Which Degree Audit catalog version should I use?

Academic requirement for degree and certificates, "You may elect to graduate under the provisions of the catalog in force either at the time of entry or at the time of completion, providing four years have not lapsed and the student has remained continuously enrolled in the program. Students who have not been continuously enrolled will be subject to any updated completion requirements."

Have you been continuously enrolled in your program?

1. If yes, most students would use the current catalog version of degree audit. If applicable, you may choose to use the catalog version you started your program.
2. If no, you will need to meet any new updated completion requirements.
3. Not, sure? Check your transcript to verify your program start and end dates to confirm which catalog versions apply for your program.
4. Some catalog changes may require crosswalks from the older catalog version to the new catalog. Contact the program Instructor or Dean for crosswalk information.

Verify your program completion requirements with your Advisor.
