for positions in their field of interest, and provide feedback from their experiences.

**LEGAL**

**LGL 132**
LEGAL TERMINOLOGY 5 CR
Designed to help students learn the legal terminology, English skills, legal formatting skills, and guidelines needed in a law office.

**LGL 211**
LEGAL DOCUMENT PROCESSING 5 CR
Course makes use of a self-contained comprehensive job simulation designed to give the student practice on the types of activities most often performed in legal office settings. Gain hands-on exposure to the various types of law while formatting documents. Word processing functions are incorporated into the course.
Prerequisite(s): CAP 106 with a C or better.
Corequisite(s): LGL 132.

**LGL 225**
FIELD-BASED EXPERIENCE 5-7 CR
Students will arrange to work in a college-approved professional setting where they will apply business and legal administrative support skills and knowledge in a variety of related activities.
Prerequisite(s): Instructor permission.
MACH 101  
MACHINE SHOP FUNDAMENTALS I  
3 CR  
This course provides the student with the foundation for success in machining, covering general shop safety, the use of precision measuring tools and blueprint reading. Students will learn proper and safe use of shop equipment and space. In addition, students learn to use precision measuring tools such as micrometers, height gages, calipers, gage blocks, gage pins, and indicators. Students will read and interpret measurements, and choose the appropriate measuring tool for the required degree of accuracy. Blueprint reading will be a point of emphases, covering: terms, dimensioning, title blocks, views, and more.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 or ABE 050 with a C or better; ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better.

MACH 102  
MACHINE SHOP FUNDAMENTALS II  
3 CR  
Continuing on the trajectory set by MACH 101, students will expand their skills of measuring. The introduction of measuring over the wire, thread micrometer, pitch gage, and bore various bore gages will be introduced. Students will use indirect measuring and continue to develop skills gained in MACH 101. Shop math will be a point of emphasis, converting fractions, geometry, and trigonometry. These skills will be put to use as the student expands on their blueprint reading skills. The student will solve for unknown dimensions, and increase their overall knowledge of blueprints, to include feature call-outs complex views, thread specifications, and more complex information.

Prerequisite(s): MACH 101 with a C or better.

MACH 103  
MACHINE SHOP FUNDAMENTALS III  
3 CR  
The third course in the Machine Shop Fundamentals series, this course covers the principles of heat treating and precision grinding. The students will be exposed to the concepts of Geometric Dimensions and Tolerancing through blueprints. Students will measure and calculate dimensions of precision ground parts to verify they are to print.

Prerequisite(s): MACH 102 with a C or better.

MACH 141  
INTRODUCTION TO MANUAL LATHE  
5 CR  
An introductory course emphasizing the proper set up and use of conventional engine lathes. Students will learn to identify the essential parts of an engine lathe and their functions. This will include gear setting to achieve desired speeds and feeds on a variety of different lathes. Work holding and the use of the 3-jaw chuck will be covered. Lathe operations to be introduced will be facing, O.D. turning, grooving, parting-off and drilling. Students will create their own cutting tools by grinding correct geometry on HSS tool blanks.

Completion Of or Concurrent Enrollment In: MACH 101 with a C or better and MACH 151 with a C or better; or concurrent enrollment in MACH 101 and MACH 151; or Instructor permission.

MACH 142  
ADVANCED MANUAL LATHE  
5 CR  
A continuation of the skills achieved in MACH 141. Students learn more advanced lathe operations including turning a taper, single point threading, knurling, and boring. All skills will be demonstrated by completing class projects to specified dimensions and tolerances.

Prerequisite(s): MACH 141 with a C or better.

MACH 151  
INTRODUCTION TO MANUAL MILL  
5 CR  
In this introductory course, students will learn the name and uses of the various parts of a vertical knee mill. The proper use of a mill will be covered including speed and feed adjustment, work holding and the 3-axis coordinate system. Operations to be performed will be tramping in a table, squaring a vise, tool setting, edge finding, facing, end mill use, drilling, and tapping. All skills will be used to produce class projects to print specifications.

Completion Of or Concurrent Enrollment In: MACH 101 with a C or better and MACH 141 with a C or better; or concurrent enrollment in MACH 101 and MACH 141; or Instructor permission.

MACH 152  
ADVANCED MANUAL MILL  
5 CR  
In this advanced course students will build on the skills gained in MACH 151. These advanced skills will be display by the completion of class projects with tighter tolerances and more complex print specifications. Time management will be a point of emphasis.

Prerequisite(s): MACH 151 with a C or better.

MACH 171  
INTRODUCTION TO CNC MACHINING  
6 CR  
This introductory course covers the principles of CNC machines. The advantages of the CNC machine in production, and the process differences between manual and CNC operations will be discussed. Students will read, write, and troubleshoot G-Code programs. The understanding of G-Code will be demonstrated by producing parts to print specifications.

Prerequisite(s): MACH 103 with a C or better.

MACH 191  
MANUAL MACHINING FOR NON-MAJORS  
5 CR  
Proper setup of manual lathes and mills will be emphasized in this Introductory machining course for non-program students. Students will be able to identify all parts of an engine lathe and calculate settings to achieve desired speeds and feeds on a variety of different lathes. Work holding, the use of the 3 jaw chuck, facing, O.D. turning, grooving, parting-off and drilling will be covered. Students will hand grind their own tools from HSS lathe tool blanks. The proper use of a mill will be covered including: speed and feed adjustment, work holding and coordinate systems. The operations to be performed will be: tramping in a table, squaring a vise, tool setting, edge finding, facing, end mill use, drilling, and tapping.

Prerequisite(s): ENGR 115 with a C or better.

MACH 193  
CNC MACHINING FOR NON-MAJORS  
5 CR  
This introductory course covers the principles of CNC machining. The advantages of the CNC machine in production and the process differences between manual and CNC operations will be discussed. Students will read, write, and troubleshoot G-Code programs, setup CNC lathes and mills, and use CAM software to program a part to run on a CNC machine.

Prerequisite(s): ENGR 180 or ENGT 233, and MACH 191 with a C or better.

MACH 241  
INTRODUCTION TO CNC LATHE OPERATION  
5 CR  
Operation and setup of CNC lathes will be the focus of this course. Students will run CAM generated toolpaths. Skills acquired in this course include loading CAM programs, setting origins, loading tools, and setting and altering tool offsets. Students will demonstrate proficiencies in CNC lattice operations by producing multiple parts to print specifications.

Prerequisite(s): MACH 103 and MACH 142 with a C or better.

MACH 242  
ADVANCED CNC LATHE OPERATION  
5 CR  
Students will operate the Mazatrol to program parts for the Mazak lathe. Students will load and edit tools, set work offsets, and execute programs. Competencies will be demonstrated with the completion of projects to print specifications.

Prerequisite(s): MACH 241 with a C or better.

MACH 251  
INTRODUCTION TO CNC MILL OPERATION  
5 CR  
This course covers the setup and operation of Centroid bed mills and HAAS vertical milling centers. Students will run CAM generated toolpaths. Skills acquired in this course include conversational Centroid programming, loading CAM...
programs, setting origins with edge-finders and probes, selecting and loading tools, and setting and altering tool offsets. Students will demonstrate proficiencies in CNC mil operation by producing multiple parts to print specifications.

Prerequisite(s): MACH 103 and MACH 152 with a C or better.

MACH 252
ADVANCED CNC MILL OPERATION 5 CR
Students will build on skills obtained in MACH 251. The focus will be placed on the setup and operation of HAAS mills as well as the 5-axis DMS router. Tasks will include tool loading and clearance checks, work holding, program loading, and program alterations. Projects for this course will include complex geometry and contours. Proficiencies will be demonstrated with the production of parts to print specifications.

Prerequisite(s): MACH 251 with a C or better.

MACH 261
INTRODUCTION TO CAD/CAM FOR MACHINING 3 CR
An introduction to Computer Aided Manufacturing. This course will combine the CAD skills gained in ENGR 180 with MasterCam CAD/CAM software. Students use CAD/CAM geometry to create geometry and produce toolpaths for CNC lathes.

Prerequisite(s): ENGR 180 with a C or better.

MACH 263
INTERMEDIATE CAD/CAM FOR MACHINING 3 CR
Students will use Mastercam to create geometry and 2.5D toolpaths to run on CNC Mills. High Speed Toolpaths, Work Coordinate Systems, and Feature Based Machining will be explored.

Prerequisite(s): MACH 261 and MACH 171 with a C or better.

MACH 264
ADVANCED CAD/CAM FOR MACHINING 3 CR
A continuation of MACH 263, students will use a variety of 3D surfacing strategies in Mastercam to create programs for more complex part shapes. The 4th and 5th axis programming will also be introduced.

Prerequisite(s): MACH 263 with a C or better.

MACH 273
ADVANCED CNC MACHINING 6 CR
A combination of skills acquired from the completion of MACH 242, MACH 252, MACH 263, and QA 115 will be applied in this lab centered course. Each student will design, program, and manufacture an assembly of machined parts.

Prerequisite(s): MACH 242, MACH 252, MACH 263, and QA 115 with a C or better.

MANAGEMENT

MGMT 100
BUSINESS AND PROFESSIONAL ETHICS 3 CR
Current events have brought the concepts of ethics, both in the individual person as well as company practices, to the foreground. This course will discuss and examine, through critical analysis, the concept of ethics in the workplace. Some concepts that will be covered are: conflict of interest, secrecy and confidentiality, honesty, interpretation of ethics policies and rules, as well as the differences. This is a very interactive course. Text required.

MGMT 101
CONFLICT MANAGEMENT 1 CR
Conflict is described as a disagreement among two or more individuals. Managing the periodic incidence can prove to be challenging, as well as stressful. This course will give the student the tools to understand the reasons that conflict exists, how to stimulate conflict in a healthy and competitive way in order to increase performance, control conflict, and resolve and eliminate unnecessary conflict. Text required.

MGMT 102
THE LEADERSHIP PROCESS 3 CR
What makes a good "leader?" Leadership in individuals, whether they seem to have been born with certain "traits," or have developed various leadership behaviors, is an area that has been studied for a long time. This course will examine the attributes of leadership, how it develops, the behaviors that need to be encouraged, those that need to be modified, as well as how to manage the leadership process. Text required.

MGMT 154
CREATING AND MANAGING A SMALL BUSINESS 5 CR
This course examines the organization and operation of a small business. Topics include development of a business plan, failure factors in small businesses, sources of capital, record-keeping, financial statements, taxation, marketing, legal and regulatory issues, and best management practices.

MGMT 210
HUMAN RESOURCE MANAGEMENT 5 CR
Demonstrate knowledge of appropriate office supervisory skills. Introduces students to the fundamentals of supervisory management. Through lectures, text, case studies, projects, and simulations students will develop an understanding of principles to be used as guides for supervision in an office.

MARKETING

MKT 100
MARKETING FUNDAMENTALS 5 CR
This course will provide a comprehensive survey of fundamental marketing principles and skills. Students will learn how marketing professionals develop strategy, research consumer needs, and identify target markets. In addition to covering the importance of global marketing and e-commerce, students will learn how to satisfy market opportunities with the 4 Ps: product, pricing, promotion, and placement.

MATHEMATICS

AMATH 100
APPLIED OCCUPATIONAL MATH 5 CR
This course emphasizes mathematics used in the professional technical occupations. Student will learn mathematical skills in the following: fractions, decimals, percents, ratios & proportions, U.S. Customary Units and metric measurement systems, basic geometry and elementary algebra. The course will include relevant technical applications and the use of a calculator.

Prerequisite(s): Accuplacer Arithmetic score of 38 or ABE 050 with a C or better or approved alternate placement criteria.

AMATH 111
APPLIED TECHNICAL MATH 5 CR
This course introduces concepts of plane geometry, right triangle trigonometry, and vectors. The elements of algebra are extended into applications for technical professions using approximate numbers in measurement and emphasizing the rules of accuracy and precision. Included are the topics: unit conversions in metric and English systems, scientific notation, fractions, decimals, percents, ratios, and proportions. Textbook and scientific or graphing calculator required.

Prerequisite(s): Accuplacer Algebra score of 75 or MATH 098 with a C or better.

MATH 090
PRE-ALGEBRA 5 CR
A developmental math course to help students make the transition from Arithmetic to Algebra. Students will increase their math skills and gain the foundation for algebraic concepts and problem-solving. Students should have a working knowledge of Arithmetic. Included are topics on fractions, sets of numbers, applied problem solving, use of variables, simplifying expressions, and setting up equations to solve.

Prerequisite(s): Accuplacer Arithmetic score of 38 or ABE 050 with a C or better.

MATH 098
ELEMENTARY ALGEBRA 5 CR
This course will cover solving different forms of equations and inequalities, manipulating expressions, factoring and graphing. Problem-solving
MATH 099  
INTERMEDIATE ALGEBRA  5 CR
This course prepares students for entry into college-level math courses. Topics include second-degree equations, relations and their graphs, exponential and logarithmic functions, and rational expressions. A graphing calculator may be required.
Prerequisite(s): ACCUPLACER Algebra score of 75 or MATH 098 with a C or better.

MATH 107  
MATH IN SOCIETY  5 CR
This course exposes students to mathematical thought and quantitative thinking to solve problems in the context of real-world scenarios. It introduces topics such as consumer problem solving, voting/decision theory, graph theory, growth and decay models, finance, statistics, probability, and counting systems in the context of their applications.
Prerequisite(s): ACCUPLACER Algebra score of 75 or MATH 098 with a C or better.

MATH& 141  
PRECALCULUS I  5 CR
The focus of this course will be functions. Students manipulate and graph linear, polynomial, rational, exponential, logarithmic and quadratic functions. The course will also cover systems of equations, matrices and determinants, and their applications.
Prerequisite(s): ACCUPLACER College Level Math score of 75 or MATH 099 with a C or better.

MATH& 142  
PRECALCULUS II  5 CR
The majority of this course will cover trigonometry. Students will explore trigonometry functions, right and oblique triangle trigonometry, graphing, trigonometry identifies, laws of Sine and Cosine as well as trigonometric application problems. This course will also cover vectors in the plane and in space, along with parametric equations. Polar coordinates and graphs of polar equations will also be included.
Prerequisite(s): MATH& 141 with a C or better.

MATH& 146  
INTRODUCTION TO STATISTICS  5 CR
Fundamental concepts and basic tools of descriptive and inferential statistics. How to describe data and make reasonable conjectures about the populations from which the samples were taken. Topics include: sampling distribution patterns, organization of data, sampling methods and experimental design, probability and simulation of random events, estimation of population parameters, confidence intervals, correlation, linear regression and basic hypothesis testing. Internet/computer access and graphing calculator required.
Prerequisite(s): ACCUPLACER Level Math score of 75 or MATH 099 with a C or better.

MATH& 151  
CALCULUS I  5 CR
Study of functions, limits, continuity, limits at infinity, differentiation of algebraic, exponential, logarithmic, and trigonometric functions and their inverses.
Prerequisite(s): MATH& 142 with a C or better.

MATH& 152  
CALCULUS II  5 CR
The study of Riemann Sums, methods of integration, numerical methods, polar and rectangular forms, fundamental theorem of Calculus, areas of regions, volumes of solids, centroids, length of curves, surface area, and an introduction to differential equations.
Prerequisite(s): MATH& 151 with a C or better.

MATH& 163  
CALCULUS 3  5 CR
This course introduces coordinate systems and vectors in 2- and 3- space. We will extend the methods of single-variable differential calculus to functions of two or more independent variables and we will generalize the singe integral to define multiple integrals, where the integrand is a function of several variables. The course will cover partial differentiation, directional derivatives and gradients; extreme values; double and triple integrals; applications. Graphing calculator required.
Prerequisite(s): MATH& 152 with a C or better.

MATH 180  
TOPICS IN MATHEMATICS STATISTICS  1 CR
Through instructor consultation, as well as customized objectives and activities, students in this special topics course will complete an independent statistics project. Project topics will include one or more of the following: sampling distribution patterns, organization of data, sampling methods and experimental design, probability and simulation of random events, estimation of population parameters, confidence intervals, correlation, linear regression and basic hypotheses testing. Internet/computer access and graphing calculator required.
Prerequisite(s): MATH& 146 with a C or higher.

NURS 110  
INTRODUCTION TO HEALTH CONCEPTS  4 CR
This integrated course introduces the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts within each domain including: comfort, elimination, health, wellness and illness, mobility, tissue integrity, cognition, assessment, clinical decision making, communication, professional behaviors, teaching and learning, accountability, legal issues, safety, basic principles of pharmacology, and foundational nursing skills.
Prerequisite(s): MATH& 146, BIOL& 241, BIOL& 242, BIOL& 260, ENGL& 101, and PSYC& 200, all with a B or better; CHEM& 121 with a B or better or CHEM& 161 with a B or better; PSY& 100 and BIOL& 160, all with a C or better; 5 credits of Communications, all with a grade of C or better; 10 credits of Humanities, all with a grade of C or better; completion of NA 101 with a grade of C or better and NA 102 with a grade of C or better or Healthcare Experience verification. ATI TEAS scores: Reading 69.0 or better, Mathematics 63.3 or better, Science 45.8 or better, and English & Language Usage 60.0 or better.

NURS 115  
INTRODUCTION TO HEALTH CONCEPTS-CLINICAL LAB  6 CR
This course introduces the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts within each domain including: Elimination, Tissue Integrity, Sensory Perception, Cognition, Health, Wellness and Illness, Mobility, Comfort, Spirituality and Culture, Professional Behaviors, Communication, Assessment, Clinical Decision Making, Teaching and Learning, Foundational Nursing Skills, Legal issues, and Safety. These concepts are applied through on-campus theory, skills and simulation labs and off-campus clinical experiences at local elder care agencies, assisted living and long-term care facilities.

NURS 120  
HEALTH AND ILLNESS CONCEPTS 1  5 CR
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of fluid and electrolyte, acid base balance, oxygenation, metabolism, thermoregulation, perfusion, inflammation, mobility, infection, developmental concepts, family, health/wellness/illness, variations of physical assessment (pediatrics), communication, clinical decision making, caring and self-care. These concepts are applied through on-campus theory, skills and simulation labs and off-campus clinical experiences at same day procedural units, community based agencies, acute care, assisted living and long-term care facilities.
Prerequisite(s): NURS 110, and NURS 115 with a B- or better.
NURS 125  
**HEALTH & ILLNESS CONCEPTS 1**  
**CLINICAL LAB**  
6 CR  
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of fluid and electrolyte, acid base balance, oxygenation, metabolism, thermoregulation, perfusion, inflammation, mobility, infection control, comfort, stress, coping, grief, mood, addictive behavior, self, family, community, violence, health/wellness/illness. Concepts of professional behaviors, patient educator, collaboration, safety, health care systems, evidence based practice, informatics are introduced. These concepts are applied on-campus, skills and simulation labs and off-campus clinical experiences at same day procedural units, community based agencies, acute care, assisted living and long-term care facilities.

Prerequisite(s): NURS 120 and NURS 125 with a B- or better.

NURS 130  
**HEALTH & ILLNESS CONCEPTS 2**  
3 CR  
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of oxygenation, metabolism, perfusion, cellular regulation, sexuality, mobility, infection control, comfort, stress, coping, grief, mood, addictive behavior, self, family, community, violence, health/wellness/illness. Concepts of professional behaviors, patient educator, collaboration, safety, health care systems, evidence based practice, informatics are introduced. These concepts are applied on-campus, skills and simulation labs and off-campus clinical experiences through local community based agencies, acute care, assisted living and long-term care facilities.

Prerequisite(s): NURS 130 and NURS 135 with a B- or better.

NURS 135  
**HEALTH & ILLNESS CONCEPTS 2-**  
**CLINICAL LAB**  
6 CR  
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of oxygenation, metabolism, perfusion, cellular regulation, sexuality, mobility, infection control, comfort, stress, coping, grief, mood, addictive behavior, self, family, community, violence, health/wellness/illness. Concepts of professional behaviors, patient educator, collaboration, safety, health care systems, evidence based practice, informatics are introduced. These concepts are applied on-campus, skills and simulation labs and off-campus clinical experiences through local community based agencies, acute care, assisted living and long-term care facilities.

NURS 215  
**ACUTE HEALTH CONCEPTS-**  
**CLINICAL LAB**  
6 CR  
This course is designed to further develop the concepts within the three domains of individual, healthcare, and nursing. Emphasis is placed on the concepts of fluid and electrolyte, acid base balance, elimination, oxygenation, metabolism, thermoregulation, perfusion, inflammation, tissue integrity, mobility, infection control, stress/coping, family, health/wellness/illness, hospitalized individual, communication, clinical decision making, advanced clinical skills, patient educator, collaboration, managing care, safety, advocacy, informatics, point of care documentation, clinical decision and support systems. These concepts are applied through on-campus theory, skills and simulation labs and off-campus clinical experiences at inpatient regional facilities with focus on adult medical surgical acute care, and assisted living.

Prerequisite(s): NURS 130 and NURS 135 with a B- or better or acceptance into LPN-ADN Pathway.

NURS 220  
**COMPLEX HEALTH CONCEPTS**  
4 CR  
This course is designed to further develop the concepts within the three domains of the individual, healthcare and nursing. Emphasis is placed on the concepts of acid base balance, newborn thermoregulation, perfusion, reproduction, development, cellular regulation and cancer, comfort, violence, communication, collaboration, managing care, ethics and mastering previously learned concepts. These concepts are applied through on-campus theory, skills and simulation labs and off-campus clinical experiences at inpatient regional facilities with focus on specialty nursing areas and assisted living.

Prerequisite(s): NURS 210 and NURS 215 with a B- or better.

NURS 225  
**COMPLEX HEALTH CONCEPTS-**  
**CLINICAL LAB**  
6 CR  
This course is designed to further develop the concepts within the three domains of the individual, healthcare and nursing. Emphasis is placed on the concepts of acid base balance, newborn thermoregulation, perfusion, reproduction, development, cellular regulation and cancer, comfort, violence, communication, collaboration, managing care, ethics and mastering previously learned concepts. These concepts are applied through on-campus theory, skills and simulation labs and off-campus clinical experiences at inpatient regional facilities with focus on specialty nursing areas and assisted living.

Prerequisite(s): NURS 220 and NURS 225 with a B- or better.
NUTR 17
NUTRITION IN HEALTHCARE III  1 CR
Examines the scientific, economic, cultural, ethnic, and psychological implications of nutrition in relation to health across the lifespan and in the context of healthcare professions through an integrated format with theory NURS 110.
Prerequisite(s): NUTR 116 with a B- or better.

NUTR 215
NUTRITION IN HEALTHCARE IV  1 CR
Examines the scientific, economic, cultural, ethnic, and psychological implications of nutrition in relation to health across the lifespan and in the context of healthcare professions through an integrated format with theory NURS 210.
Prerequisite(s): NUTR 117 with a B- or better.

NUTR 216
NUTRITION IN HEALTHCARE V  1 CR
Examines the scientific, economic, cultural, ethnic, and psychological implications of nutrition in relation to health across the lifespan and in the context of healthcare professions through an integrated format with theory NURS 220.
Prerequisite(s): NUTR 215 with a B- or better.

PHIL 115
ETHICS AND POLICY IN HEALTHCARE I  1 CR
Explores values, ethics, and legal decision-making frameworks and policies used to support the well-being of people and groups within the context of the healthcare professions through an integrated format with theory NURS 110.
Prerequisite(s): Acceptance into the Nursing program.

PHIL 215
ETHICS & POLICY IN HEALTHCARE II  1 CR
Explores values, ethics, and legal decision-making frameworks and policies used to support the well-being of people and groups within the context of the healthcare professions through an integrated format with theory NURS 210.
Prerequisite(s): PHIL 115 with a B- or better.

PHIL 216
ETHICS & POLICY IN HEALTHCARE III  3 CR
Explores values, ethics, and legal decision-making frameworks and policies used to support the well-being of people and groups within the context of the healthcare professions through an integrated format with theory NURS 230.
Prerequisite(s): PHIL 215 with a B- or better.

PSYC 115
PSYCHOSOCIAL ISSUES IN HEALTHCARE I  1 CR
Examines some determinants of health and illness including social, psychological, environmental, spiritual, and cultural dimensions across the lifespan and within the context of health care through an integrated format with theory NURS 110.
Prerequisite(s): Acceptance into the Nursing program.

PSYC 116
PSYCHOSOCIAL ISSUES IN HEALTHCARE II  1 CR
Examines some determinants of health and illness including social, psychological, environmental, spiritual, and cultural dimensions across the lifespan and within the context of health care through an integrated format with theory NURS 120.
Prerequisite(s): PSYC 115 with a B- or better.

PSYC 117
PSYCHOSOCIAL ISSUES IN HEALTHCARE III  2 CR
Examines some determinants of health and illness including social, psychological, environmental, spiritual, and cultural dimensions across the lifespan and within the context of health care through an integrated format with theory NURS 130.
Prerequisite(s): PSYC 116 with a B- or better.

PSYC 215
PSYCHOSOCIAL ISSUES IN HEALTHCARE IV  1 CR
Examines some determinants of health and illness including social, psychological, environmental, spiritual, and cultural dimensions across the lifespan and within the context of health care through an integrated format with theory NURS 220.
Prerequisite(s): PSYC 117 with a B- or better.

NA 101
NURSING ASSISTANT ESSENTIALS  6 CR
Provide the student an opportunity to study the essential theoretical content necessary to meet the OBRA nursing assistant objectives. Fundamental caregiving skills are taught with an emphasis on safety and activities of daily living. While studying the care necessary for an individual of any age, a primary focus is placed on the care of the elderly, including rehabilitation and death and dying.
Prerequisite(s): Program admission and ACCUPLACER Reading Comprehension score of 50 or completion of ABE 054 with a C or better, and ACCUPLACER Arithmetic score of 38 or completion of ABE 050 with a C or better. Successful completion of HO 127 and HLTH 133.

NA 102
NURSING ASSISTANT CLINICAL  5 CR
During the clinical practicum the student is given the opportunity to put into practice those skills learned in the classroom and lab settings. The clinical experiences include orientation to the extended care facility and a clinical final exam which is conducted in the college lab.
Prerequisite(s): Program admission; and ACCUPLACER Reading Comprehension score of 50 or completion of ABE 054 with a C or better; and ACCUPLACER Arithmetic score of 38 or completion of ABE 050 with a C or better. Successful completion of HO 127 and HLTH 133.

NUTRITION

NUTR& 101
NUTRITION  5 CR
This course provides information pertaining to human nutrition and the function of nutrients in the body. Topics covered include anatomy and physiology of digestion and absorption; specific utilization of carbohydrates, protein, and fats; vitamin and mineral supplements. Other topics include food safety and the impact of diet on health and disease. Basic principles of chemistry, biology, and physics are applied to the study of nutrition.

OPERATIONS MANAGEMENT

OPM 311
MATHEMATICAL TECHNIQUES FOR OPERATIONS MANAGEMENT  5 CR
This course provides students with the foundational mathematical tools required for operations management including acceptance sampling; decision theory including its application under uncertain conditions; the application of probability theory to determine the reliability of systems; solution of linear programming problems using graphical and computational methods; and the application of learning curves for planning and scheduling. These techniques are introduced in this course and then exercised and practiced through repeated application to real problems in other courses.
Prerequisite(s): Admission to the BASOPS program.

OPM 312
FORECASTING AND SYSTEM DESIGN  5 CR
This course introduces students to forecasting and capacity planning tools for manufacturing and service organizations. Qualitative and quantitative techniques are discussed, and the pros and cons of each are identified. The selection of appropriate processes and facility layouts, and the design of work systems to optimize production are discussed; and the impact of good product design on production operations is highlighted. Maintenance planning is discussed including the differences between breakdown (reactive) and preventative (planned) maintenance. Techniques for job design such as methods analysis and time study methods are demonstrated. Both graphical and computational (spreadsheet) techniques are...
used throughout the course to solve a range of typical problems.
Prerequisite(s): Admission to the BASOPS program.

OPM 313
QUALITY MANAGEMENT 5 CR
This course is designed to equip students with the managerial concepts and quantitative tools used in effective and efficient management of quality in manufacturing and service organizations. The course begins with the quality management concepts espoused by Deming and discusses some of the resulting approaches such as Total Quality Management (TQM), Six Sigma, ISO 9000 and AS 9100. Quality requirements specific to regulated industries such as biomedical devices and aerospace will also be surveyed. Students will learn how to plan, implement and manage a comprehensive quality management program within an organization with special emphasis on process documentation, staff training, and communication of results to management and auditors.
Prerequisite(s): OPM 311 with a C or higher.

OPM 314
LOGISTICAL PLANNING AND SUPPLY CHAIN MANAGEMENT 5 CR
A supply chain is a sequence of organizations involved in the production and delivery of a product or service. Supply chain management is the coordination of those organizations, and logistics is the management of the flow of resources e.g. goods, materials, information; between the organizations. This course will introduce students to the complexities of and global supply chains including consideration of make/buy and outsourcing decisions. The importance of the procurement function is explored, and inventory management techniques are presented including the application of mathematical approaches to solve typical problems. Finally, the use of materials resource planning (MRP), manufacturing resource planning (MRPII) and enterprise resource planning (ERP) systems in operations management is examined.
Prerequisite(s): OPM 311 with a C or higher.

OPM 315
LEAN CONCEPTS AND APPLICATIONS 5 CR
Lean production is a modern management practice applicable to both manufacturing and service industries that considers the expenditure of resources for any goal other than the creation of value for the end customer to be wasteful and thus a target for elimination. This course introduces students to the theory behind Lean including concepts such as Value Stream Mapping, Workplace Organization and Standardization, 5-S and Cellular Flow. Terminology, including Kan Ban and Total Production Maintenance, and tools such as Gap Analysis, 5 Why’s, root cause analysis, Pareto charts, and cause effect diagrams are covered. The importance of workforce development and ongoing training to Lean implementation is stressed, and students will learn about the how to apply Lean techniques to both industrial and service operations.
Prerequisite(s): OPM 311 with a C or higher or ENGT 321 with a C or higher.

OPM 411
FACILITY LAYOUT AND MATERIALS HANDLING 5 CR
This course covers the design and optimal layout of industrial facilities, materials handling systems, and warehousing for the most efficient flow of raw materials, work-in-process, and completed product. Students, working in groups, will be required to develop a written proposal for a newly designed or modified facility including a financial justification for the project, and carry out a verbal presentation of their results.
Prerequisite(s): OPM 311 with a C or higher or ENGT 321 with a C or higher.

OPM 412
WORKPLACE HEALTH AND SAFETY MANAGEMENT 5 CR
This course provides a foundation for students to take on responsibility for the management of health and safety in the workplace. Students will learn about OSHA and the inspection process, identification of safety hazards and implementation of preventative measures, and developing a formal health and safety training program. The course will also cover work design and ergonomics aimed at increasing operator effectiveness and reducing production costs.
Prerequisite(s): OPM 311 with a C or higher or ENGT 321 with a C or higher.

OPM 413
MEASUREMENT AND STATISTICAL PROCESS CONTROL 5 CR
Statistical process control (SPC) is a quality control technique which employs statistical methods to monitor and control a process to ensure that it operates at its full potential, and that the finished products meet specified criteria. In this course, students will be introduced to key tools used in SPC include control charts, continuous improvement, acceptance sampling, and the design of experiments. Students will also be taught about fundamental metrology principles including error measurement and analysis, the impact of temperature and pressure on precision measurement; equipment calibration; and advanced test and measurement techniques.
Prerequisite(s): OPM 311 with a C or higher.

OPM 421
IT STRATEGY, MANAGEMENT AND DELIVERY 5 CR
This course examines the strategic role of IT within an organization. Students will learn how to assess the impact of emerging technologies, and then design information infrastructure and systems to support organizational structures.
Prerequisite(s): OPM 311, OPM 312, ENGL 310 all with a C or higher, and Instructor permission.

OPM 422
BUSINESS CONTINUITY AND DISASTER RECOVERY 5 CR
This course looks at how to identify business risk and impact; recognize mission-critical systems; and create, test and implement business continuity plans.

OPM 491
FOCUSED STUDY I 5 CR
Focused Study 1, 2 and 3: These courses provide students with opportunities to explore areas of professional interest and to develop a greater understanding of those areas through focused study and applied research under the direction of a faculty member and/or industry mentor. Topics to be studied will be agreed in conjunction with program faculty and approved by the program director; and each course will require both a written report and an oral presentation of the research findings.
Prerequisite(s): OPM 311, OPM 312, ENGL 310 all with a C or higher, and Instructor permission.

OPM 492
FOCUSED STUDY II 5 CR
Focused Study 1, 2 and 3: These courses provide students with opportunities to explore areas of professional interest and to develop a greater understanding of those areas through focused study and applied research under the direction of a faculty member and/or industry mentor. Topics to be studied will be agreed in conjunction with program faculty and approved by the program director; and each course will require both a written report and an oral presentation of the research findings.
Prerequisite(s): OPM 311, OPM 312, ENGL 310 all with a C or higher, and Instructor permission.

OPM 493
FOCUSED STUDY III 5 CR
Focused Study 1, 2 and 3: These courses provide students with opportunities to explore areas of professional interest and to develop a greater understanding of those areas through focused study and applied research under the direction of a faculty member and/or industry mentor. Topics to be studied will be agreed in conjunction with program faculty and approved by the program director; and each course will require both a written report and an oral presentation of the research findings.
Prerequisite(s): OPM 311, OPM 312, ENGL 310 all with a C or higher, and Instructor permission.
PERSONAL FITNESS TRAINER
PFT 100
FOUNDATIONS OF HEALTH AND FITNESS 6 CR
You will study the science and structure of the human organism and how it relates to exercise science. You will learn about food requirements, values and how food is broken down into usable fuel. You will develop and learn techniques to regulate and prescribe appropriate eating systems. You will learn operation and set up of digital and programmable exercise machinery, equipment repair and maintenance, facility safety, sports injury management and prevention and how gym etiquette is practiced. Program development helps you understand the many needs and requirements of your future client. You will learn the tools, skills and methods to determine how each client fits into the program schedule. Assessment of health risks, potential problem areas and special needs will be covered.

PHILOSOPHY
PHIL 310
PROFESSIONAL ETHICS 5 CR
This course aims to raise students' awareness of ethical dilemmas that might occur at work, to show how such ethical issues are subject to management analysis and decision-making action, and to provide students with the conceptual tools necessary to identify and then develop an acceptable resolution of these dilemmas. The course will include the presentation of ethical arguments to groups, and debate on their merits. 
Prerequisite(s): Admission to BASOPS program or admission to the BASET program or Instructor permission.

PHYSICS
PHYS& 110
PHYSICS FOR NON-SCIENCE MAJORS W/LAB 5 CR
A course for non-science majors exploring the central concepts of physics while focusing on applications. The principles and laws of physics are covered on a conceptual level and everyday examples are treated. Topics include Newton's laws of motion, fluids, energy and magnetism, and waves (sound and light). Laboratory work provides and introduction to the scientific method and role of measurement in science and serves to demonstrate the application of physics concepts. 
Prerequisite(s): Accuplacer Algebra score of 75 or better or MATH 098 or AMATH 111 (or higher) with a C or better.

PHYS& 114
GENERAL PHYSICS I W/LAB 5 CR
An algebra-based introduction to classical mechanics and problem-solving in physics, designed for students majoring in technically oriented fields that do not require a calculus-oriented approach. Topics include kinematics description of motion, forces and Newton's Law, gravity, momentum and energy. Emphasis will be placed on problem solving, mathematical reasoning, computer-aided laboratory investigations, and the scientific method. 
Prerequisite(s): MATH& 142 with a C or better.

PHYS& 221
ENGINEERING PHYSICS I W/LAB 5 CR
PHYS& 221 is the first in a three-course calculus-based survey of physics for engineering pathways. The course introduces the fundamental principles of mechanics; kinematics, momentum and energy conservation laws, physical interactions, force, work, rotation, torque and gravity. Conceptual development and problem solving have equal emphasis. Laboratory work includes
experimental methods, data analysis, and prepares students for coursework in engineering.

Prerequisite(s): ENGL 101 with a C or better.
Prerequisite or Corequisite: MATH& 151 with a C or better.
Completion Of or Concurrent Enrollment In: MATH& 151 with a C or better.

PHYS& 222
ENGINEERING PHYSICS II W/LAB  5 CR
PHYS& 222 is a calculus-based introduction to electricity and magnetism that prepares students for coursework in engineering. The course introduces the fundamental principles of electricity and magnetism: electrostatics; magnetic fields of steady currents; time-varying electric and magnetic fields; DC and AC circuits. Conceptual development and problem solving have equal emphasis. Laboratory work includes an introduction to design, experimental methods and data analysis.
Prerequisite(s): PHYS& 221 with a C or better.
Prerequisite or Corequisite: MATH& 152.
Completion Of or Concurrent Enrollment In: MATH& 152.

PHYS& 223
ENGINEERING PHYSICS III W/LAB  5 CR
PHYS& 223 is a calculus-based introduction to rotations and oscillations, wave phenomena and optics that prepares students for coursework in engineering. Conceptual development and problem solving have equal emphasis. Laboratory work includes an introduction to design, experimental methods, and data analysis.
Prerequisite(s): PHYS & 222 with a C or better.

POLITICAL SCIENCES

POLS& 202
AMERICAN GOVERNMENT  5 CR
Focus is given to the system, process, and organizational functions of the American government. It also puts primary attention on the relationships between citizens and their national government by exploring the key theoretical precepts that shaped the Constitution and its federal structural arrangements. Close attention is paid to the policy making process and its key actors, as well as various public policies.
Prerequisite(s): Accuplacer Reading Comprehension score of 50 or ABE 054 or ABE 055 with a C or better; and Accuplacer Sentence Skills score of 50 or ENGL 092 with a C or better.

PROCESS TECHNOLOGY

PTEC 101
INTRODUCTION TO PROCESS TECHNOLOGY  5 CR
In this course students will study various aspects of the Process Industry, including its history; roles, responsibilities, and expectations of the Process Technician; team dynamics; basic physics and chemistry; safety, and quality management. In addition, the course will cover basic components of the Process Industry environment, such as piping and valves; tanks, drums, and vessels; pumps and compressors; steam turbines; electricity and motors; heat exchangers; cooling towers and fans; furnaces and boilers; distillation columns; process control instrumentation; process utilities and auxiliary systems; and process print reading.
Prerequisite(s): ACCUPLACER Algebra score of 75 or Math 098 with a C or better; ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; CAP 101 with a C or better or passing scores in the Internet and Computing Core Certification (IC3) test battery or successful completion of Digitools or Tech Connections completed at Whatcom County high schools.

PTEC 102
PROCESS TECHNOLOGY I (EQUIPMENT)  5 CR
The purpose of this course is to provide an overview of the equipment and tools used in the process industry, including piping, tubing, hoses and fittings; valves; pumps; compressors; turbines; motors and engines; power transmission and lubrication; heat exchangers; cooling towers; furnaces and boilers; filters and dryers; vessels; and process diagrams. Students will be introduced to many process related equipment concepts, such as purpose, components, operation, and the Process Technician’s role for operating and troubleshooting the equipment.
Prerequisite(s): PTEC 101 with a C or better.
Completion Of or Concurrent Enrollment In: PTEC 101 with a D or better; or concurrent enrollment in PTEC 101; or Instructor permission.

PTEC 103
SAFETY, HEALTH & ENVIRONMENT I  5 CR
In this course, students will study industrial hazards types, including physical, chemical, ergonomic, and biological. Within these four general types, specific agents, causative factors, and effects will be identified along with controls, alarms, and detection systems. The course will focus on hazardous chemicals found in the process industry.
Prerequisite(s): PTEC 101 and PTEC 102.

PTEC 104
PROCESS DRAWINGS  2 CR
In this course, students will study various process drawings such as a Process Flow Diagram (PFD) and Piping and Instrumentation Diagram (P&ID). This course will cover how to read detailed diagrams in the process industry which shows the piping and vessels in the process flow, together with the instrumentation and control devices. Students will use these drawings to analyze process flows, equipment, isolation valves, instrumentation and process control loops. Additionally, students will use process diagrams for determining safe isolation procedures.
Prerequisite(s): PTEC 101 and PTEC 102.

PTEC 105
PROCESS TECHNOLOGY II (SYSTEMS)  5 CR
In this course, students will study the interrelation of process equipment and process systems. Specifically, students will be able to arrange process equipment into basic systems; describe the purpose and function of specific process systems; explain how factors affecting process systems are controlled under normal conditions; and recognize abnormal process conditions. In addition, students are introduced to the concept of system and plant economics.
Prerequisite(s): PTEC 101 and PTEC 102.

PTEC 109
INTRO TO WWT  5 CR
In this course, students will be introduced to the various methods and processes for fresh water and wastewater treatment. These will include the steps of preliminary, primary, secondary and tertiary treatment which involve the operations of sedimentation, biological and chemical reacting, thickening, drying, filtration, mixing, and disinfection. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to water processing.
Completion Of or Concurrent Enrollment In: CAP 101 with a C or better; or concurrent enrollment in CAP 101; or Instructor permission.

PTEC 110
PROCESS INSTRUMENTATION  5 CR
In this course, students will study process variables and the various instruments used to sense, measure, transmit, and control these variables. The course also introduces students to control loops and the elements that are found in different types of loops, such as controllers, regulators, and final control elements. The course concludes with a study of instrumentation drawings and diagrams along with a unit on troubleshooting instrumentation.
Prerequisite(s): PTEC 103 and PTEC 105 and AMATH 111, or Instructor permission.
PTEC 190
FOOD PROCESSING 3 CR
In this course, students will be introduced to the various methods and processes for producing foods. These will include the operations of heat- ing, drying, reacting, mixing, separating, and granulating. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to food processing. This course may be either live, a hybrid, or online.
Prerequisite(s): CAP 101.

PTEC 191
NON-REFINING PROCESSES 3 CR
In this course, students will be introduced to local and regional non-petroleum refining processes such as Food Processing, Dry Materials Processing, Pulp and Paper Mill Processing among others. Students will analyze and compare other industry processes. Topics range from industry specific safety and environmental concerns to exploring career opportunities. The students will have an opportunity to meet and tour local industries.
Prerequisite(s): CAP 101.

PTEC 192
PULP & PAPER PROCESSING 3 CR
In this course, students will be introduced to the various methods and processes for producing pulp and paper. These will include the operations of feedstock preparation, digestion, bleaching, drying, reacting, mixing, separating, and pressing. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to pulp and paper processing. This course may be either live, a hybrid, or online.
Prerequisite(s): CAP 101.

PTEC 193
UPSTREAM PROCESS 3 CR
In this course, students will be introduced to the various methods and processes for locating and producing oil. In addition, the geology of the formation of oil deposits will be covered as well as an overview of the regulations for oil exploration. The methods and operations include exploration, drilling, completion of the well. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to upstream processing. This course may be either live, a hybrid, or online.
Prerequisite(s): Completion of or concurrent enrollment in CAP 101.

PTEC 194
WASTEWATER TREATMENT 3 CR
In this course, students will be introduced to the various methods and processes for wastewater treatment. These will include the steps of preliminary, primary, secondary and tertiary treatment which involve the operations of sedimentation, biological and chemical reacting, thickening, drying, filtration, mixing, and disinfection. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to pulp and paper processing. This course may be either live, a hybrid, or online.
Prerequisite(s): Completion of or concurrent enrollment in CAP 101.

PTEC 195
BIODEisel FUNDAMENTALS 3 CR
In this course, students will be introduced to the various methods and processes for producing biodiesel. These will include the operations of feedstock preparation, reaction, mixing, separating, and washing. The equipment necessary to provide and control these operations. Quality control, safety, and jobs available in this industry will also be covered. Students will also prepare biodiesel in the laboratory and in a pilot plant. A project related to biodiesel production will also be required. This course may be either live, a hybrid, or on-line with access to the laboratory and pilot plant.
Prerequisite(s): Completion of or concurrent enrollment in CAP 101.

PTEC 196
GREEN ENERGY 3 CR
In this course, students will be introduced to the various methods and processes for producing green energy. These will include the production of renewable energy by wind, solar, hydroelectric, wave, and biofuels. The equipment necessary to provide and control these operations; quality control, safety, and jobs available in this industry will also be covered. Students will also do a project related to green energy. This course may be either live, a hybrid or on-line.
Prerequisite(s): CAP 101.

PTEC 197
COOPERATIVE EDUCATION 3 CR
In this course, students will be given credit for courses or portions of courses taken at other educational institutions. Examples of these include trips to other PTEC schools to operate special pieces of equipment or learn specialized topics. Students will be required to perform the required portion of coursework and to prepare a written and oral report.
Prerequisite(s): PTEC 103, PTEC 105; open to currently enrolled PTEC students with Instructor permission.

PTEC 198
BASIC MECHANICAL SKILLS 3 CR
In this course, students will learn and practice the use of basic hand tool and power tool to disassemble various pieces of industrial equipment, to include valve maintenance an value repacking. Reading and interpreting manufacturers technical manuals and equipment drawings. Student will disassemble, inspect pipe flanges, install blinds, make up piping flanges and connections in accordance with applicable documentation.
Prerequisite(s): Completion of or concurrent enrollment in CAP 101.

PTEC 199
POWER GENERATION 3 CR
In this course, students will be introduced to multiple types of power generation such as Boilers, Co-Generation, Wind and Hydro Power. This will include the operations of boilers, steam turbines, gas turbines, wind and hydro turbines. The equipment necessary to provide and control these operations, quality control, safety, and jobs available in this industry will also be covered. Students will visit a power generation site and discuss with operators the unique industry requirements and job outlook. A project related to power generation will also be required. This course may be either live, a hybrid, or online with access to the laboratory and pilot plant.
Prerequisite(s): CAP 101.

PTEC 203
SAFETY, HEALTH & ENVIRONMENT II 5 CR
Continued instruction in the application of concepts presented in Safety, Health, & Environment I with an emphasis on emergency response concepts. The student will demonstrate appropriate response to emergency situations; recognize hazardous situations for personnel, environment, and the community; and apply team skills in response to emergency situations.
Prerequisite(s): PTEC 110.

PTEC 205
DYNAMIC PROCESS CONTROL 5 CR
Multiple dynamic process simulators operating in a PC Lab environment will be utilized as the foundational elements of the course learning activities. Computer simulations of fired heaters and distillation systems will be operated in normal, off-normal, emergency, start-up and shutdown modes. The course will be conducted as a “hands on” operating experience using both small-group and individual simulation activities, assignments and scenarios.
Prerequisite(s): PTEC 110.

PTEC 207
QUALITY CONTROL 5 CR
The purpose of this course is to provide students with an overview of, or introduction to, the field of quality control within the process industry. In this course, students will be introduced to many process industry-related quality concepts, including operating consistency, continuous improvement, plant economics, team skills, and statistical process control (SPC). This course may be either live, a hybrid or on-line.
Prerequisite(s): PTEC 110.
PTEC 211 TROUBLESHOOTING 5 CR
In this course, students will be introduced to troubleshooting controllers, control schemes, and advanced control schemes at a level appropriate for the process technician. The student will learn about different types of Process Technology troubleshooting techniques, procedures, and methods used to solve process problems. Topics include application of data collections and analysis, cause-effect relationships, and reasoning.
Prerequisite(s): PTEC 110.

PTEC 212 INDUSTRIAL PROCESSES & EQUIPMENT 5 CR
The purpose of this course is to provide the student with an understanding of the typical process systems employed in process technology companies such as: petroleum refining, wastewater treatment, food processing, pulp and paper processing, and power generation. Special emphasis will be placed upon systems that are utilized by local area process technology companies. Lab assignments and activities will be conducted to illustrate and simulate typical industrial processes. The student will understand construction, theory of operation, and typical uses of process industry equipment.
Prerequisite(s): PTEC 110.

PTEC 215 PROCESS TECHNOLOGY III (OPERATIONS) 5 CR
Provides an overview of the field of operations within the process industry. Students will use existing knowledge of equipment, system, and instrumentation to understand the operation of an entire unit. Students study concepts related to commissioning, normal startup, normal operations, normal shutdown, turnarounds, and abnormal situations as well as the Process Technician’s role in performing the tasks associated with these concepts within an operating unit.
Prerequisite(s): PTEC 110.

PTEC 221 PRELIM & SEC WWT STAGE 1 5 CR
Students will be introduced to the various methods and processes for preliminary and secondary treatment of wastewater. These will include the steps of preliminary, primary, and secondary treatment which involve the operations of contaminant removal equipment, sedimentation systems, biological and chemical reactors, thickeners, and mixing systems. The class will discuss the equipment necessary to provide and control these operations, quality control methods, and safe work practices. Students will also do a project related to waste water processing.
Prerequisite(s): PTEC 109 with a D or better or Instructor permission.

PTEC 222 SOLIDS & REGS WWT STAGE 2 5 CR
This course will cover methods and technology associated with solids treatment and regulatory issues associated with Water Treatment processes. Processes, equipment, operations and operator duties/responsibilities will be covered. Regulations related to permit compliance and standard record keeping will also be covered.
Prerequisite(s): PTEC 109 with a D or better or Instructor permission.

PTEC 223 WATER & ADV WWT STAGE 3 5 CR
This course will cover methods and technology associated with fresh water treatment, water disinfection and advanced treatment of wastewater. Processes, equipment, operations and operator duties/responsibilities will be covered. The class will discuss the equipment necessary to provide and control these operations, quality control methods, and safe work practices. Students will also do a project related to fresh water processing.
Prerequisite(s): PTEC 109 with a D or better or Instructor permission.

PTEC 224 WWT TEST PREPARATION 3 CR
This course will prepare the participant to successfully apply for and take the Operator in Training exam. Topics include managing the operational and maintenance needs of water and wastewater treatment facilities; water quality concerns and disinfection; interpreting and applying Federal, State and Local rules and regulations; planning and record keeping requirements.
Prerequisite(s): PTEC 109 with a D or better or Instructor permission.

PTEC 227 PROCESS TECHNOLOGY PROJECT I 5 CR
This is a culminating project assignment for an individual or a group of students. The instructor may assign a specific topic for the project or work with a local industry/plant to define a particular project topic from a real-life situation. The student or the group of students will define the problem, resources needed, postulate the hypothesis/solution, research the problem and possible solutions, visit the plant, interview/consult with instructor/engineers/technicians and other resources and internet to develop a solution. The student or the group will then write the technical report defining the complete process from defining the problem, methodology applied, and conclusion. This may also require building a piece of equipment, writing a software program, or writing safety or operational procedures.
Prerequisite(s): PTEC 109.

PTEC 272 PROCESS TECHNOLOGY PROJECT II 5 CR
This may be a continuation of PTEC 270 or a separate assignment. For the degree student, this is a culminating project for an individual or group. The instructor may assign a topic for the project or work with a local industry to define a project topic from a real-life situation. The student or group of students will define the problem, resources needed, postulate the hypothesis/solution, research the problem and possible solutions, visit the plant, interview /consult with instructor/engineers/technicians and other resources, and develop a solution. The student or group will then write a technical report outlining the complete process from defining the problem, methodology applied and conclusion. This may also require building a piece of equipment, writing a software program, or writing safety or operational procedures.

PTEC 290 PROCESS TECHNOLOGY PRACTICUM/INTERNSHIP I 5 CR
This elective course provides work experience in a Process Technology related environment so that students may expand their technical knowledge and skills. Specific performance skills and customized objectives will be developed for each student. Clock hours are variable and may be repeated for clock hour credit.
Prerequisite(s): PTEC 101.

PTEC 291 PROCESS TECHNOLOGY PRACTICUM/INTERNSHIP II 5 CR
This elective course provides work experience in a Process Technology related environment so that students may expand their technical knowledge and skills. Specific performance skills and customized objectives will be developed for each student. Clock hours are available and may be repeated for clock hour credit.
Prerequisite(s): PTEC 101.

PSYCHOLOGY

PSYC 100 GENERAL PSYCHOLOGY 5 CR
An overview of the factors affecting behavior including topics related to theories of learning, the senses, perceptions, nervous system, emotions, personality theory, motivation, abnormal behavior and therapy, and social psychology.
Prerequisite(s): Accuplacer Reading Comprehension score of 85 or RDG 085 with a B or better; and Accuplacer Sentence Skills score of 86 or ENGL 092 with a B or better or AENGL 100 with a C or better.
RADIOLOGIC TECHNOLOGY

RT 101

RADIOGRAPHIC POSITIONING I  6 CR
This course introduces the basic positioning techniques used in the radiography of the respiratory system, abdomen, upper and lower extremities. Lab sections include peer positioning, film critique, anatomical identification pathologies and an energized section using phantoms.

Prerequisite(s): Admission to the Radiologic Technology program.

RT 102

RADIOGRAPHIC POSITIONING & ANATOMY II  6 CR
This course introduces the basic positioning techniques used in the radiography of the bony thorax, spinal column, pelvic girdle and continuation of the upper and lower extremities. Lab sections include peer positioning, film critique, anatomical identification, pathologies and an energized section using phantoms.

Prerequisite(s): RT 101 with a minimum grade of C.

RT 103

RADIOGRAPHIC POSITIONING AND ANATOMY III  5 CR
This course introduces the basic positioning techniques used in the radiography of the digestive system, urinary system, and cranium. Lab sections include peer positioning, film critique, anatomical identification, pathologies and an energized section using phantoms.

Prerequisite(s): RT 102 with a minimum grade of C.

RT 108

MEDICAL INFORMATICS  4 CR
This course will investigate the integration of computer capabilities, information science and health care. This course will include key elements that are driving our national health care system to electronic records and the complex issues that arise in this transition. Issues addressed include methods required to optimize the acquisition, storage, retrieval, and use of information in health and biomedicine. Imaging informatics, PACS systems, RIS (Radiology Information Systems) and HIS (Hospital Information Systems) will be included in this course.

Prerequisite(s): RT 103 with a minimum grade of C.

RT 112

PATIENT CARE IN RADIOLOGY  4 CR
This course provides the student with basic concepts of patient care, including consideration for the physical and psychological needs of the patient and family. Routine patient care will be included, as well as infection control techniques, vital signs, safety and transfer positioning, medical emergencies, barium studies, oxygen therapy and catheters. Patient education and documentation will be addressed.

Prerequisite(s): Admission to the Radiologic Technology program.

RT 114

LEADERSHIP SEMINAR  2 CR
This course is designed to encourage leadership principles in students including participation and project development for professional organizations.

Prerequisite(s): Admission to the Radiologic Technology program.

RT 120

IMAGE ACQUISITION  4 CR
This course is designed to establish a knowledge base in factors that govern and influence the production and recording of radiologic images. Emphasis will be on electronic imaging with related accessories. Topics to be included are basic radiographic production, imaging standards, radiographic density and contrast, recorded detail, distortion, exposure latitude, beam-limiting devices, beam filtration, technique formulation, exposure calculations, image acquisition. Lab exercises will provide application of theories using energized equipment and test tools.

Prerequisite(s): Admission to the Radiologic Technology program.

RT 121

RADIOGRAPHIC PHYSICS I  4 CR
This course is designed to establish a knowledge base in atomic structure and terminology. Included are the nature and characteristics of radiation, x-ray production and the fundamentals of photon interactions with matter. An introduction to the principles of radiation protection is included. Lab activities will provide application for the course theories.

Prerequisite(s): RT 120 with a minimum grade of C.

RT 123

RADIOGRAPHIC PHYSICS II  4 CR
This course is designed to establish a knowledge base regarding the digital environment in imaging. Comparison of direct digital capture and computed imaging radiographic, fluoroscopic, mobile, mammographic equipment requirements and design. Content includes exploration of medical informatics and picture archiving and storage in the electronic environment.

Prerequisite(s): RT 102, RT 121, and RT 131, all with a C or higher.

RT 131

RADIOGRAPHIC CLINIC I  7 CR
This course consists of two clinical assignments of eight-hour work shifts per week. Students are assigned clinical experience in a radiology department to complete clinical competencies correlating with academic coursework.

Prerequisite(s): RT 101, RT 112, RT 114, and RT 120 with a minimum grade of C in each course.

RT 132

RADIOGRAPHIC CLINIC II  7 CR
This course consists of two clinical assignments of eight-hour work shifts per week. Students...
are assigned clinical experience in a radiology department to complete clinical competencies correlating with academic coursework.

Prerequisite(s): RT 131 with a minimum grade of C.

RT 133
RADIOGRAPHIC CLINIC III 8 CR
This course consists of clinical assignments correlating with current academic course work. Assignments will include rotations at hospitals, clinics or doctors offices in regional areas. Rotations may include day, evening or weekend schedules.

Prerequisite(s): RT 132 with a minimum grade of C.

RT 201
ADVANCED PATIENT PROCEDURES AND PATHOLOGY I 4 CR
This course includes applications of patient care, procedures and pathology related to trauma, surgical, pediatric, digestive, respiratory, urinary and skeletal/muscular systems. Students will present case studies incorporating patient history, care considerations, procedures and pathology.

Prerequisite(s): RT 108 and RT 231 with a minimum grade of C in each course.

RT 202
ADVANCED PATIENT PROCEDURES AND PATHOLOGY II 4 CR
This course includes applications of patient care, procedures and pathology related to reproductive, circulatory, lymphatic, endocrine, nervous and sensory organs. Students will present case studies incorporating patient history, care considerations, procedures and pathology.

Prerequisite(s): RT 201 with a minimum grade of C.

RT 205
PHARMACOLOGY 3 CR
This course will provide basic concepts of pharmacology. Concepts included are pharmacokinetic and pharmacodynamic principles of drugs, categories specific to drugs, actions and side effects of select medications, and legal and ethical status of radiographer’s role in drug administration.

Prerequisite(s): RT 103 and RT 123 with a minimum grade of C in each course.

RT 210
RADIATION BIOLOGY 4 CR
This course provides an overview of the principles of the interaction of radiation with living systems. The factors that affect biological response to include acute and chronic effects of radiation. Includes examination of standards, measurements and requirements required by government guidelines.

Prerequisite(s): RT 108 and RT 231 with a minimum grade of C in each course.

RT 230
REGISTRY REVIEW AND EMPLOYMENT READINESS 4 CR
This course is designed to provide students with opportunities to prepare for registry review and employment readiness. Registry review will be provided utilizing presentations and computer applications. Students will prepare a professional portfolio for employment and practice interview skills.

Prerequisite(s): RT 210 and RT 201 with a minimum grade of C in each course.

RT 231
RADIOGRAPHIC CLINIC IV 10 CR
This course consists of clinical assignments correlating with current academic course work. Assignments will include rotations at hospitals, clinics or doctors offices in regional areas. Rotations may include day, evening or weekend schedules.

Prerequisite(s): RT 133 with a minimum grade of C.

RT 232
RADIOGRAPHIC CLINIC V 10 CR
This course consists of three clinical assignments of eight-hour shifts per week. Students are assigned clinical experience in a radiology department to complete sixth quarter clinical competencies and select specialized rotations.

Prerequisite(s): RT 231 with a minimum grade of C.

RT 233
RADIOGRAPHIC CLINIC VI 10 CR
This course consists of clinical assignments correlating with current academic course work. Assignments will include rotations at hospitals, clinics or doctors offices in regional areas. Rotations may include day, evening or weekend schedules.

Prerequisite(s): RT 232 with a minimum grade of C.

READING

RDG 085
READING SKILLS 5 CR
This course focuses on developing technical/college level reading. Emphasis is placed on locating main ideas, summarizing, critical thinking skills and digital literacy. Students will document reading strategies for a variety of reading material as well as map navigation process for on-screen readings. Practices include daily reading, group work, vocabulary expansion, critical thinking, and summary writing.

Prerequisite(s): Accuplacer Reading Comprehension score of 50 or ABE 054 or ABE 055 with a C or better, and Accuplacer Sentence score of 50 or ABE 052 or ABE 055 with a C or better.

SOCIOLOGY

SOC& 101
INTRODUCTION TO SOCIOLOGY 5 CR
This course introduces the major concepts and definitions of the science of sociology. Basic sociological inquiry is covered, and how social forces shape communal and individual behaviors and attitudes. Topics include socialization, cultures, deviance, social control, inequality, power, social class, race, gender, and institutions. Students learn the basic theories and perspectives of sociology and how those theories apply to the social landscape.

Prerequisite(s): Accuplacer Reading Comprehension score of 85 or RDG 085 with a B or better; and Accuplacer Sentence Skills score of 86 or ENGL 092 with a B or better or AENGL 100 with a C or better.
SPANISH

SPANISH I 5 CR
This course covers basic communication for comprehension, speaking, reading, and writing in Spanish with a focus on interactions in business situations. Students will learn specific vocabulary and skills to communicate with Spanish-speaking clients in a professional setting. This course will also provide an introduction to Hispanic cultures.

SPANISH II 5 CR
A continuation of Spanish I. The vocabulary and grammatical structures are more complicated, and the student begins to master a past tense. Oral comprehension and speaking skills are emphasized through daily practice, as well as the reading and writing exercises.

SURGERY TECHNOLOGY

SURG 100 INTRO TO SURGERY TECHNOLOGY 2 CR
This course provides information related to the role of the surgical technologist within the surgical team, operative environment with an emphasis on physical requirements of the surgical technician, professional roles, inter-departmental/peer/relationships and medical communication used in surgical technology. An introduction to the profession will include: history of surgery, surgical ethics and law and principles of aseptic technique. In addition, college and program policies will be introduced. You are required to receive a B in this course to apply to the program.

SURG 120 SURGERY TECHNOLOGY I 12 CR
The student will gain theoretical and practical knowledge of general equipment, instrumentation, surgical team member roles and health care facilities and their management. Includes physical, psychological, and ethical aspects of patient care in addition to principles of aseptic technique, sterilization and safety in the operating room. Students will participate in activities that help to identify, manage and apply general terminology in procedures and techniques used to achieve proper interaction with customers, shop managers and fellow employees will be emphasized. Proper interaction with customers, shop managers and fellow employees will be emphasized. The student will participate in activities that help to identify, manage and apply general terminology in procedures and techniques used to achieve

SURG 125 SURGERY TECHNOLOGY LAB I 10 CR
The student will participate in lab activities based on principles and techniques of operating room procedure. Students will develop skills necessary to plan, set-up and maintain sterile fields. In addition, the student will orient to health care facilities.

Prerequisite(s): MATH& 107 (or higher), BIOL& 241, BIOL& 242, BIOL& 260, ENGL& 101, and SURG 100, all with a B or better; CHEM& 121 with a B or better or CHEM& 161 with a B or better; PSYC& 100 (or CMST& 210), BIOL& 160, and HT 126, all with a C or better. ATI TEAS scores: Reading 69.0 or better, Mathematics 63.3 or better, Science 45.8 or better, and English & Language Usage 60.0 or better.

Corequisite(s): SURG 120.

SURG 133 SURGERY TECHNOLOGY II 10 CR
In this course the student will gain further theoretical and practical knowledge of specialty equipment, instrumentation, and surgical supplies. The student will detail intra operative care techniques and the surgical technologist’s role in surgical case preparation and surgical procedures.

Prerequisite(s): SURG 120 and SURG 125 with a C+ or higher in each class.

Corequisite(s): SURG 136.

SURG 136 SURGERY TECHNOLOGY CLINICAL PRACTICE I 12 CR
The students will participate in activities that correlate the theories and principles of surgical procedure and technique in a mock operating room (lab) setting. In addition students will assume the role of a student surgical technologist participating in surgical procedures in affiliated hospitals, surgery centers or clinics.

Prerequisite(s): SURG 120 and SURG 125 with a C+ or higher in each course.

Corequisite(s): SURG 133.

SURG 143 SURGERY TECHNOLOGY III 6 CR
In this course the student will gain further theoretical and practical knowledge of specialty equipment, instrumentation, and surgical supplies. The student will detail the surgical technologists’ role in procedures and techniques used to achieve intraoperative hemostasis, proper patient documentation and patient care emergencies. The students will also describe the surgical technologists’ professional and legal responsibilities.

Prerequisite(s): SURG 133 and SURG 136 with a C+ or higher in each course.

Corequisite(s): SURG 145.

SURG 145 SURGERY TECHNOLOGY CLINICAL PRACTICE II 10 CR
The students will participate in activities that correlate the theories and principles of surgical procedure and technique in a mock operating room (lab) setting. In addition students will assume the role of a student surgical technologist with emphasis on independent scrubbing on surgical procedures in affiliated hospitals, surgery centers or clinics.

Prerequisite(s): SURG 133 and SURG 136 with a C+ or higher in each course.

Corequisite(s): SURG 143.

TRANSPORTATION

TRANS 101 BASIC TRANSPORTATION SERVICE & SYSTEMS 101 5 CR
Basic Transportation is a hybrid class. A portion of the lecture component will be delivered through an online “textbook.” Students will be introduced to basic automotive and diesel repair practices. Proper interaction with customers, shop managers and fellow employees will be emphasized.

NOTE: Diesel Technology students must complete all General Education requirements prior to entering DET 139, DET 240 and DET 242. Automotive Technology students must complete all General Education requirements prior to entering AUTO 219.

Prerequisite(s): Instructor permission.

Note: This class must be taken concurrently with TRANS 102 and TRANS 103.

TRANS 102 BASIC TRANSPORTATION SERVICE & SYSTEMS 102 5 CR
Basic Transportation is a hybrid class. A portion of the lecture component will be delivered through an online “textbook.” Students will begin to apply tool use and shop practices that are introduced in Basic Transportation 102. These practices will be demonstrated on shop and customer vehicles.

NOTE: Students are required to complete all General Education courses before entering DET 139, DET 240, DET 242.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; and a valid driver's license or Instructor permission.

Note: This class must be taken concurrently with TRANS 101 and TRANS 103.

TRANS 103 BASIC TRANSPORTATION SERVICE & SYSTEMS 103 5 CR
Basic Transportation is a hybrid class. A portion of the lecture component will be delivered through an online “textbook.” Student will continue to

www.btc.edu 159
implement the knowledge they have gained in Trans 101 and 102 to more advanced vehicle systems. Students at this point will have the basic knowledge of dealing with customer concerns, verifying their concerns and beginning to diagnose basic problems. NOTE: Students are required to complete all General Education courses before entering DET 139, DET 240, DET 242.

Prerequisite(s): ACCUPLACER Arithmetic score of 38 or MATH 090 with a C or better or ABE 050 with a C or better; and ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better, and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; and a valid driver’s license or Instructor permission.

Note: This class must be taken concurrently with TRANS 101 and TRANS 102.

VETERINARY TECHNICIAN

VET 117
VETERINARY ASSISTANT INTERNSHIP 2 CR
This course is for students enrolled in the Veterinary Technician Program who choose the “early out” option and are pursuing a certificate in Veterinary Assistant. Students are to gain work experience as a Veterinary Assistant in an appropriate setting.

Prerequisite(s): VETT 101, VETT 102, VETT 103, VETT 104, VETT 106, VETT 107, VETT 108, VETT 109, VETT 201, VETT 202 and VETT 120 with a minimum grade of C- in each course.

VET 120
MEDICAL DOSAGES AND CALCULATIONS 3 CR
This course will cover the necessary concepts involved in mathematics used in veterinary medicine. This will include: dosage calculations, English and metric conversions, per cents, ratios, and other technical applications. This course includes both lecture and lab learning formats.

Prerequisite(s): Admission to the Veterinary Technician program.

Completion Of or Concurrent Enrollment In: VETT 101 with a C or higher.

VET 101
VETERINARY NURSING I 4 CR
Upon completion of this module, the Veterinary Assistant and Veterinary Technician student will be able to safely and effectively obtain subjective and objective patient data that will allow accurate evaluation of the patient with minimum stress and maximum safety. Also, the Veterinary Assistant and Veterinary Technician student will be able to interpret animal body language and use restraint techniques appropriate to the patient and its care needs.

Prerequisite(s): Veterinary Technician program admission; ENGL & 101, MATH & 107, BIOL & 160, CHEM & 121, and VETT 100, all with a C or higher; PSYC & 100 with a C or higher or CMST & 210 with a C or higher.

VETT 102
VETERINARY ANATOMY & PHYSIOLOGY I 5 CR
Upon completion of this course, the Veterinary Assistant and Veterinary Technician student will be knowledgeable in the function of basic cell structure, skeletal anatomy & physiology, integument & muscular systems, the respiratory & cardiovascular systems, the hemolymphatic, gastrointestinal, endocrine, reproductive, urinary, & nervous systems in the canine and feline.

Prerequisite(s): Admission to the Veterinary Technician program.

Completion Of or Concurrent Enrollment In: VETT 101 with a C or higher.

VET 103
VETERINARY MEDICAL TERMINOLOGY 3 CR
Upon completion of this module, the Veterinary Assistant and Veterinary Technician student will: understand terms of anatomical topography, nursing records, and pharmaceutical, emergency and surgical, medicine, and patient description terms; students should also be comfortable and accurate with metric system conversion.

Prerequisite(s): Admission to the Veterinary Technician program.

VET 104
VETERINARY NUTRITION I 3 CR
Given the characteristics of the patient, the Veterinary Assistant and Veterinary Technician student will understand appropriate and inappropriate dietary components for various life stages to promote optimal health. Also, the Veterinary Assistant and Veterinary Technician student will be able to explain nutritional recommendations to clients and reinforce owner compliance.

Prerequisite(s): VETT 101, VETT 102 and VETT 103 with a C- or higher in each course.

VET 105
LEARNING FOR A LIFETIME 2 CR
The goals of this module are to enable the student to learn the materials of Veterinary Technician medicine in a logical, goal-oriented manner. The Veterinary Technician student should be empowered with critical thinking and problem-solving skills. The Veterinary Technician student should be able to utilize a variety of reference media and assess that material for quality of content. Finally, the Veterinary Technician student should be able to tailor study skills to address their personal strengths and weaknesses with the goal of maximizing retention of material learned during the Veterinary Technician Program and in continuing education pursuits throughout his or her career.

Prerequisite(s): VETT 101, VETT 102 and VETT 103 with a C- or higher in each course.

VET 106
MICROBIOLOGY, VIROLOGY, & MYCOLOGY 3 CR
Upon completion of this module, the Veterinary Assistant and Veterinary Technician student will be able to classify, collect, & culture bacteria. The Veterinary Assistant or Veterinary Technician student will also be knowledgeable in mycology & virology.

Prerequisite(s): VETT 101, VETT 102 and VETT 103 with a C- or higher in each course.

VET 107
SMALL ANIMAL PARASITOLOGY 4 CR
Upon completion of this module, the Veterinary Assistant and Veterinary Technician student will be able to: 1) Identify & describe the life cycle of ecto- and endo- parasites; 2) Understand the importance of parasites in veterinary and zoonotic disease; 3) Understand the importance of, and demonstrate proper diagnostic fecal techniques; 4) Identify parasite ova, adults and non-parasite artifacts; 5) Describe prevention of parasitic diseases.

Prerequisite(s): VETT 101, VETT 102 and VETT 103 with a C- or higher in each course.

VET 108
RADIOLOGY I 4 CR
Given the characteristics of the patient and the radiographic study that has been requested, the Veterinary Assistant and Veterinary Technician student will be able to prepare the radiographic equipment, measure the animal using topographic landmarks and choose the appropriate radiographic technique to provide maximum diagnostic benefit in an appropriate and safe manner. The student will also be able to assess the image quality and offer options to correct deficiencies.

Prerequisite(s): VETT 101, VETT 102, and VETT 103 with a C- or higher in each course.

VET 109
CLINICAL LABORATORY SCIENCES 4 CR
Upon completion of this module, the Veterinary Assistant and Veterinary Technician student will be able to properly handle and submit appropriate samples for diagnostic analysis to ensure maximum accuracy of results. Also, give the characteristics of the laboratory equipment; the student will perform diagnostic tests and determine proper maintenance and quality control procedures necessary to ensure accurate results. Skills will be developed in performing basic hematology, urinalysis and cytology.

Prerequisite(s): VETT 101, VETT 102 and VETT 103 with a C- or higher in each course.
VETT 110
VETERINARY ANATOMY & PHYSIOLOGY II  3 CR
Upon completion of this module, the Veterinary Technician student will be knowledgeable in:
1) Unique equine features: head and gastrointestinal tract and reproductive tract; 2) Unique ruminant features: gastrointestinal tract and reproductive tract and foot; 3) Avian anatomy.
Prerequisite(s): VETT 102, VETT 104, VETT 106, VETT 107, and VETT 108 with a C- or higher in each course.

VETT 111
SMALL ANIMAL MEDICINE I  3 CR
Upon completion of this module, the Veterinary Technician student will be knowledgeable in:
1) The general approach to medical problems and become familiar with systemic diseases; 2) Respiratory & cardiac diseases; 3) Gastrointestinal diseases; 4) Urinary tract diseases; 5) Liver & pancreas diseases; 6) Endocrine diseases; 7) Neurologic diseases; 8) Erythrocytes, platelets, & coagulation.
Prerequisite(s): VETT 102, VETT 104, VETT 106, VETT 107, and VETT 108 with a C- or higher in each course.

VETT 112
VETERINARY NURSING II: SURGICAL  5 CR
Given the characteristics of the patient and the surgical procedure to be performed, the Veterinary Technician student will be able to: 1) Assess the patient’s pre-surgical status and tests and report to the veterinarian; 2) Identify surgical equipment; 3) Identify and apply appropriate surgical site preparation of hair clipping and decontamination; 4) Position the patient appropriately for maximum surgical convenience and safety; 5) Maintain aseptic technique for surgical facility and equipment.
Prerequisite(s): VETT 102, VETT 104, VETT 106, VETT 107, and VETT 108 with a C- or higher in each course.

VETT 113
IMMUNOLOGY & PHARMACOLOGY I  3 CR
Upon completion of this module, the Veterinary Technician student will be able to calculate the correct amount of medication in the prescribed form and administer it by the prescribed route as directed by a veterinarian. The Veterinary Technician student shall also be able to differentiate between normal and abnormal responses to medications and communicate necessary information to clients in order to maximize safety and compliance for effective treatment. Finally, the Veterinary Technician student should be proficient at inventory control procedures, especially as applied to controlled substances.
Prerequisite(s): VETT 104, VETT 106, VETT 107, VETT 108 and VETT 109 with a C- or higher in each course.

VETT 114
DENTISTRY  4 CR
Upon completion of this module, the Veterinary Technician student will be knowledgeable of: 1) Dental anatomy & pathophysiology; 2) Dental radiographs; 3) Dental instruments & usage; 4) Large animal dentistry (equine & swine); 5) Small mammal dentistry & avian beaks.
Prerequisite(s): VETT 104, VETT 106, VETT 107, VETT 108 and VETT 109 with a minimum grade of C- in each course.

VETT 115
RADIOLOGY II  4 CR
Given the characteristics of the patient and the radiographic study that has been requested, the Veterinary Assistant and Veterinary Technician student will be able to prepare the radiographic equipment, measure the animal using topographic landmarks and choose the appropriate radiographic technique to provide maximum diagnostic benefit in an appropriate and safe manner for specialty studies of the spine, pelvis and GI tract of the dog/cat. The Veterinary Technician student will be able to assess the image quality and offer options to correct deficiencies. Also given the characteristics of the patient and the non-radiographic imaging study requested, the Veterinary Technician student will properly prepare the imaging site and equipment and position the patient appropriately for the study of large animal leg/foot.
Prerequisite(s): VETT 105, VETT 110, VETT 111, and VETT 112, with a C- or higher in each course.

VETT 116
LARGE ANIMAL MEDICINE  3 CR
Upon completion of this module, the Veterinary Technician student will be knowledgeable in:
1) Equine preventative health care, gastrointestinal diseases, respiratory & cardia diseases, lameness, & reproductive & neonate diseases; 2) Bovine gastrointestinal & reproductive diseases; 3) Important diseases of sheep, goats, & llamas.
Prerequisite(s): VETT 115, VETT 118, VETT 119, and VETT 120 with a C- or higher in each course.

VETT 117
VETERINARY NURSING III: LARGE ANIMAL  4 CR
Upon completion of this module, the Veterinary Technician student will be able to safely and effectively obtain subjective and objective patient data that will allow accurate evaluation of the patient with minimum stress and maximum safety. In addition, the student will be able to carry out appropriate therapeutic techniques and diagnostics in order to achieve maximum health benefits for the large animal (equine/bovine/porcine) patient.
Prerequisite(s): VETT 110 with a C- or higher.

VETT 118
SMALL ANIMAL MEDICINE II  3 CR
Upon completion of this module, the Veterinary Technician student will be knowledgeable of the following relative small animal medicine: 1) Lymphatics, spleen, & bone marrow; 2) Reproductive disorders; 3) Trauma medicine; 4) Transfusion medicine; 5) Sepsis; 6) Diabetes mellitus & diabetic ketoacidosis (DKA); 7) Acute abdomen stabilization
Prerequisite(s): VETT 105, VETT 110, VETT 111, VETT 112, VETT 113, VETT 114 and VETT 203 with a C- or higher in each course.

VETT 119
ADVANCED CLINICAL LAB SCIENCES  4 CR
Upon completion of this module, the Veterinary Technician student will be knowledgeable in the following advanced clinical laboratory sciences:
1) SeroLOGY & antigen testing; 2) Pulse oximetry, capnography, & blood gas analysis; 3) Electrocardiogram (ERG); 4) Arthrocentesis, CSF tap, & bone marrow evaluation; 5) Blood pressure evaluation; 6) Thoracocentesis, abdominocentesis, & transrectal wash; 7) Blood collection for transfusion or blood culture; 8) Advanced hematology.
Prerequisite(s): VETT 105, VETT 110, VETT 111, VETT 112, and VETT 203 with a C- or higher in each course.

VETT 120
ANESTHESIA  5 CR
Given the characteristics of the anesthetic patient and the procedure, (directed by the veterinarian) the Veterinary Technician student will assess patient risk status and determine appropriate perianesthetic, anesthetic and pain management protocols. Also (directed by the veterinarian), the Veterinary Technician student will choose appropriate monitoring equipment and techniques to maintain safe anesthesia, pain management and anesthesia recovery.
Prerequisite(s): VETT 105, VETT 110, VETT 111, VETT 112, and VETT 203 with a C- or higher in each course.

VETT 121
EXOTIC ANIMAL MEDICINE  3 CR
Given the unique requirements for exotic species, the Veterinary Technician student will safely obtain subjective and objective data that will allow evaluation of these animals. The Veterinary Technician student will be able to: identify husbandry issues and recognize normal from abnormal behaviors and vital signs.
Prerequisite(s): VETT 105, VETT 110, VETT 111, VETT 112, VETT 113, VETT 114 and VETT 203 with a C- or higher in each course.

VETT 122
VETERINARY NUTRITION II  2 CR
Upon completion of this module, the Veterinary Technician student will be knowledgeable of:
1) Nutrition & recovery care; 2) Therapeutic nutrition; 3) Small mammal & avian nutrition; 4) Nutrition of lizards, snakes, & turtles.
Prerequisite(s): VETT 115, VETT 118, VETT 119, VETT 120, and VETT 125 with a minimum grade of C- in each course.
VETT 123  
**VETERINARY NURSING IV:**  
**CRITICAL CARE**  
5 CR  
Upon completion of this module, the Veterinary Technician student will be able to safely and effectively obtain subjective and objective patient data that will allow accurate evaluation of the patient with minimum stress and maximum safety. Also, the Veterinary Assistant and Veterinary Technician student will be able to carry out appropriate therapeutic techniques in order to achieve maximum health benefits for the patient.  
Prerequisite(s): VETT 115, VETT 118, VETT 119, VETT 120, and VETT 125 with a C- or higher in each course.

VETT 124  
**SPECIALTY MEDICINE**  
3 CR  
Upon completion of this module, the Veterinary Technician student will be knowledgeable of the following veterinary medicine specialties: 1) Ophthalmology; 2) Dermatology; 3) Oncology; 4) Alternative & complimentary medicine; 5) Physical therapy; 6) Cardiology; 7) Theriogenology; 8) Hospice care.  
Prerequisite(s): VETT 115, VETT 126, VETT 119, VETT 120, and VETT 125 with a C- or higher in each course.

VETT 125  
**HUMANITY OF VETERINARY MEDICINE**  
2 CR  
Upon completion of this module, the Veterinary Technician student will be able to effectively contribute to the professional and efficient operation of the veterinary facility in order to provide maximum benefits to clients, patients and the facility. Also, the Veterinary Technician student will be able to effectively and accurately acquire and convey information to the client and to veterinary colleagues.  
Prerequisite(s): VETT 105, VETT 110, VETT 111, VETT 112, and VETT 203 with a C- or higher in each course.

VETT 126  
**PHARMACOLOGY II**  
3 CR  
Upon completion of this module, the Veterinary Technician student will be knowledgeable of: 1) Gastrointestinal drugs; 2) Hormones; 3) Anticonvulsants; 4) Therapies for the following: hypertension, airway disease, allergic disease, heart disease, & behavior disorders.  
Prerequisite(s): VETT 115, VETT 118, VETT 119, VETT 120, and VETT 125 with a C- or higher in each course.

VETT 130  
**VETERINARY CLINICAL WORK EXPERIENCE**  
12 CR  
A cooperative effort between practicing veterinary facilities and Bellingham Technical College to provide hands-on training. Student will observe, assist, and perform tasks at selected facilities as directed by veterinary staff, using all knowledge gained during program.  
Prerequisite(s): VETT 116, VETT 117, VETT 122, VETT 123, VETT 124, VETT 126 and VETT 205 with a C- or higher in each course.

VETT 201  
**MENTORSHIP LAB I**  
2 CR  
This lab requires students, under the supervision of a mentor or the faculty, to demonstrate competency in an escalating list of skills in the lab and the clinical sites. Each quarter builds upon that quarter’s didactic material as well as previous skill sets. Primary skill focus: animal restraint, physical exam, diagnostic sampling, and small animal patient care.  
Prerequisite(s): Admission to the Veterinary Technician program.  
Completion Of or Concurrent Enrollment In: VETT 101 with a C or better.

VETT 202  
**MENTORSHIP LAB II**  
2 CR  
This lab requires students, under the supervision of a mentor or the faculty, to demonstrate competency in an escalating list of skills in the lab and the clinical sites. Each quarter builds upon that quarter’s didactic material as well as previous skill sets. Primary skill focus: advanced sampling techniques and beginning radiology.  
Prerequisite(s): VETT 201 with a grade of C- or higher.

VETT 203  
**MENTORSHIP LAB III**  
2 CR  
This lab requires students, under the supervision of a mentor or the faculty, to demonstrate competency in an escalating list of skills in the lab and the clinical sites. Each quarter builds upon that quarter’s didactic material as well as previous skill sets. Primary skill focus: advanced diagnostics.  
Prerequisite(s): VETT 202 with a C- or higher.

VETT 204  
**MENTORSHIP LAB IV**  
2 CR  
This lab requires students, under the supervision of a mentor or the faculty, to demonstrate competency in an escalating list of skills in the lab and the clinical sites. Each quarter builds upon that quarter’s didactic material as well as previous skill sets. Primary skill focus: anesthetic patient care, bovine patient care, and advanced radiology procedures.  
Prerequisite(s): VETT 203 with a C- or higher.

VETT 205  
**MENTORSHIP LAB V**  
2 CR  
This lab requires students, under the supervision of a mentor or the faculty, to demonstrate competency in an escalating list of skills in the lab and the clinical sites. Each quarter builds upon that quarter’s didactic material as well as previous skill sets. Primary skill focus: equine patient care, bovine patient care, and advanced radiology procedures.  
Prerequisite(s): VETT 204 with a C- or higher.

VETT 206  
**MENTORSHIP LAB VI**  
2 CR  
This lab requires students, under the supervision of a mentor or the faculty, to demonstrate competency in an escalating list of skills in the lab and the clinical sites. Each quarter builds upon that quarter’s didactic material as well as previous skill sets. Primary skill focus: exotic animals, nutrition, specialized medicine and advanced nursing care.  
Prerequisite(s): VETT 205 with a C- or higher.

WLD 101  
**WELDING SAFETY**  
2 CR  
Introduction to the general welding industry, shop safety and orientation to the metal shop environment. Also electrical and compressed gas cylinder safety, and safe applications with grinders, band saws, and ironworkers.  
Prerequisite(s): ACCUPLACER Reading Comprehension score of 71 or RDG 085 with a C or better; and ACCUPLACER Sentence Skills score of 71 or ENGL 092 with a C or better; and ACCUPLACER Arithmetic score of 38 or MATH 090 or ABE 050 with a C or better.

WLD 105  
**THERMAL CUTTING PROCESSES**  
4 CR  
This course will introduce the student to the basics of plasma arc cutting and oxy-fuel cutting processes including cutting safety; theory of gases; and hands-on lab practice. Cylinder handling and equipment safety and orientation will be stressed.  
Completion Of or Concurrent Enrollment In: WLD 101, WLD 110 and WLD 120, all with a C or better; or concurrent enrollment in WLD 101, WLD 110 and WLD 120; or Instructor permission.

WLD 106  
**PRINT READING I**  
2 CR  
Students will learn to use prints and drawings used in the welding trade. Students will study interpretation of basic drawings and prints, dimensions, terminology, notes, applied mathematics and sketching and drawing techniques.  
Prerequisite(s): WLD 101, WLD 105, WLD 110 and WLD 120, all with a C or better, or Instructor permission.  
Completion Of or Concurrent Enrollment In: WLD 130, WLD 140, and WLD 150, all with a C or better; or concurrent enrollment in WLD 130, WLD 140 and WLD 150; or Instructor permission.

WLD 110  
**SMAW I**  
4 CR  
Students will learn applications of power sources, electrode identification, and basic steel metallurgy, while practicing lab techniques in E6010 and E7018 SMAW Electrodes in the weld booth.  
Completion Of or Concurrent Enrollment In: WLD 101, WLD 105 and WLD 120 all with a C or better; or concurrent enrollment in WLD 101, WLD 105 and WLD 120; or Instructor permission.
WLD 116
SMAW PRACTICE  2 CR
Students will demonstrate all position SMAW welding techniques using E6010 or E7018 electrodes.
Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 120, WLD 130, WLD 140 and WLD 150 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 121, WLD 131 and WLD 141 all with a C- or better; or concurrent enrollment in WLD 121, WLD 131 and WLD 141; or Instructor permission.

WLD 120
GMAW I  4 CR
Introduction to the Gas Metal Arc Welding, welding process for mild steel. Power sources, techniques, shielding gases, metallurgy, and electrode identification will be covered. The student will learn the application of this process through lab practice in the weld booth.
Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 120, all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 101, WLD 105 and WLD 110, all with a C- or better; or concurrent enrollment in WLD 101, WLD 105 and WLD 110; or Instructor permission.

WLD 121
GMAW ALUMINUM I  4 CR
This introduction to the gas metal arc welding process on aluminum covers safety, power sources, metallurgy, gases, filler metals, and lab practice.
Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 130, WLD 140 and WLD 150 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 116, WLD 131, and WLD 141, all with a C- or better; or concurrent enrollment in WLD 116, WLD 131 and WLD 141; or Instructor permission.

WLD 130
FCAW I  4 CR
Course covers the flux core arc welding process, including dual shield and self-shielding processes. Classroom discussion includes process safety and applications, power sources, shielding gases, FCAW electrodes and metallurgy. Lab practice on mild steel in the weld booth.
Prerequisite(s): WLD 101, WLD 105, WLD 110, and WLD 120, all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 106, WLD 140 and WLD 150, all with a C- or better; or concurrent enrollment in WLD 106, WLD 140 and WLD 150; or Instructor permission.

WLD 131
FCAW PRACTICE  2 CR
Students will demonstrate all position FCAW welding techniques.
Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 120, WLD 130, WLD 140 and WLD 150 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 116, WLD 121 and WLD 141, all with a C- or better; or concurrent enrollment in WLD 116, WLD 121 and WLD 141; or Instructor permission.

WLD 140
GTAW I  4 CR
This introduction to Gas Tungsten Arc Welding process covers safety, power sources, metallurgy, gases, filler metals, and welding lab practice on mild steel in the weld booth.
Prerequisite(s): WLD 101, WLD 105, WLD 110, and WLD 120, all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 106, WLD 130 and WLD 150, all with a C- or better; or concurrent enrollment in WLD 106, WLD 130 and WLD 150; or Instructor permission.

WLD 141
GTAW ALUMINUM I  4 CR
This introduction to gas tungsten arc welding process on aluminum covers safety, power sources, metallurgy, gases, filler metals, and lab practice.
Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 120, WLD 130, WLD 140, and WLD 150 all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 116, WLD 121 and WLD 131, all with a C- or better; or concurrent enrollment in WLD 116, WLD 121 and WLD 131; or Instructor permission.

WLD 150
INTRODUCTION TO METAL FABRICATING  4 CR
Students will learn and apply basic layout and fabricating techniques, applying simple print reading concepts, and cutting and welding techniques, to produce simple fabricated small projects. Will familiarize students with shop equipment and sign-off each for safety. GMAW and FCAW welding processes may be used, as well as Plasma and Oxy/Fuel Thermal Cutting processes, and introduction to bevellers. The importance of accurate measuring: precision squares, angles, drilling and leveling; attention to detail, neatness, and the finished product will be demonstrated in an approved small fabrication project.
Prerequisite(s): WLD 101, WLD 105, WLD 110, and WLD 120, all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 106, WLD 130 and WLD 140, all with a C- or better; or concurrent enrollment in WLD 106, WLD 130 and WLD 140; or Instructor permission.

WLD 173
BASIC WELDING  2 CR
This course covers basic industrial welding techniques and safety. From beginning competencies in SMAW and oxy/fuel cutting, through GMAW and plasma cutting processes. Basic fabricating principles will cover lap, fillet, and butt weld joint set-up.

WLD 205
PRINT READING II - PIPE  3 CR
Students will learn to use prints and drawings used in the welding trade, with emphasis on piping. Students will study and interpret industry drawings and prints, ISO’s, plan drawings, symbols, dimensions, terminology, notes, applied mathematics, sketching and drawing techniques.
Prerequisite(s): WLD 210 with a C- or better and WLD 211 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 215 with a C- or better and WLD 256 with a C- or better; or concurrent enrollment in WLD 215 and WLD 256; or Instructor permission.

WLD 206
PRINT READING II - WELDING & FABRICATION  3 CR
Students will learn to use prints and drawings used in the welding trade, with emphasis on structural steel. Students will study and interpret industry drawings and prints, plan drawings, symbols, dimensions, terminology, notes, applied mathematics, sketching and drawing techniques.
Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 116, WLD 120, WLD 130, WLD 131, WLD 140, WLD 141, and WLD 150, all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 230, WLD 242 and WLD 252, all with a C- or better; or concurrent enrollment in WLD 230, WLD 242 and WLD 252; or Instructor permission.

WLD 209
CODES & STANDARDS  3 CR
Discussion of commonly used destructive and non-destructive weld testing processes and techniques, visual weld inspection parameters and techniques, and industry accepted codes and welding standards, publications, and standardizing organizations; including AWS, ASME, ANSI, API, AA and WABO.
Prerequisite(s): WLD 213 with a C- or better and WLD 230 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 271 with a C- or better or concurrent enrollment in WLD 271, or Instructor permission.
2019-2020 Course Descriptions

WLD 210

SMAW II  6 CR
Open-Root Carbon Steel late Shield Arc Welding in 2G and 3G positions. Emphasis on open-root groove welding on 3/8” - 1/2” plate with E6010 (Root), and E7018 (Fill & Cap) for students enrolled in Pipe Pathway. This welding practice follows AWS Welding Standard D1.1 and WABO Structural Steel Welding Code, and is beginning practice to qualify open-root welds to ASME IX: B31.3; and API1104 SMAW Pipe Welding Certification Standards for pressure piping applications required by local refineries and affiliated industrial piping applications.

Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 116, WLD 120, WLD 121, WLD 130, WLD 131, WLD 140, WLD 141, and WLD 150 all with a C- or better or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 211 with a C- or better or concurrent enrollment in WLD 210, or Instructor permission.

WLD 211

SMAW III  6 CR
Open Root Carbon Steel Plate Shield Metal Arc Welding in 4G position. Emphasis on open root groove welding on 3/8” - 1” plate with E6010 (Root), and E7018 (Fill & Cap) for students enrolled in Pipe Pathway. This welding practice follows AWS Welding Standard D1.1 Structural Steel Welding Code, and is beginning practice to qualify open root welds to ASME IX: B31.3; and API1104 SMAW Pipe Welding Certification Standards for pressure piping applications required by local refineries and affiliated industrial piping applications.

Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 116, WLD 120, WLD 121, WLD 130, WLD 131, WLD 140, WLD 141, and WLD 150 all with a C- or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 210 with a C- or better or concurrent enrollment in WLD 210, or Instructor permission.

WLD 213

PRINT READING III  3 CR
Advanced Print Reading for 2nd year students. Students will study interpretation of basic drawings and prints, dimensions, terminology, notes, applied mathematics and sketching and drawing techniques. Also may include applications for CNC Plasma Software, Isometric reading and drawing, and understanding basic AutoCAD applications.

Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 116, WLD 120, WLD 121, WLD 130, WLD 131, WLD 140, WLD 141, and WLD 150 all with a C- or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 220, WLD 232 and WLD 254, all with a C- or better, or concurrent enrollment in WLD 220, WLD 232 and WLD 254 for Welding & Fab: General pathway; or WLD 230, WLD 257 and WLD 262, all with a C- or better, or concurrent enrollment in WLD 230, WLD 257 and WLD 262 for Welding & Fab: Pipe pathway; or Instructor permission.

WLD 215

SMAW PIPE  6 CR
Shield metal arc welding of open-root steel pipe in all positions in preparation for industrial applications and the AWS/WABO Pipe Welding Certification Test (AWS/WABO testing is offered in-house). This pipe welding practice follows AWS Welding Standard D1.1 and WABO Structural Welding Code and ASME IX and B31.3 SMAW Pipe Welding Certification Standards for pressure piping applications required by local refineries and affiliated industrial applications. Pipe welding conducted in 2G, 5G, and 6G positions on 8” pipe.

Prerequisite(s): WLD 210 with a C- or better and WLD 211 with a C- or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 205 with a C- or better and WLD 256 with a C- or better; or concurrent enrollment in WLD 205 and WLD 256; or Instructor permission.

WLD 220

SMAW TEST PRACTICE II  4 CR
Lab exploring avenues for overcoming the difficulties of advanced SMA welding, including confined space applications, and out of position welding. Will apply practices on standard unlimited structural groove weld test plates.

Prerequisite(s): WLD 206 with a C- or better, WLD 230 with a C- or better, and WLD 242 with a C- or better; or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 213, WLD 232 and WLD 254 all with a C- or better; or concurrent enrollment in WLD 213, WLD 232 and WLD 254; or Instructor permission.

WLD 230

FCAW II  3 CR
Advanced FCA welding techniques in all positions; in the weld booth and in work simulated difficult positions such as the welding module. Lab practice will include preparation for AWS and WABO certification testing.

Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 116, WLD 120, WLD 121, WLD 130, WLD 131, WLD 140, WLD 141, and WLD 150 all with a C- or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 206, WLD 242 and WLD 252, all with a C- or better, or concurrent enrollment in WLD 206, WLD 242 and WLD 252, for part of Welding & Fab: General pathway; or WLD 213, WLD 257 and WLD 262, all with a C- or better or concurrent enrollment in WLD 213, WLD 257 and WLD 262, if part of Welding & Fab: Pipe pathway; or Instructor permission.

WLD 232

FCAW PRACTICES II  4 CR
FCAW process in various positions for advanced welding techniques.

Prerequisite(s): WLD 206, WLD 230, WLD 242, and WLD 252, all with a C- or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 213, WLD 220 and WLD 254, all with a C- or better; or concurrent enrollment in WLD 213, WLD 220 and WLD 254; or Instructor permission.

WLD 242

GTAW & SMAW ALLOY  4 CR
This course is designed to give students experience fabricating projects from aluminum, stainless steel and other alloys. Students will use large shop equipment including CNC plasma, press brake, hydraulic plate shear, and overhead bridge crane.

Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 116, WLD 120, WLD 121, WLD 130, WLD 131, WLD 140, WLD 141, and WLD 150, all with a C- or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 206, WLD 230 and WLD 252, all with a C- or better; or concurrent enrollment in WLD 206, WLD 230 and WLD 252; or Instructor permission.

WLD 252

ALLOY FABRICATION  6 CR
Advanced fabricating techniques for alloys. Students will use large shop equipment and welding power supplies to fabricate projects from alloys including but not limited to aluminum, stainless steel and titanium to an industry acceptable standard.

Prerequisite(s): WLD 101, WLD 105, WLD 106, WLD 110, WLD 116, WLD 120, WLD 121, WLD 130, WLD 131, WLD 140, WLD 141, and WLD 150, all with a C- or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 206, WLD 230 and WLD 242, all with a C- or better; or concurrent enrollment in WLD 206, WLD 230 and WLD 242; or Instructor permission.

WLD 254

STEEL FABRICATION  5 CR
Advanced fabricating techniques for steel. Students will use large shop equipment and welding power supplies to fabricate projects from standard structural shapes to applicable industry standard.

Prerequisite(s): WLD 206, WLD 230, WLD 242, and WLD 252, all with a C- or better, or Instructor permission.

Completion Of or Concurrent Enrollment In: WLD 213, WLD 220 and WLD 232, all with a C- or better; or concurrent enrollment in WLD 213, WLD 220 and WLD 232; or Instructor permission.
WLD 256
PIPE FABRICATION I  6 CR
Advanced Fabrication techniques for Pipe, including basic trade math, measuring tools and techniques, pipe welding layout and fit-up techniques for large-bore and small-bore steel pipe; pipe materials and fittings; pipe fitting safety, tools and techniques; and preparation of beveled pipe joints for welding. Welding is to WABO structural, AWS and ASME Pressure pipe welding standards, and Fabrication to accepted Industry Standards. This course will be based extensively on The Pipe Fitter’s Blue Book by Graves and BTC’s Pipe Welding and Pipe Fitting from NCCEP Pipelining Levels 1-4.
Prerequisite(s): WLD 210 with a C- or better and WLD 211 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 205 with a C- or better and WLD 215 with a C- or better, or concurrent enrollment in WLD 205 and WLD 215; or Instructor permission.

WLD 257
PIPE FABRICATION II  5 CR
Advanced Fabrication techniques for Pipe per Piping Industry accepted codes and standards. Will include trade math in laying-out angles and offsets; pipelining calculations; special pipelining problems, including branch connections, headers; and fabrication piping systems involving reducers, and fabrication of offsets. Also pipe support systems and rigging for piping installations in the Fabrication Module. This course will be based extensively on The Pipe Fitter’s Blue Book by Graves and BTC’s Pipe Welding and Pipe Fitting, Volumes I & II from NCCEP Pipelining Levels 1-4.
Prerequisite(s): WLD 205 with a C- or better, WLD 215 with a C- or better, and WLD 256 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 209 with a C- or better and WLD 262, all with a C- or better, or Instructor permission.

WLD 262
GTAW PIPE WELDING  4 CR
GTAW open root welding on carbon steel will be discussed. Pipe fitting techniques; for GTAW remote amperage adjustment and scratch-arc techniques. Welding in the booth and in the fabrication shop or Fabrication Module will be demonstrated and practiced.
Prerequisite(s): WLD 205 with a C- or better, WLD 215 with a C- or better, and WLD 256 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 213, WLD 230 and WLD 257, all with a C- or better; or concurrent enrollment in WLD 213, WLD 230 and WLD 257; or Instructor permission.

WLD 271
WELDER TESTING  6 CR
This course requires successful completion of at least one AWS/WABO Certification Test (SMAW or FCAW) on 1” plate or 8” Schedule 80 Pipe. Proof of industry certification may substitute for this requirement by Instructor permission.
Prerequisite(s): WLD 213 with a C- or better and WLD 230 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 209 with a C- or better or concurrent enrollment in WLD 209, or Instructor permission.

WLD 291
CAPSTONE PROJECT I  3 CR
A culminating project consisting of a portfolio, resume, and job search element, and a culminating fabrication project under the direction of staff.
Prerequisite(s): WLD 213 with a C- or better and WLD 230 with a C- or better or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 209 with a C- or better or concurrent enrollment in WLD 209, or Instructor permission.

WLD 292
CAPSTONE PROJECT II  6 CR
A culminating project consisting of a portfolio, resume, and job search element, and a culminating fabrication project under the direction of staff.
Prerequisite(s): WLD 213 with a C- or better and WLD 230 with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 209 with a C- or better and WLD 271 with a C- or better; or concurrent enrollment in WLD 209 and WLD 271; or Instructor permission.

WLD 293
WELDING INTERNSHIP I  3 CR
Industry-on-the-job experience per individualized opportunities under guided practice. May be taken multiple times.
Prerequisite(s): Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 209 with a C- or better and WLD 271 with a C- or better; or concurrent enrollment in WLD 209 and WLD 271; or Instructor permission.

WLD 294
WELDING INTERNSHIP II  6 CR
Industry-on-the-job experience per individualized opportunities under guided practice.
Prerequisite(s): Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 209 with a C- or better and WLD 271 with a C- or better; or concurrent enrollment in WLD 209 and WLD 271; or Instructor permission.

WLD 295
PIPE CAPSTONE PROJECT I  3 CR
A culminating project consisting of a portfolio, resume and job search element, and a culminating fabrication project under the direction of staff.
Prerequisite(s): WLD 213, WLD 230, WLD 257, and WLD 262, all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 209 with a C- or better and WLD 271 with a C- or better; or concurrent enrollment in WLD 209 and WLD 271; or Instructor permission.

WLD 296
PIPE CAPSTONE PROJECT II  6 CR
A culminating project consisting of a portfolio, resume, and job search element, and a culminating fabrication project under the direction of staff.
Prerequisite(s): WLD 213, WLD 230, WLD 257, and WLD 262, all with a C- or better, or Instructor permission.
Completion Of or Concurrent Enrollment In: WLD 209 with a C- or better and WLD 271 with a C- or better; or concurrent enrollment in WLD 209 and WLD 271; or Instructor permission.
ADMINISTRATORS
Kimberly Perry

STUDENT CONDUCT CODE

WAC 495B-121-010
Definitions. The following definitions shall apply for the purpose of this student conduct code.

1. “Board” means the board of trustees of Bellingham Technical College.

3. “Student conduct officer” is a Bellingham Technical College administrator designated by the president or vice-president of student services to be responsible for implementing and enforcing the student conduct code. The president or vice-president of student services is authorized to reassign any and all of the student conduct officer’s duties or responsibilities as set forth in this chapter as may be reasonably necessary.

4. “Conduct review officer” is the vice-president of student services or other college administrator designated by the president to be responsible for receiving and for reviewing or referring appeals of student disciplinary actions in accordance with the procedures of this code. The president is authorized to reassign any and all of the conduct review officer’s duties or responsibilities as set forth in this chapter as may be reasonably necessary.

5. “The president” is the president of the Bellingham Technical College. The president is authorized to delegate any and all of his or her responsibilities as set forth in this chapter as may be reasonably necessary.

6. “Disciplinary action” is the process by which the student conduct officer imposes discipline against a student for a violation of the student conduct code.

7. “Disciplinary appeal” is the process by which an aggrieved student can appeal the discipline imposed by the student conduct officer. Disciplinary appeals from a suspension in excess of ten instructional days or and expulsion are heard by the student conduct appeals board. Appeals of all other appealable disciplinary action shall be reviewed through brief adjudicative proceedings.

8. “Respondent” is the student against whom disciplinary action is initiated.

9. “Service” is the process by which a document is officially delivered to a party. Unless otherwise provided, service upon a party shall be accomplished by:
   a. Hand delivery of the document to the party; or
   b. By sending the document by e-mail and by certified mail or first-class mail to the party’s last known address.

Service is deemed complete upon hand delivery of the document or upon the date the document is e-mailed and deposited in the mail.

10. “Filing” is the process by which a document is officially delivered to a college official responsible for facilitating a disciplinary review. Unless otherwise provided, filing shall be accomplished by:
   a. Hand delivery of the document to the specified college official or college official’s assistant; or
   b. By sending the document by e-mail and first-class mail to the specified college official’s office and college e-mail address.

Papers required to be filed shall be deemed filed upon actual receipt during office hours at the office of the specified college official.

11. “College premises” includes all campuses of Bellingham Technical College, wherever located, and includes all land, buildings, facilities, vehicles, equipment, and other property owned, used, or controlled by the college.

12. “Student” includes all persons taking courses at or through the college, whether on a full-time or part-time basis, and whether such courses are credit courses, noncredit courses, online courses, or otherwise. Persons who withdraw after allegedly violating the code, who are not officially enrolled for a particular term but who have a continuing relationship with the college, or who have been notified of their acceptance for admission are considered “students.”

13. “Day” and “business day” mean a weekday, excluding weekends and college holidays.

14. “Alcohol” or “alcoholic beverages” means the definition of liquor as contained within RCW 66.04.010 as now law or hereinafter amended.

15. “Drugs” means a narcotic drug as defined in RCW 69.50.101, a controlled substance as defined in RCW 69.50.201 through 60.50.212, or a legend drug as defined in RCW 69.41.010.

WAC 495B-121-020
Authority. The board of trustees, acting pursuant to RCW 28B.50.140(14), delegates to the president of Bellingham Technical College the authority to administer disciplinary action. Administration of the disciplinary procedures is the responsibility of the vice-president of student services or designee. The vice-president of student services or the student conduct officer shall serve as the principal investigator and administrator for alleged violations of this code.

WAC 495B-121-030
Statement of student rights. As members of the Bellingham Technical College academic community, students are encouraged to develop the capacity for critical judgment and to engage in an independent search for truth. Freedom to teach and freedom to learn are inseparable facets of academic freedom. The freedom to learn depends upon appropriate opportunities and conditions in the classroom, on the campus, and in the larger community. Students should exercise their freedom with responsibility. The responsibility to secure and to respect general conditions conducive to the freedom to learn is shared by all members of the college community. The following enumerated rights are guaranteed to each student within the limitations of statutory law and college policy, which are deemed necessary to achieve the educational goals of the college.

1. Academic freedom.
   a. Students are guaranteed the rights of free inquiry, expression, and assembly upon and within college facilities that are generally open and available to the public.
   b. Students are free to pursue appropriate educational objectives from among the college’s curricula, programs, and services, subject to the limitations of RCW 28B.50.090 (3)(b)
   c. Students shall be protected from academic evaluation which is arbitrary, prejudiced, or capricious, but are responsible for meeting the standards of academic performance established by each of their instructors.
2. Due process.
   a. The rights of students to be secure in their persons, quarters, papers, and effects against unreasonable searches and seizures is guaranteed.
   b. No disciplinary sanction may be imposed on any student without notice to the accused of the nature of the charges.
   c. A student accused of violating this code of student conduct is entitled, upon request, to procedural due process as set forth in this chapter.

WAC 495B-121-040

Prohibited student conduct. Prohibited student conduct for which the college may impose sanctions includes, but is not limited to, any of the following:

1. Any act of academic dishonesty including, but not limited to, cheating, plagiarism, and fabrication.
   a. Cheating includes any attempt to give or obtain unauthorized assistance relating to the completion of an academic assignment.
   b. Plagiarism includes taking and using as one's own, without proper attribution, the ideas, writings, or work of another person in completing an academic assignment. Prohibited conduct may also include the unauthorized submission for credit of academic work that has been submitted for credit in another course.
   c. Fabrication includes falsifying data, information, or citations in completing an academic assignment and also includes providing false or deceptive information to an instructor concerning the completion of an assignment.

2. Any other acts of dishonesty. Such acts include, but are not limited to:
   a. Forgery, alteration, submission of falsified documents or misuse of any college document, record, or instrument of identification;
   b. Tampering with an election by or for college students; or
   c. Furnishing false information, or failing to furnish correct information, in response to the request or requirement of a college officer or employee.

3. Obstruction or disruption of:
   a. Any instruction, research, administration, disciplinary proceeding, or other college activity; or
   b. Any activity that is authorized to occur on college property, whether or not actually conducted or sponsored by the college.

4. Assault, physical abuse, verbal abuse, threat(s), intimidation, harassment, bullying, stalking or other conduct which harms, threatens, or is reasonably perceived as threatening the health or safety of another person or another person's property. For purposes of this subsection:
   a. Bullying is physical or verbal abuse, repeated over time, and involving a power imbalance between the aggressor and victim.

b. Stalking is intentional and repeated harassment or repeated following of another person, which places that person in reasonable fear that the stalker intends to injure the person, another person, or the property of the person or another person, and the stalker either intends to frighten, intimidate, or harass the person, or knows or reasonably should know that the person is frightened, intimidated or harassed, even if the stalker lacks such an intent.

5. Cyberstalking, cyberbullying or online harassment. Use of electronic communications including, but not limited to, electronic mail, instant messaging, electronic bulletin boards, and social media sites, to harass, abuse, bully or engage in other conduct which harms, threatens, or is reasonably perceived as threatening the health or safety of another person. Prohibited activities include, but are not limited to, unauthorized monitoring of another's e-mail communications directly or through spyware, sending threatening e-mails, disrupting electronic communications with spam or by sending a computer virus, sending false messages to third parties using another's e-mail identity, nonconsensual recording of sexual activity, and nonconsensual distribution of a recording of sexual activity.

6. Attempted or actual damage to, or theft or misuse of, real or personal property or money of:
   a. The college or state;
   b. Any student or college officer, employee, or organization; or
   c. Any other person or organization, or possession of such property or money after it has been stolen.

7. Failure to comply with the direction of a college officer or employee who is acting in the legitimate performance of his or her duties, including failure to properly identify oneself to such employee who is acting in the legitimate performance of his or her duties;

8. Participation in any activity which unreasonably disrupts the operations of the college or infringes on the rights of another member of the college community, or leads or incites another person to engage in such an activity.

9. Weapons. Possession, holding, wearing, transporting, storage or presence of any firearm, dagger, sword, knife or other cutting or stabbing instrument, club, explosive devices, or any other weapon apparently capable of producing bodily harm is prohibited on the college campus, subject to the following exceptions:
   a. Commissioned law enforcement personnel or legally authorized military personnel while in performance of their duties;
   b. A student with a valid concealed weapons permit may store a pistol in his or her vehicle parked on campus in accordance with RCW 9.41.050 (2) or (3), provided the vehicle is locked and the weapon is concealed from view; or
   c. The president may grant permission to bring a weapon on campus upon a determination that the weapon is reasonably related to a legitimate pedagogical purpose. Such permission shall be in writing and shall be subject to such terms or conditions incorporated in the written permission.
This policy does not apply to the possession and/or use of disabling chemical sprays when possessed and/or used for self-defense.

10. Hazing. Hazing includes, but is not limited to, any initiation into a student organization or any pastime or amusement engaged in with respect to such an organization that causes, or is likely to cause, bodily danger or physical harm, or serious mental or emotional harm, to any student.

11. Tobacco, electronic cigarettes, and related products. The use of tobacco, electronic cigarettes, and related products in any building owned, leased, or operated by the college or in any location where such use is prohibited, including twenty-five feet from entrances, exits, windows that open, and ventilation intakes of any building owned, leased, or operated by the college, except in designated areas. “Related products” include, but are not limited to, cigarettes, cigars, pipes, bidi, clove cigarettes, water pipes, hookahs, chewing tobacco, personal vaporizers, vape pens, electronic nicotine delivery systems and snuff.

12. Alcohol. Being observably under the influence of any alcoholic beverage, or otherwise using, possessing, selling or delivering any alcoholic beverage, except as permitted by law and authorized by the college president.

13. Marijuana. Being observably under the influence of marijuana or the psychoactive compounds found in marijuana, or otherwise using, possessing, selling, or delivering any product containing marijuana or the psychoactive compounds found in marijuana and intended for human consumption, regardless of form. While state law permits the recreational use of marijuana, federal law prohibits such use on college premises or in connection with college activities.

14. Being observably under the influence of any legend drug, narcotic drug, or controlled substance as defined in chapters 69.41 and 69.50 RCW, or otherwise using, possessing, delivering, or selling any such drug or substance, except in accordance with a lawful prescription for that student by a licensed health care professional.

15. Obstruction of the free flow of pedestrian or vehicular movement on college property or at a college activity.

16. Conduct that is disorderly, lewd, or obscene.

17. Breach of the peace.

18. Discriminatory action which harms or adversely affects any student or college employee because of his/her race, color, national origin, mental or physical disability, gender, sexual orientation, age, creed, or religion.

19. Sexual violence. Sexual or gender-based misconduct perpetrated against a person’s will or where a person is incapable of giving consent including, but not limited to, rape, sexual assault, sexual battery, gender-based stalking, and sexual coercion, regardless of the relationship between the perpetrator and the victim.

20. Sexual harassment. Conduct that includes, but is not limited to, engaging in unwelcome sexual advances, requests for sexual favors, or other sexual conduct, including verbal, nonverbal, electronic or social media communication, or physical touching that would substantially interfere with a reasonable person’s ability to participate in or benefit from the college’s program, or to create an intimidating, hostile, or offensive educational environment.

21. Other harassment. Conduct that has the purpose or effect of substantially interfering with a reasonable person’s work or educational performance or creating an intimidating, hostile or offensive working or educational environment, when such conduct is directed at an individual because of race, national origin, disability, age, religion, sexual orientation, gender or any other legally protected classification. Harassing conduct may include, but is not limited to, physical conduct, verbal, written, social media and electronic communications.

22. Theft or misuse of computer time or other electronic information resources of the college. Such misuse includes, but is not limited to:
   a. Unauthorized use of such resources or opening of a file, message, or other item;
   b. Unauthorized duplication, transfer, or distribution of a computer program, file, message, or other item;
   c. Unauthorized use or distribution of someone else’s password or other identification;
   d. Use of such time or resources to interfere with someone else’s work;
   e. Use of such time or resources to send, display, or print an obscene or abusive message, text, or image;
   f. Use of such time or resources to interfere with normal operation of the college’s computing system or other electronic information resources;
   g. Use of such time or resources in violation of applicable copyright or other law;
   h. Adding to or otherwise altering the infrastructure of the college’s electronic information resources without authorization; or
   i. Failure to comply with the college’s electronic use policy.

23. Unauthorized possession, duplication, or other use of a key, keycard, or other restricted means of access to college property, or unauthorized entry onto or into college property.

24. Abuse or misuse of any of the procedures relating to student complaints or misconduct including, but not limited to:
   a. Failure to obey a subpoena;
   b. Falsification or misrepresentation of information;
   c. Disruption or interference with the orderly conduct of a proceeding;
   d. Interfering with someone else’s proper participation in a proceeding;
   e. Destroying or altering potential evidence, or attempting to intimidate or otherwise improperly pressure a witness or potential witness;
   f. Attempting to influence the impartiality of, or harassing or intimidating, a student conduct committee member; or
   g. Failure to comply with any disciplinary sanction(s) imposed under this student conduct code.

25. Operation of any motor vehicle on college property in an unsafe manner or in a manner which is reasonably perceived as threatening the health or safety of another person.
Disciplinary actions include, but are not limited to, the following sanctions that may be imposed upon students according to the procedure outlined in WAC 495B-121-070 through 495B-121-200.

1. Disciplinary warning: A verbal statement to a student that there is a violation and that continued violation may be cause for further disciplinary action.

2. Written reprimand: Notice in writing that the student has violated one or more terms of this code of conduct and that continuation of the same or similar behavior may result in more severe disciplinary action.

3. Disciplinary probation: Formal action placing specific conditions and restrictions upon the student's continued attendance depending upon the seriousness of the violation and which may include a deferred disciplinary sanction. If the student, subject to a deferred disciplinary sanction, is found in violation of any college rule during the time of disciplinary probation, the deferred disciplinary sanction, which may include, but is not limited to, a suspension or a dismissal from the college, shall take effect immediately without further review. Any such sanction shall be in addition to any sanction or conditions arising from the new violation. Probation may be for a limited period of time or may be for the duration of the student's attendance at the college. A student who is on disciplinary probation may be deemed "not in good standing" with the college. If so, the student shall be subject to the following restrictions:
   a. Ineligible to hold an office in any student organization recognized by the college or to hold any elected or appointed office of the college.
   b. Ineligible to represent the college to anyone outside the college community in any way, including representing the college at any official function, or any forms of intercollegiate competition or representation.

4. Restitution: Reimbursement for damage to or misappropriation of property, or for injury to persons, or for reasonable costs incurred by the college in pursuing an investigation or disciplinary proceeding. This may take the form of monetary reimbursement, appropriate service, or other compensation.

5. Disciplinary suspension: Dismissal from the college and from the student status for a stated period of time. There will be no refund of tuition or fees for the quarter in which the action is taken.

6. Professional evaluation: Referral for drug, alcohol, psychological or medical evaluation by an appropriately certified or licensed professional may be required. The student may choose the professional within the scope of practice and with the professional credentials as defined by the college. The student will sign all necessary releases to allow the college access to any such evaluation. The student's return to college may be conditioned upon compliance with recommendations set forth in such a professional evaluation. If the evaluation indicates that the student is not capable of functioning within the college community, the student will remain suspended until future evaluation recommends that the student is capable of reentering the college and complying with the rules of conduct.

7. Dismissal: The revocation of all rights and privileges of membership in the college community and exclusion from the campus and college-owned or controlled facilities without any possibility of return. There will be no refund of tuition or fees for the quarter in which the action is taken.

8. Refund of fees: Refund of fees for the quarter in which disciplinary action is taken shall be in accordance with the college's refund policy.

A student suspended on the basis of conduct that disrupted the orderly operation of the campus or any facility of the college may be denied access to all or any part of the campus or other college facility.

9. No contact order: An order directing a student to have no contact with a specified student, college employee, a member of the college community, or a particular college facility.

Statement of jurisdiction. The student conduct code shall apply to student conduct that occurs on Bellingham Technical College premises and facilities, to conduct that occurs at or in connection with college sponsored activities, or to off-campus conduct that in the judgment of the college adversely affects the college community or the pursuit of its objectives. Jurisdiction extends to, but is not limited to, locations in which students are engaged in official college activities including, but not limited to, foreign or domestic travel, activities funded by the associated students, athletic events, training internships, cooperative and distance education, online education, practicums, supervised work experiences or any other college-sanctioned social or club activities. Students are responsible for their conduct from the time of application for admission through the actual receipt of a degree, even though conduct may occur before classes begin or after classes end, as well as during the academic year and during periods between terms of actual enrollment. These standards shall apply to a student's conduct even if the student withdraws from college while a disciplinary matter is pending. The college has sole discretion, on a case-by-case basis, to determine whether the student conduct code will be applied to conduct that occurs off campus.
WAC 495B-121-065
Statement of purpose.
1. Bellingham Technical College is maintained by the state of Washington for the provision of programs of instruction in higher education and related community services. Like any other institution having its own special purposes, the college must maintain conditions conducive to the effective performance of its functions. Consequently it has special expectations regarding the conduct of the various participants in the college community.
2. Admission to the college carries with it the prescription that the student will conduct himself or herself as a responsible member of the college community. This includes an expectation that the student will obey appropriate laws, will comply with the rules of the college and its departments, and will maintain a high standard of integrity and honesty.
3. Sanctions for violations of college rules or conduct that interferes with the operation of college affairs may be applied by the college, and the college may impose sanctions independently of any action taken by civil or criminal authorities. In the case of minors, misconduct may be referred to parents or legal guardians.
4. The rules and regulations prescribed in this title shall be observed by guests and visitors while on campus, at all college functions and events, and on or within any other college-controlled or college-owned property. Guests and visitors who willfully refuse to obey college security or other duly designated college authorities to desist from conduct prohibited by such rules and regulations may be ejected from the premises. Refusal to obey such an order may subject the person to arrest under the provisions of the Washington criminal trespass law, in addition to such other sanctions as may be applicable.

WAC 495B-121-070
Initiation of disciplinary action.
1. All disciplinary actions will be initiated by the student conduct officer. If that officer is the subject of a complaint initiated by the respondent, the president shall, upon request and when feasible, designate another person to fulfill any such disciplinary responsibilities relative to the complainant.
2. The student conduct officer shall initiate disciplinary action by serving the respondent with written notice directing him or her to attend a disciplinary meeting. The notice shall briefly describe the factual allegations, the provision(s) of the conduct code the respondent is alleged to have violated, the range of possible sanctions for the alleged violation(s), and specify the time and location of the meeting. At the meeting, the student conduct officer will present the allegations to the respondent and the respondent shall be afforded an opportunity to explain what took place. If the respondent fails to attend the meeting the student conduct officer may take disciplinary action based upon the available information.
3. Within ten days of the initial disciplinary meeting, and after considering the evidence in the case, including any facts or argument presented by the respondent, the student conduct officer shall serve the respondent with a written decision setting forth the facts and conclusions supporting his or her decision, the specific student conduct code provisions found to have been violated, the discipline imposed, if any, and a notice of any appeal rights with an explanation of the consequences of failing to file a timely appeal.
4. The student conduct officer may take any of the following disciplinary actions:
   a. Exonerate the respondent and terminate the proceedings;
   b. Impose a disciplinary sanction(s), as described in WAC 495B-121-040;
   c. Refer the matter directly to the student conduct committee for such disciplinary action as the committee deems appropriate. Such referral shall be in writing, to the attention of the chair of the student conduct committee, with a copy served on the respondent.

WAC 495B-121-080
Appeal from disciplinary action.
1. The respondent may appeal a disciplinary action by filing a written notice of appeal with the conduct review officer within twenty-one days of service to the student conduct officer’s decision. Failure to timely file a notice of appeal constitutes a waiver of the right to appeal and the student conduct officer’s decision shall be deemed final.
2. The notice of appeal must include a brief statement explaining why the respondent is seeking review.
3. The parties to an appeal shall be the respondent and the conduct review officer.
4. A respondent, who timely appeals a disciplinary action or whose case is referred to the student conduct committee, has a right to a prompt, fair, and impartial hearing as provided for in these procedures.
5. On appeal, the college bears the burden of establishing the evidentiary facts underlying the imposition of a disciplinary sanction by a preponderance of the evidence.
6. Imposition of disciplinary action for violation of the student conduct code shall be stayed pending appeal, unless the respondent has been summarily suspended.
7. The student conduct committee shall hear appeals from:
   a. The imposition of disciplinary suspensions in excess of ten instructional days;
   b. Dismissals; and
   c. Discipline cases referred to the committee by the student conduct officer, the conduct review officer, or the president.
8. Student conduct appeals from the imposition of the following disciplinary sanctions shall be reviewed through a brief adjudicative proceeding:
   a. Suspensions of ten instructional days or less;
   b. Disciplinary probation;
   c. Written reprimands; and
   d. Any conditions or terms imposed in conjunction with one of the foregoing disciplinary actions.
9. Except as provided elsewhere in these rules, disciplinary warnings and dismissals of disciplinary actions are final action and not subject to appeal.
WAC 495B-121-090
Brief adjudicative proceedings-Initial hearing.
1. Brief adjudicative proceedings shall be conducted by a conduct review officer designated by the president. The conduct review officer shall not participate in any case in which he or she is a complainant or witness, or in which they have direct or personal interest, prejudice, or bias, or in which they have acted previously in an advisory capacity.
2. Before taking action, the conduct review officer shall conduct an informal hearing and provide each party:
   a. An opportunity to be informed of the agency’s view of the matter; and
   b. An opportunity to explain the party’s view of the matter.
3. The conduct review officer shall serve an initial decision upon both of the parties within ten days of consideration of the appeal. The initial decision shall contain a brief written statement of the reasons for the decision and information about how to seek administrative review of the initial decision. If no request for review is filed within twenty-one days of services of the initial decision, the initial decision shall be deemed the final decision.
4. If the conduct review officer upon review determines that the respondent’s conduct may warrant imposition of a disciplinary suspension of more than ten instructional days or expulsion, the matter shall be referred to the student conduct committee for a disciplinary hearing.

WAC 495B-121-100
Brief adjudicative proceedings-Review of an initial decision.
1. An initial decision is subject to review by the president, provided the respondent files a written request for review with the conduct review officer within twenty-one days of service of the initial decision.
2. The president shall not participate in any case in which he or she is a complainant or witness, or in which they have direct or personal interest, prejudice, or bias, or in which they have acted previously in an advisory capacity.
3. During the review, the president shall give each party an opportunity to file written responses explaining their view of the matter and shall make any inquiries necessary to ascertain whether the sanctions should be modified or whether the proceedings should be referred to the student conduct committee for a formal adjudicative hearing.
4. If the president, upon review, determines that the respondent’s conduct may warrant imposition of a disciplinary suspension of more than ten instructional days or expulsion, the matter shall be referred to the student conduct committee for a disciplinary hearing.

WAC 495B-121-110
Student conduct committee.
1. The student conduct committee shall consist of five members:
   a. Two full-time students appointed by the student government;
   b. Two faculty members appointed by the president;
   c. One administrative staff member (other than an administrator serving as a student conduct or conduct review officer) appointed by the president at the beginning of the academic year.
2. The administrative staff member shall serve as the chair of the committee and may take action on preliminary hearing matters prior to convening the committee. The chair shall receive annual training on protecting victims and promoting accountability in cases involving allegations of sexual misconduct.
3. Hearings may be heard by a quorum of three members of the committee so long as one faculty member and one student are included on the hearing panel. Committee action may be taken upon a majority vote of all committee members attending the hearing.
4. Members of the student conduct committee shall not participate in any case in which they are a party, complainant, or witness, in which they have direct or personal interest, prejudice, or bias, or in which they have acted previously in an advisory capacity. Any party may petition for disqualification of a committee member pursuant to RCW 34.05.425(4)

WAC 495B-121-120
Appeal-Student conduct committee.
1. Proceedings of the student conduct committee shall be governed by the Administrative Procedure Act, chapter 34.05 RCW, and by the Model Rules of Procedure, chapter 10-08 WAC. To the extent there is a conflict between these rules and chapter 10-08 WAC, these rules shall control.
2. The student conduct committee chair shall serve all parties with written notice of the hearing not less than seven days in advance of the hearing date, as further specified in RCW 34.05.434 and WAC 10-08-040 and 10-08-045. The chair may shorten this notice period if both parties agree, and also may continue the hearing to a later time for good cause shown.
3. The committee chair is authorized to conduct prehearing conferences and/or to make prehearing decisions concerning the extent and form of any discovery, issuance of protective decisions, and similar procedural matters.
4. Upon request, filed at least five days before the hearing by any party or at the direction of the committee chair, the parties shall exchange, no later than the third day prior to the hearing, lists of potential witnesses and copies of potential exhibits that they reasonably expect to present to the committee. Failure to participate in good faith in such a requested exchange may be cause for exclusion from the hearing of any witness or exhibit not disclosed, absent a showing of good cause for such failure.
5. The committee chair may provide to the committee members in advance of the hearing copies of:
   a. The conduct officer’s notification of imposition of discipline (or referral to the committee); and
   b. The notice of appeal (or any response to referral) by the
respondent. If doing so, however, the chair should remind
the members that these “pleadings” are not evidence of
any facts they may allege.

6. The parties may agree before the hearing to designate specific
exhibits as admissible without objection and, if they do so,
whether the committee chair may provide copies of these
admissible exhibits to the committee members before the
hearing.

7. The student conduct officer, upon request, shall provide
reasonable assistance to the respondent in obtaining relevant
and admissible evidence that is within the college’s control.

8. Communications between committee members and other
hearing participants regarding any issue in the proceeding,
other than procedural communications that are necessary to
maintain an orderly process, are generally prohibited without
notice and opportunity for all parties to participate, and any
improper ex parte communication shall be placed on the
record, as further provided in RCW 34.05.455.

9. Each party may be accompanied at the hearing by a
nonattorney assistant of his/her choice. A respondent may
elect to be represented by an attorney at his or her own cost,
but will be deemed to have waived that right unless, at least
four business days before the hearing, written notice of the
attorney’s identity and participation is filed with the committee
chair with a copy to the student conduct officer. The committee
will ordinarily be advised by an assistant attorney general. If the
respondent is represented by an attorney, the student conduct
officer may also be represented by a second, appropriately
screened assistant attorney general.

WAC 495B-121-125
Student conduct appeals committee hearings-Presentations of
evidence.

1. Upon the failure of any party to attend or participate in a
hearing, the student conduct committee may either:
   a. Proceed with the hearing and issuance of its decision; or
   b. Serve a decision of default in accordance with RCW
      34.05.440.

2. The hearing will ordinarily be closed to the public. However, if all
   parties agree on the record that some or all of the proceedings
   be open, the chair shall determine any extent to which the
   hearing will be open. If any person disrupts the proceedings,
   the chair may exclude that person from the hearing room.

3. The chair shall cause the hearing to be recorded by a method
   that he/she selects, in accordance with RCW 34.05.449. That
   recording, or a copy, shall be made available to any party upon
   request. The chair shall assure maintenance of the record of the
   proceeding that is required by RCW 34.05.476, which shall also
   be available upon request for inspection and copying by any
   party. Other recording shall also be permitted, in accordance
   with WAC 10-08-190.

4. The chair shall preside at the hearing and decide procedural
   questions that arise during the hearing, except as overridden
   by majority vote of the committee.

5. The student conduct officer (unless represented by an
   assistant attorney general) shall present the case for imposing
disciplinary sanctions.

6. All testimony shall be given under oath or affirmation. Evidence
   shall be admitted or excluded in accordance with RCW
   34.05.452.

WAC 495B-121-130
Student conduct committee-Initial decision.

1. At the conclusion of the hearing, the student conduct
   committee shall permit the parties to make closing arguments
   in whatever form it wishes to receive them. The committee also
   may permit each party to propose findings, conclusions, and/or
   a proposed decision for its consideration.

2. Within twenty days following the latter of the conclusion of
   the hearing or the committee’s receipt of closing arguments,
   the committee shall issue an initial decision in accordance with
   RCW 34.05.461 and WAC 10-08-210. The initial decision shall
   include findings on all material issues of fact and conclusions
   on all material issues of law, including which, if any, provisions
   of the student conduct code were violated. Any findings based
   substantially on the credibility of evidence or the demeanor of
   witnesses shall so be identified.

3. The committee’s initial order shall also include a determination
   on appropriate discipline, if any. If the matter was referred to
   the committee by the student conduct officer, the committee
   shall identify and impose disciplinary sanction(s) or conditions,
   if any, as authorized in the student code. If the matter is an
   appeal by the respondent, the committee may affirm, reverse,
   or modify the disciplinary sanction and/or conditions imposed
   by the student conduct officer and/or impose additional
disciplinary sanction(s) or conditions as authorized herein.

4. The committee chair shall cause copies of the initial decision
to be served on the parties and their legal counsel of record.
The committee chair shall also promptly transmit a copy of
the decision and the record of the committee’s proceedings to the
president.

WAC 495B-121-135
Appeal from student conduct committee initial decision.

1. A respondent who is aggrieved by the findings or conclusions
   issued by the student conduct committee may appeal the
   committee’s initial decision to the president by filing a notice
   of appeal with the president’s office within twenty-one days of
   service of the committee’s initial decision. Failure to file a timely
   appeal constitutes a waiver of the right and the initial decision
   shall be deemed final.

2. The notice of appeal must identify the specific findings of
   fact and/or conclusions of law in the initial decision that are
   challenged and must contain an argument as to why the appeal
   should be granted. The president’s review shall be restricted
   to the hearing record made before the student conduct
   committee and will normally be limited to a review of those
   issues and arguments raised in the notice of appeal.

3. The president shall provide a written decision to all parties
   within forty-five days after receipt of the notice of appeal. The
   president’s decision shall be final and shall include a notice of
   any rights to request reconsideration and/or judicial review.

4. The president may, at his or her discretion, suspend any
disciplinary action and/or impose interim sanctions pending
review of the merits of the findings, conclusions, and disciplinary
actions imposed.
5. The president shall not engage in any ex parte communication with any of the parties regarding an appeal.

WAC 495B-121-140
Summary suspension.

1. Summary suspension is a temporary exclusion from specified college premises or denial of access to all activities or privileges for which a respondent might otherwise be eligible, while an investigation and/or formal disciplinary procedures are pending.

2. The student conduct officer may impose a summary suspension if there is probable cause to believe that the respondent:
   a. Has violated any provision of the code of conduct; and
   b. Presents an immediate danger to the health, safety or welfare of members of the college community; or
   c. Poses an ongoing threat of disruption of, or interference with, the operations of the college.

3. Notice. Any respondent who has been summarily suspended shall be served with oral or written notice of the summary suspension. If oral notice is given, a written notification shall be served on the respondent within two business days of the oral notice.

4. The written notification shall be entitled notice of summary suspension and shall include:
   a. The reasons for imposing the summary suspension, including a description of the conduct giving rise to the summary suspension and reference to the provisions of the student conduct code or the law allegedly violated;
   b. The date, time, and location when the respondent must appear before the conduct review officer for a hearing on the summary suspension; and
   c. The conditions, if any under which the respondent may physically access the campus or communicate with members of the campus community. If the respondent has been trespassed from the campus, a notice against trespass shall be included that warns the student that his or her privilege to enter into or remain on college premises has been withdrawn, that the respondent shall be considered trespassing and subject to arrest for criminal trespass if the respondent enters the college campus other than to meet with the student conduct officer or conduct review officer, or to attend a disciplinary hearing.

5. The conduct review officer shall conduct a hearing on the summary suspension as soon as practicable after imposition of the summary suspension.
   a. The hearing will be conducted as a brief adjudicative proceeding.
   b. During the summary suspension hearing, the issue before the conduct review officer is whether there is probable cause to believe that the summary suspension should be continued pending the conclusion of disciplinary proceedings and/or whether the summary suspension should be less restrictive in scope.
   c. The respondent shall be afforded an opportunity to explain why summary suspension should not be continued while disciplinary proceedings are pending or why the summary suspension should be less restrictive in scope.
   d. If the student fails to appear at the designated hearing time, the conduct review officer may order that the summary suspension remain in place pending the conclusion of the disciplinary proceedings.
   e. As soon as practicable following the hearing, the conduct review officer shall issue a written decision which shall include a brief explanation for any decision continuing and/or modifying the summary suspension and notice of any right to appeal.
   f. To the extent permissible under applicable law, the conduct review officer shall provide a copy of the decision to all persons or offices who may be bound or protected by it.

DISCIPLINE PROCEDURES FOR CASES INVOLVING ALLEGATIONS OF SEXUAL MISCONDUCT
WAC 495B-121-150
Supplemental sexual misconduct-Procedures. Both the respondent and the complainant in cases involving allegations of sexual misconduct shall be provided the same procedural rights to participate in student discipline matters, including the right to participate in the initial disciplinary decision-making process and to appeal any disciplinary decision. Application of the following procedures is limited to student conduct code proceedings involving allegations of sexual misconduct by a student. In such cases, these procedures shall supplement the student disciplinary procedures in WAC 495B-121-050 through 495B-121-140. In the event of conflict between the sexual misconduct procedures and the student disciplinary procedures, the sexual misconduct procedures shall prevail.

WAC 495B-121-160
Supplemental sexual misconduct-Definitions. The following supplemental definitions shall apply for purposes of student conduct code proceedings involving allegations of sexual misconduct by a student:
1. A “complainant” is an alleged victim of sexual misconduct, as defined in subsection (2) of this section.
2. “Sexual misconduct” is prohibited sexual or gender-based conduct by a student including, but not limited to:
   a. Sexual activity for which clear and voluntary consent has not been given in advance;
   b. Sexual activity with someone who is incapable of giving valid consent because, for example, he or she is underage, sleeping or otherwise incapacitated due to alcohol or drugs;
   c. Sexual harassment;
   d. Sexual violence which includes, but is not limited to, sexual assault, domestic violence, dating/intimate violence, and sexual or gender-based stalking;
e. Nonphysical conduct such as sexual or gender-based digital media stalking, sexual or gender-based online harassment, sexual or gender-based cyberbullying, nonconsensual recording of sexual activity, and nonconsensual distribution of a recording of a sexual activity.

WAC 495B-121-170
Supplemental complaint process. The following supplemental procedures shall apply with respect to complaints or other reports of alleged sexual misconduct by a student.

1. The college’s Title IX compliance officer, coordinator, or designee shall investigate complaints or other reports of alleged sexual misconduct by a student. Investigations will be completed in a timely manner and the results of the investigation shall be referred to the student conduct officer for disciplinary action.

2. Informal dispute resolution shall not be used to resolve sexual misconduct complaints without written permission from both the complainant and the respondent. If the parties elect to mediate a dispute, either party shall be free to discontinue mediation at any time. In no event shall mediation be used to resolve complaints involving allegations of sexual violence.

3. College personnel will honor requests to keep sexual misconduct complaints confidential to the extent this can be done without unreasonably risking the health, safety and welfare of the complainant or other members of the college community or compromising the college’s duty to investigate and process sexual harassment and sexual violence complaints.

4. The student conduct officer, prior to initiating disciplinary action, will make a reasonable effort to contact the complainant to discuss the results of the investigation and possible disciplinary sanctions and/or conditions, if any, that may be imposed upon the respondent if the allegations of sexual misconduct are found to have merit.

5. The student conduct officer, on the same date that a disciplinary decision is served on the respondent, will serve a written notice informing the complainant whether the allegations of sexual misconduct were found to have merit and describing any disciplinary sanctions and/or conditions imposed upon the respondent for the complainant’s protection, including disciplinary suspension or dismissal of the respondent. The notice will also inform the complainant of his or her appeal rights. If protective sanctions and/or conditions are imposed, the student conduct officer shall make a reasonable effort to contact the complainant to ensure that prompt notice of the protective disciplinary sanctions and/or conditions is received.

WAC 495B-121-180
Supplemental appeal rights.

1. The following actions by the student conduct officer may be appealed by the complainant:
   a. The dismissal of a sexual misconduct complaint; or
   b. Any disciplinary sanction(s) and conditions imposed against a respondent for a sexual misconduct violation, including a disciplinary warning.

2. A complainant may appeal a disciplinary decision by filing a notice of appeal with the conduct review officer within twenty-one days of service of the notice of the discipline decision provided for in WAC 495B-121-170. The notice of appeal may include a written statement setting forth the grounds of appeal. Failure to file a timely notice of appeal constitutes a waiver of this right and the disciplinary decision shall be deemed final.

3. If the respondent appeals a decision imposing discipline for a sexual misconduct violation in a timely manner, the college shall notify the complainant of the appeal and provide the complainant an opportunity to intervene as a party to the appeal.

4. Except as otherwise specified in this supplemental procedure, a complainant who timely appeals a disciplinary decision or who intervenes as a party to respondent’s appeal of a disciplinary decision shall be afforded the same procedural rights as are afforded the respondent.

5. An appeal by a complainant from the following disciplinary actions involving allegations of sexual misconduct against a student shall be handled as a brief adjudicative proceeding:
   a. Exoneration and dismissal of the proceedings;
   b. A disciplinary warning;
   c. A written reprimand;
   d. Disciplinary probation;
   e. Suspensions of ten instructional days or less; and/or
   f. Any conditions or terms imposed in conjunction with one of the foregoing disciplinary actions.

6. An appeal by a complainant from disciplinary action imposing a suspension in excess of ten instructional days or an expulsion shall be reviewed by the student conduct committee.

7. In proceedings before the student conduct committee, respondent and complainant shall have the right to be accompanied by a nonattorney assistant of their choosing during the appeal process. The complainant may choose to be represented at the hearing by an attorney at his or her own expense, but will be deemed to have waived that right unless, at least four business days before the hearing, he or she files a written notice of the attorney’s identity and participation with the committee chair, and with copies to the respondent and the student conduct officer.

8. In proceedings before the student conduct committee, complainant and respondent shall not directly question or cross examine one another. All questions shall be directed to the committee chair, who will act as an intermediary and pose questions on the parties’ behalf.
9. Student conduct hearings involving sexual misconduct allegations shall be closed to the public, unless respondent and complainant both waive this requirement in writing and request that the hearing be open to the public. Complainant, respondent and their respective nonattorney assistants and/or attorneys may attend portions of the hearing where argument, testimony and/or evidence are presented to the student conduct committee.

10. The chair of the student conduct committee, on the same date as the initial decision is served on the respondent, will serve a written notice upon the complainant informing the complainant whether the allegations of sexual misconduct were found to have merit and describing any disciplinary sanctions and/or conditions imposed upon the respondent for the complainant’s protection, including suspension or dismissal of the respondent. The notice will also inform the complaint of his or her appeal rights.

11. The complainant may appeal the student conduct committee’s initial decision to the president subject to the same procedures and deadlines applicable to other parties.

12. The president, on the same date that the final decision is served upon the respondent, shall serve a written notice informing the complainant whether the sexual misconduct allegation was found to have merit and describe any disciplinary sanctions and/or conditions imposed upon the respondent for the complainant’s protection, including suspension or dismissal of the respondent. Judicial review of the decision may be available to the complainant or respondent.

e. Summary suspensions; and

f. Appeals by a complainant in student disciplinary proceedings involving allegations of sexual misconduct in which the student conduct officer:
   i. Dismisses disciplinary proceedings based upon a finding that the allegations of sexual misconduct have no merit; or
   ii. Issues a verbal warning to respondent.

9. Appeals of decisions regarding mandatory tuition and fee waivers.

Brief adjudicative proceedings are informal hearings and shall be conducted in a manner which will bring about a prompt fair resolution of the matter.

WAC 495B-121-200

Brief adjudicative proceedings-Agency record. The agency record for brief adjudicative proceedings shall consist of any documents regarding the matter that were considered or prepared by the presiding officer for the brief adjudicative proceeding or by the reviewing officer for any review. These records shall be maintained as the official record of the proceedings.

WAC 495B-121-190

Brief adjudicative proceedings authorized. This chapter is adopted in accordance with RCW 34.05.482 through 34.05.494. Brief adjudicative proceedings shall be used, unless provided otherwise by another rule or determined otherwise in a particular case by the president, or a designee, in regard to:

1. Parking violations;
2. Outstanding debts owed by students or employees;
3. Use of college facilities;
4. Residency determinations;
5. Use of library - Fines;
6. Challenges to contents of education records;
7. Loss of eligibility for participation in institution-sponsored athletic events;
8. Student conduct appeals involving the following disciplinary actions:
   a. Suspensions of ten instructional days or less;
   b. Disciplinary probation;
   c. Written reprimands;
   d. Any conditions or terms imposed in conjunction with one of the foregoing disciplinary actions;

Get started at BTC today!
Find more information: www.btc.edu/admissions
Print a checklist: www.btc.edu/admissionsteps

Apply to BTC & Apply for Financial Aid
Apply at www.btc.edu/applyonline and get your Student Identification Number (SID).
Complete the Free Application for Federal Student Aid (FAFSA) online at www.btc.edu/financialaid
Use BTC college code 016227.

Assess Your Starting Point
Degree- and certificate-seeking students need to determine their math and English starting points.
Some programs require certain placement scores before starting program classes. BTC uses multiple measures to determine placement, including assessment testing.
Visit: www.btc.edu/assessment

Advising & Registration
Students will meet with Advising and Career Services staff for a mandatory GET Started appointment:
navigate Goals, create an Education Plan, become Tech Ready, and register for classes. Contact the Admissions & Student Resource Center to schedule your appointment: 360.752.8345.

Prepare to Attend
Participate in New Student Orientation to learn about campus resources and what to expect before your first quarter.
